43245 The Magical Madrigal House

 Installation requires a lot of patience and great observation that your LEGO bricks will come alive when you get this finished. The bricks with lighting as below, so make sure you're ready and let's get started.

Strategies for the Installation

This instruction divides three sections to complete the installation of the lighting set.

Section A: Check the type and quantity of components.

The quantity and type of components of each products are different and it needs to be carefully checked to make sure there do have enough material. The type of components is indicated by the label on the bag.

Section B: Test that each components is working properly.

Each components is Manual customization so it is necessary to test that each components is working properly to avoid the situation that the lighting does not work .

Section C: laying out components following the instruction.

Our material is very small but not fragile, just be reminded that don't to pull the wires too hard. For different people, there may be some installation steps that you can't understand. Please look at the previous and later installation steps.

Section A: Check the type and quantity of components.

This set contains five bags labelled "1" "2" "3" "4" "5" , please make sure that the components in each bag are the same as shown in the pictures.

Please contact us immediately if there have any missing components.

Section B: Test that each components is working properly.

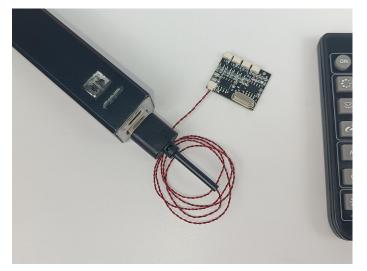

Take out the USB Power Cord and the remote control and the remote control module from N0.4 bag and N0.5 bag.

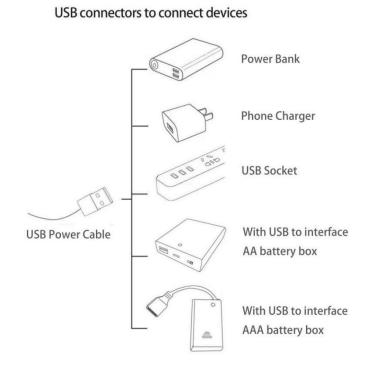

Connect the USB power cable to the remote control module.

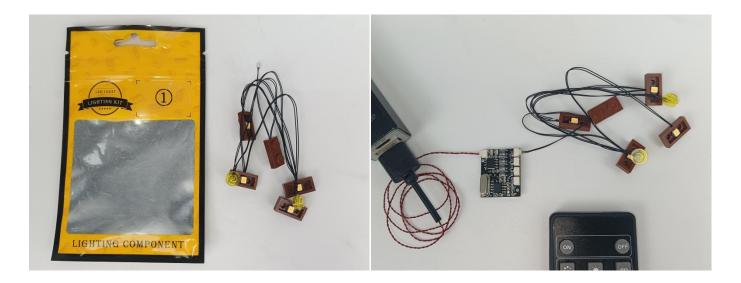

Connect the other end of the USB power cable to the power supply.

The USB Power Cord can be powered by phone chargers, power banks, etc. This instruction will use the power bank as power supply.

Connect all the components in No.1 bag to the remote control module in same way just as shown.Turn on the power bank, all the lights are on as shown.Remove the lamp after the test.

Unplug this component and return it to the appropriate bag.Please test other components in the same way.

Attention that after the test is completed, each components should put back in the corresponding bag including the socket and the usb power cable.

Please contact us immediately if any components don't work.

Remote control test:

Take out the remote control.

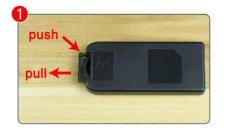

Remote control function introduce

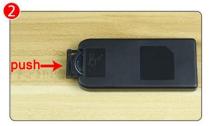

ON: All lights turn on sequentially. OFF: All lights are off.			
	Function 1: A, B, C, D are turned on slowly in sequence.		
•	Function 2: Breathing light mode.		
خائع	, , , , , , , , , , , , , , , , , , , ,	A: Turn A on/off.

0	Funktion 7: A, B, C, D fließendes Wasser Lichtettekt.		
10(:		☆ : Brightness-: Decreases the brightness	

The remote control does not contain batteries, please buy a CR2025 or CR2032 button battery in the nearest store and install it in the remote control.

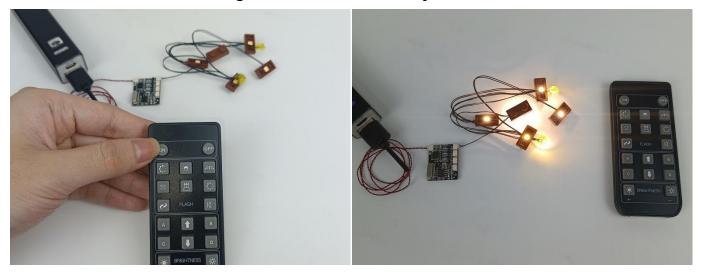

Please purchase CR2025 model batteries in advance at the store.

Press the on button and the light will come on normally.

After the test, please put the normal parts back into the package, and other parts are tested in the same way.

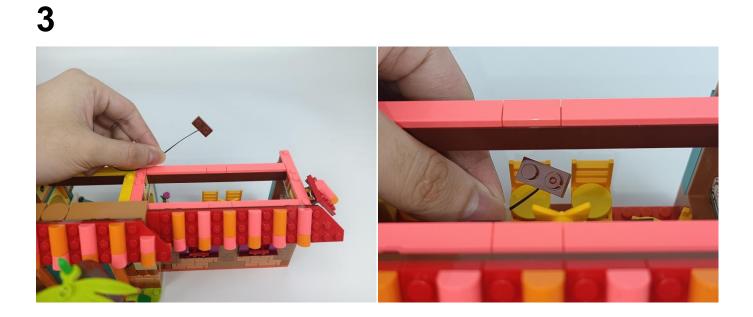

If there is any problem with the spare parts,

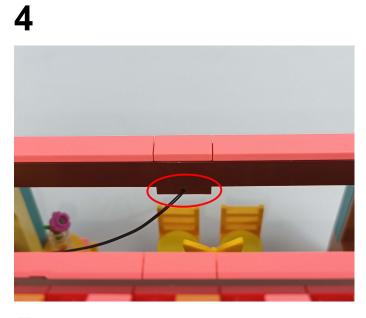

please contact our after-sales service for replacement!

Section C: laying out components following the instruction.

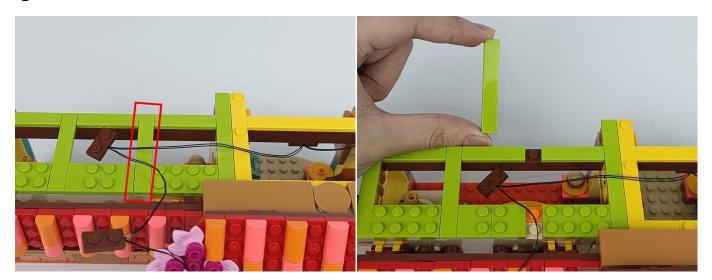

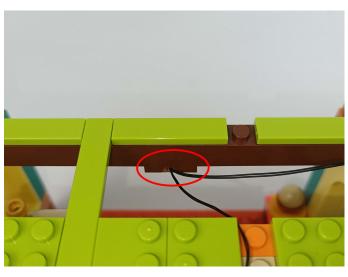

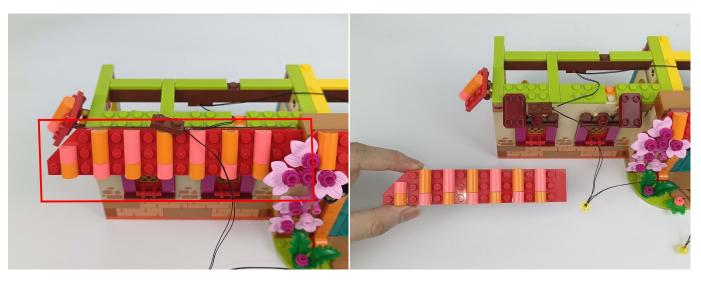

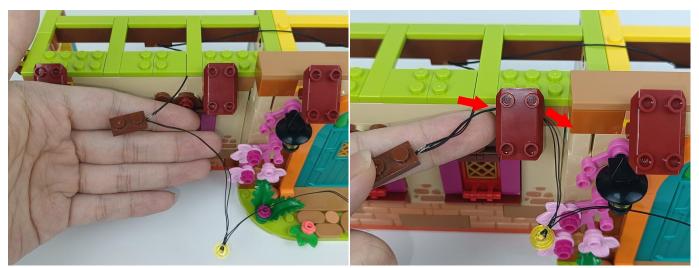

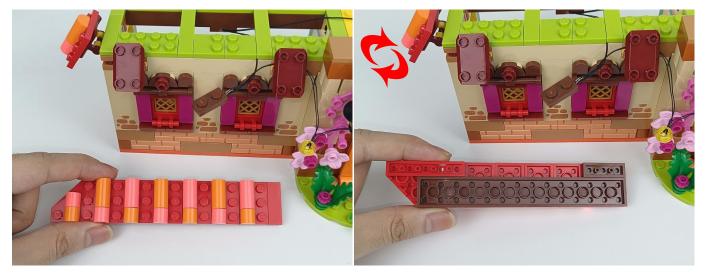

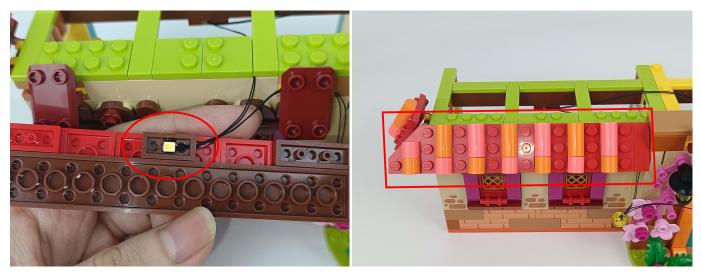

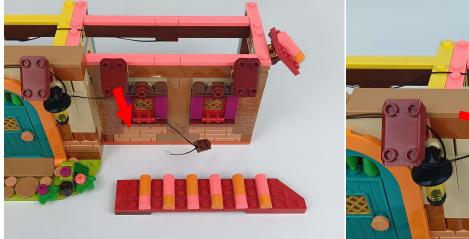

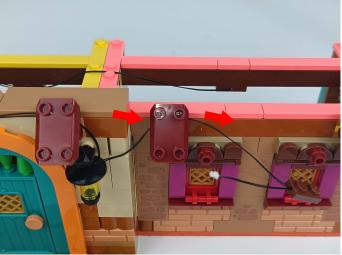

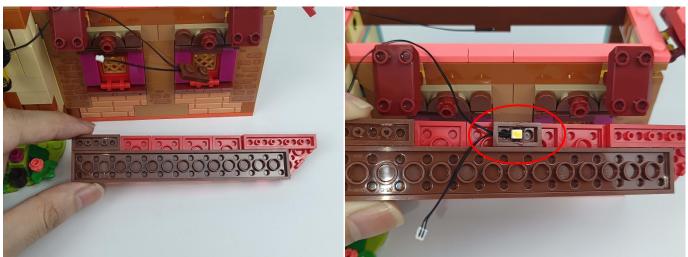

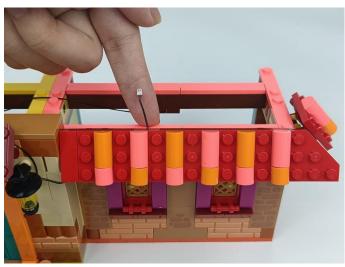

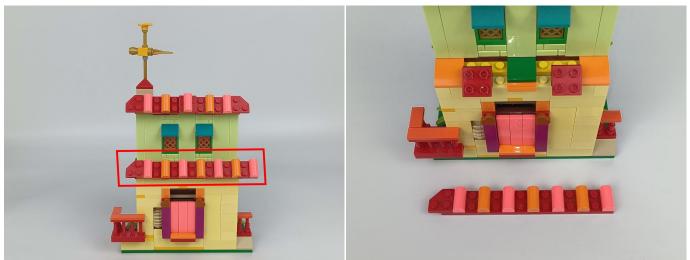

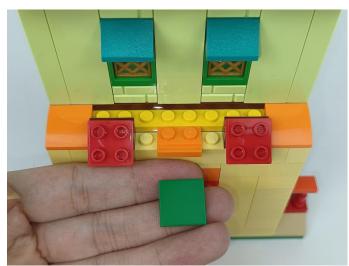

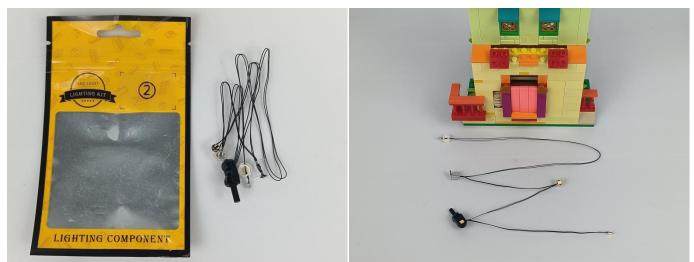

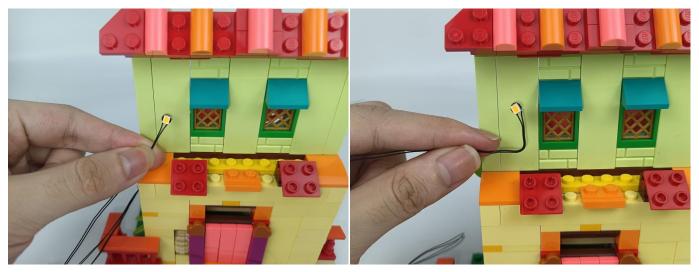

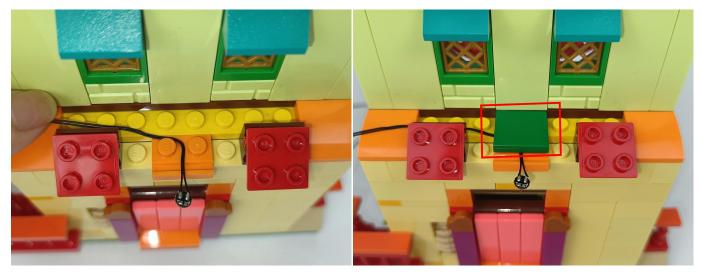

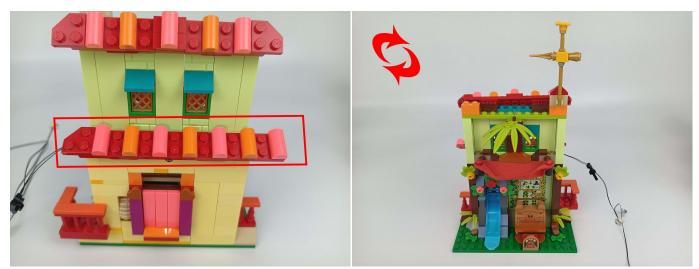

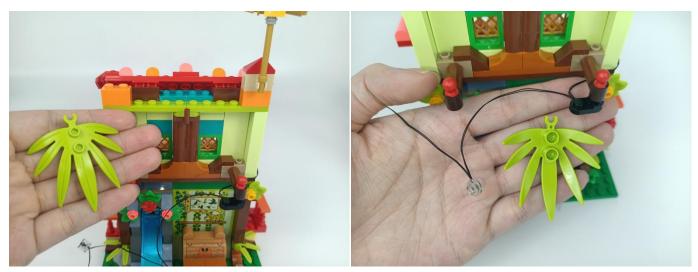

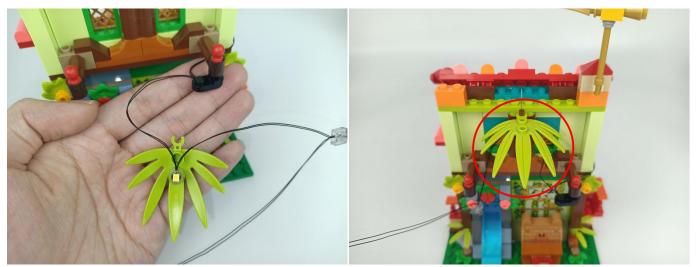

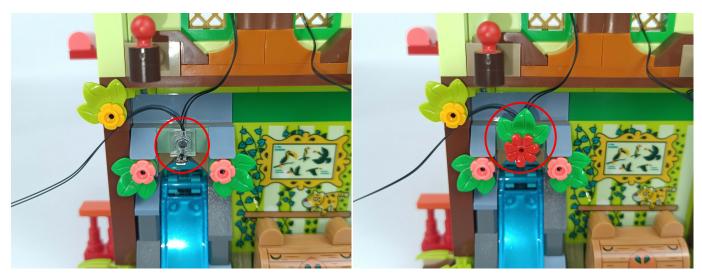

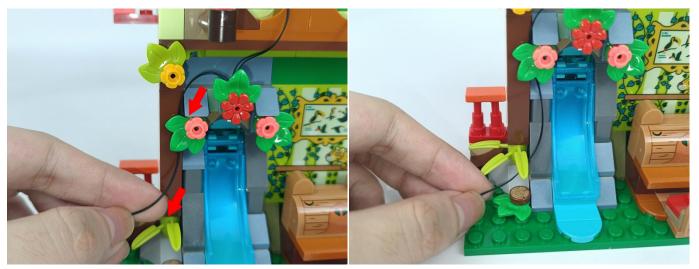

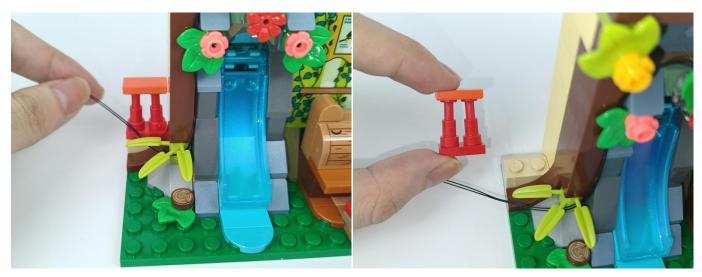

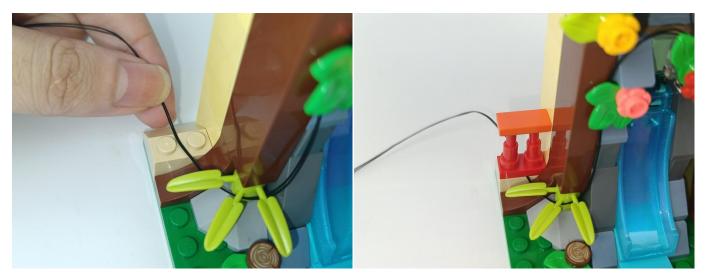

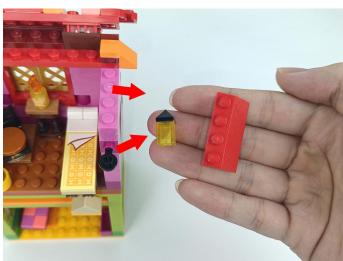

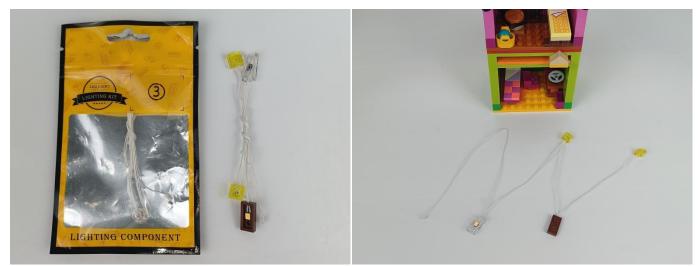

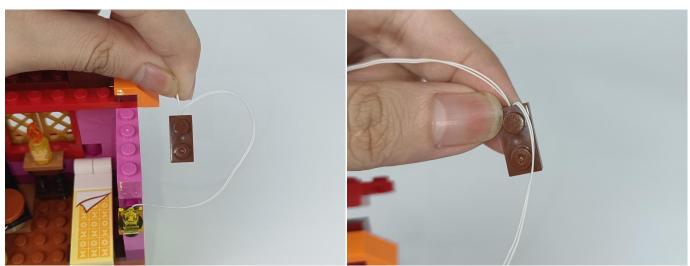

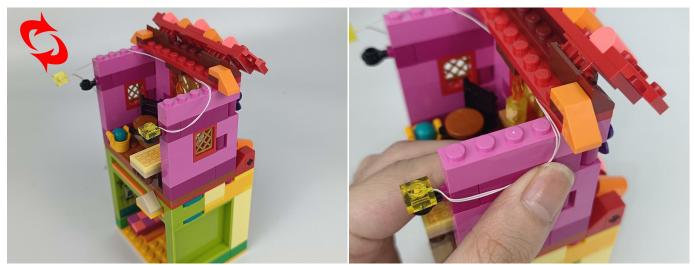

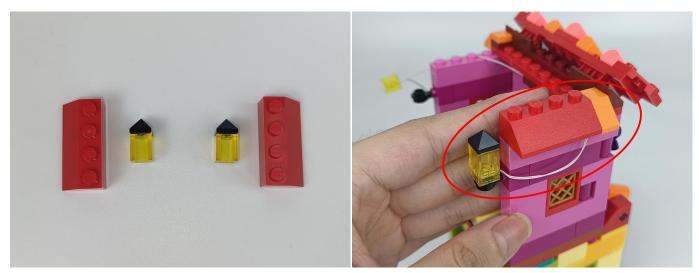

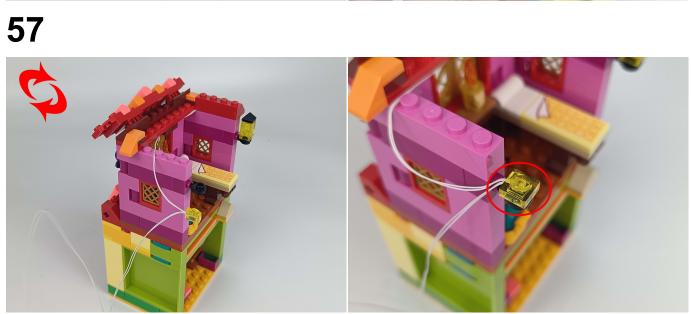

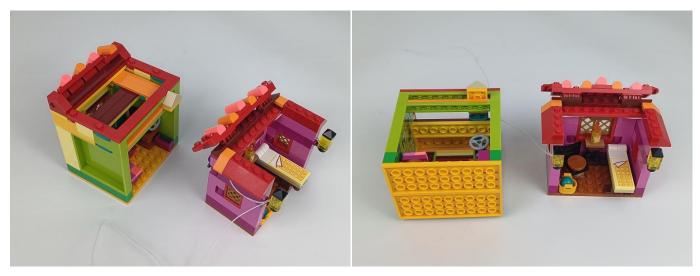

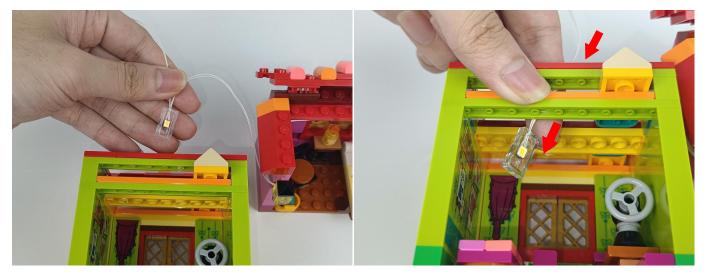

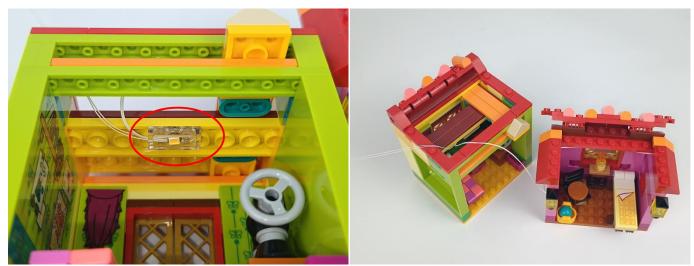

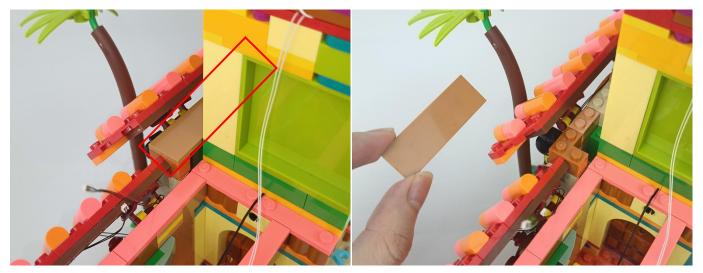

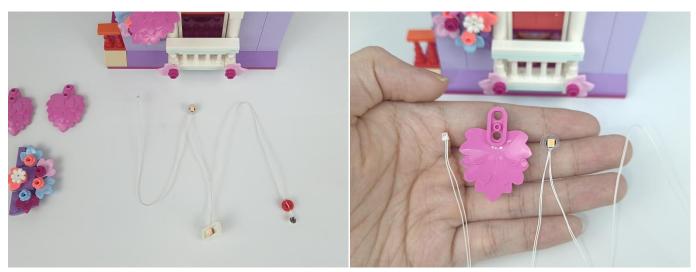

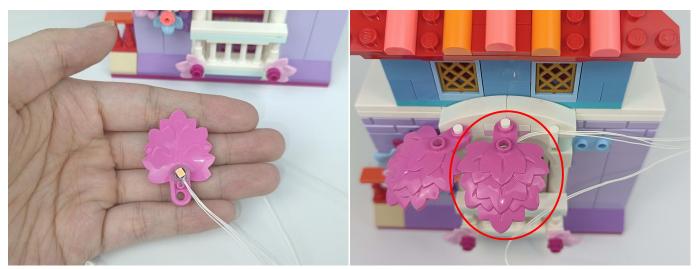

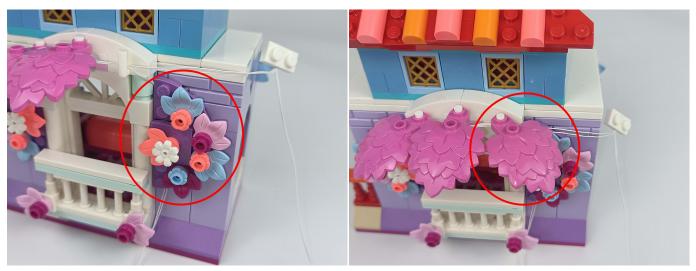

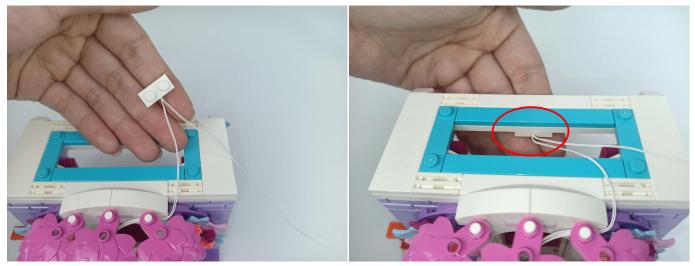

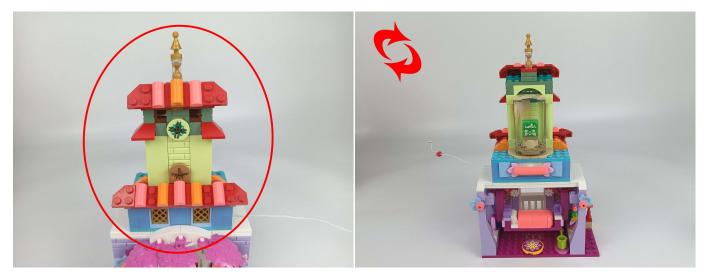

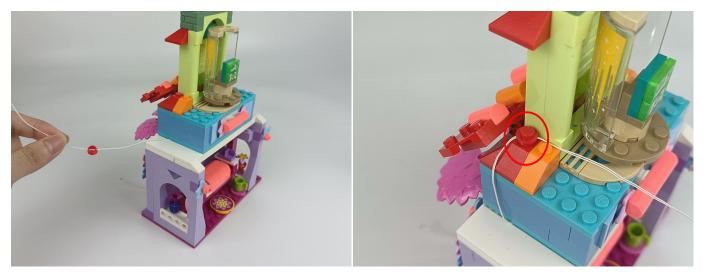

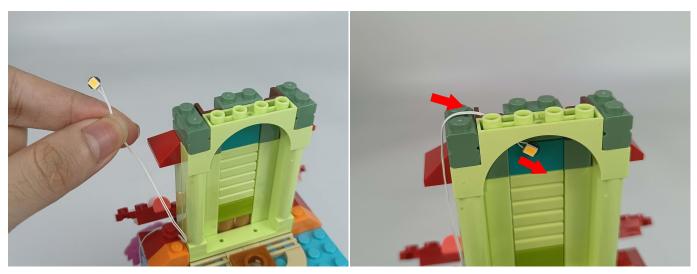

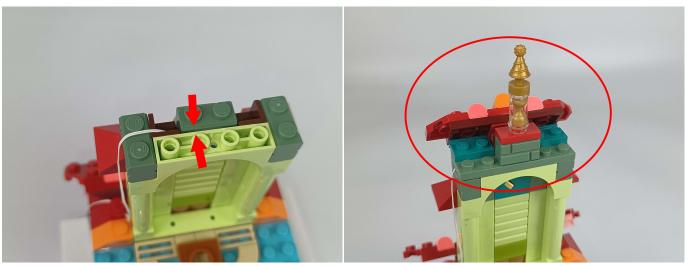

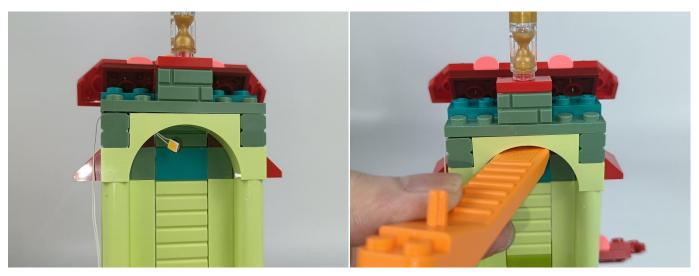

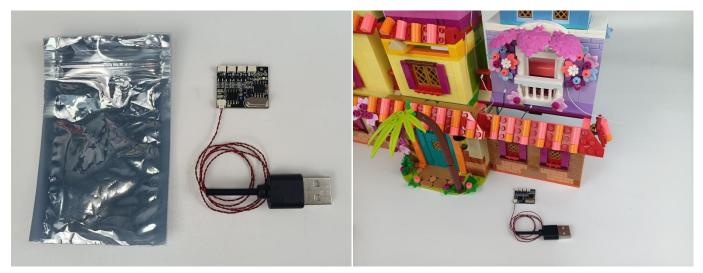

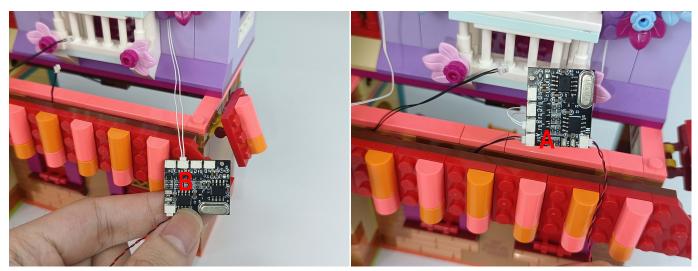

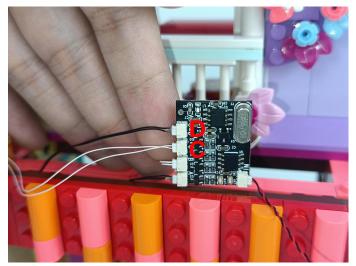

Good job, you've done all the installation steps, power it up and enjoy your work.

The battery box in bag NO.4 can also power the set. If it is necessary to change the power supply, prepare three AAA batteries, install them in the battery box, turn on the switch on the battery box, remove the plug of the USB Power Cable from the socket of the expansion board, plug the plug of the battery box to the same socket in the expansion board to power the suit as well.

THANKS
