Step 1 : Test

Available power supply devices for USB power cord.

USB connectors to connect devices

This item have totally 7 packs included (one is a freebie battery box, not included battery).

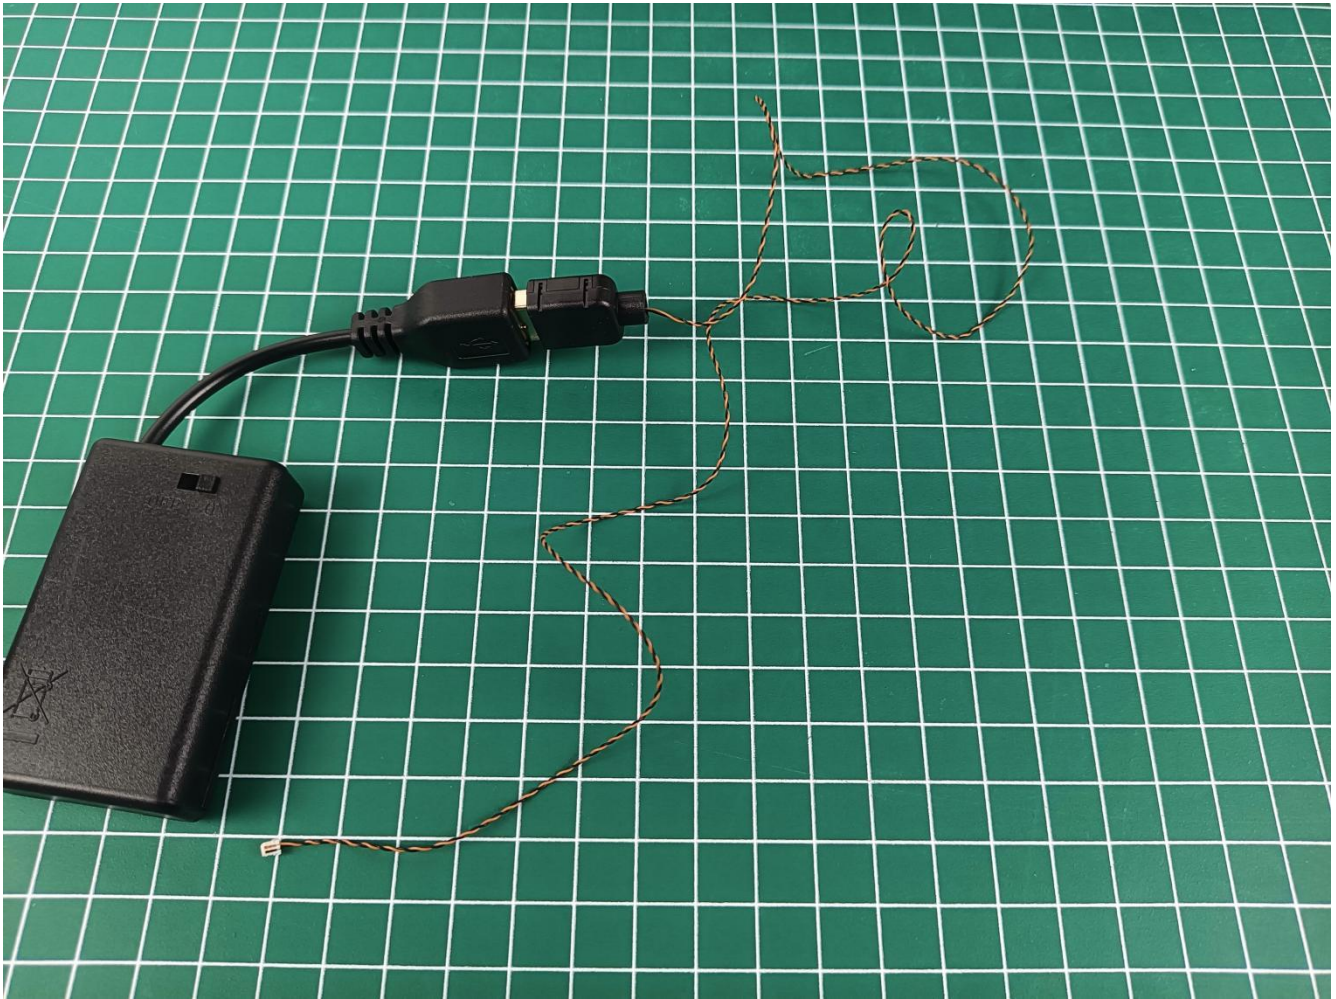

Take out the accessories in the No. 6 bag (the parts used in this article are all samples, which are slightly different from the finished product, please forgive me).

Install the battery, pay attention to the positive and negative poles.

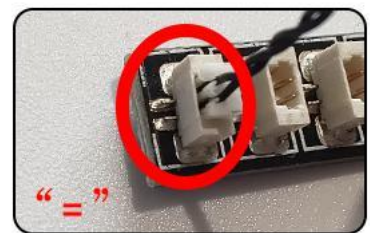

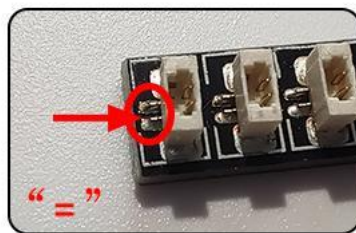

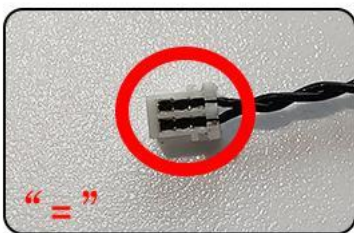

Connect the USB power cord to the battery box.

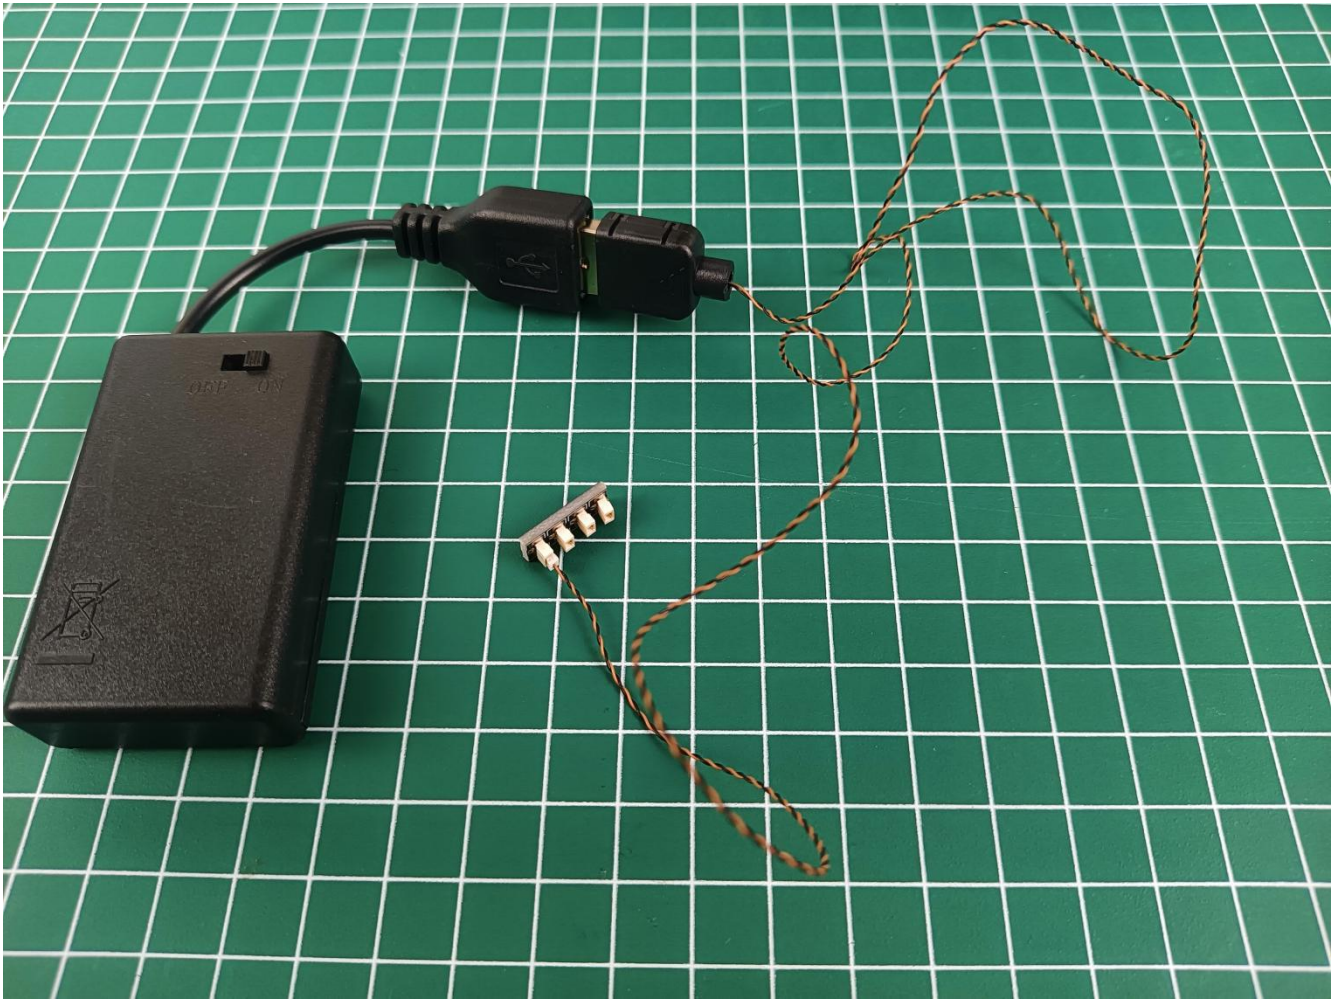

Take out the 4 expansion boards from the No. 5 bag.

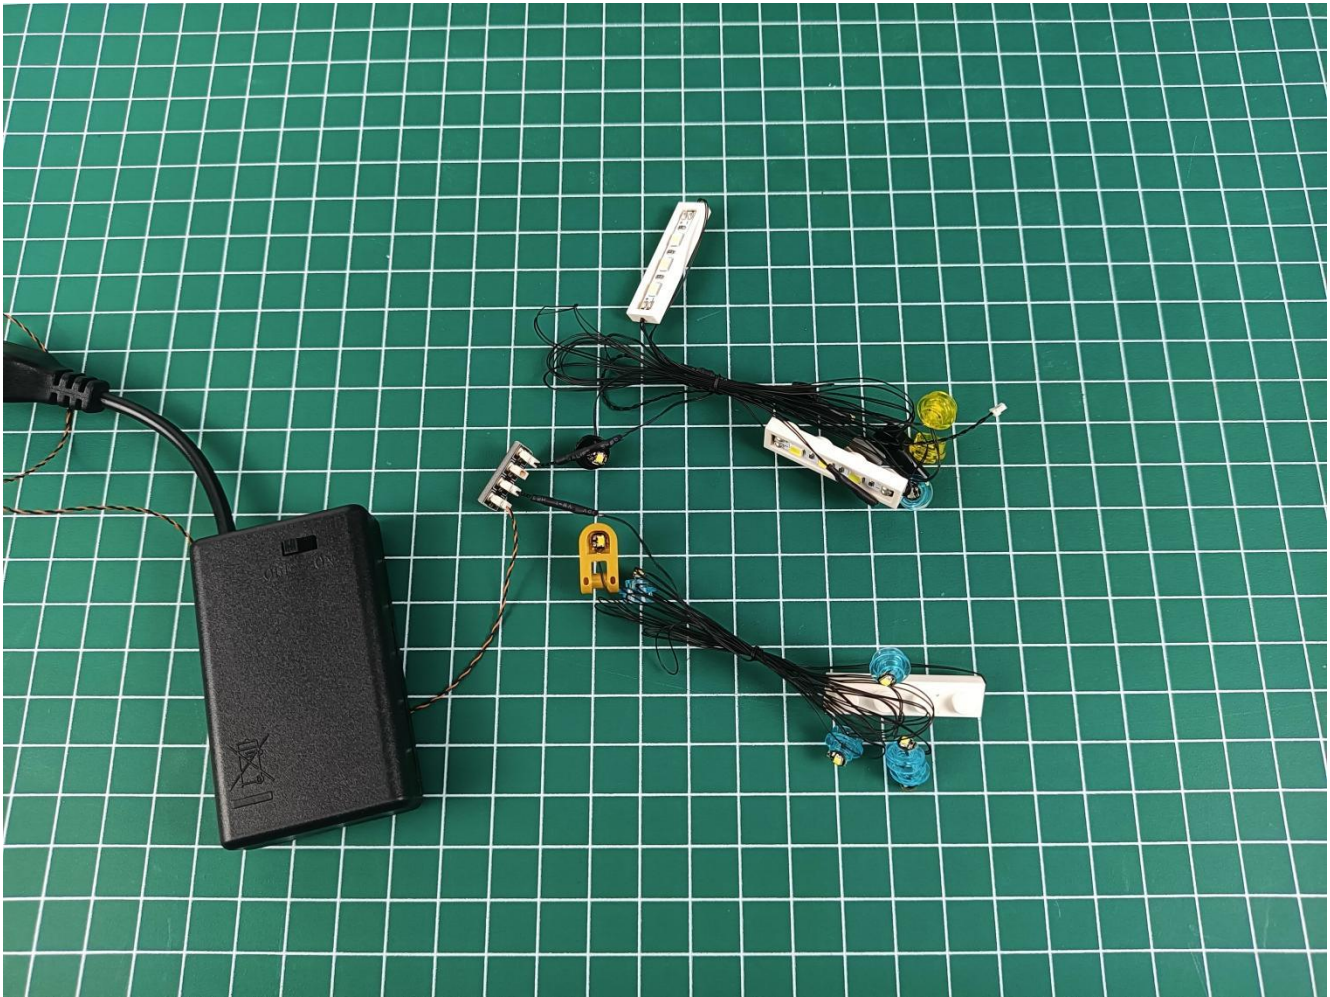

Please pay more attention and carefully using the connector for it is small. The “=” of the 2P interface is aligned with the “=” of the expansion board. The “=” on the expansion board refers to the two outside solder joints, not the two metal pins inside the jack.

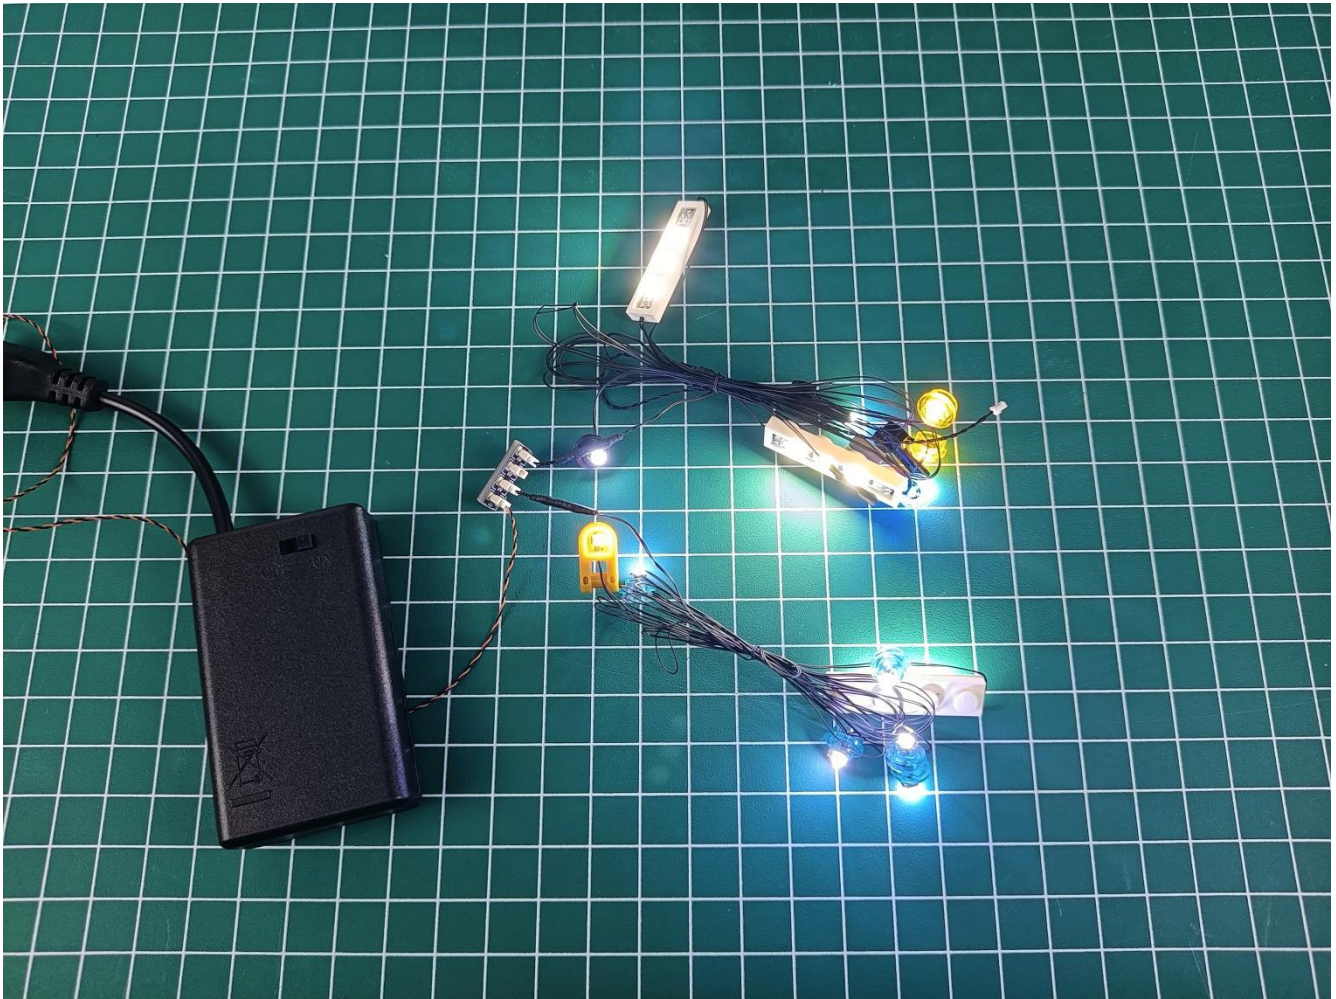

Tear off the seal on the expansion board and connect it to the port of the USB power cord.

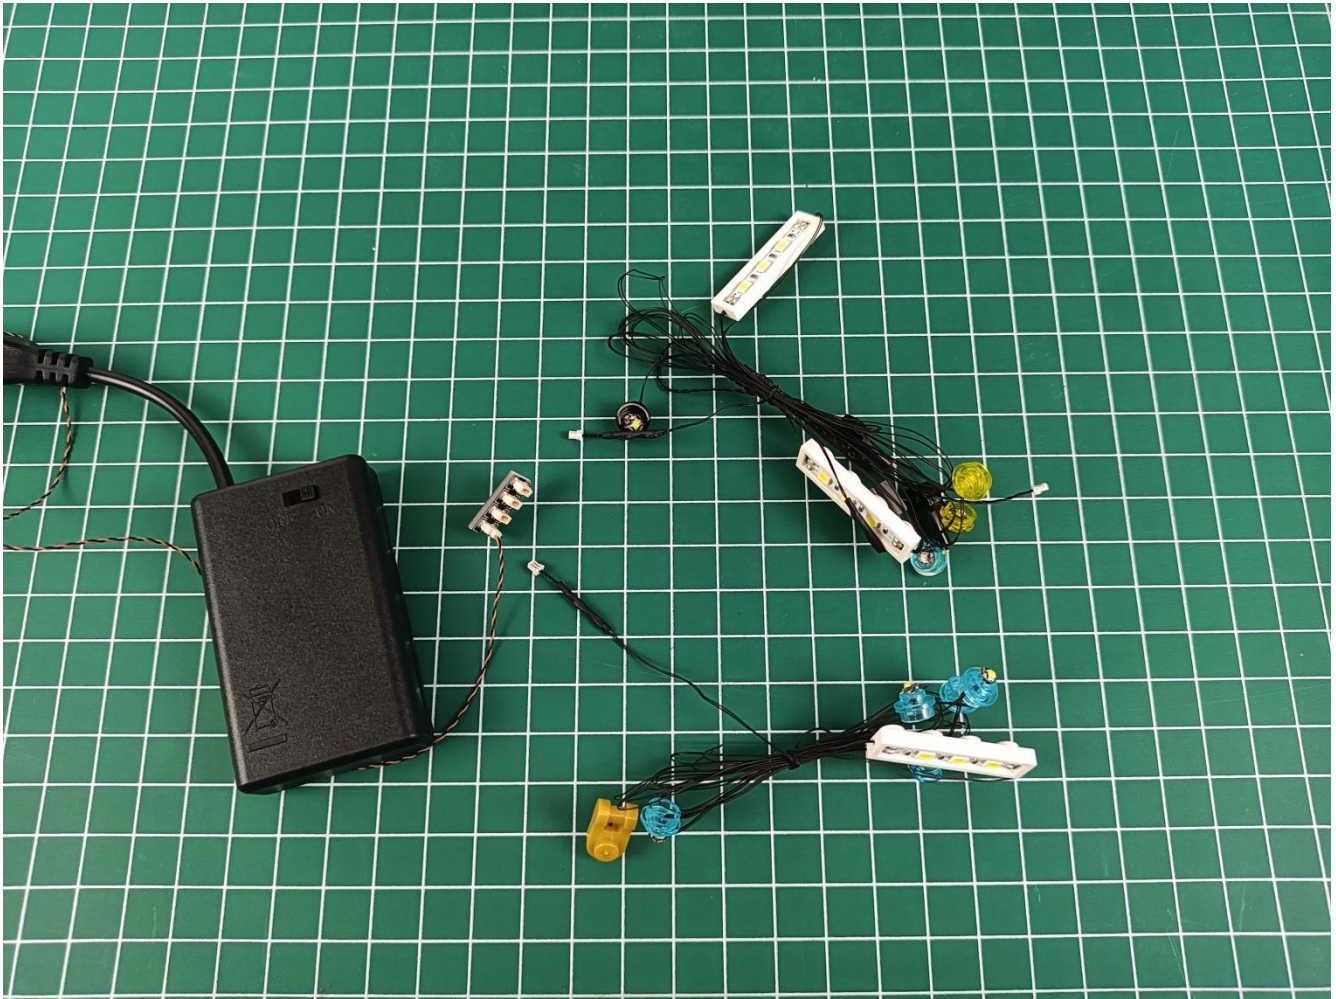

Take out pack No.1 lighting kit.

Turn on the power and test the lighting. If there is any abnormality, please contact us in time.

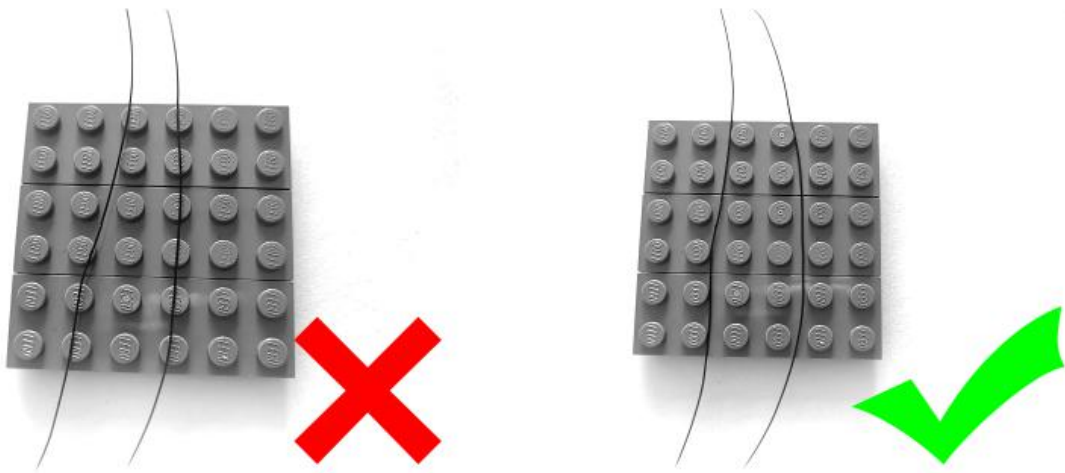

If there is no abnormality, unplug the lights and leave the expansion board on the USB power cord, Put the lighting back into the original bag, and test the lighting of other bags in the same way.

Attention:

Please be careful when installing since the lamp thread is slender. Cannot be pressed against the raised position of the building block. It should pass along the gap, otherwise the lamp wire will be pinched.
