

10220 Volkswagen T1 Camper Van LED lighting Kit (Standard Replacement) GC167/LG167

Installing Instructions:

Please follow below two parts to finish the installation of the lighting

Step 1 : Test

Step 2 : Installation

Let us start.

Step 1 : Test

This item have totally 2 packs included (one is a freebie battery box, not included battery).

Totally 2 packs lighting kit set included, please confirm you have received the right quantity (The parts used in here all sample product, which may be slightly different from the bulk products).

Take out the USB power cord and a 4-seat expansion board, and then tear off the seal of the expansion board. Coming with usb cable and battery box for choose, can be powered by power bank/wall charger or you can also use it with the battery.

Available power supply devices for USB power cord.

USB connectors to connect devices

Please pay more attention and carefully using the connector for it is small. The “=” of the 2P interface is aligned with the “=” of the expansion board. The “=” on the expansion board refers to the two outside solder joints, not the two metal pins inside the jack.

Connect the USB power cord and expansion board together.

Connect the other side of the USB power cord to the mobile power supply (power prepare by yourself).

Take out pack No.1 lighting kit.

Connect the lighting to the expansion board then turn on the power switch. Testing whether the lighting is normal, if there is any problem, please contact us timely.

Unplug the lighting from the expansion board after finish testing and put it in back to the bag.

Put the okay lamp pellets back in the original packaging bag. To avoid the lighting kit can not work normally.

Attention:

Please be careful when installing since the lamp thread is slender. Cannot be pressed against the raised position of the building block. It should pass along the gap, otherwise the lamp wire will be pinched.

Step 2

start installation:

Put the yellow lighting parts through the small holes in the picture, and then place the lighting lines in the gaps between the building blocks.

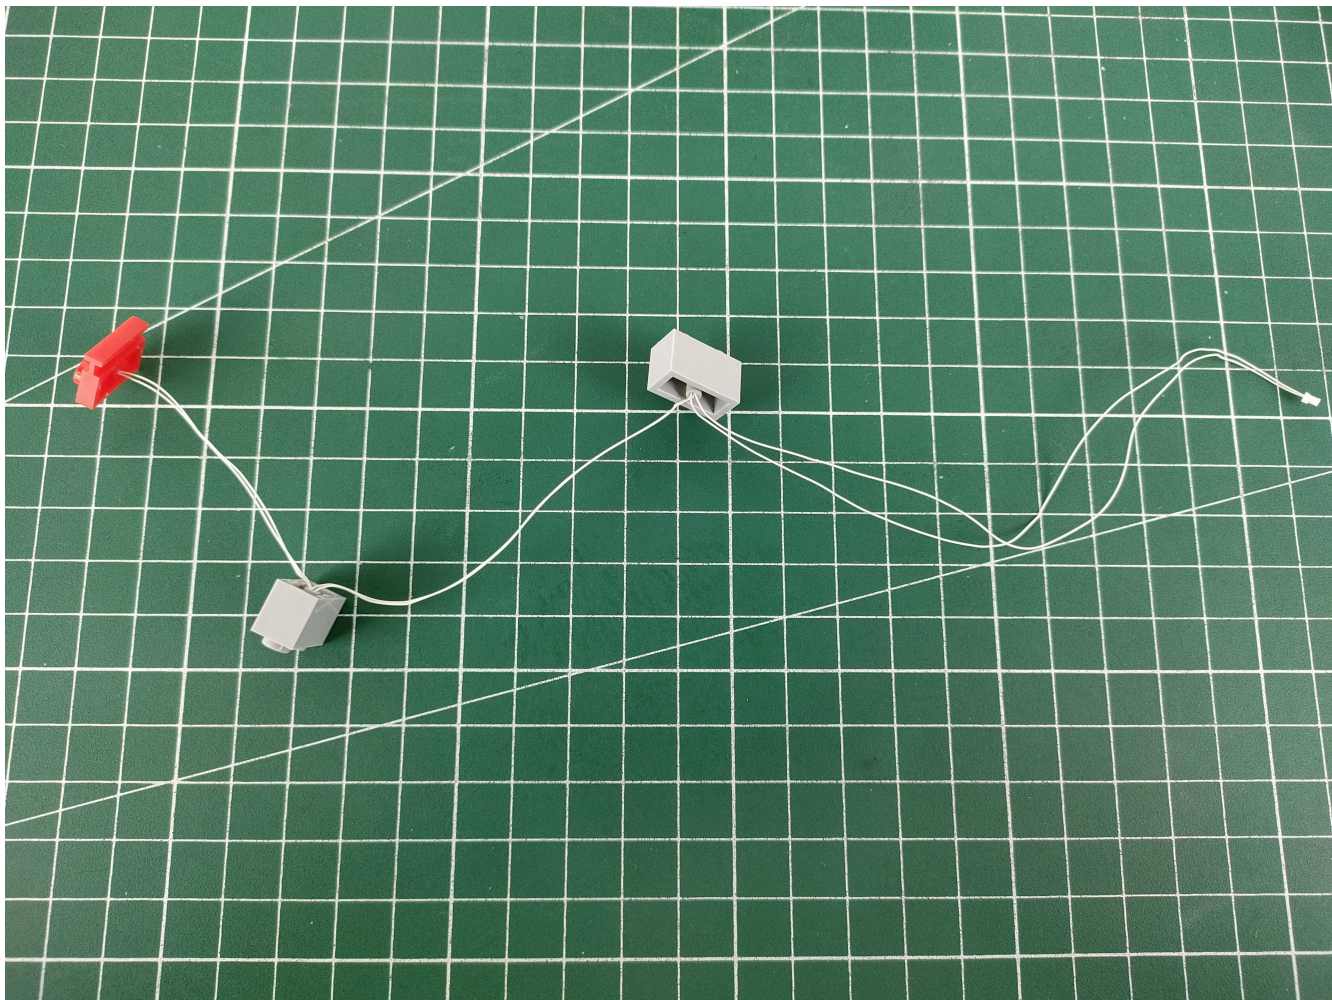

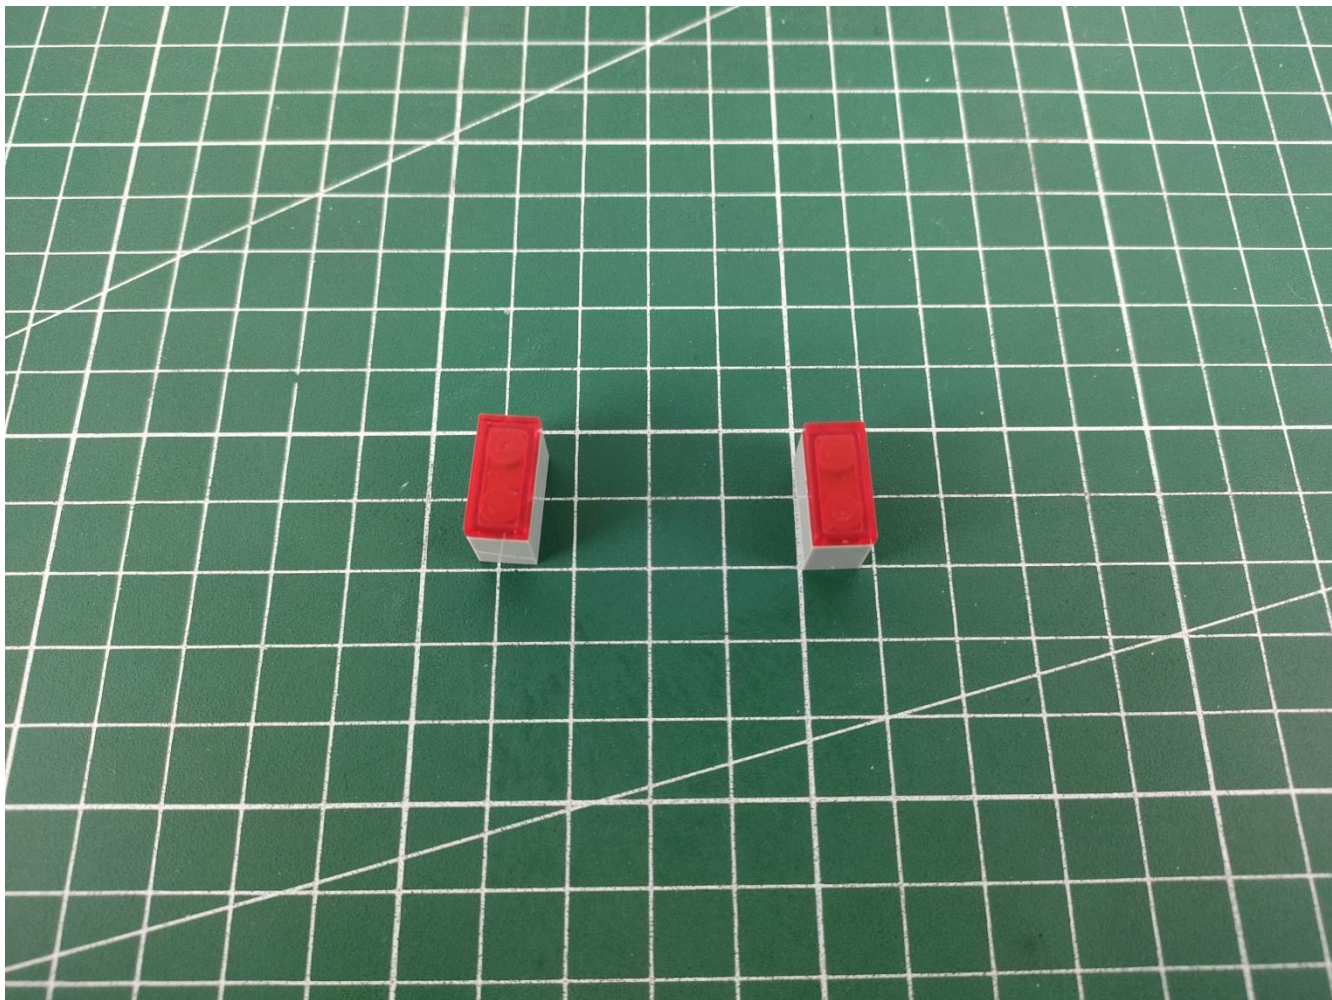

Complete install and plug in the power to try it.
