

# GC1 42115 Lamborghini

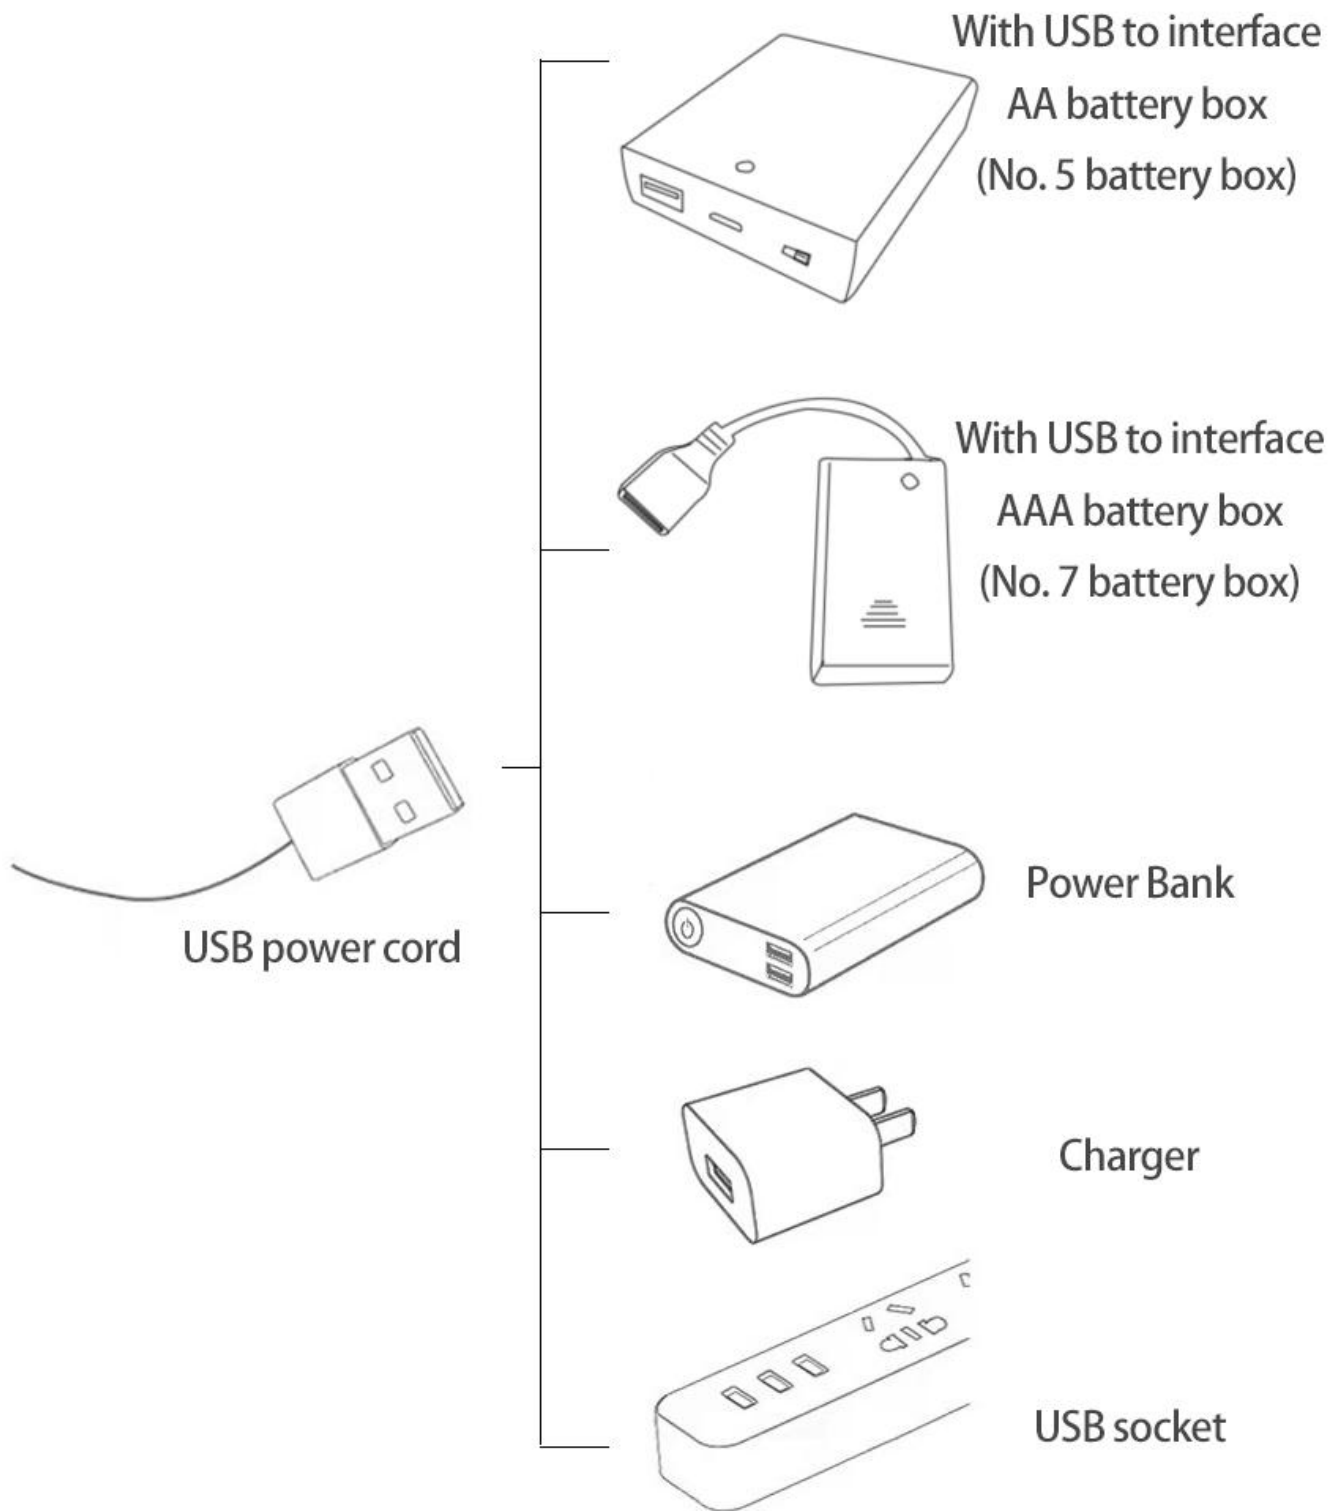

**Instructions for installing this kit:**

**Power supply mode: USB power cord (please bring your own power supply).**

**It can be energized through a USB battery box (please pay attention to the positive and negative poles of the battery), power bank, mobile phone charger or USB socket. The normal voltage is 3-5V.**

# USB connectors to connect devices

There are 5 bags in total, and the AAA USB battery box is a gift (without battery)

Open the bag, take out the power supply, and test the lighting parts. If there are products with multiple bags, it is recommended that you test them one by one, and put the tested lights back into the original bags.

**Note:**

Please be careful when installing. The lamp wire is relatively slender and cannot be pressed on the raised position of the building block. It should pass along the gap, otherwise the lamp wire will be pinched.

If there is a 2P interface in the package, please pay attention to the way the interface is used. The interface is small, please use it carefully: the = sign of the 2P interface is aligned with the = sign of the expansion board

## Start Installation:

The above are ideas and instructions provided by our designers. Please move on:

1: Do you have any suggestions about the material and quality of our products?

2: Do you have any suggestions on the installation instructions and the degree of difficulty of the installation?

3: If you have better installation method and ideas, please contact us in time.
