

41430 Summer Fun Water Park LED lighting Kit (Standard Version) LG19

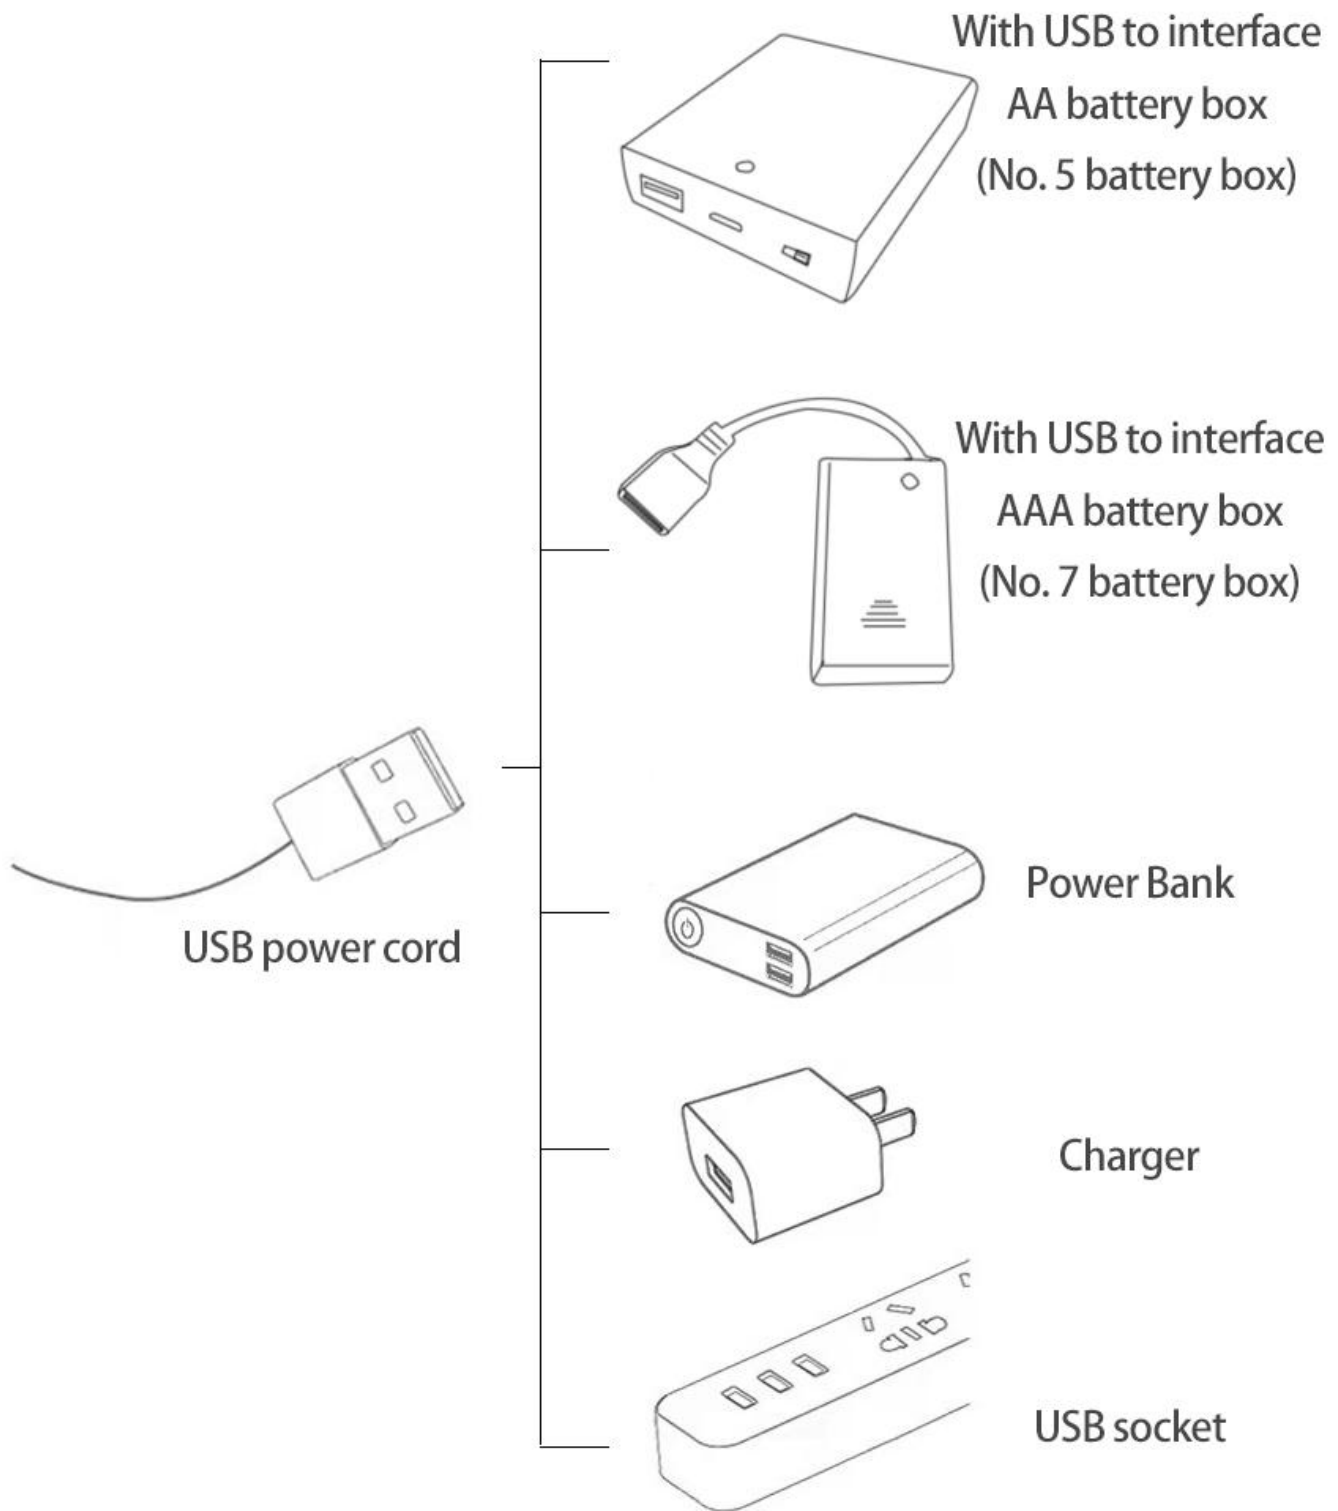

Instructions for installing this kit:

Power supply mode: USB power cord (please bring your own power supply).

It can be energized through a USB battery box (please pay attention to the positive and negative poles of the battery), power bank, mobile phone charger or USB socket. The normal voltage is 3-5V.

USB connectors to connect devices

There are 5 bags of this product, and the AA battery box is a gift. (Without battery)

Lighting test:

Take out the accessories inside (accessories include: No. AA battery box, 6-seat expansion board). The following power supply methods use AA battery box (battery self-supplied)

Take out the AA battery box and expansion board

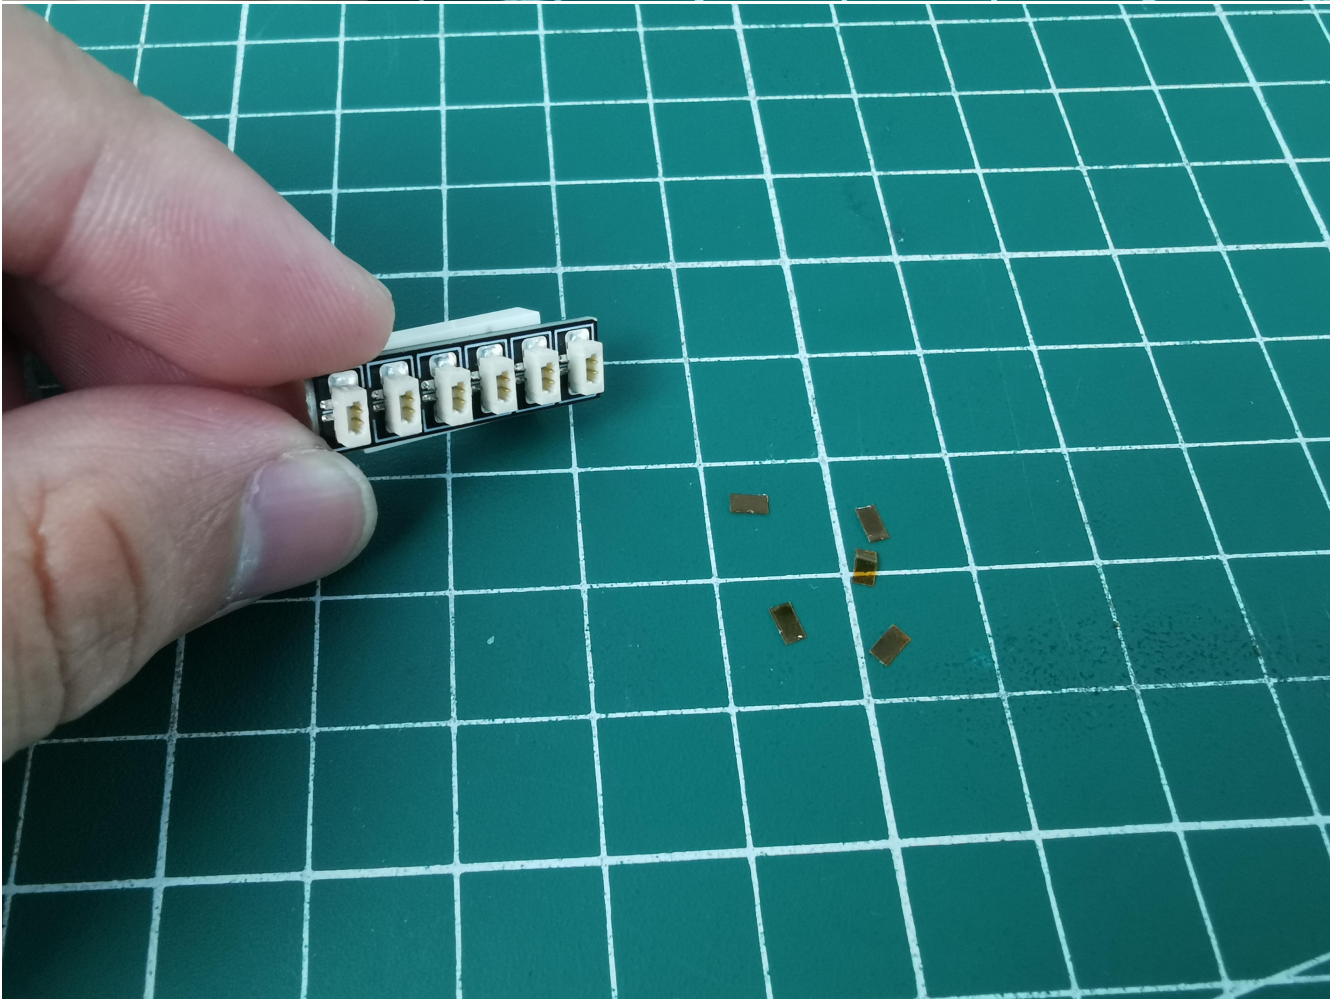

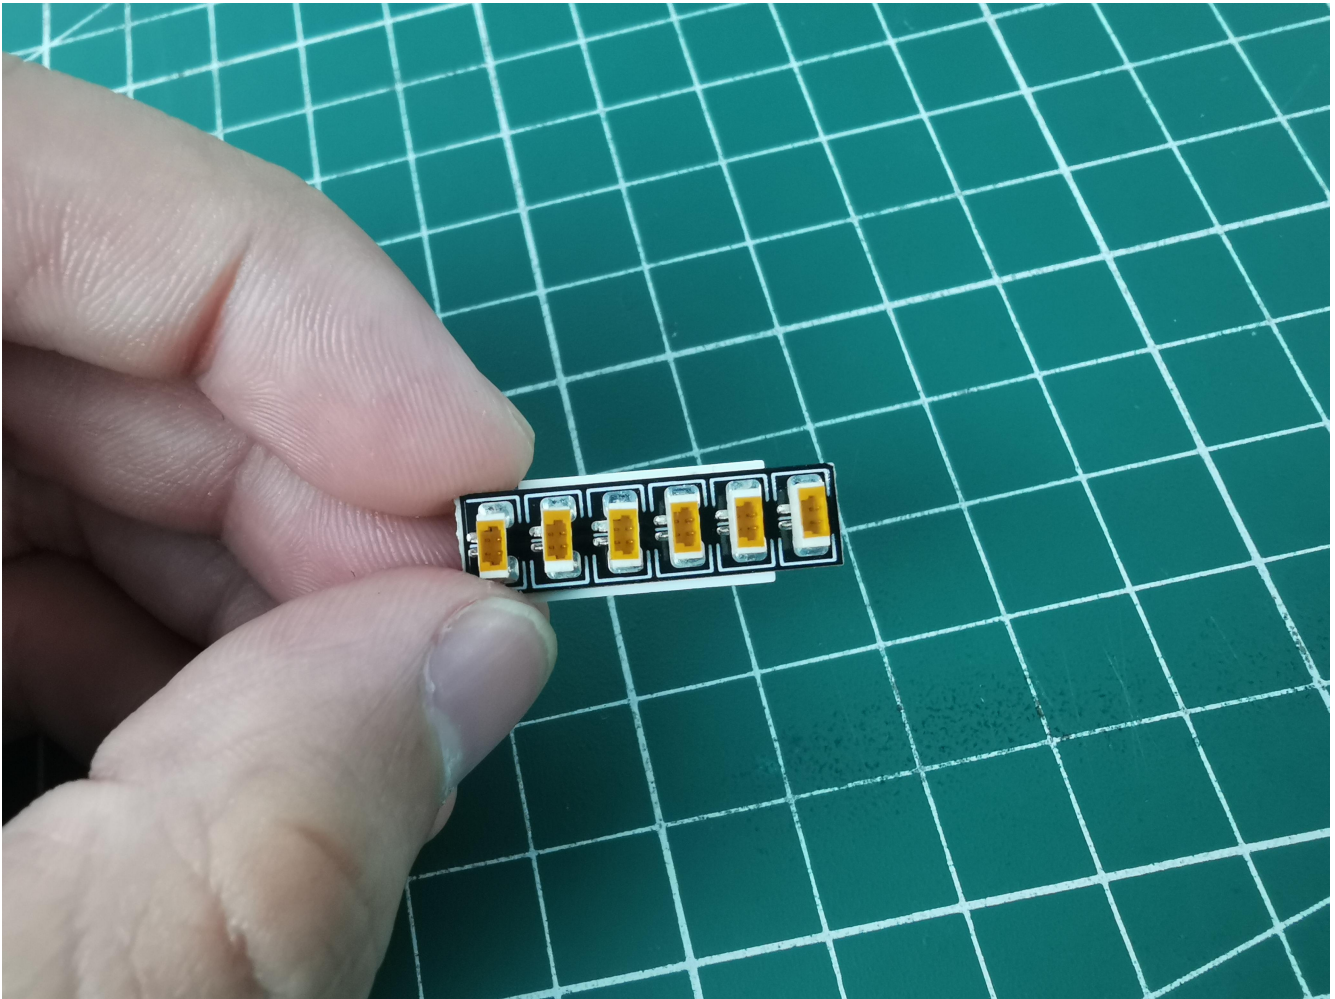

Open the AA battery box to install the battery (batteries are self-supplied), and close the lid.

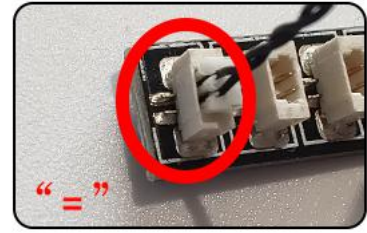

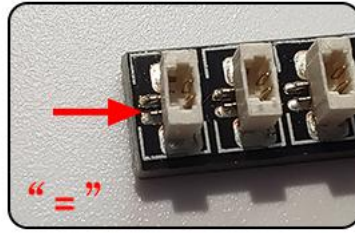

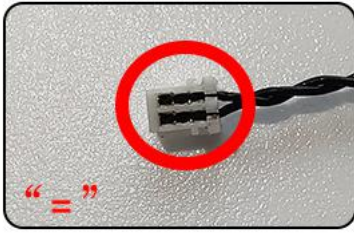

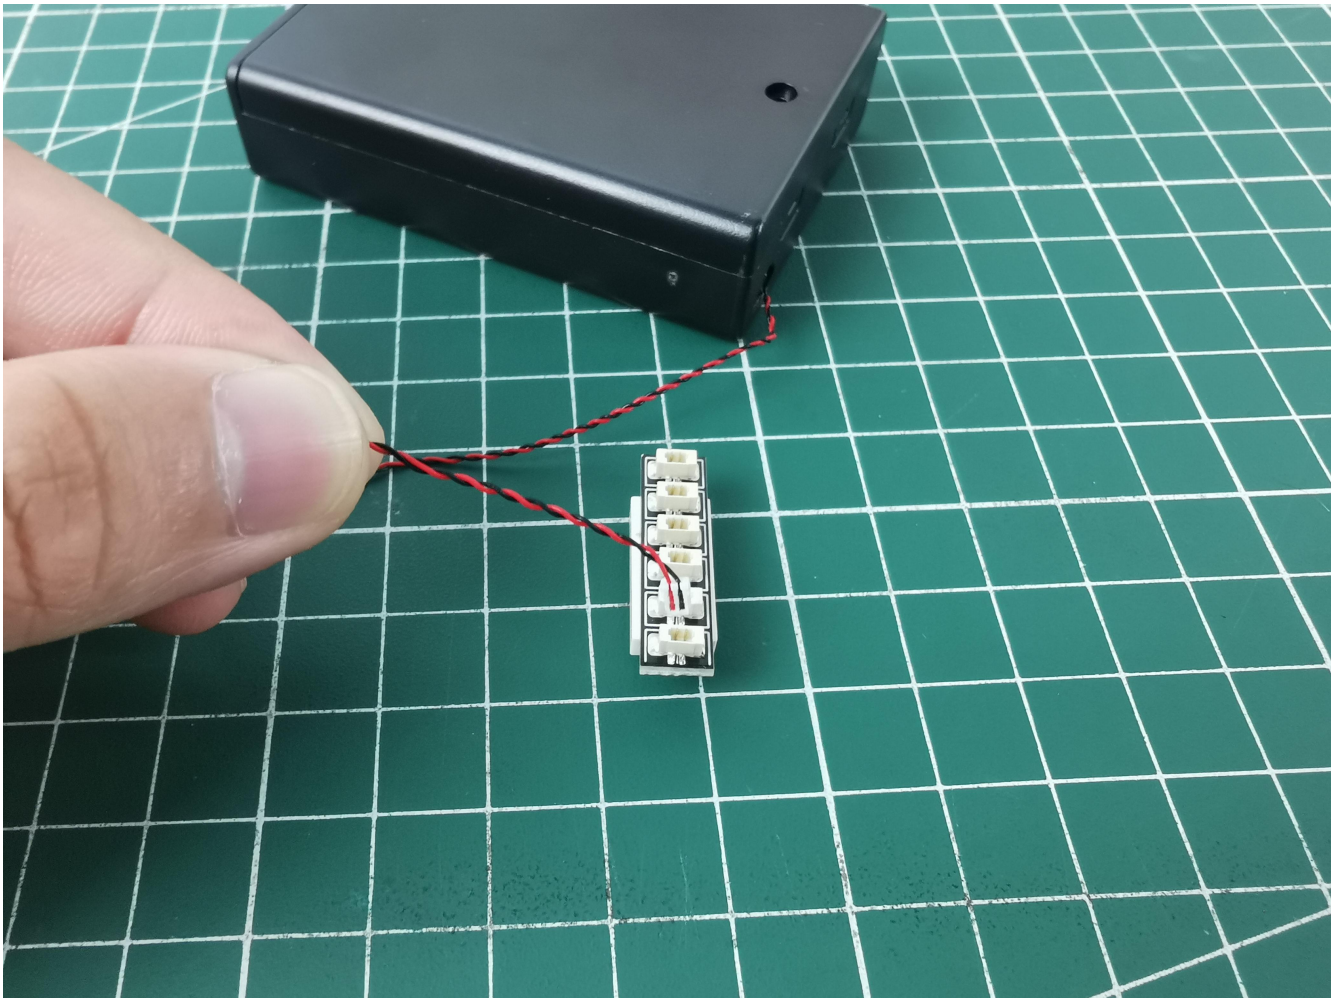

Remove the seal on the expansion board

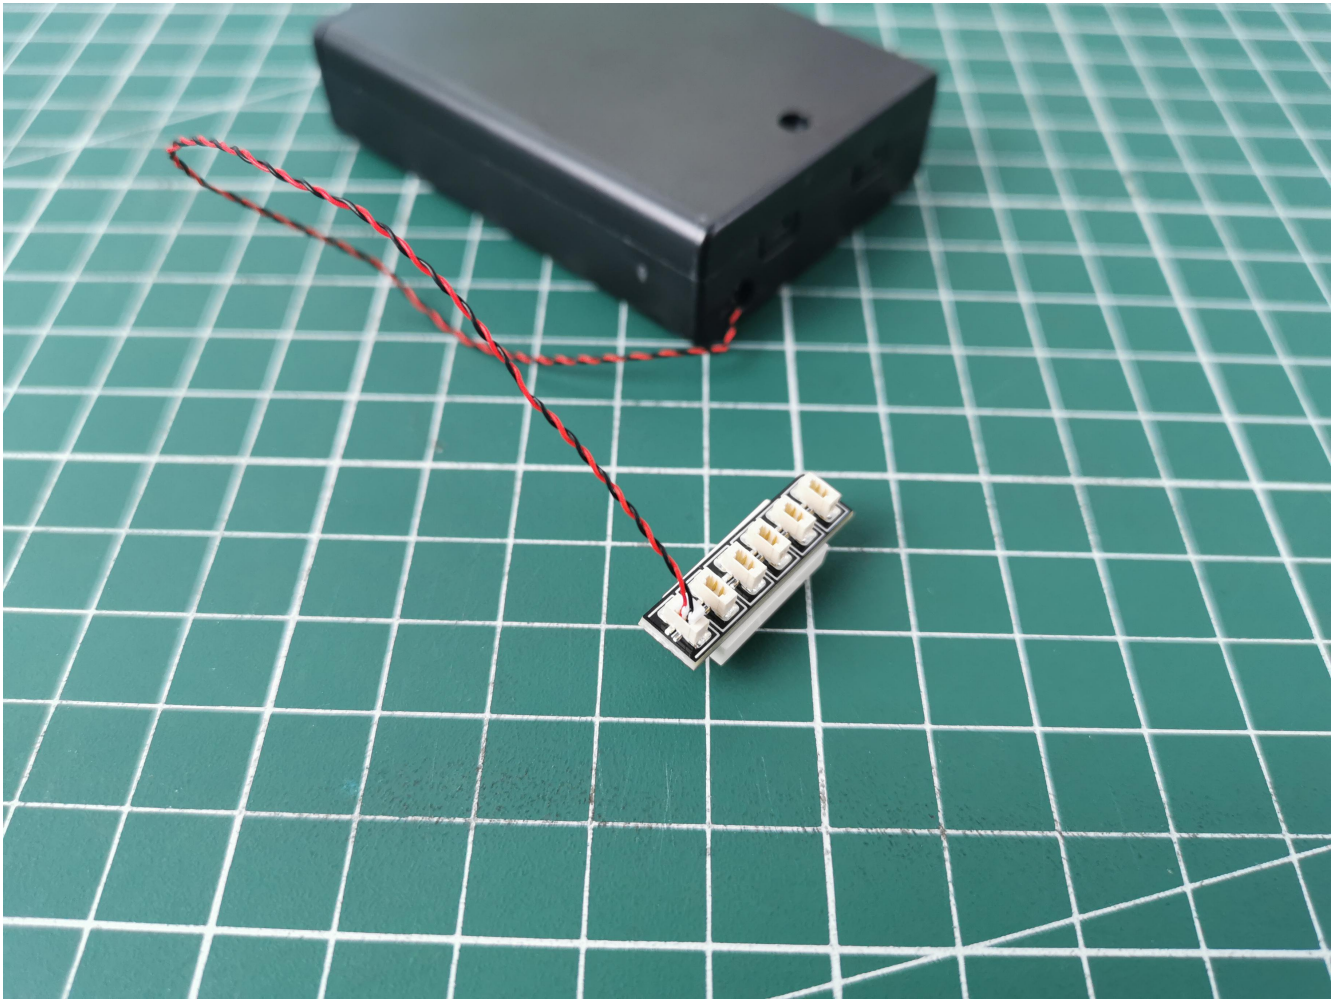

The two are connected through the interface, the connection method is as follows.

Connect the AA battery box power cord to the expansion board

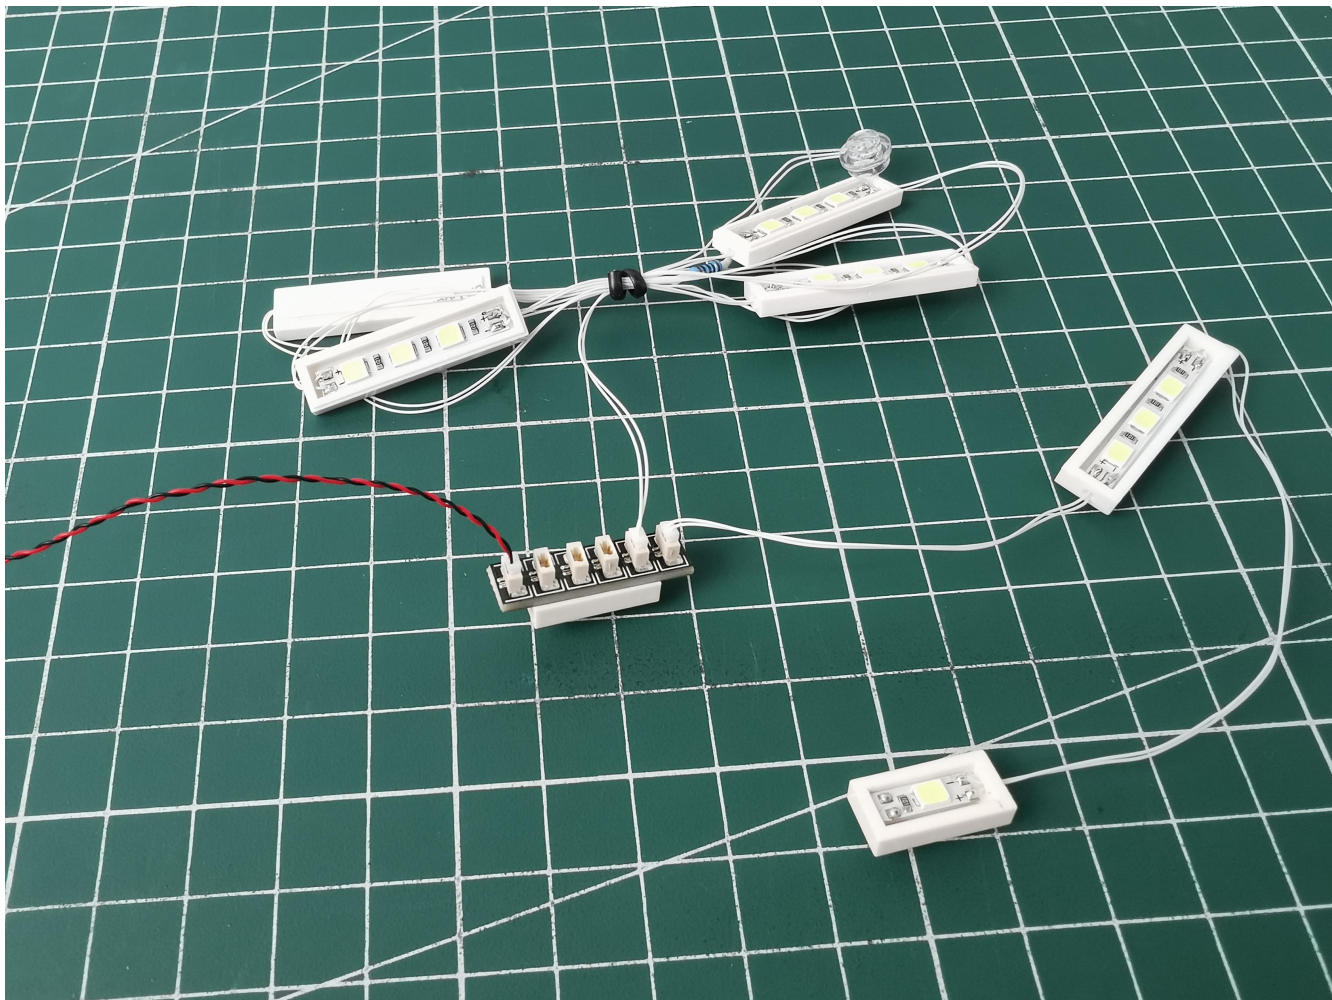

Take out the bag labeled No. 1.

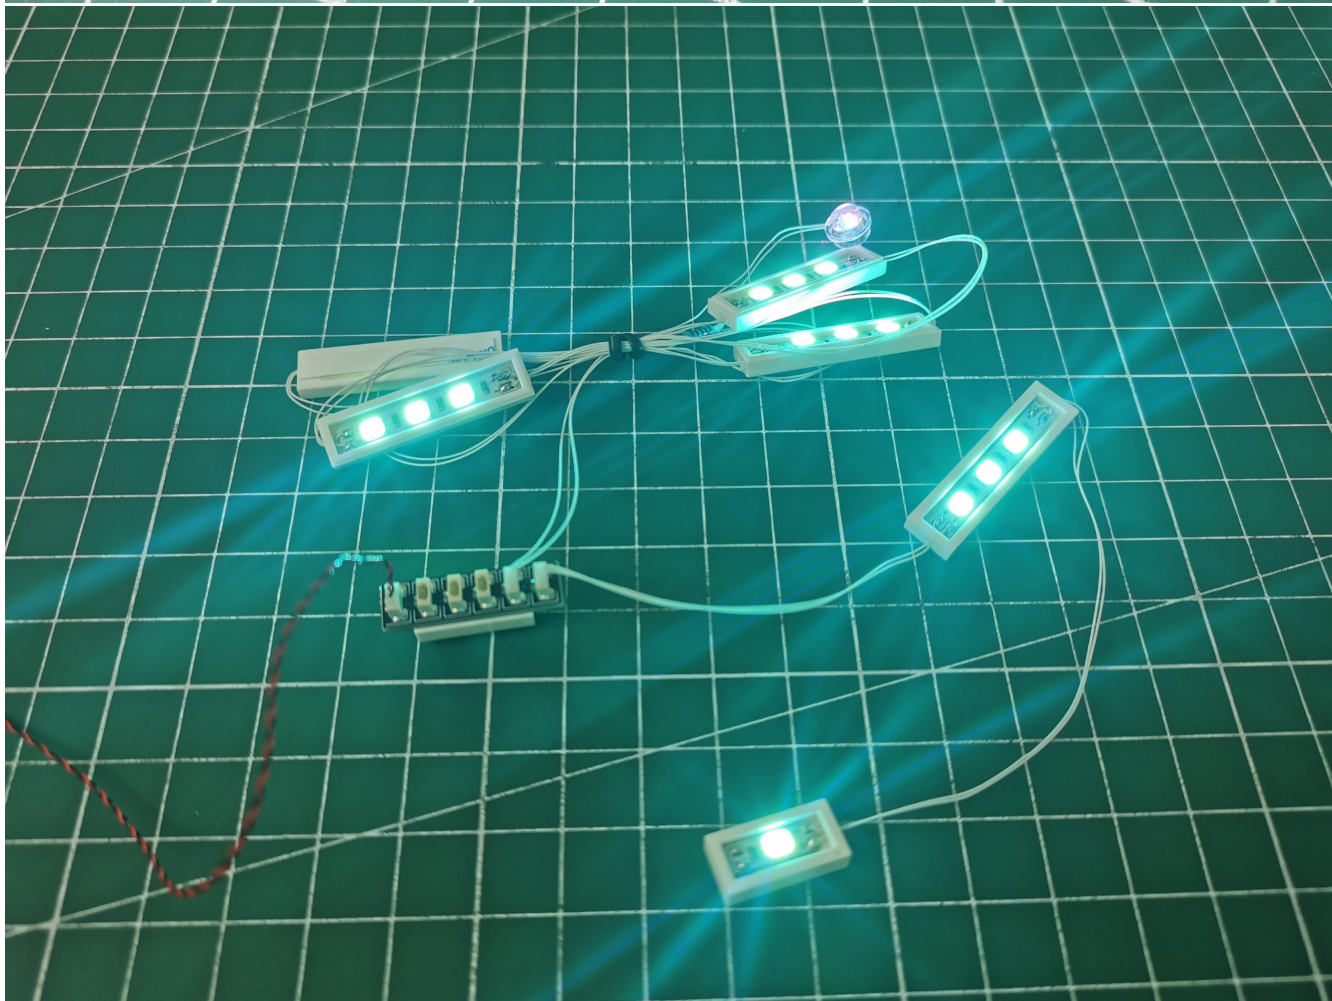

The lighting wire is connected to the expansion board, pay attention to the direction of the terminal

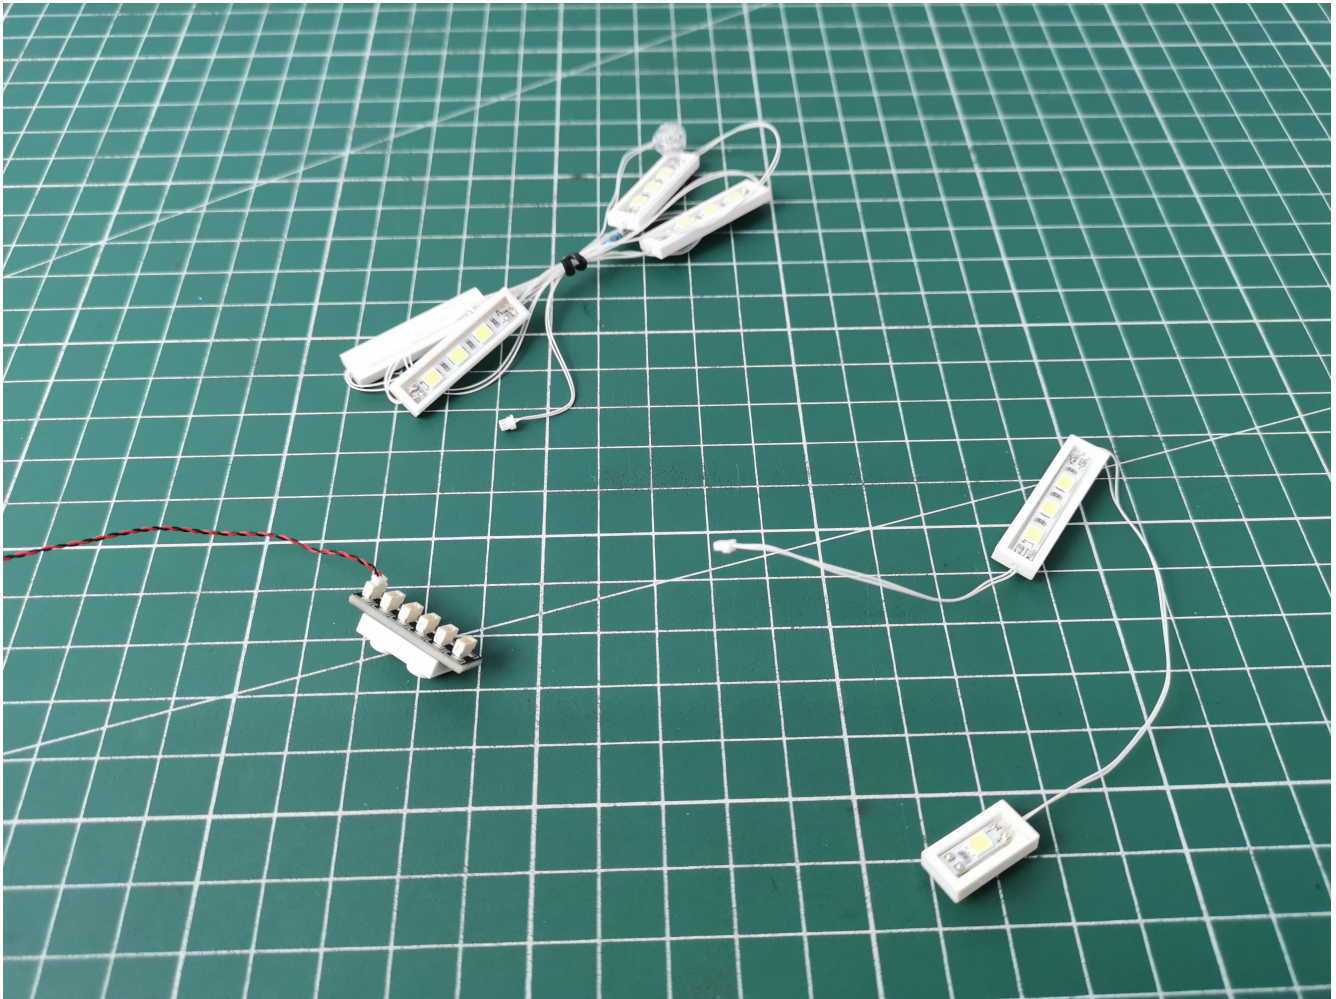

Turn on the icon switch to test whether the lighting is abnormal.

If there is any abnormality, please contact us in time!

After the test is normal, unplug the light and leave the expansion board on the AAA battery box. Please be careful when unplugging the plug to avoid damaging the plug. Put the lights back into the bag to avoid losing them.

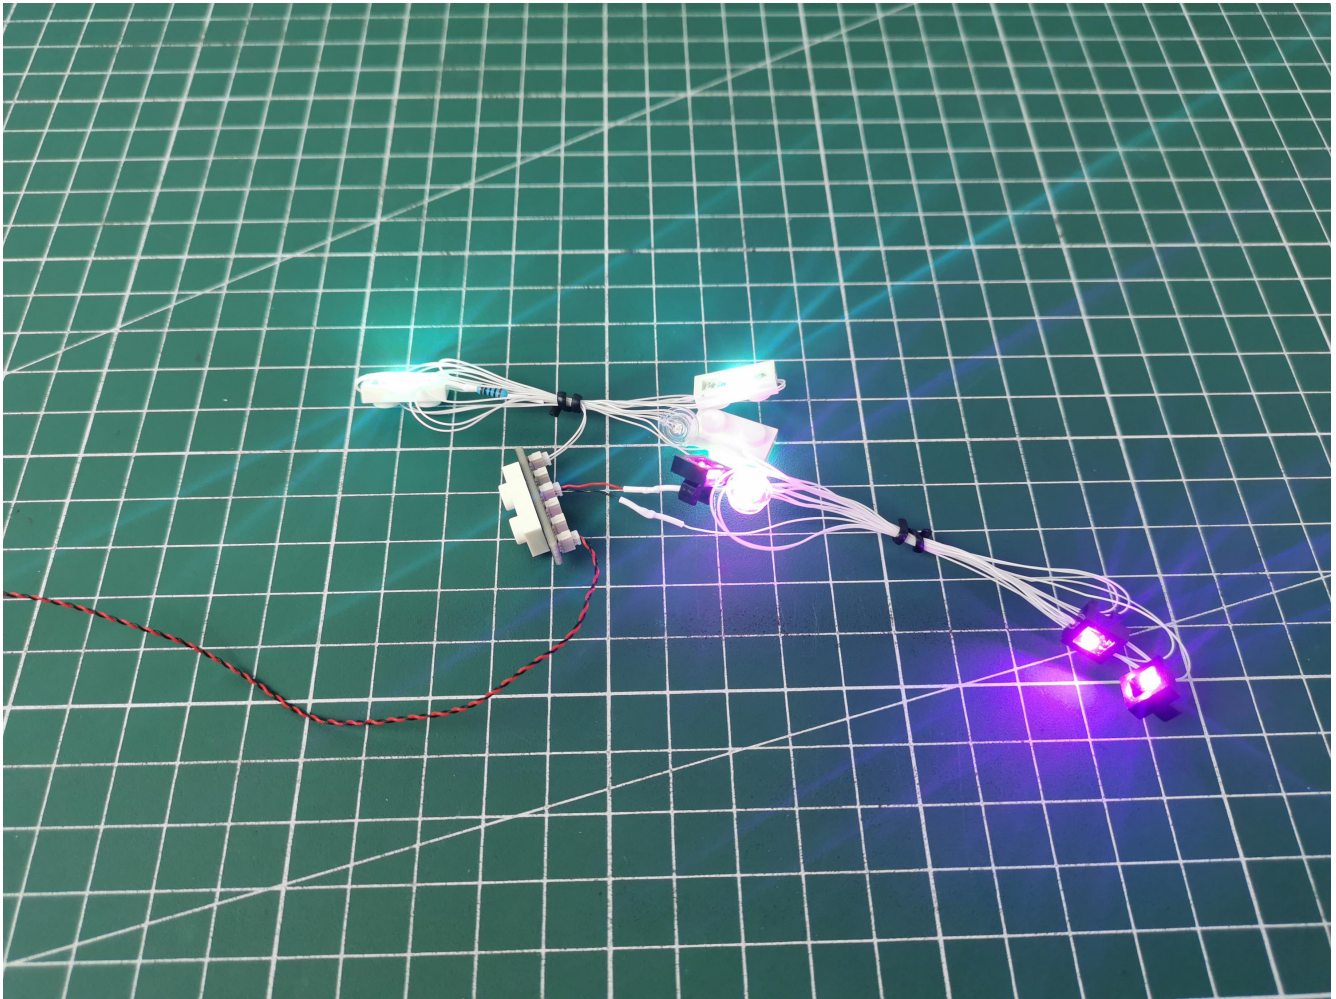

Take out the lights marked with No. 2 bag

Connect the lighting to the expansion board, and test whether the lighting is abnormal.

If there is any abnormality, please contact us in time!

After the test, put the lights back into the bag, beware of losing them.

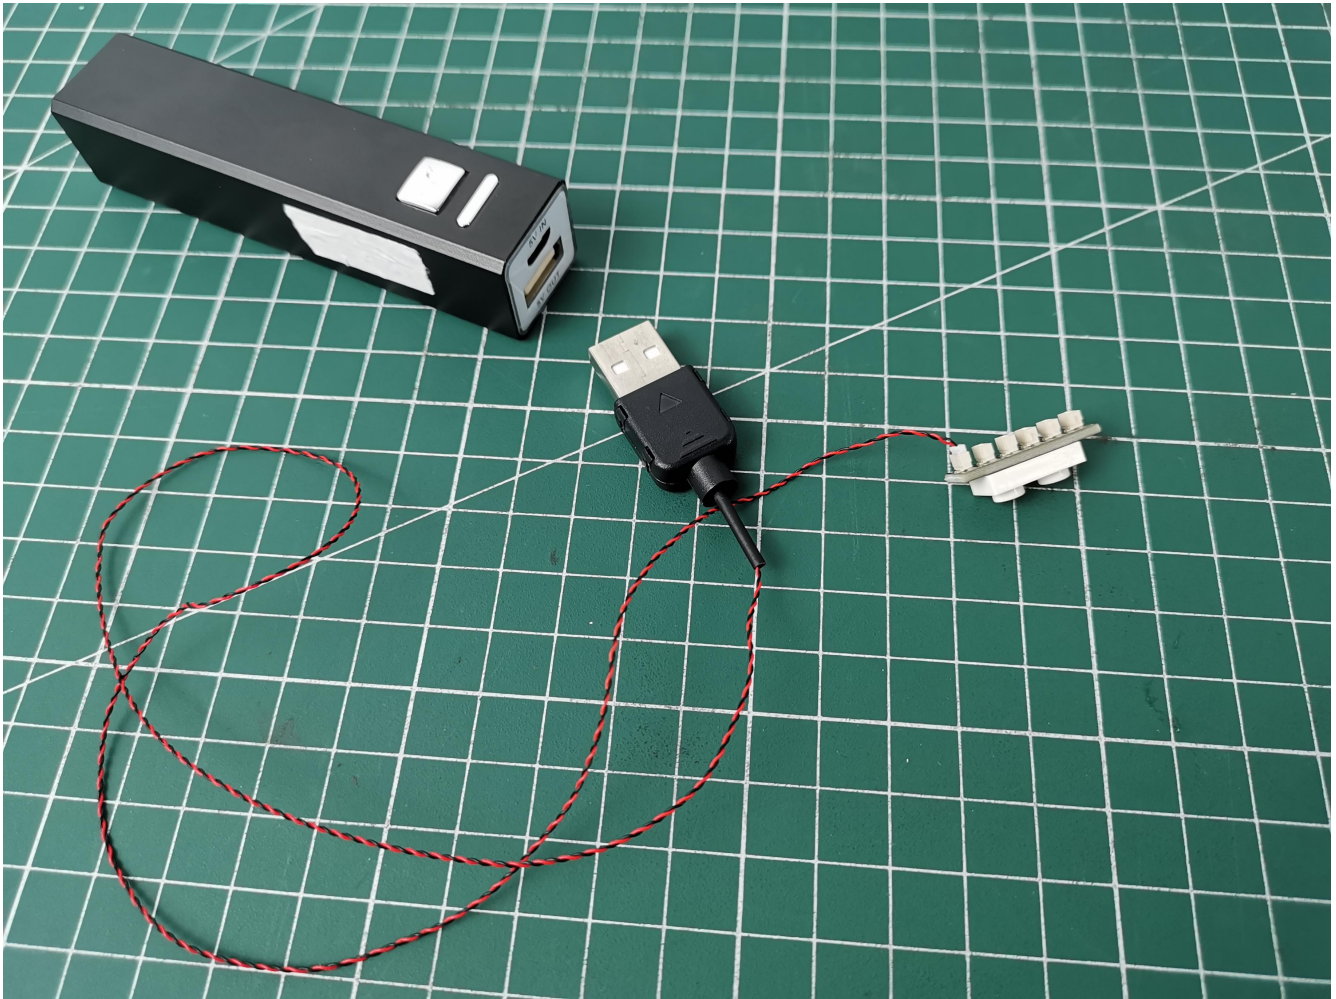

Take out the light decoration marked with No. 3 bag.

Remove the USB power cord

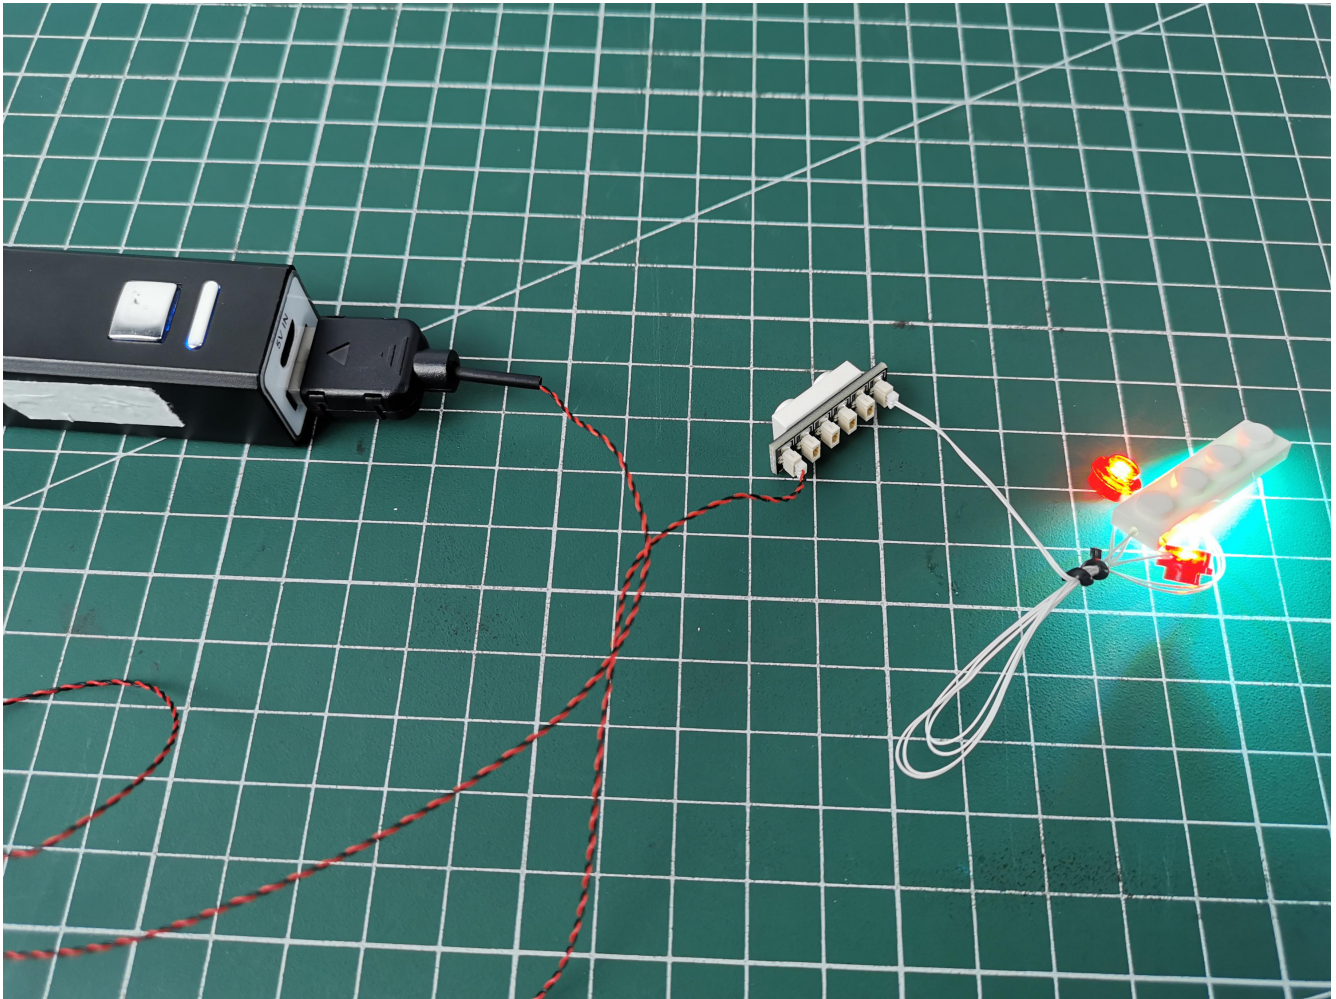

The USB power cord is connected to the expansion board, and the power head is connected to the power bank

Connect the lighting to the expansion board to test whether the lighting is abnormal.

If there is any abnormality, please contact us in time!

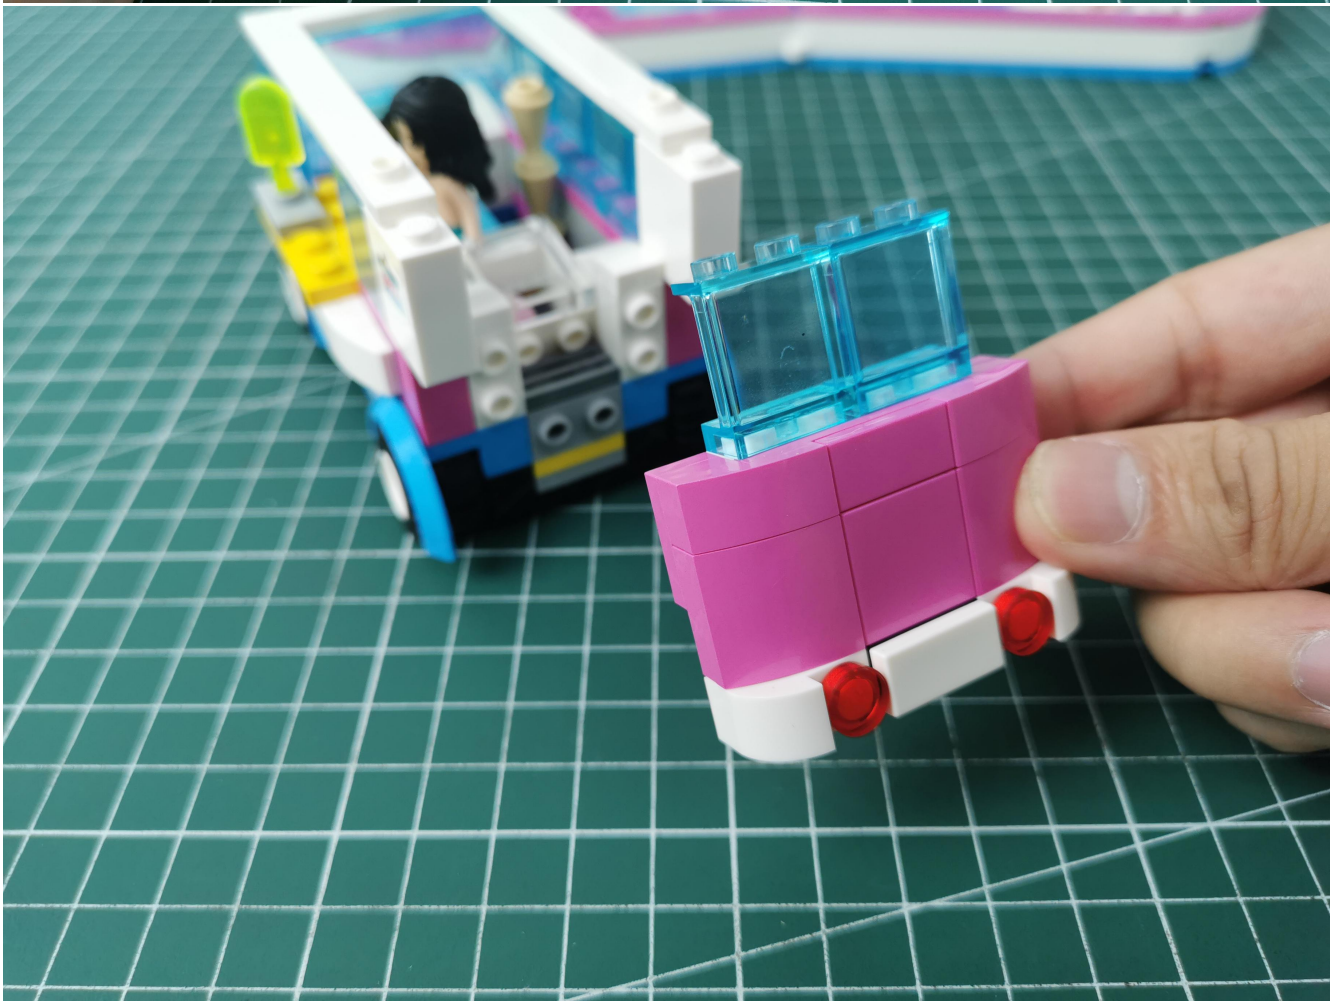

After the test, put the lights back into the bag, beware of losing them.

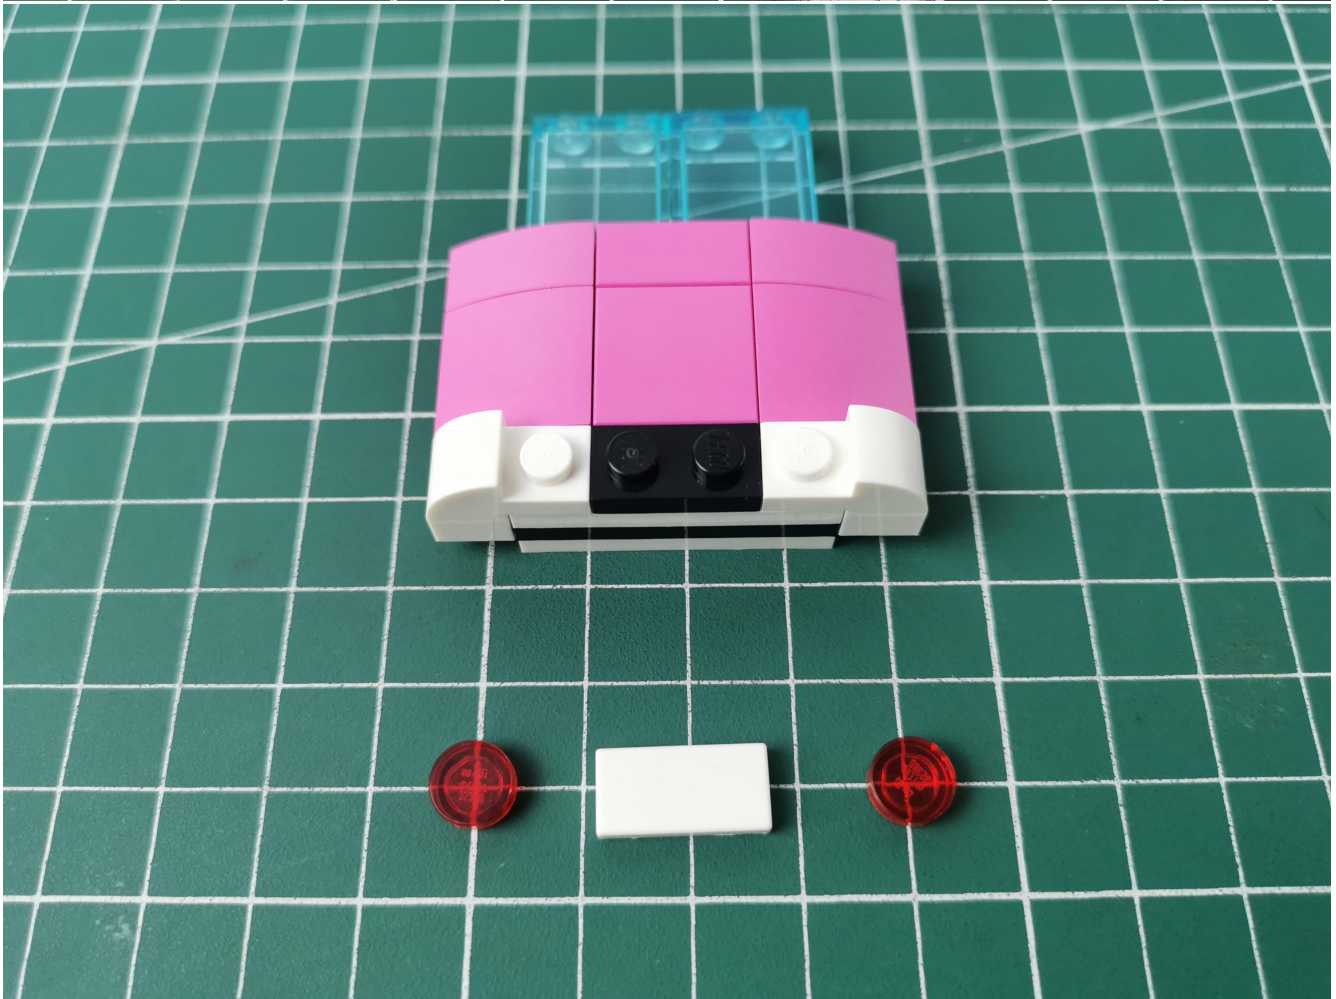

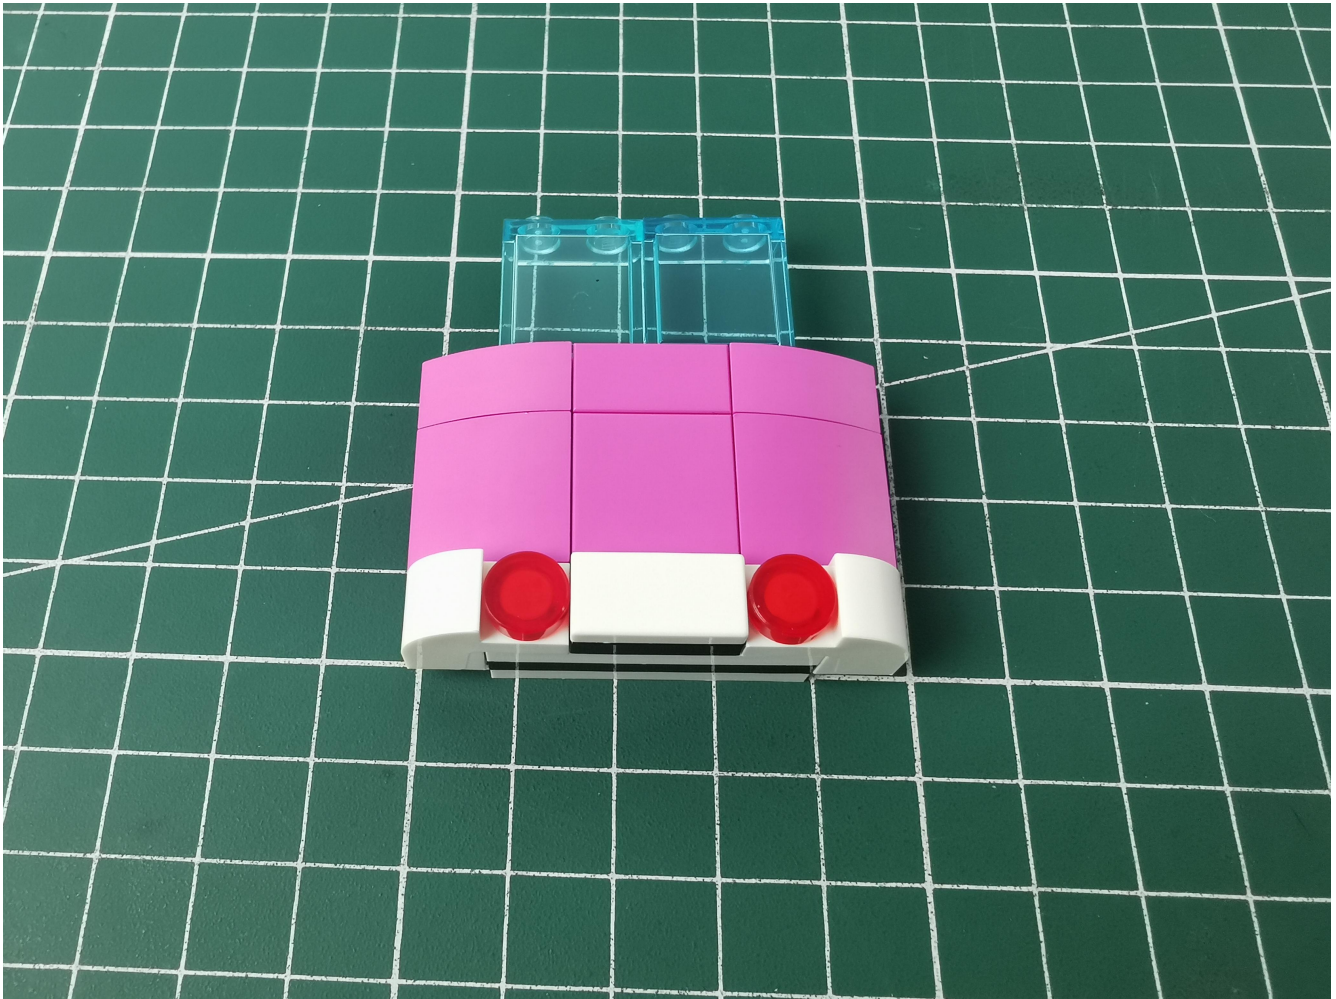

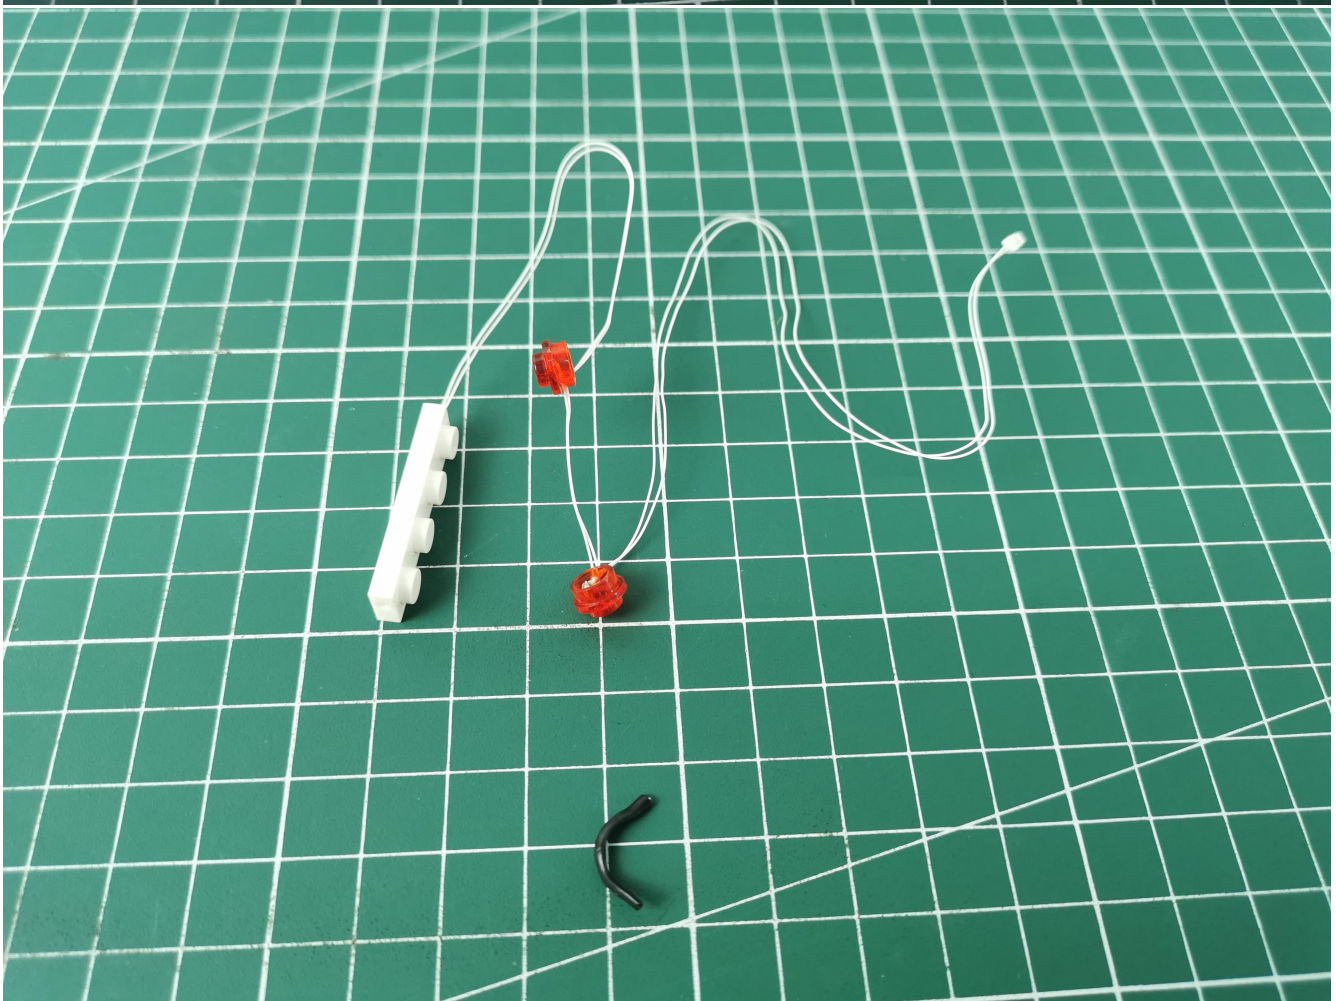

start installation:

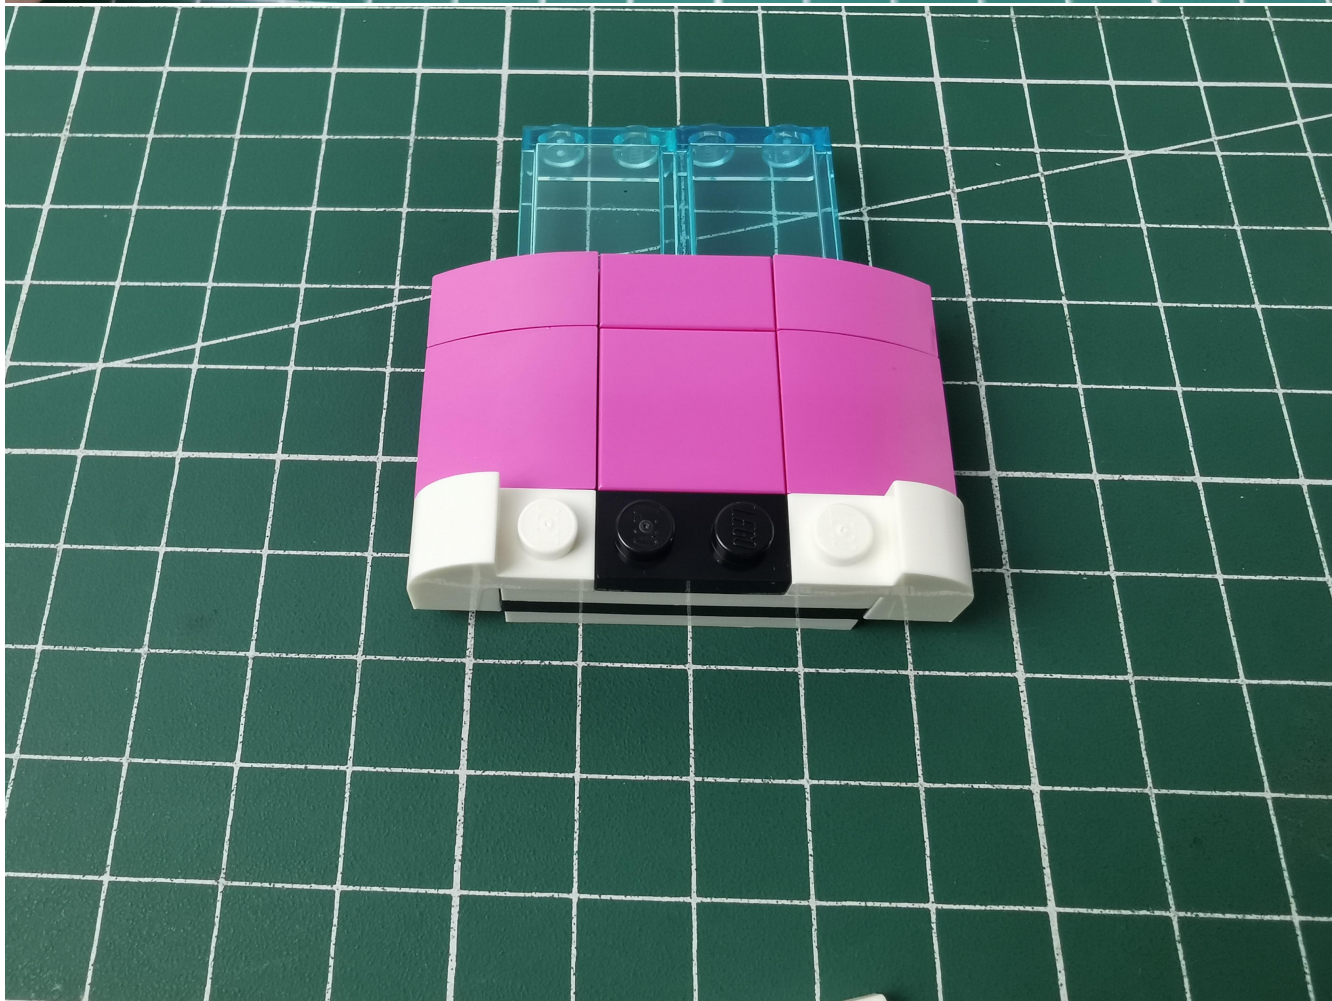

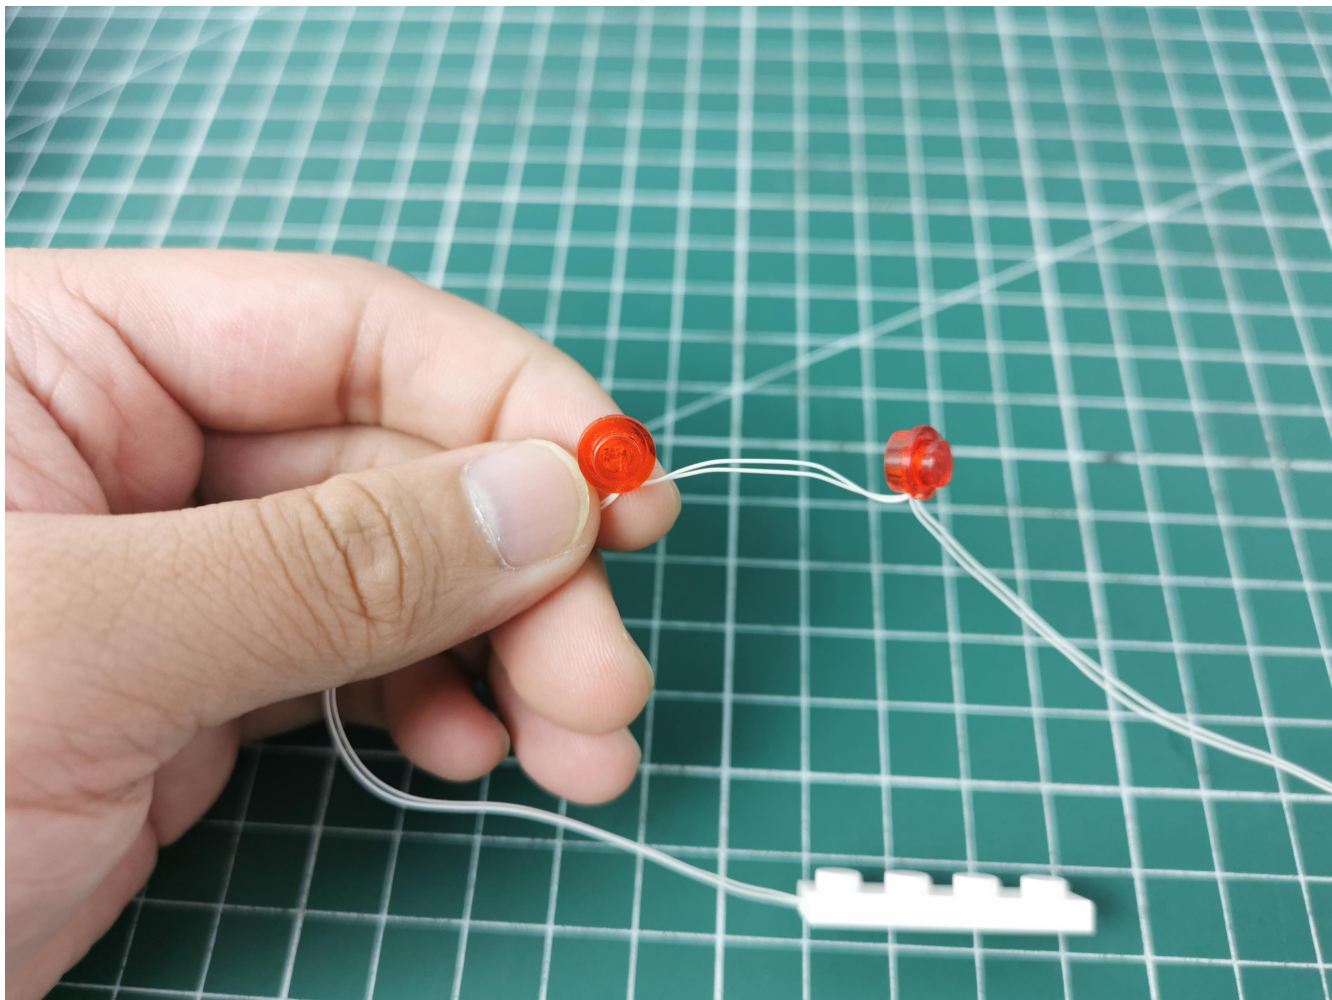

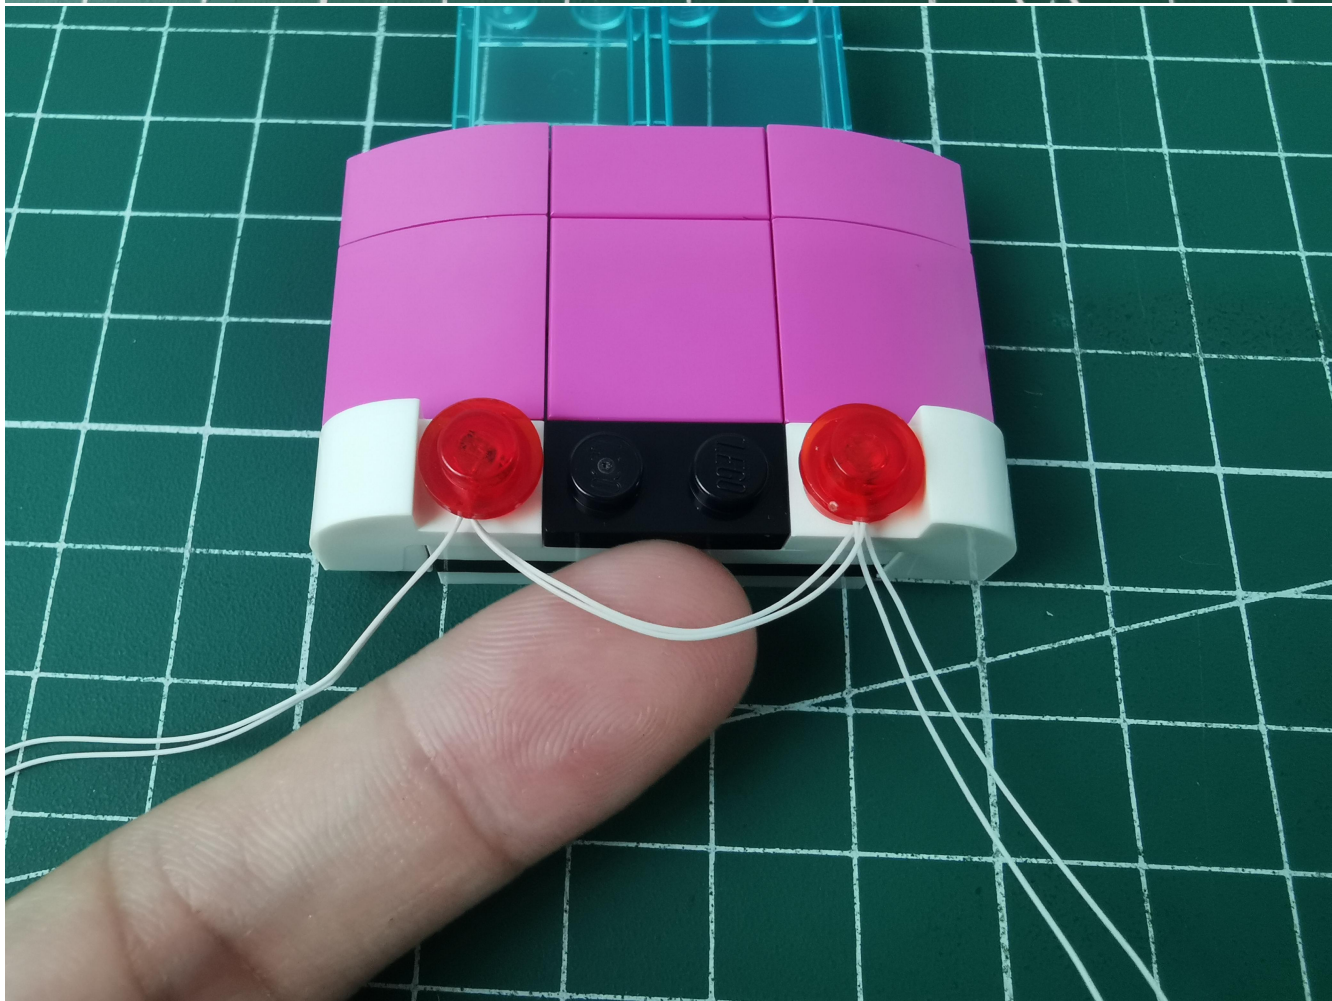

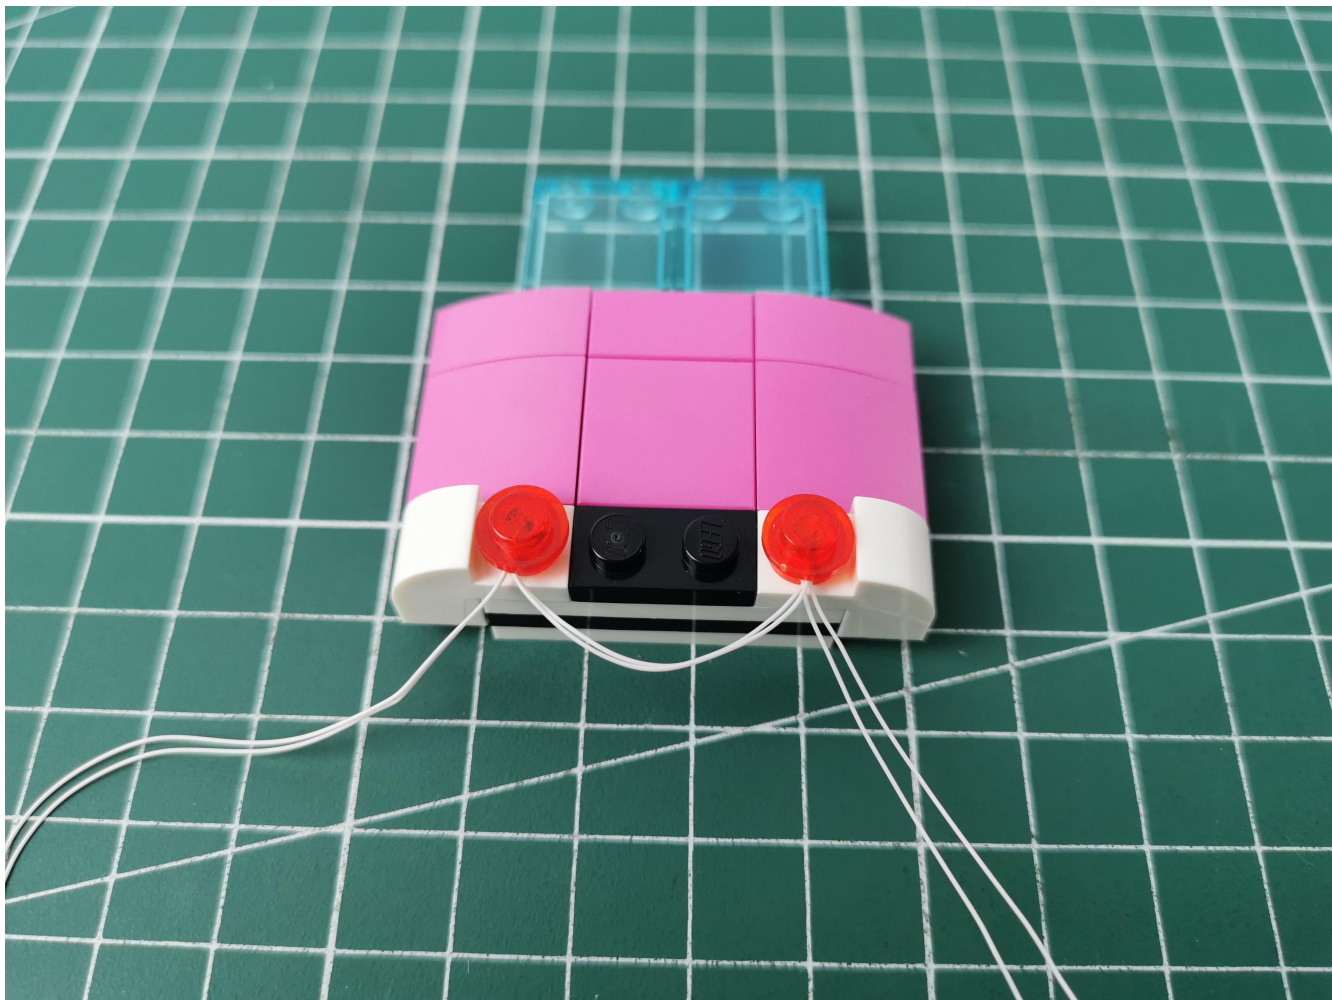

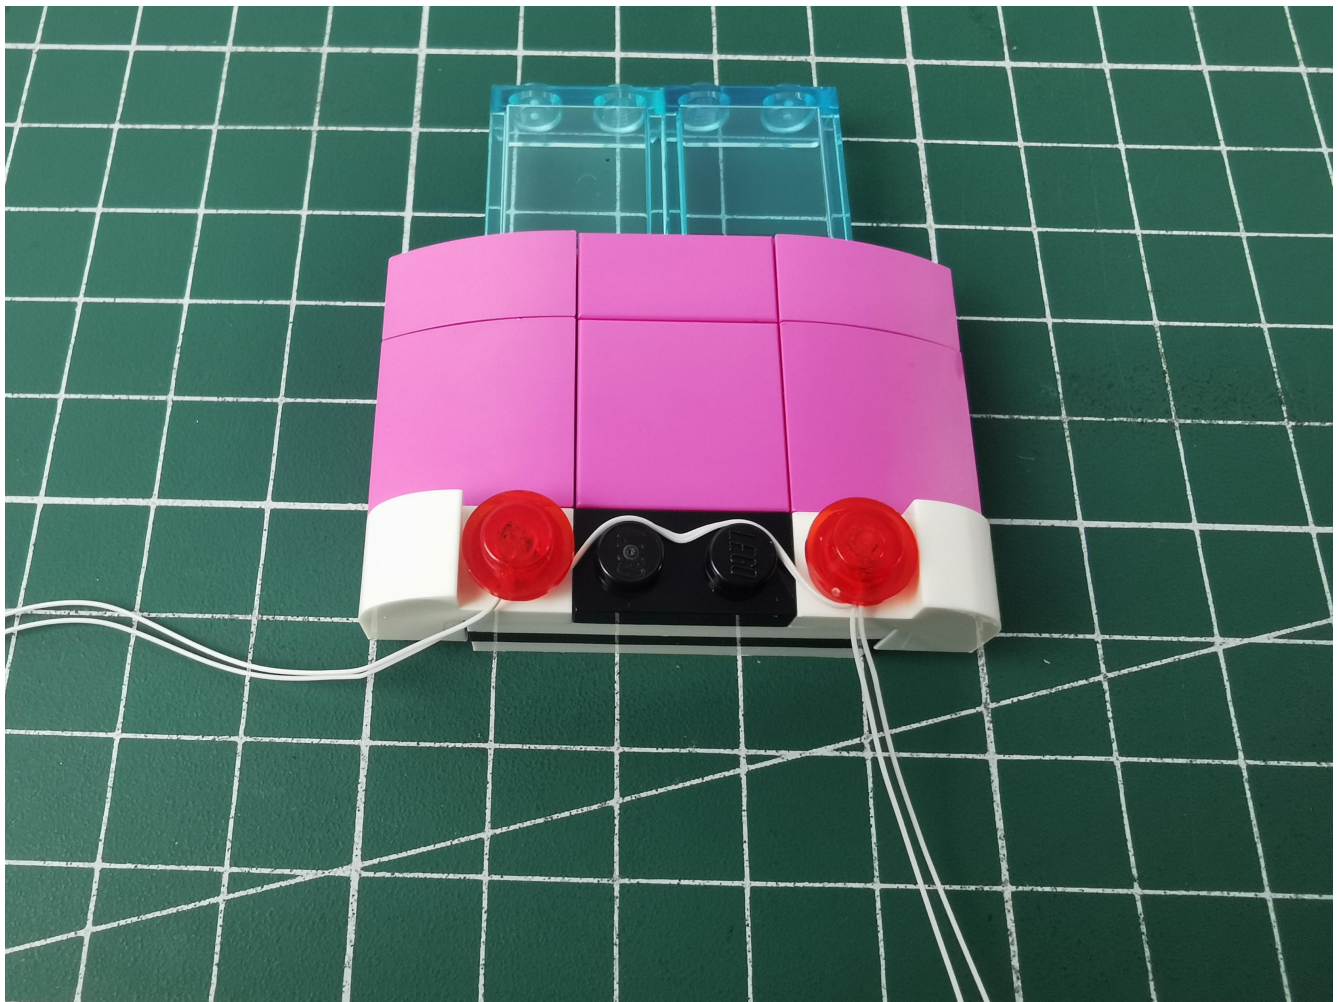

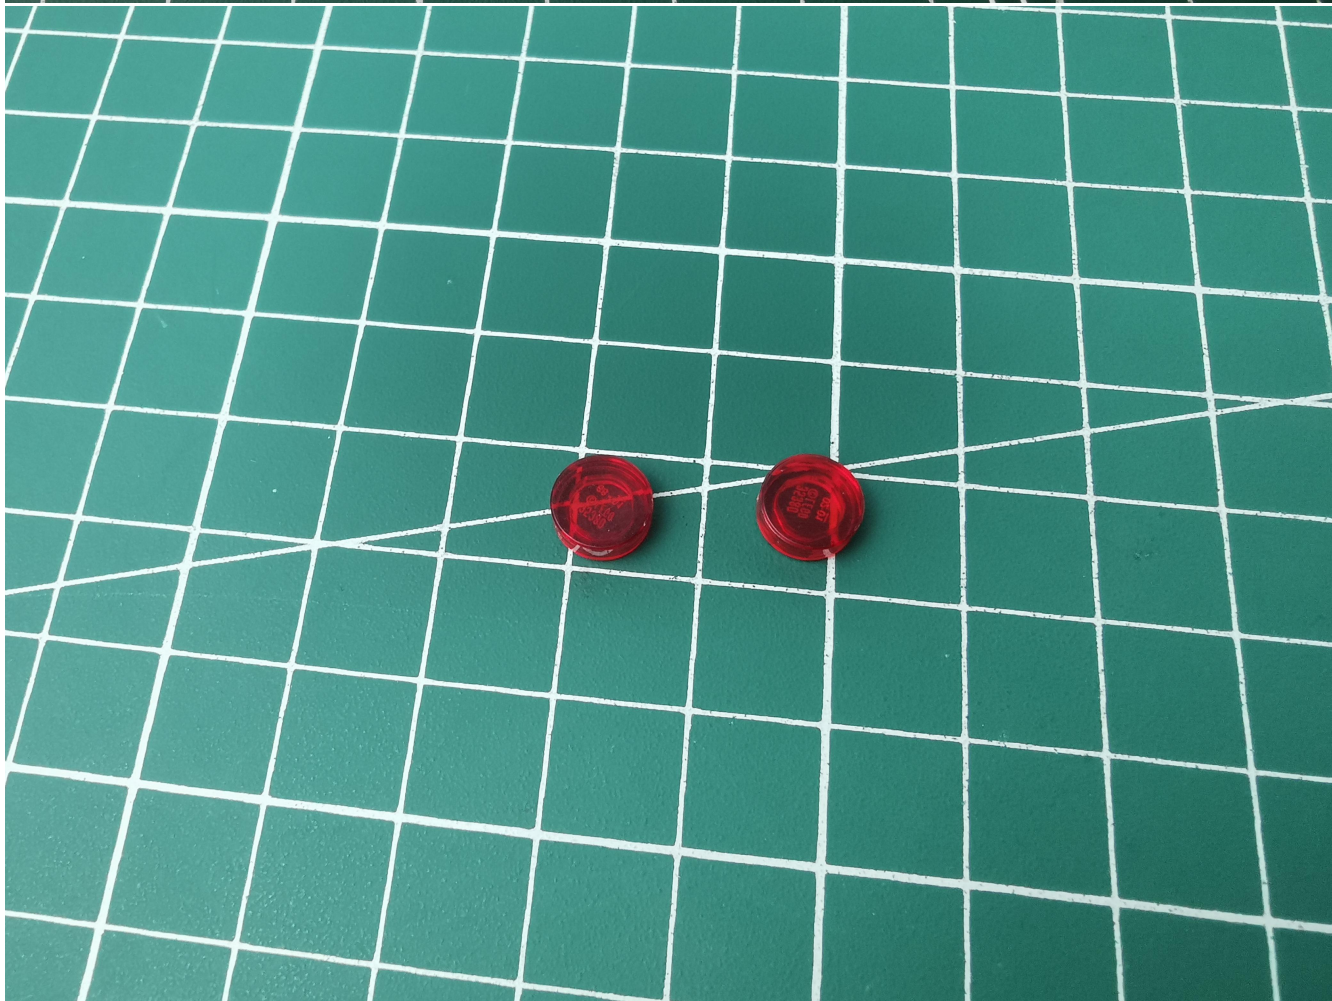

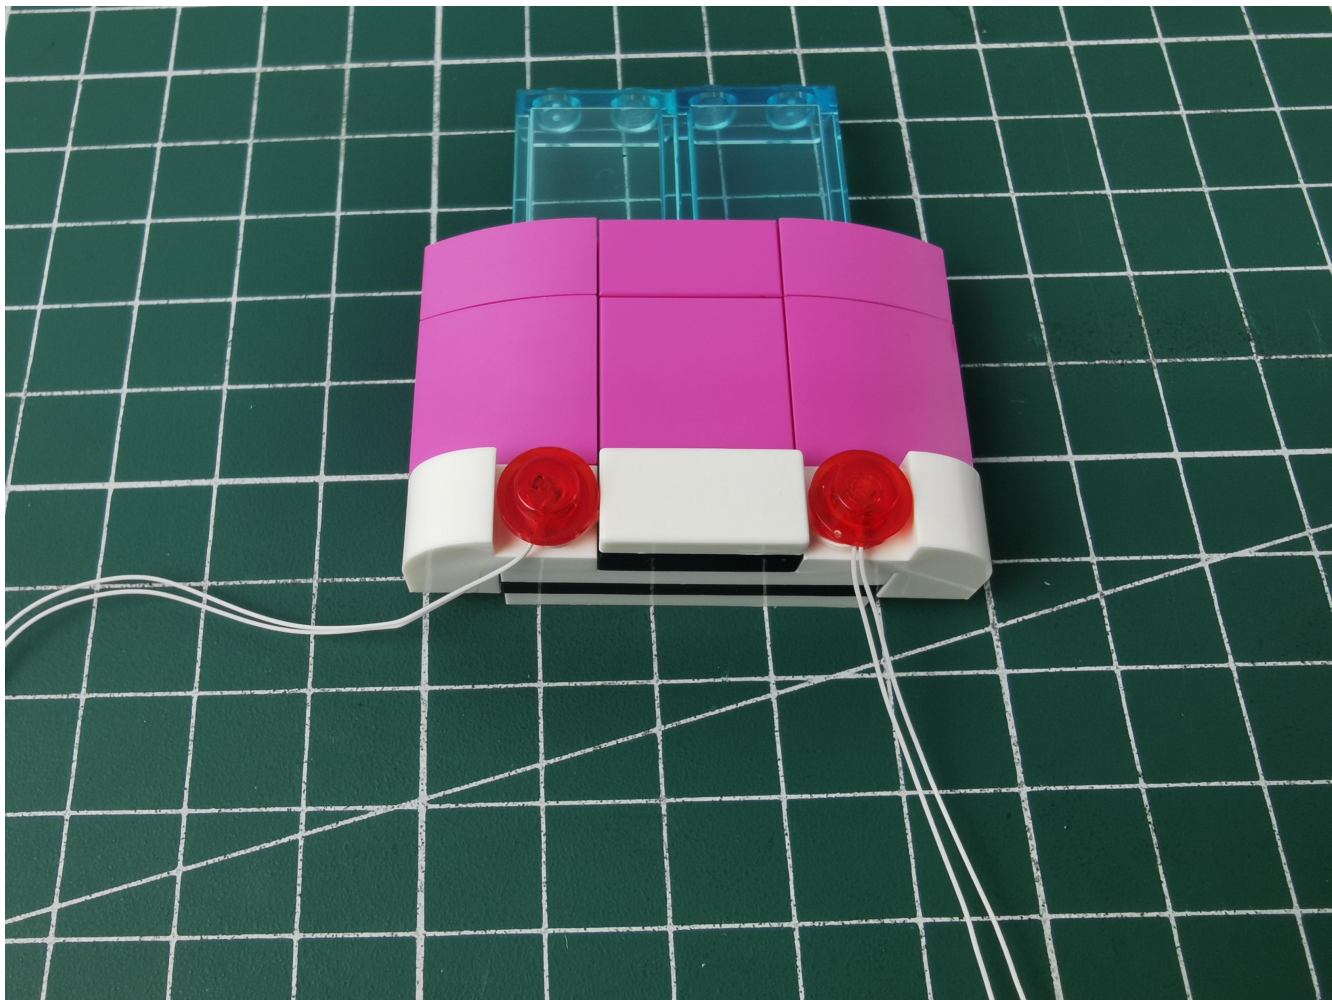

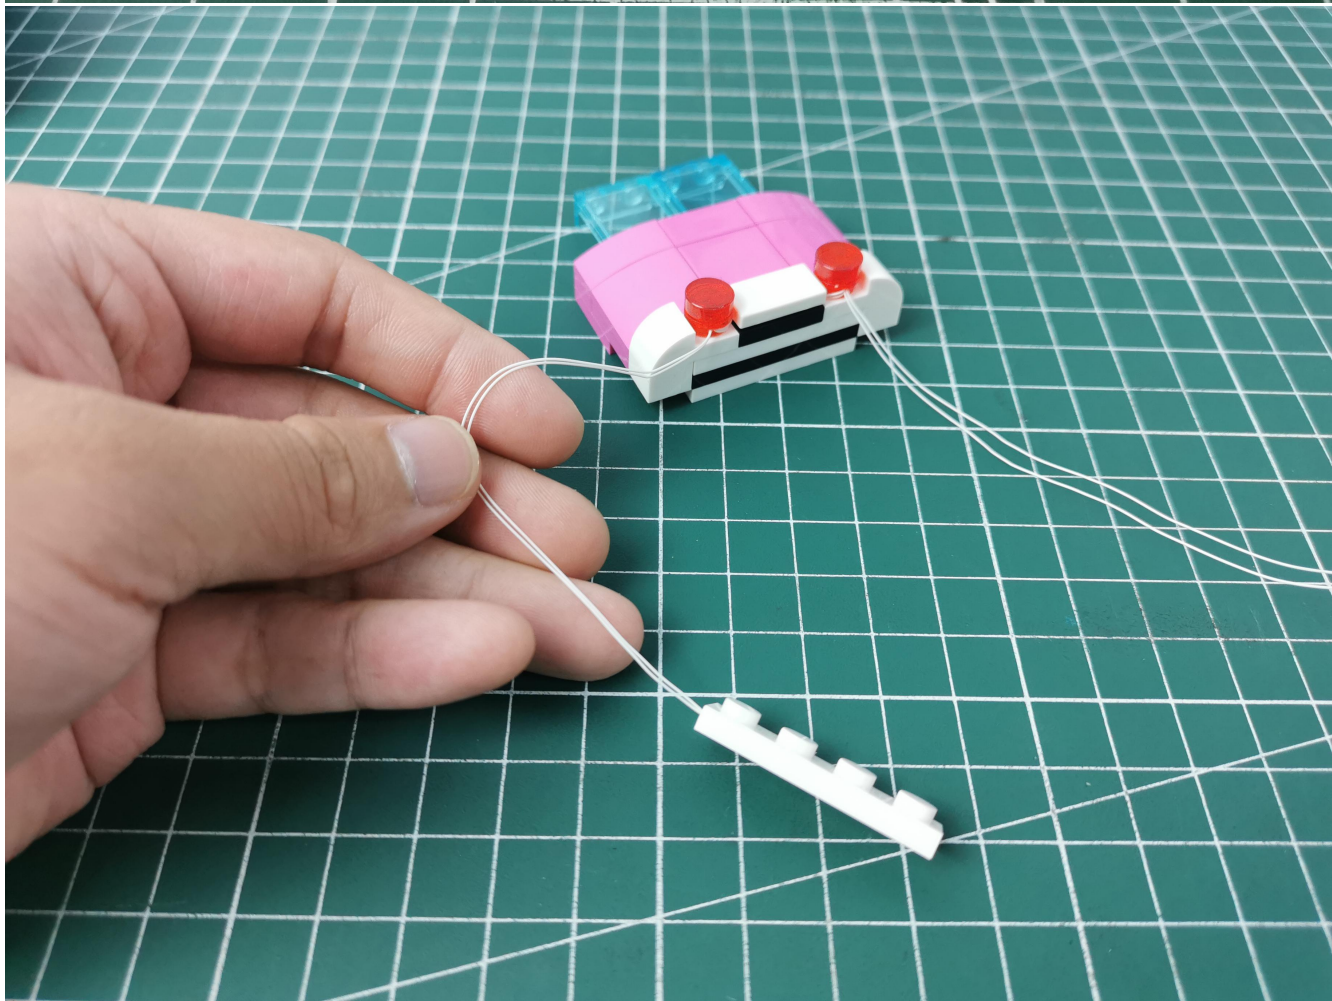

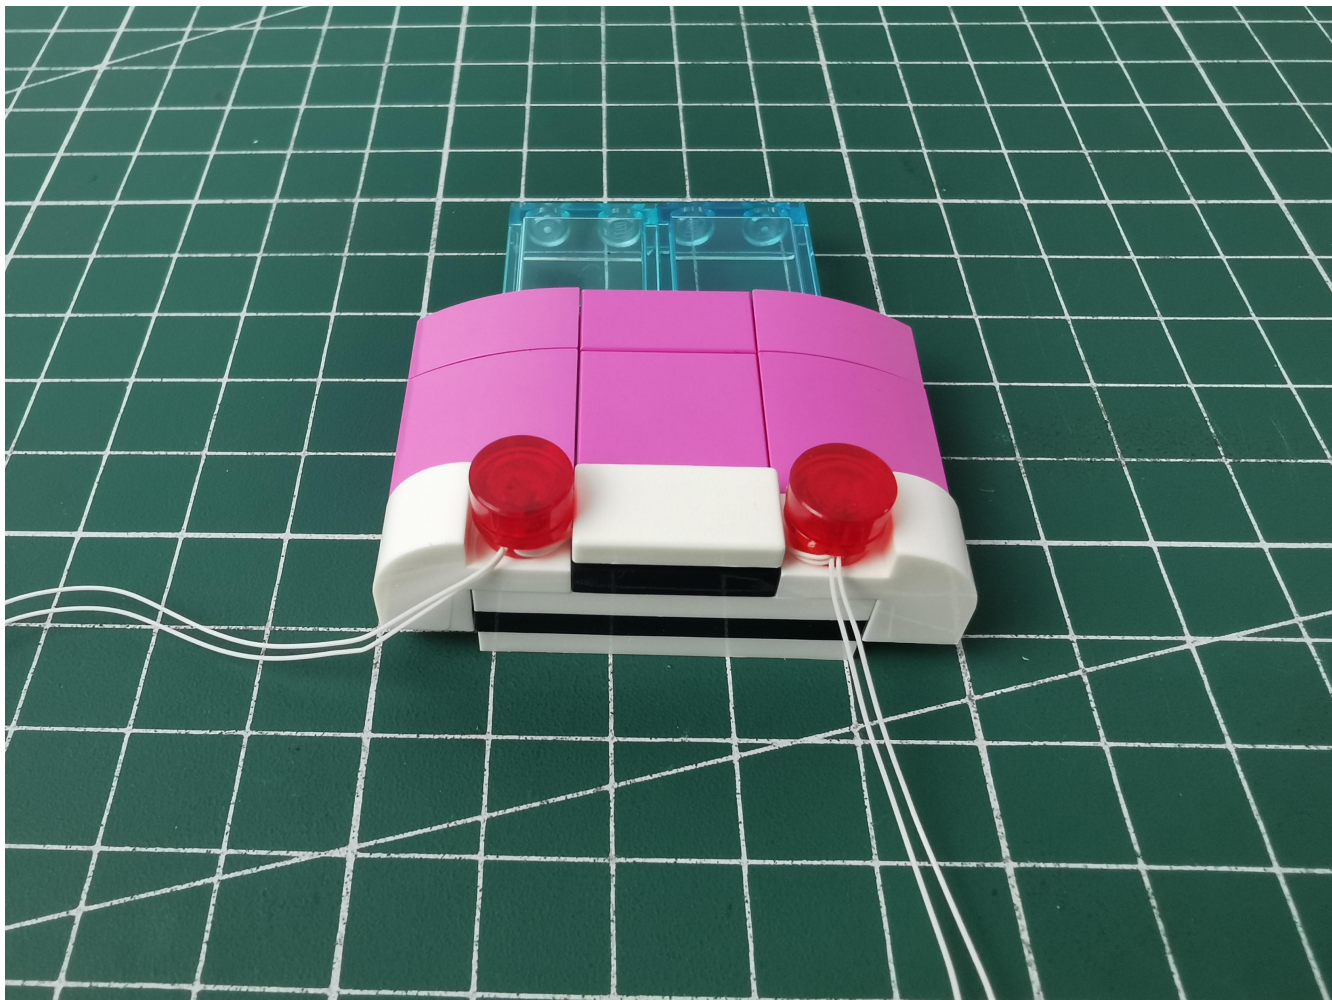

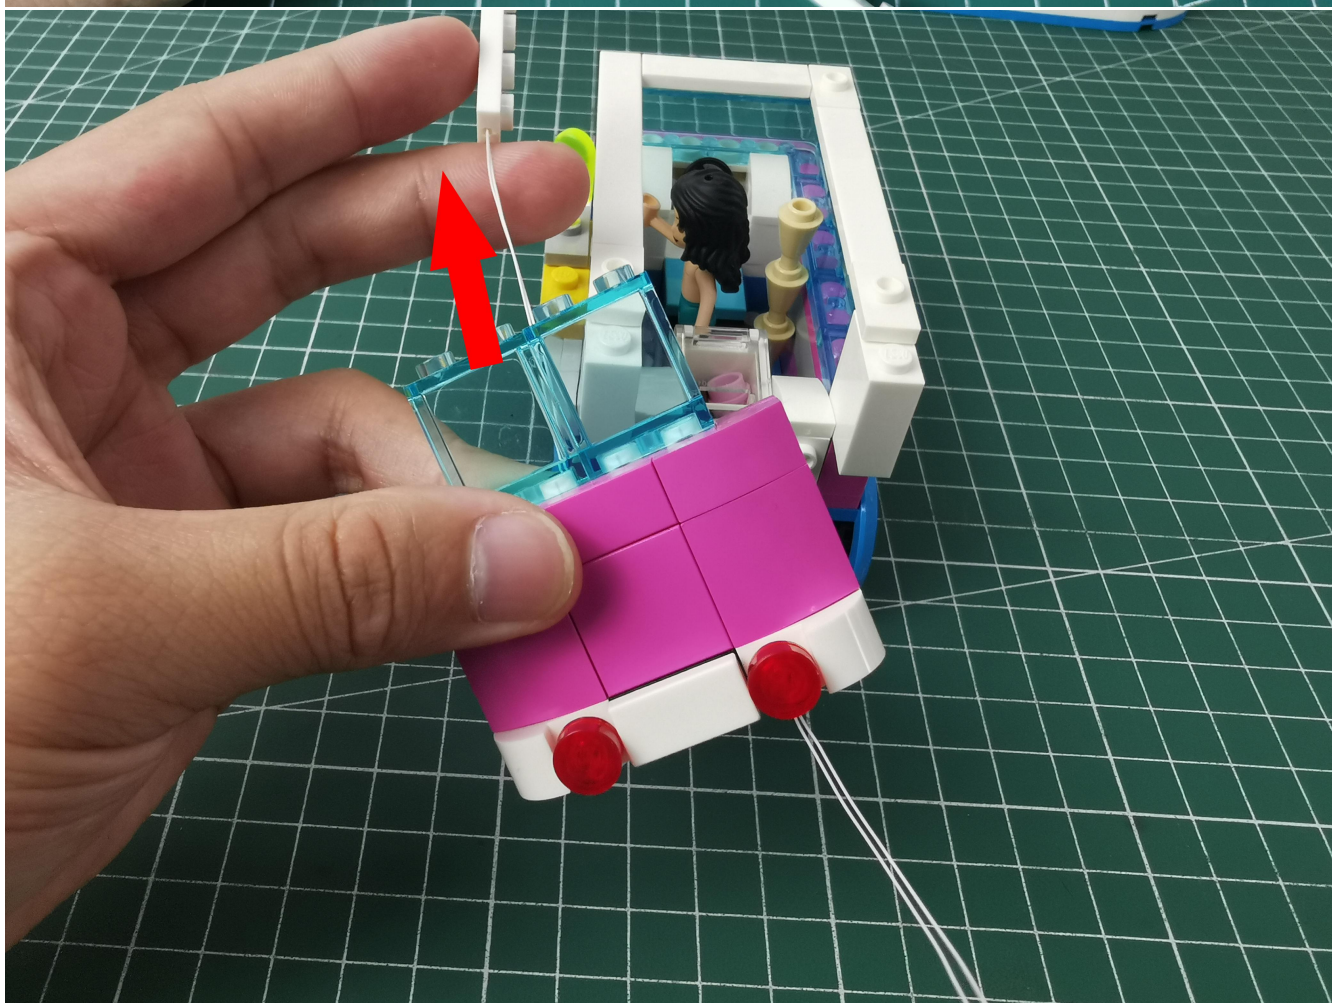

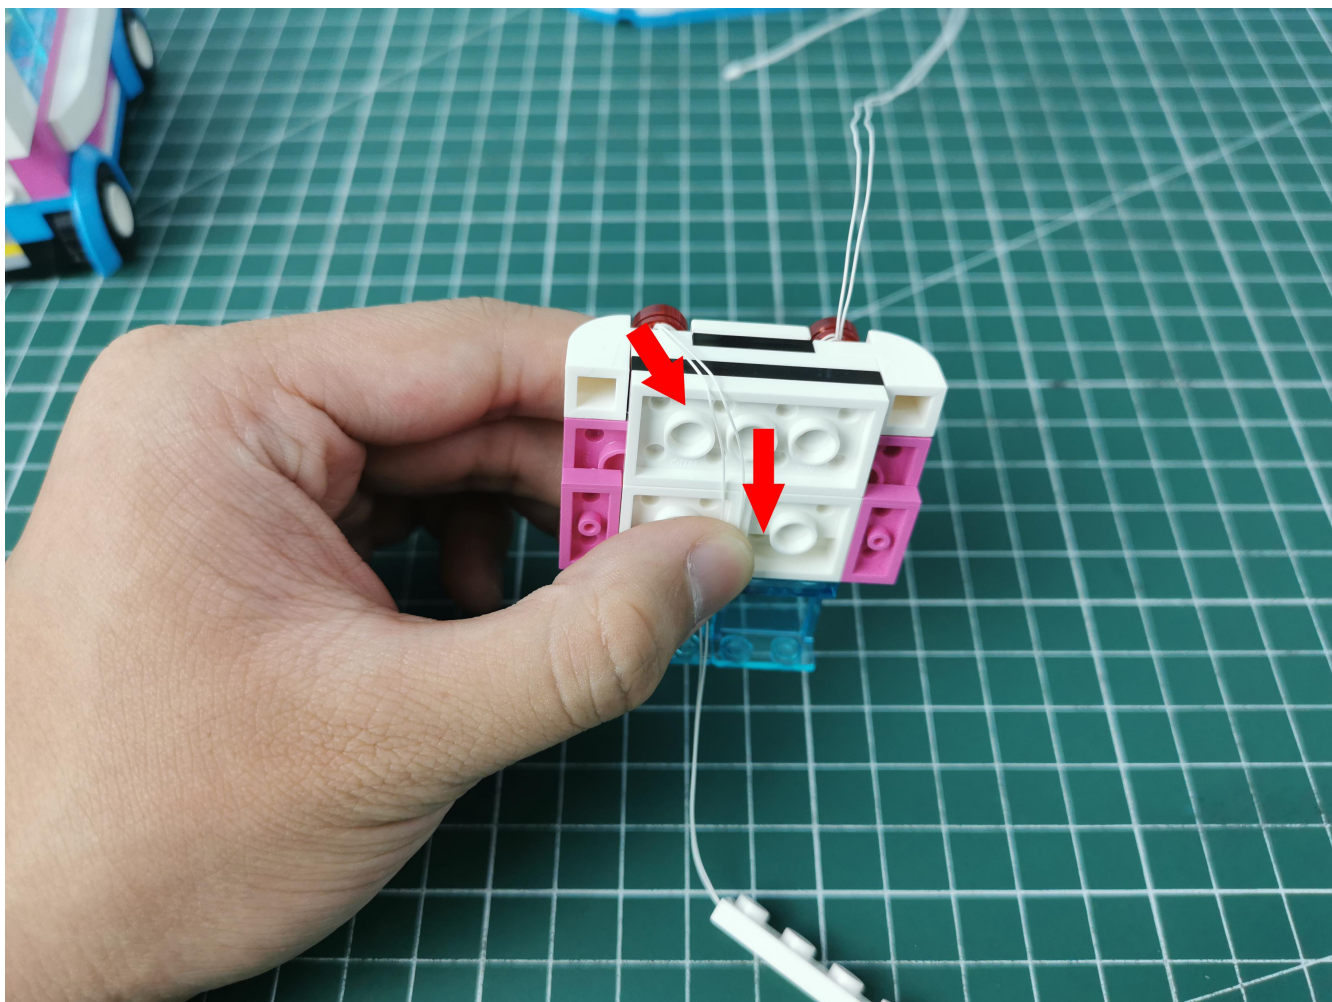

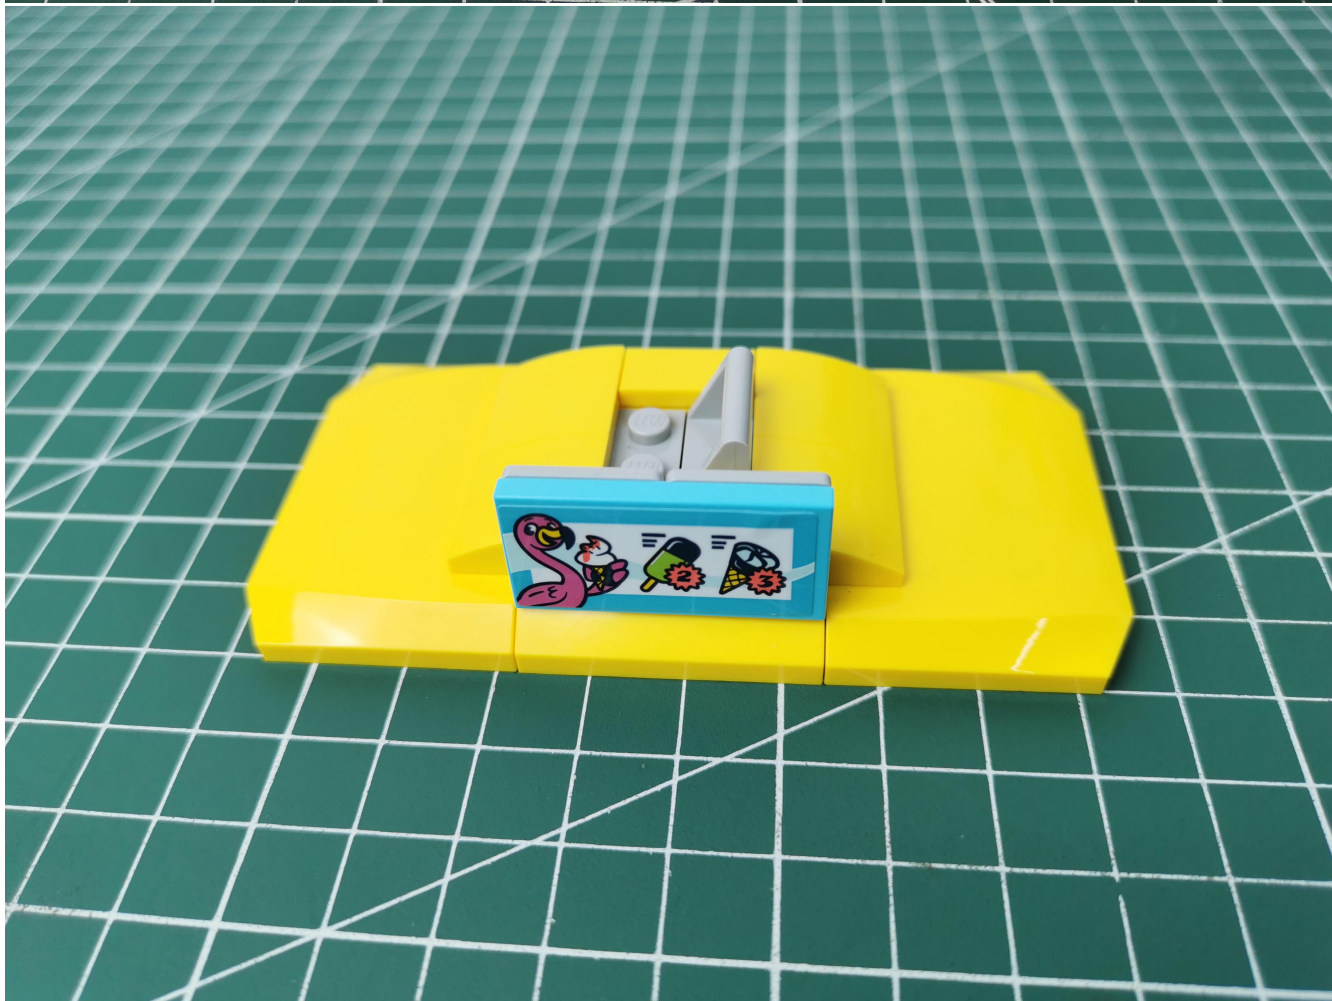

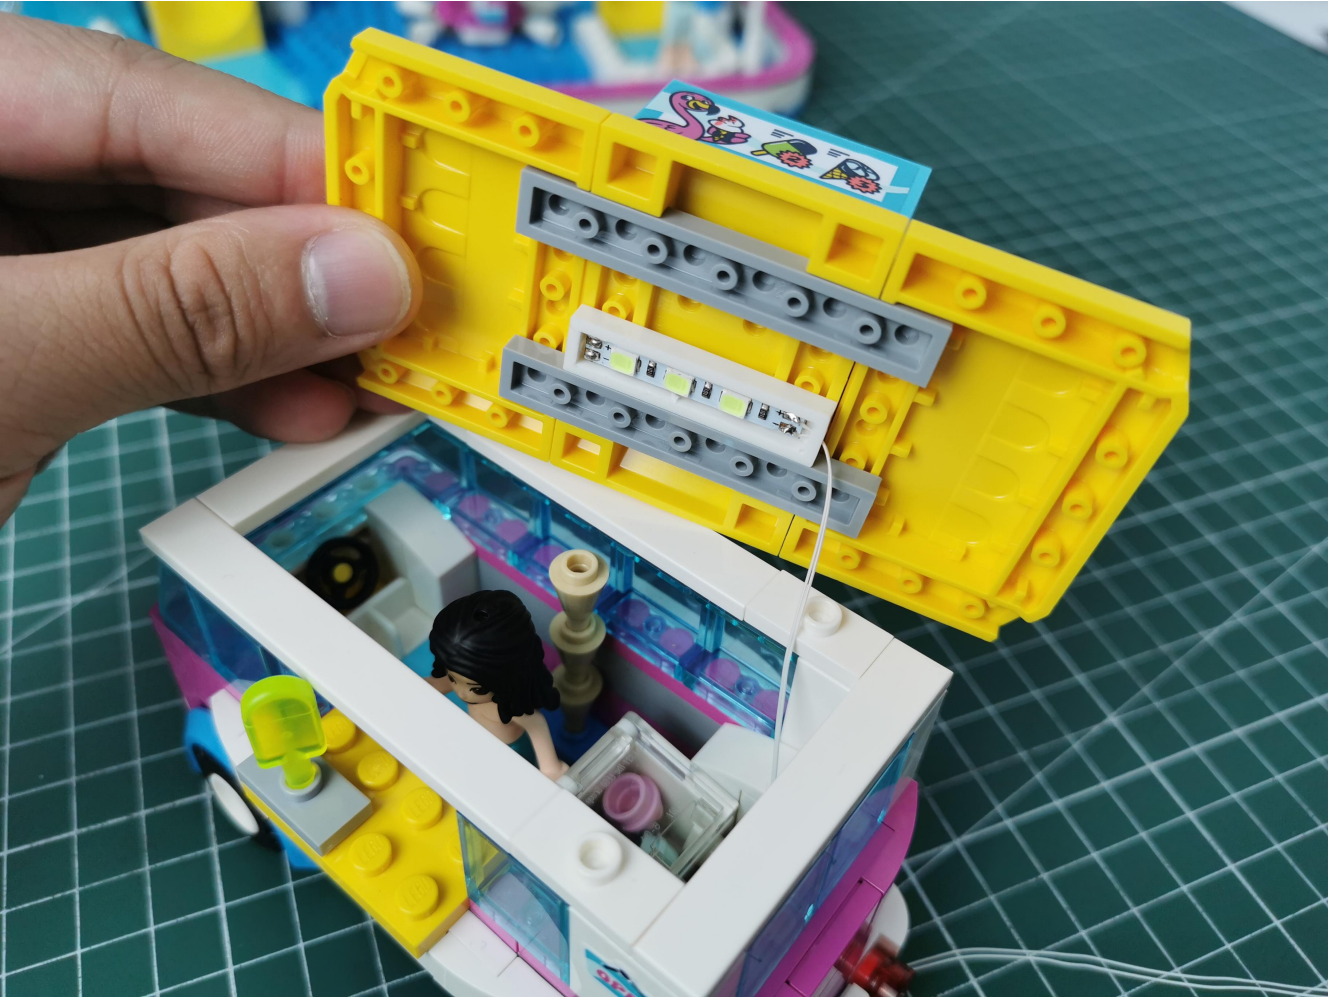

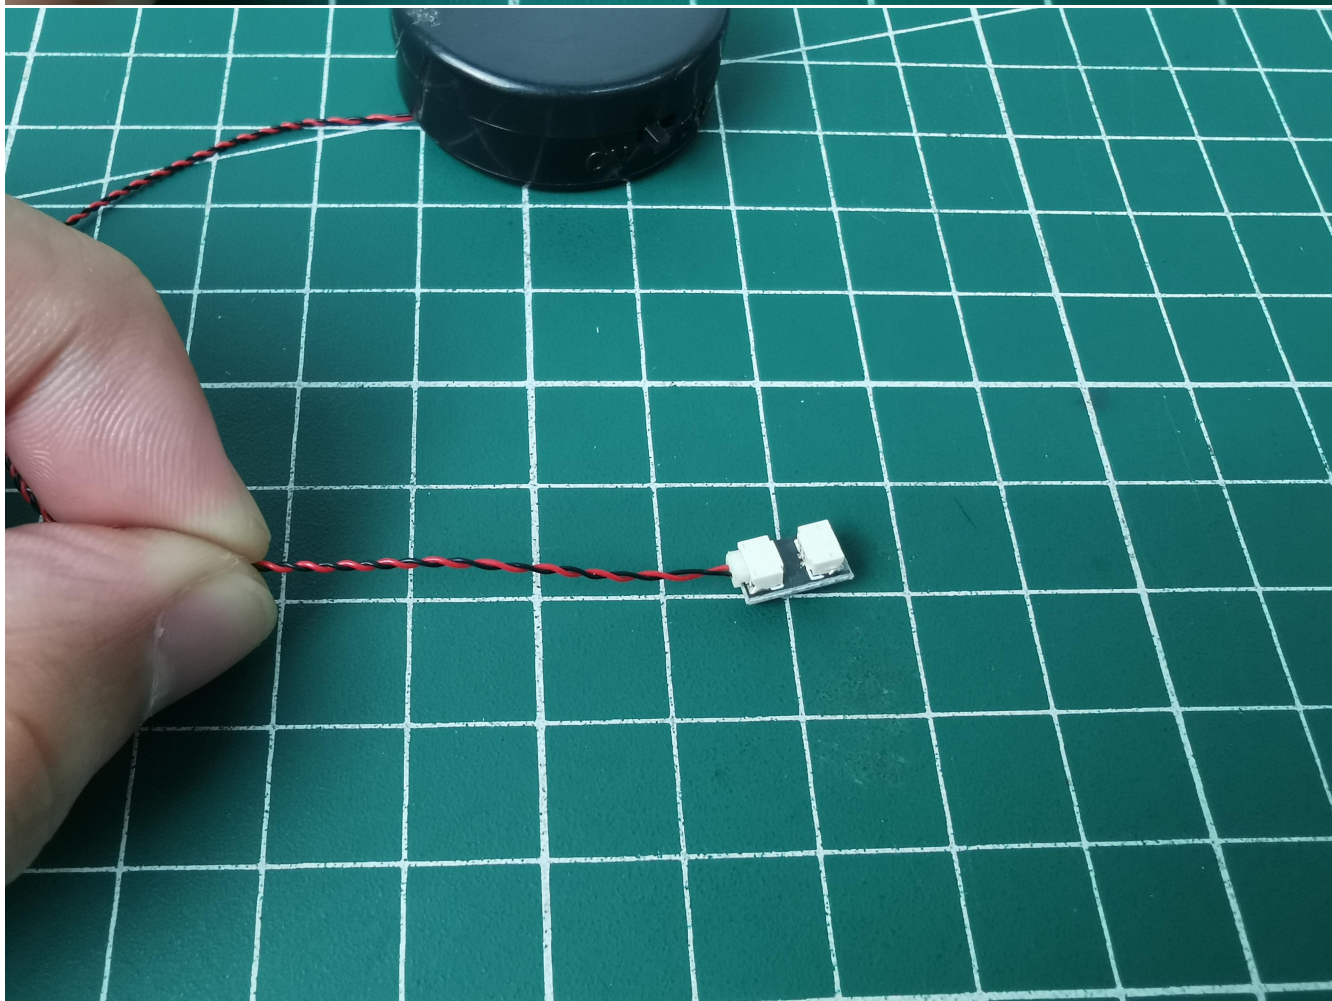

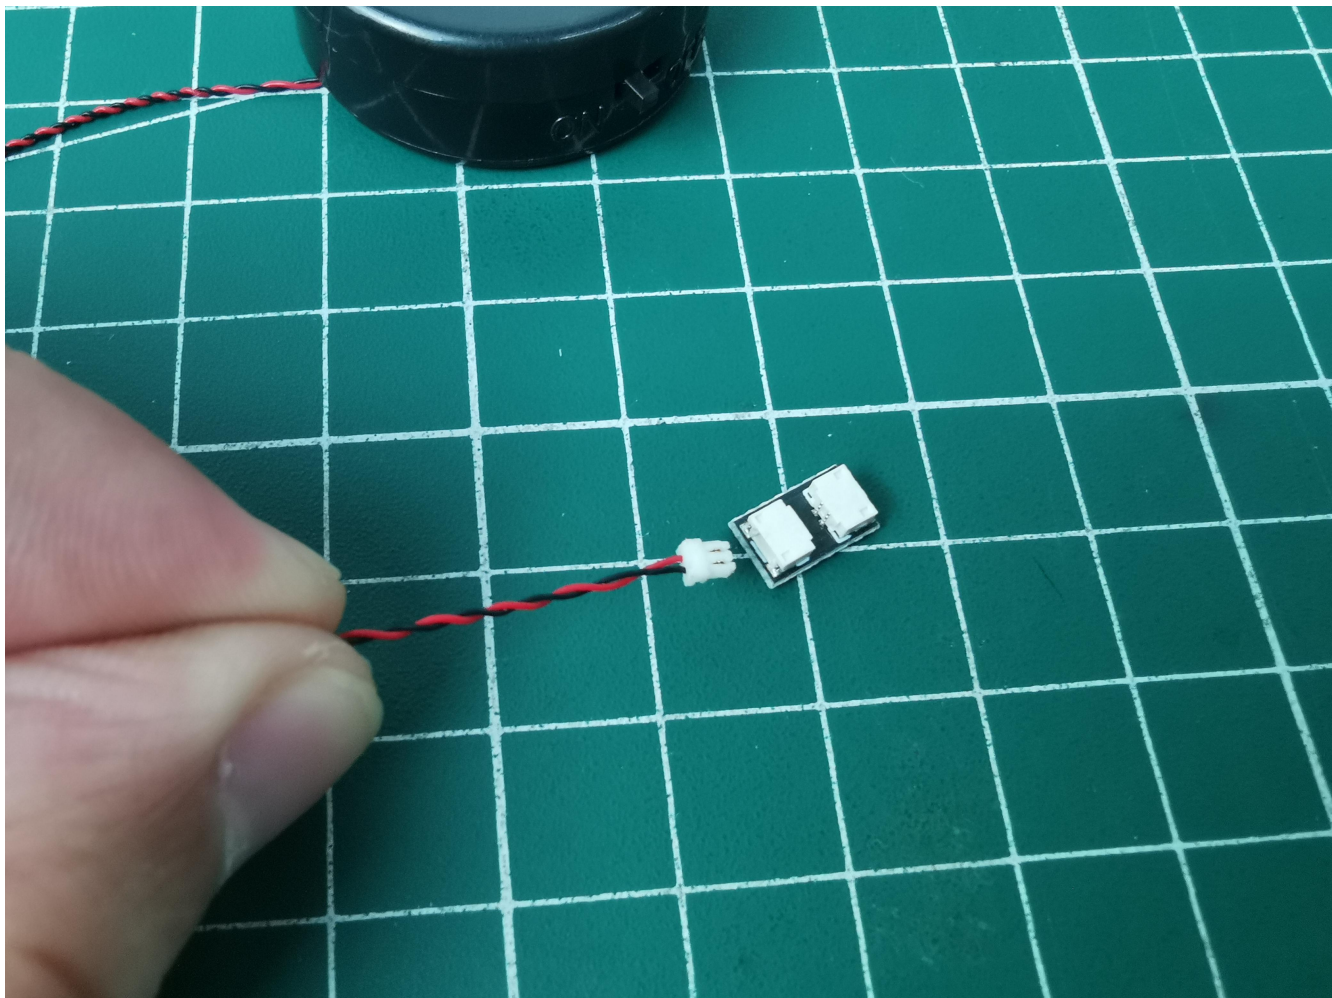

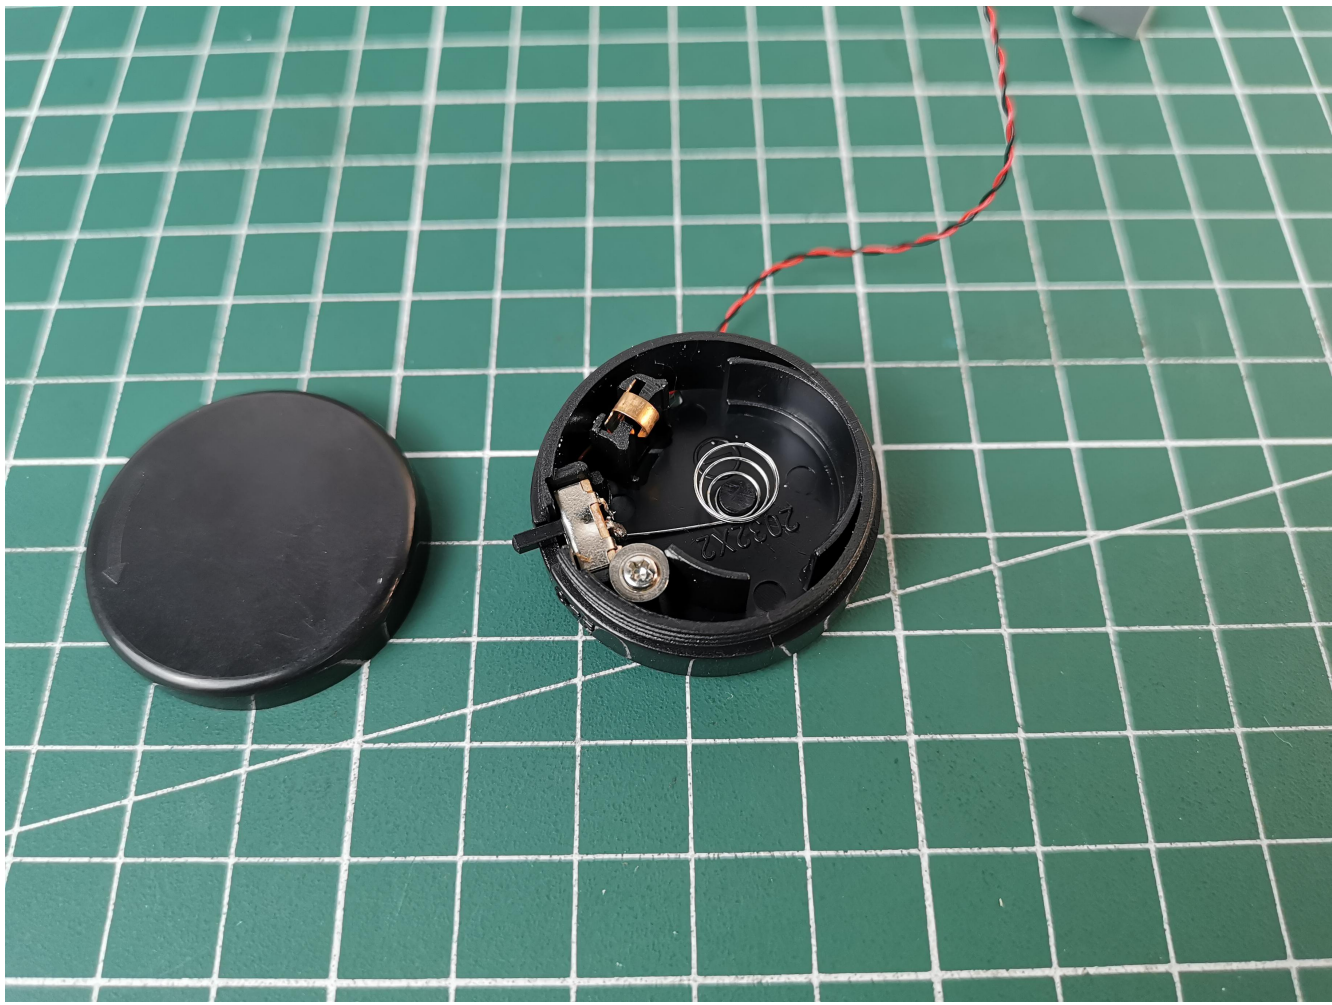

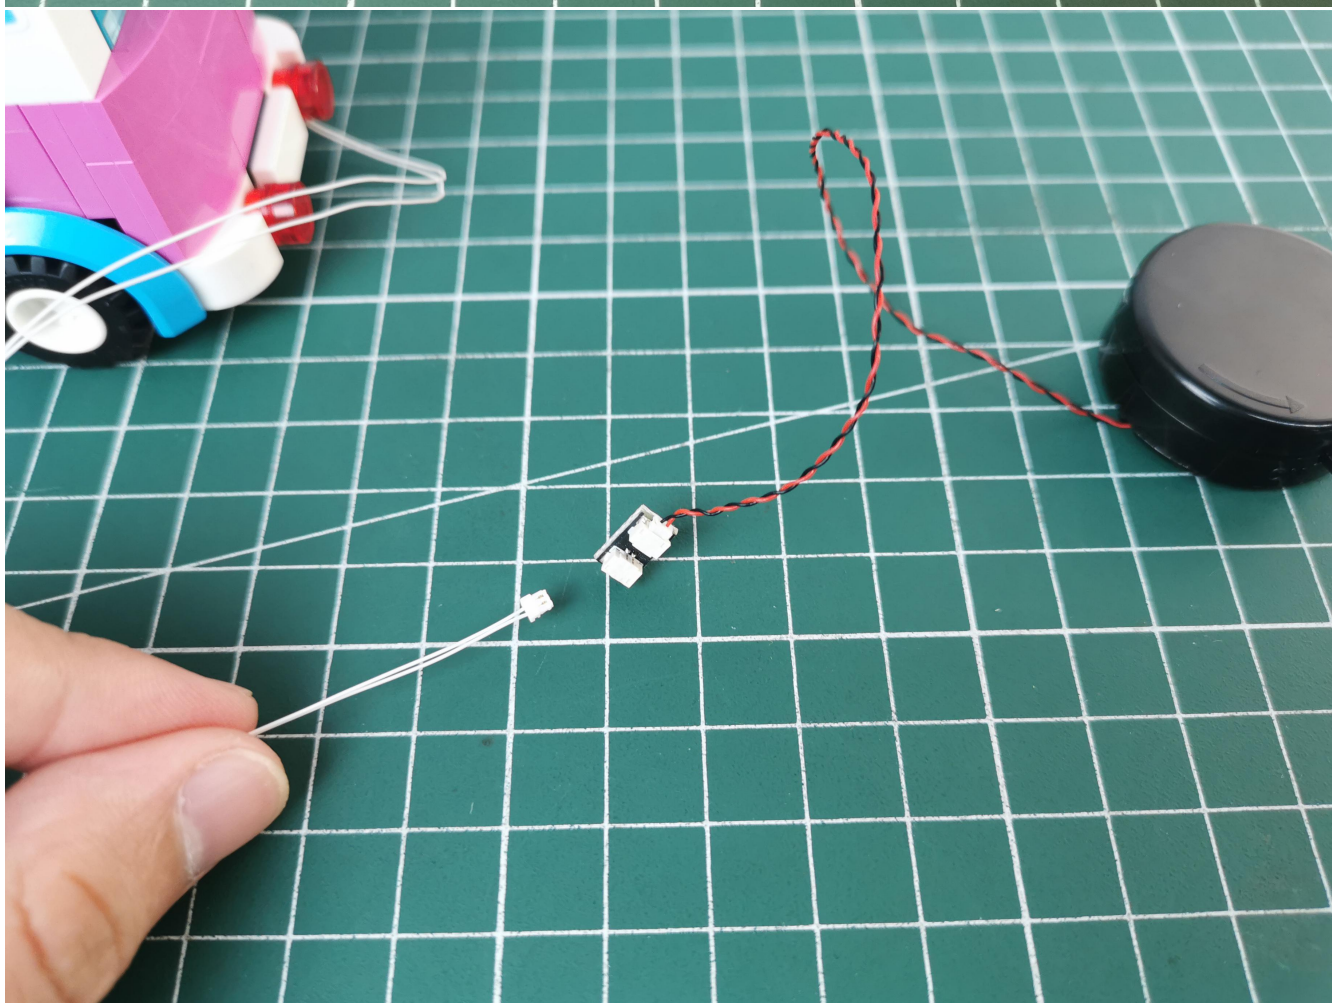

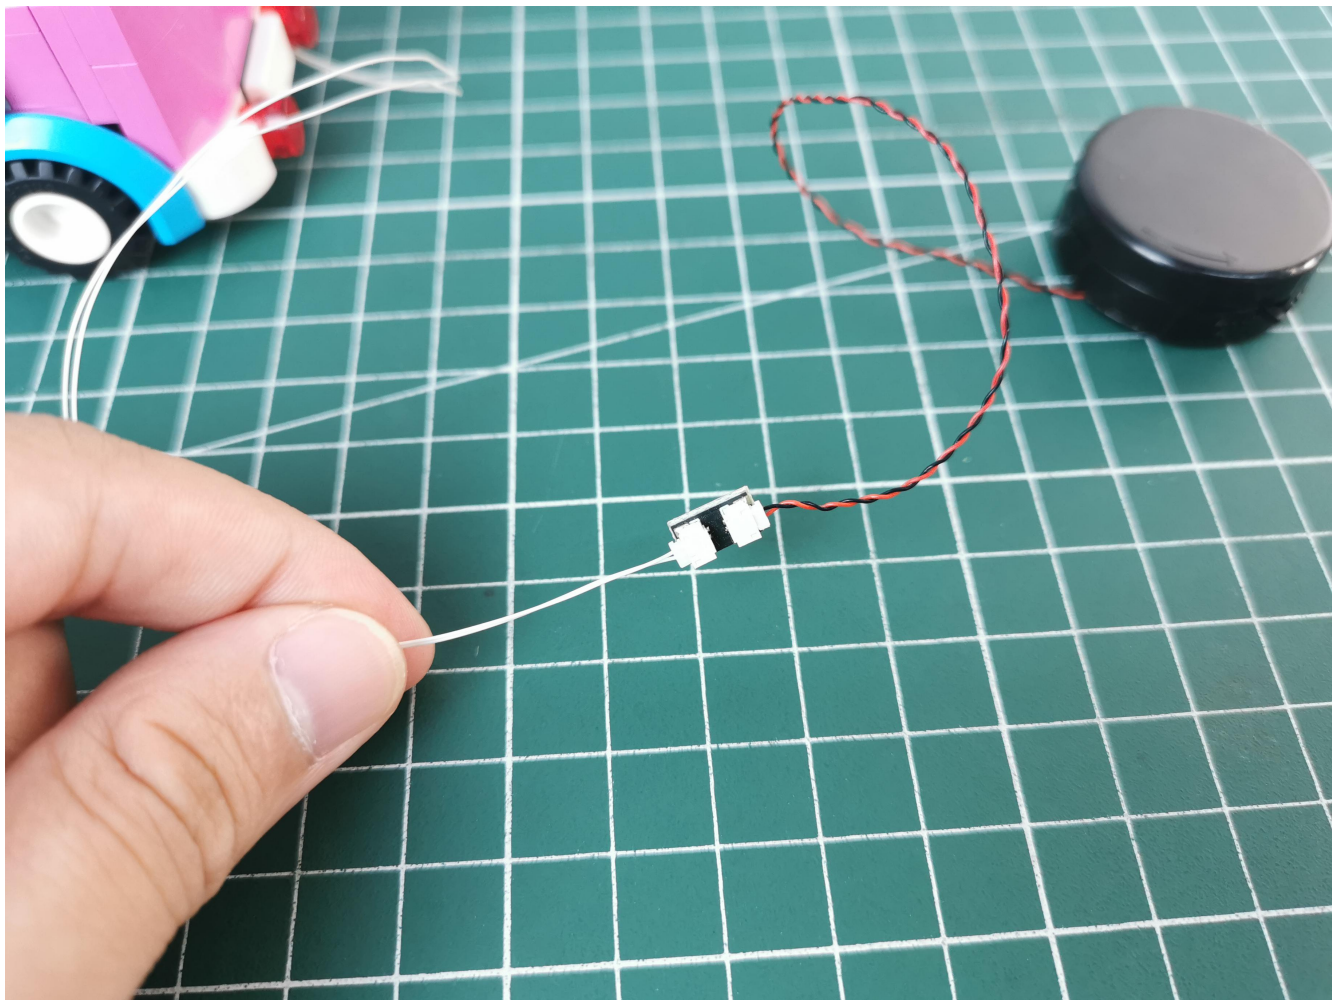

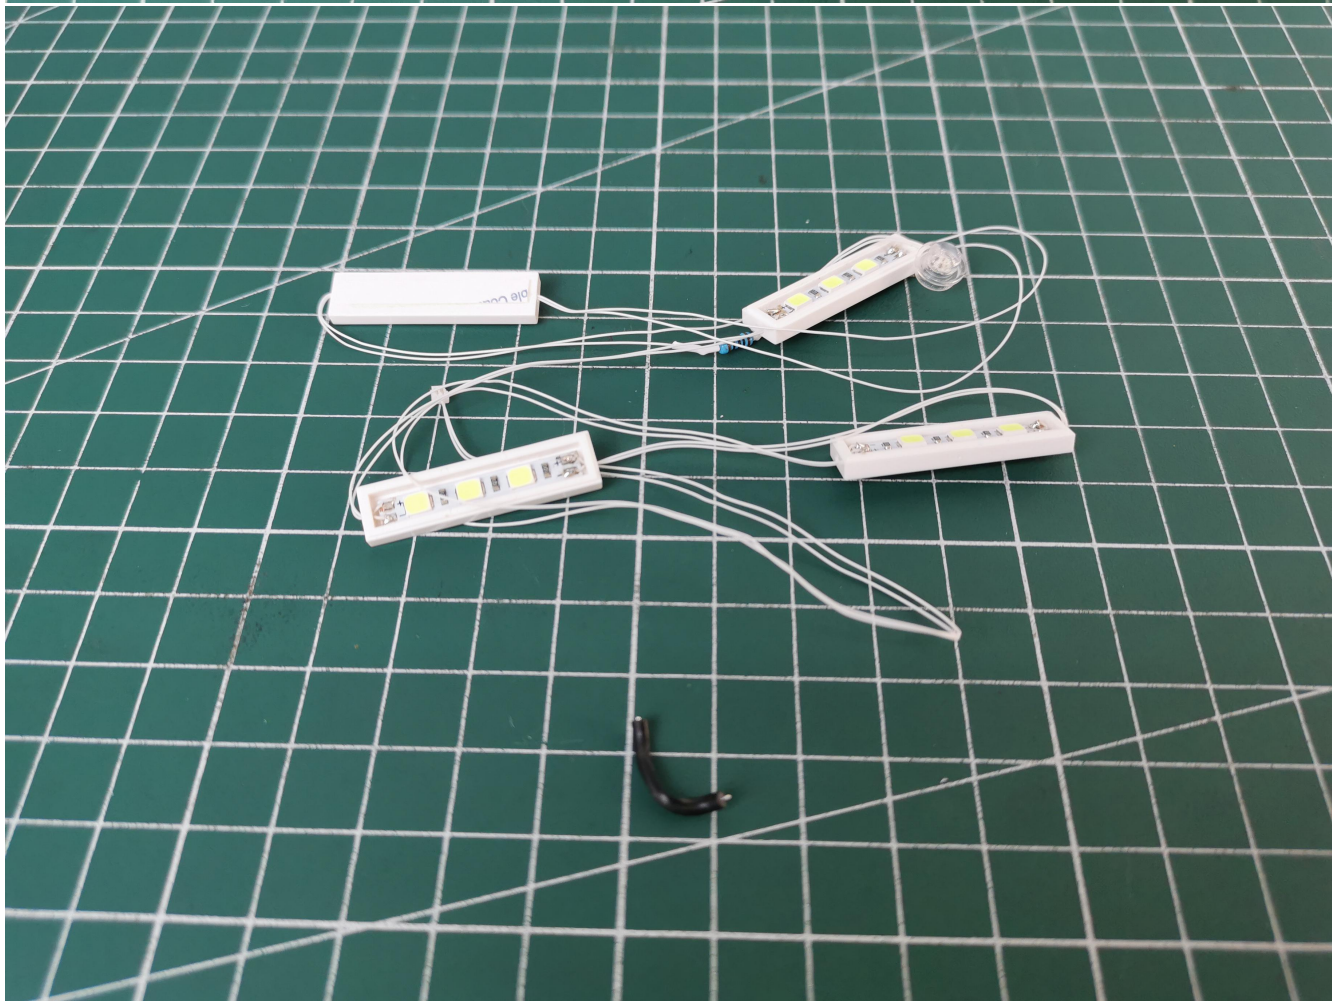

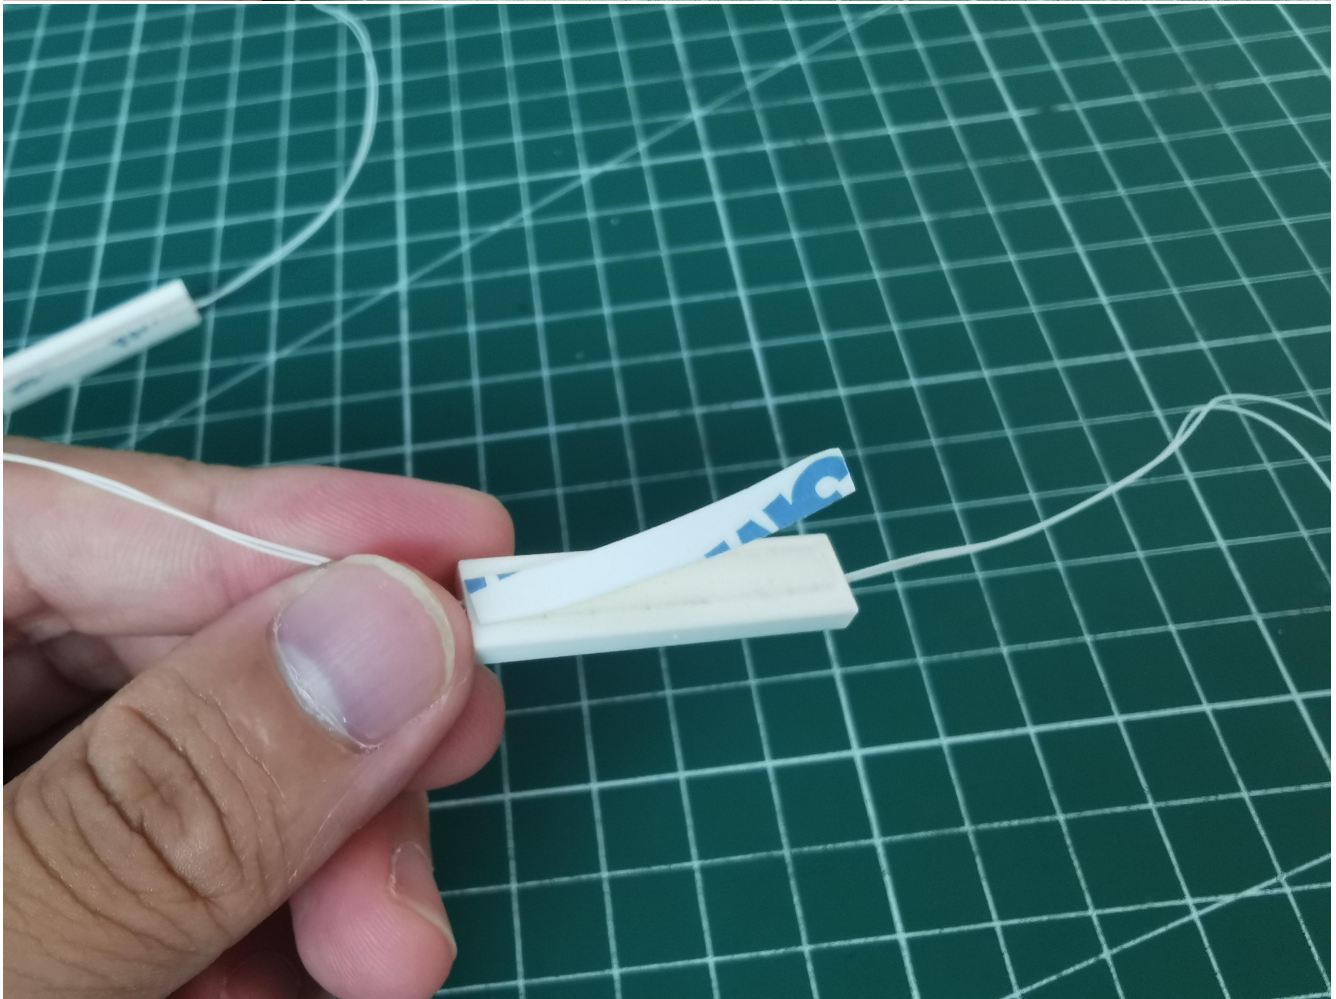

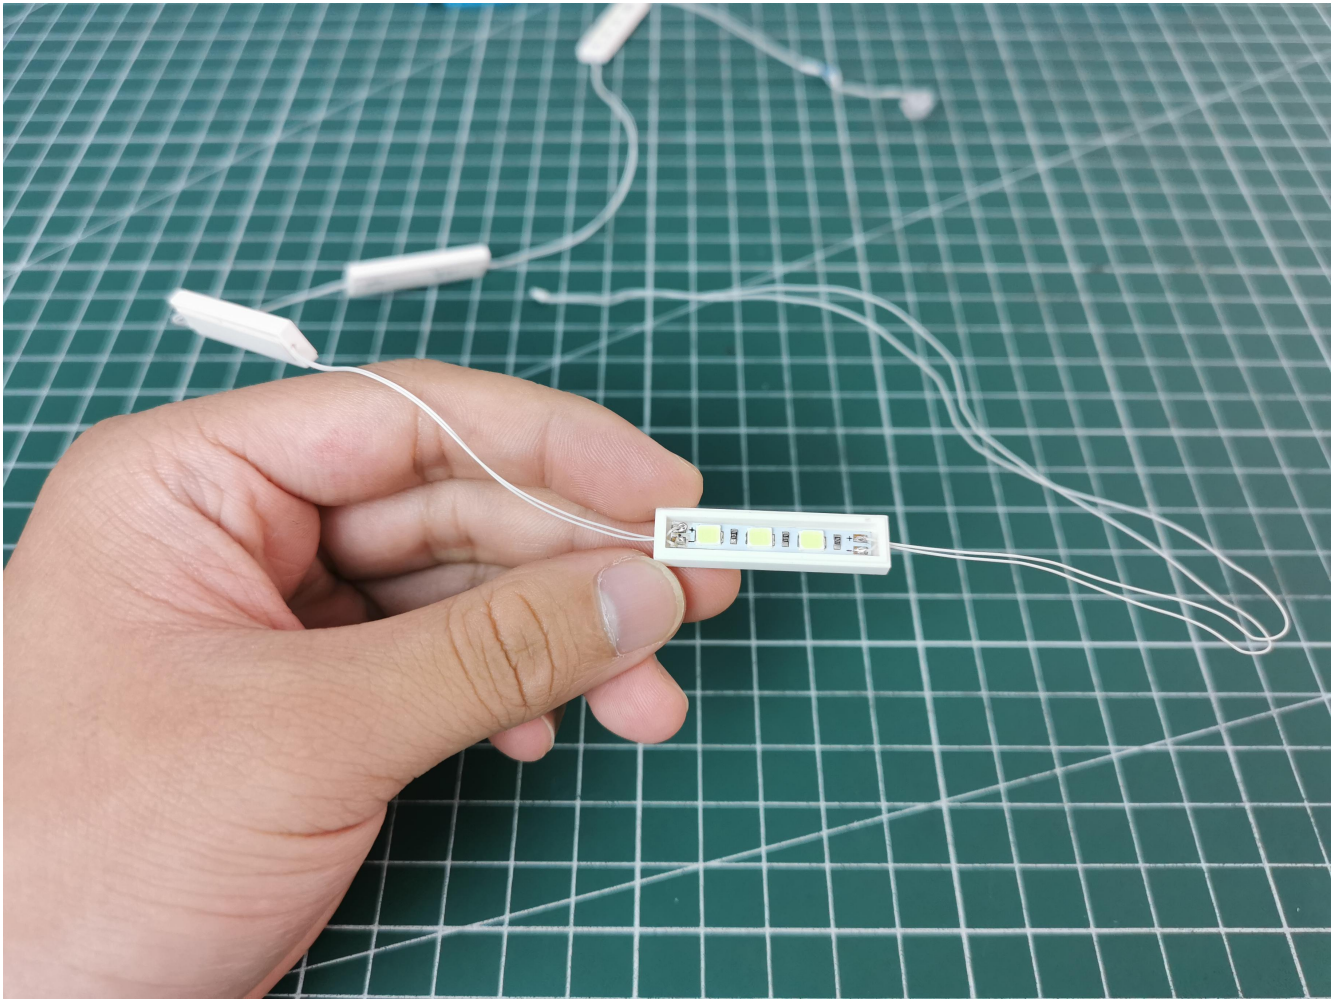

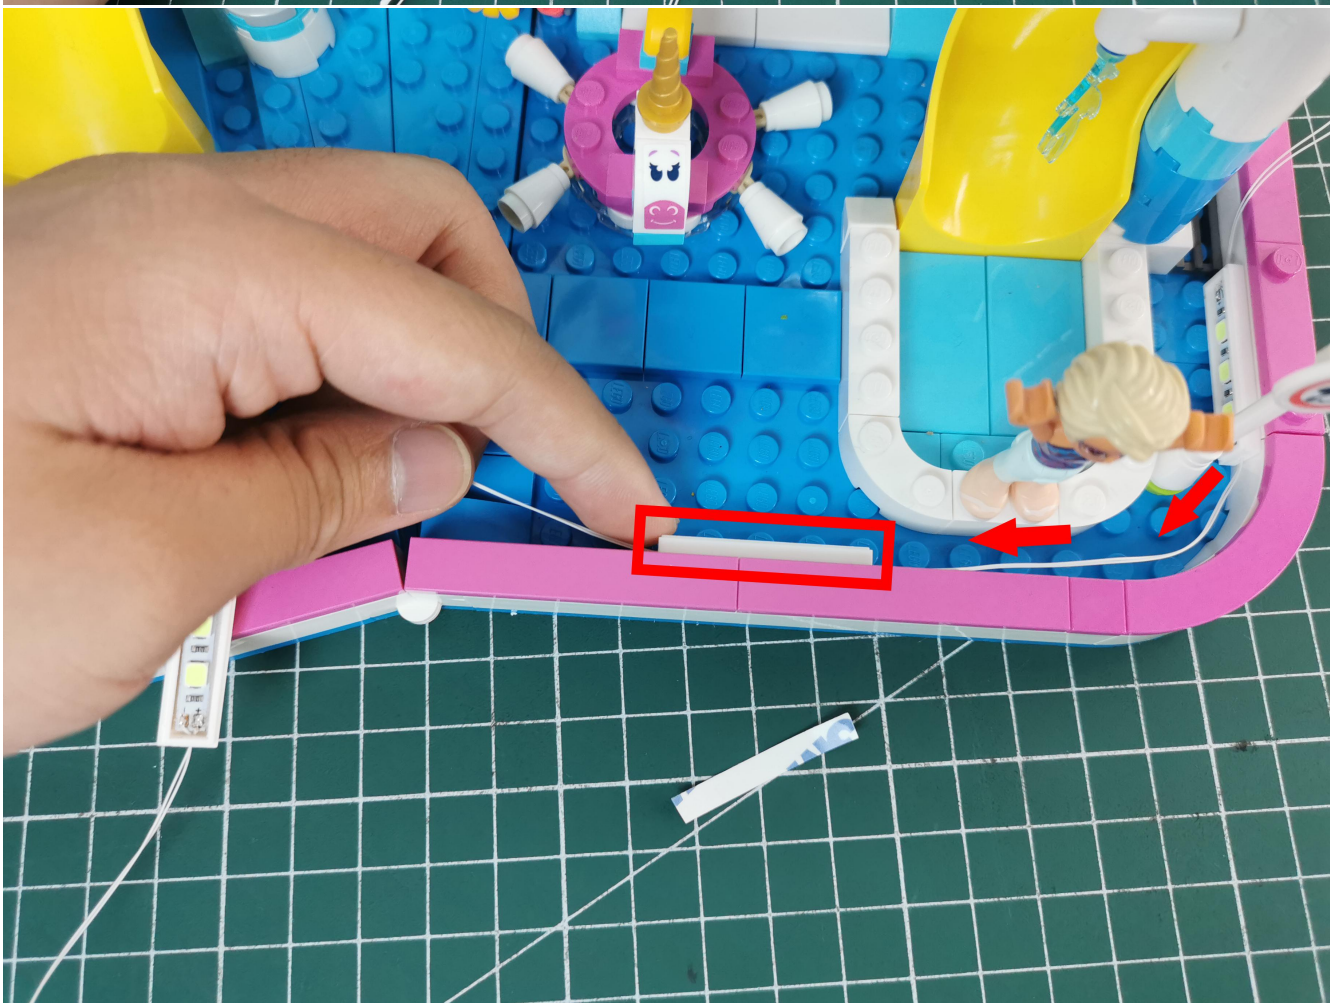

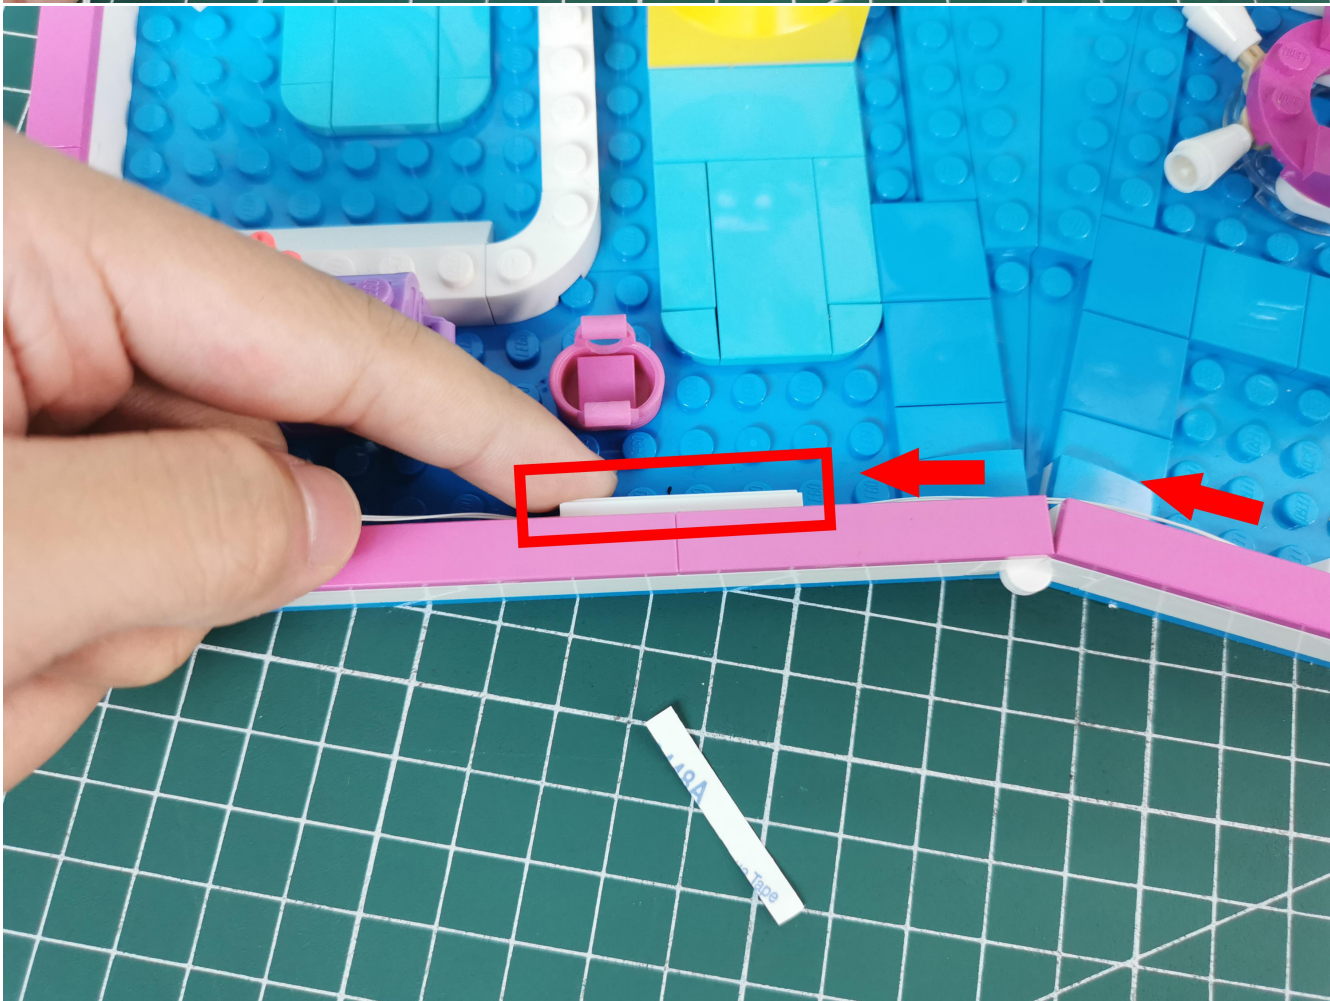

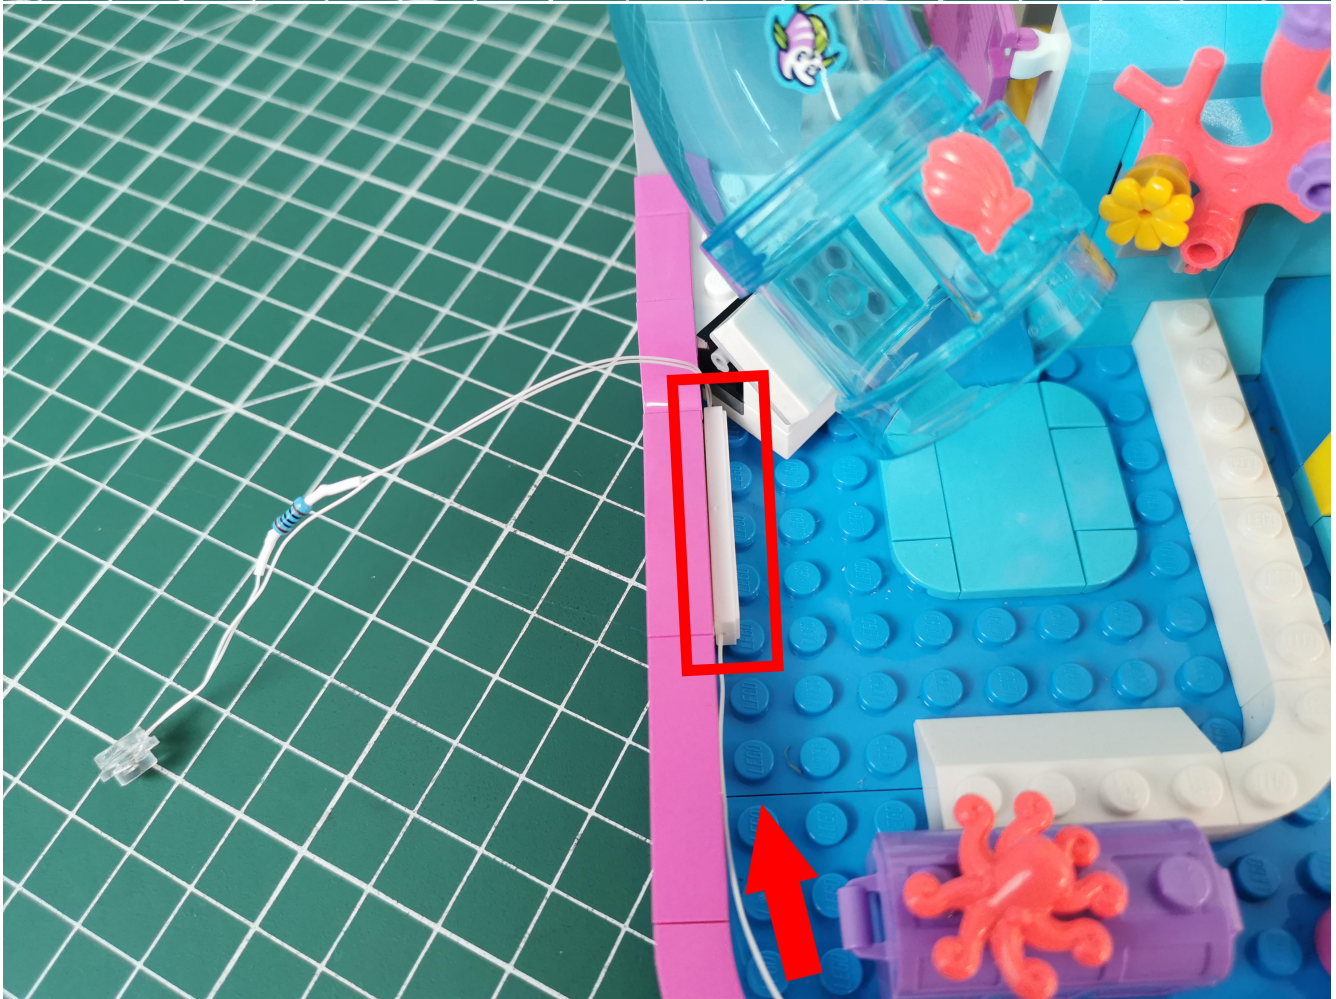

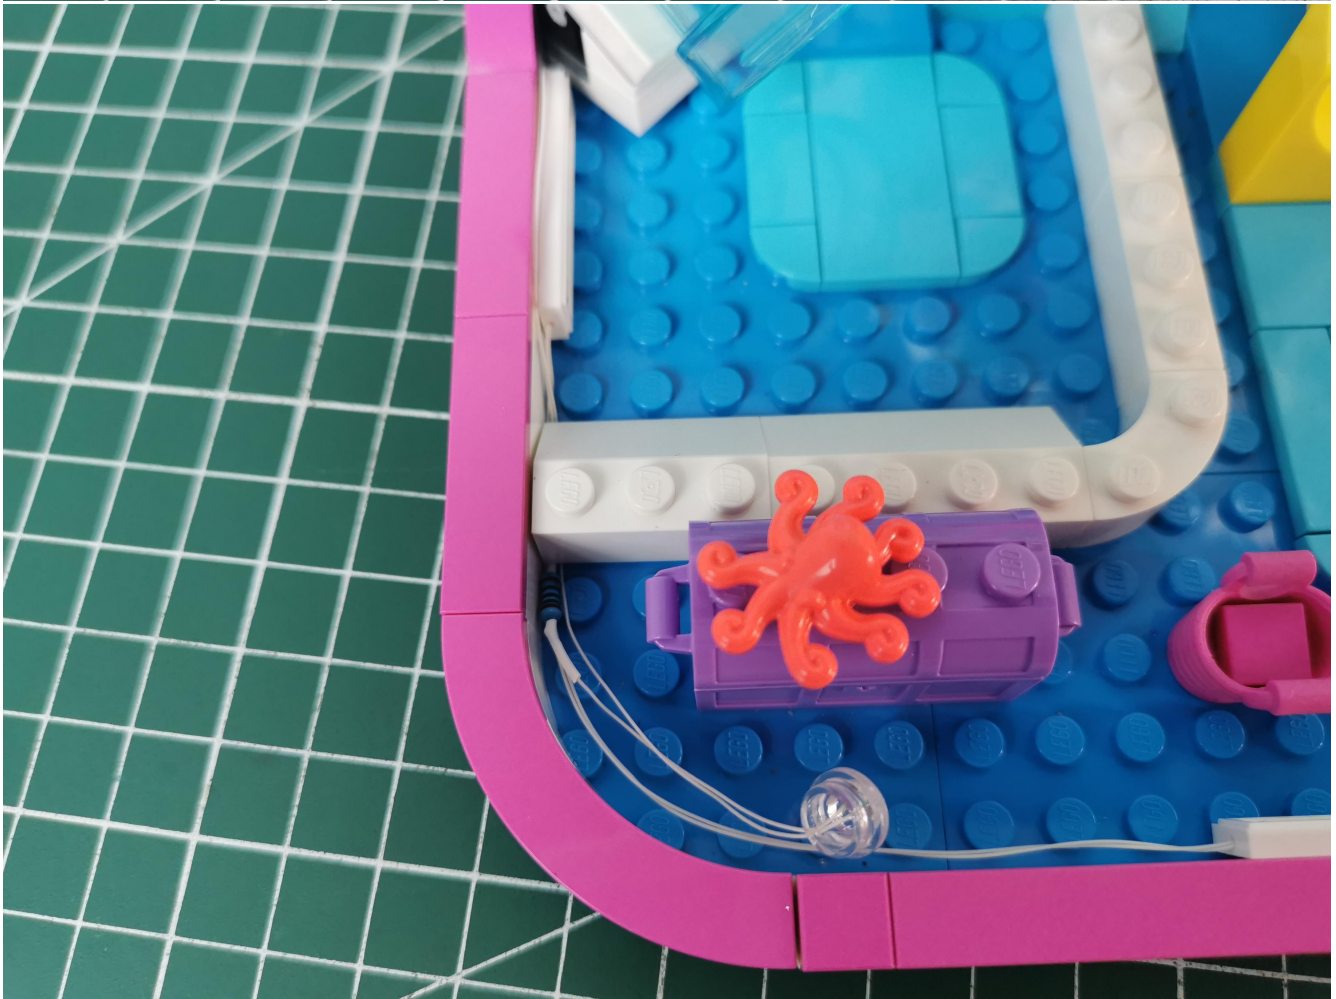

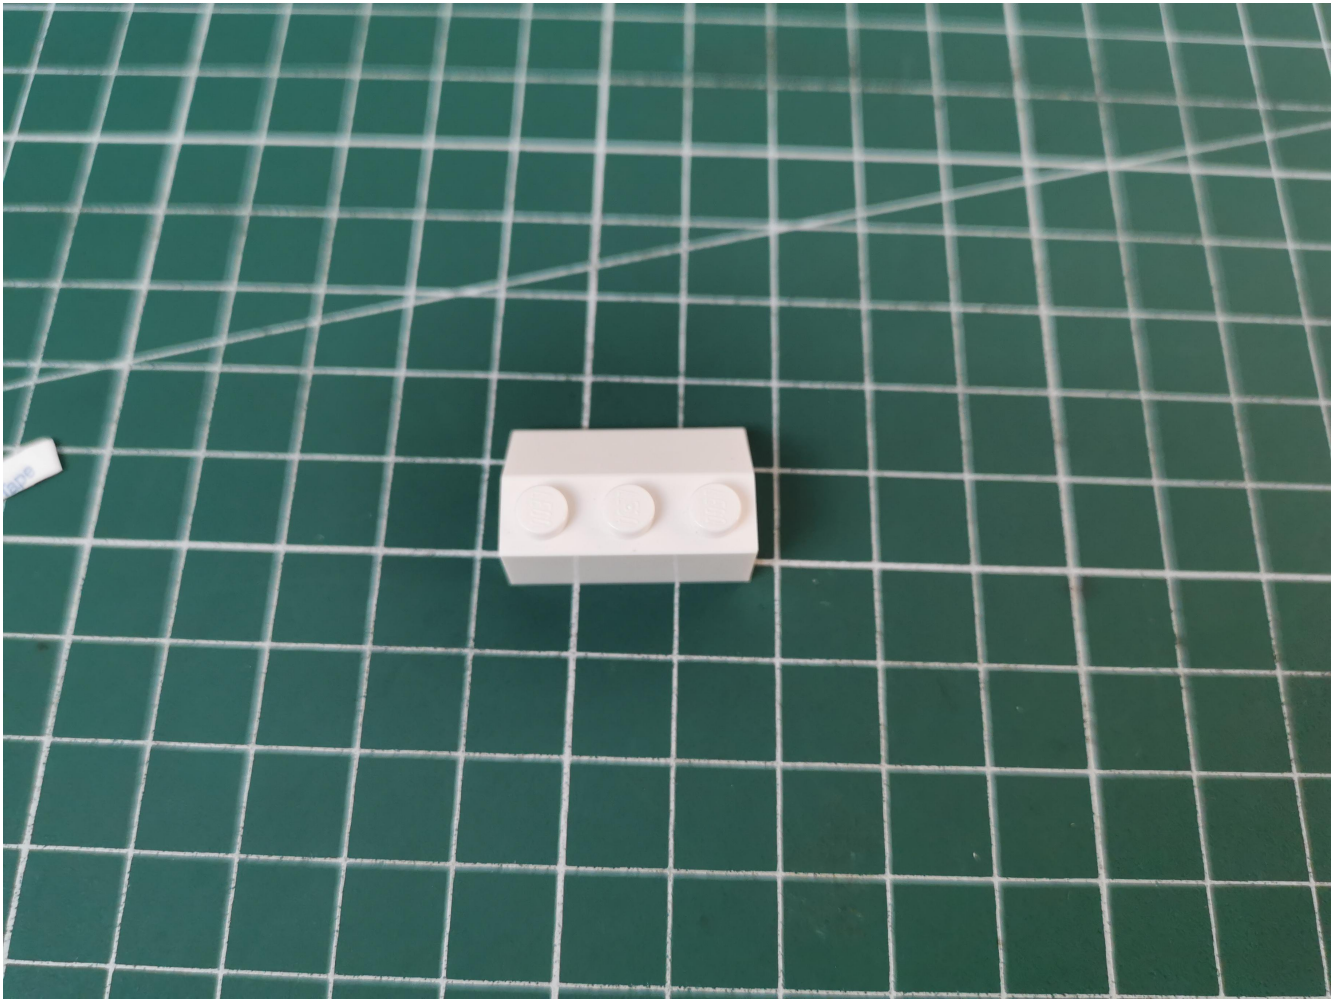

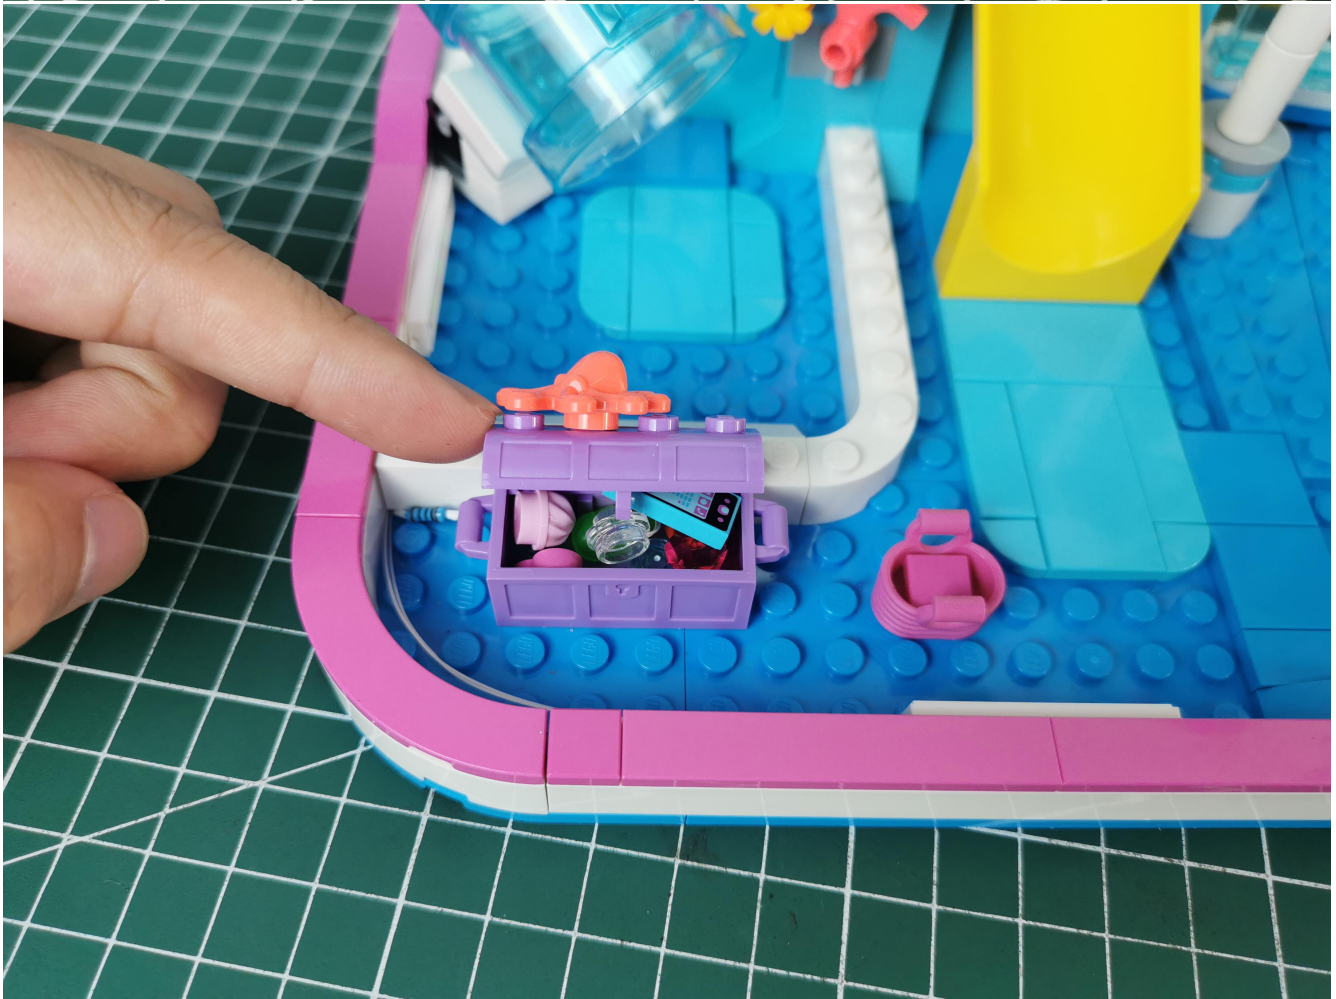

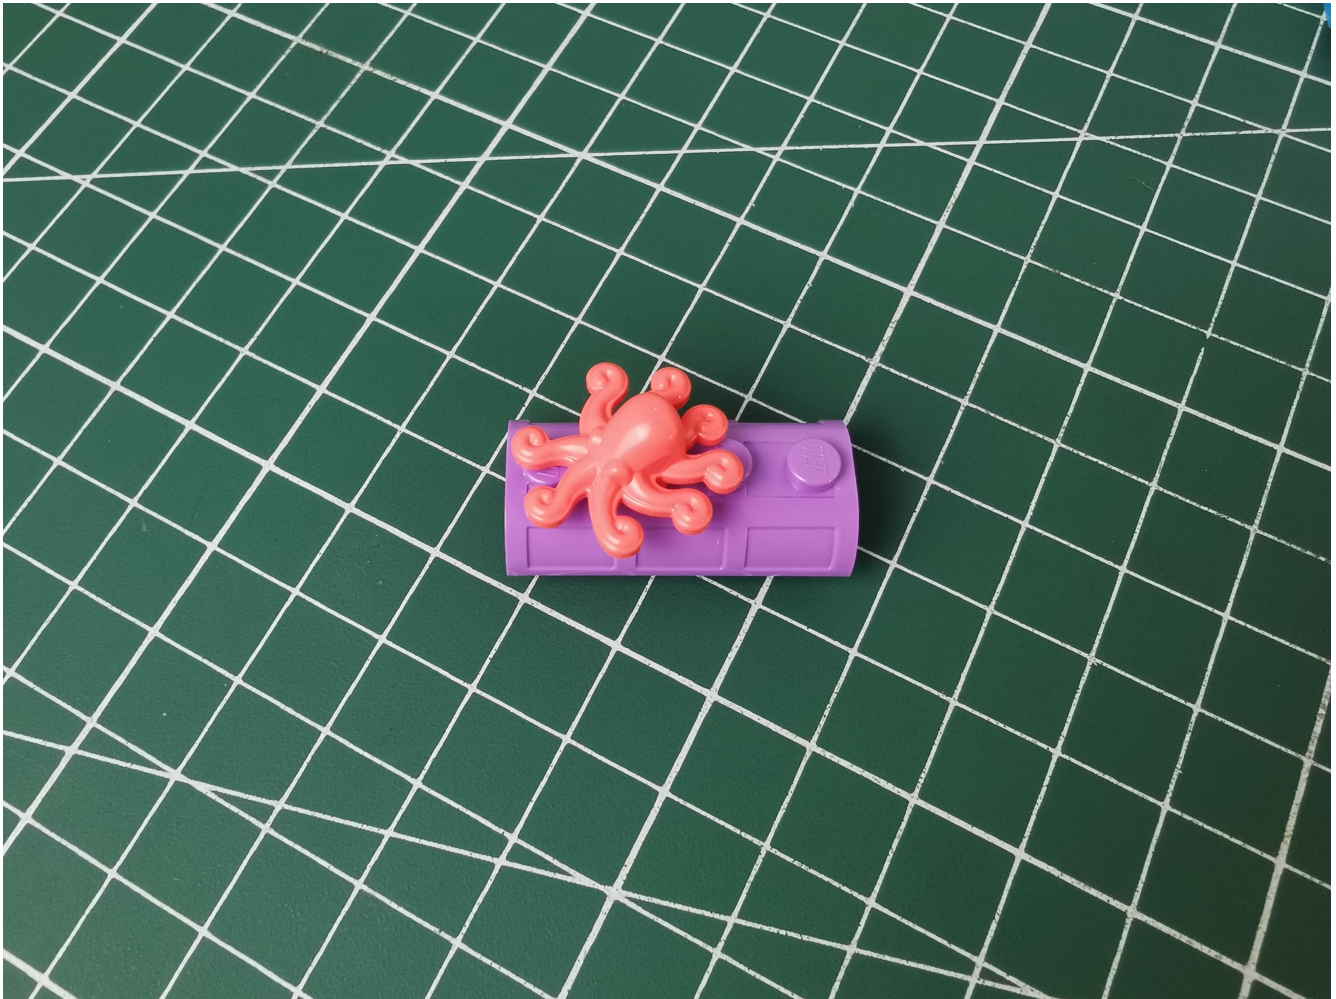

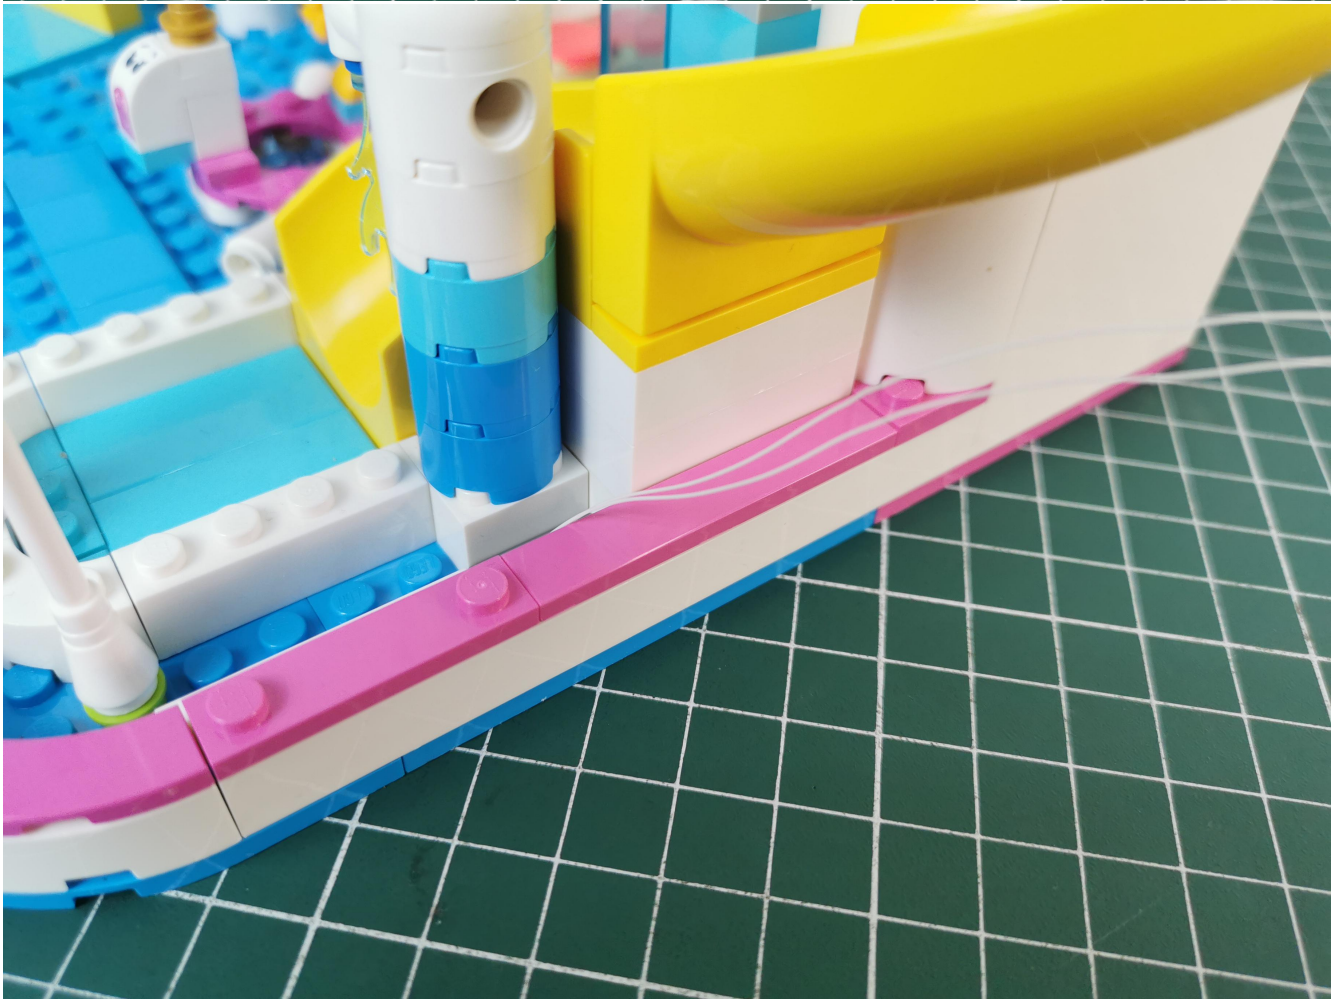

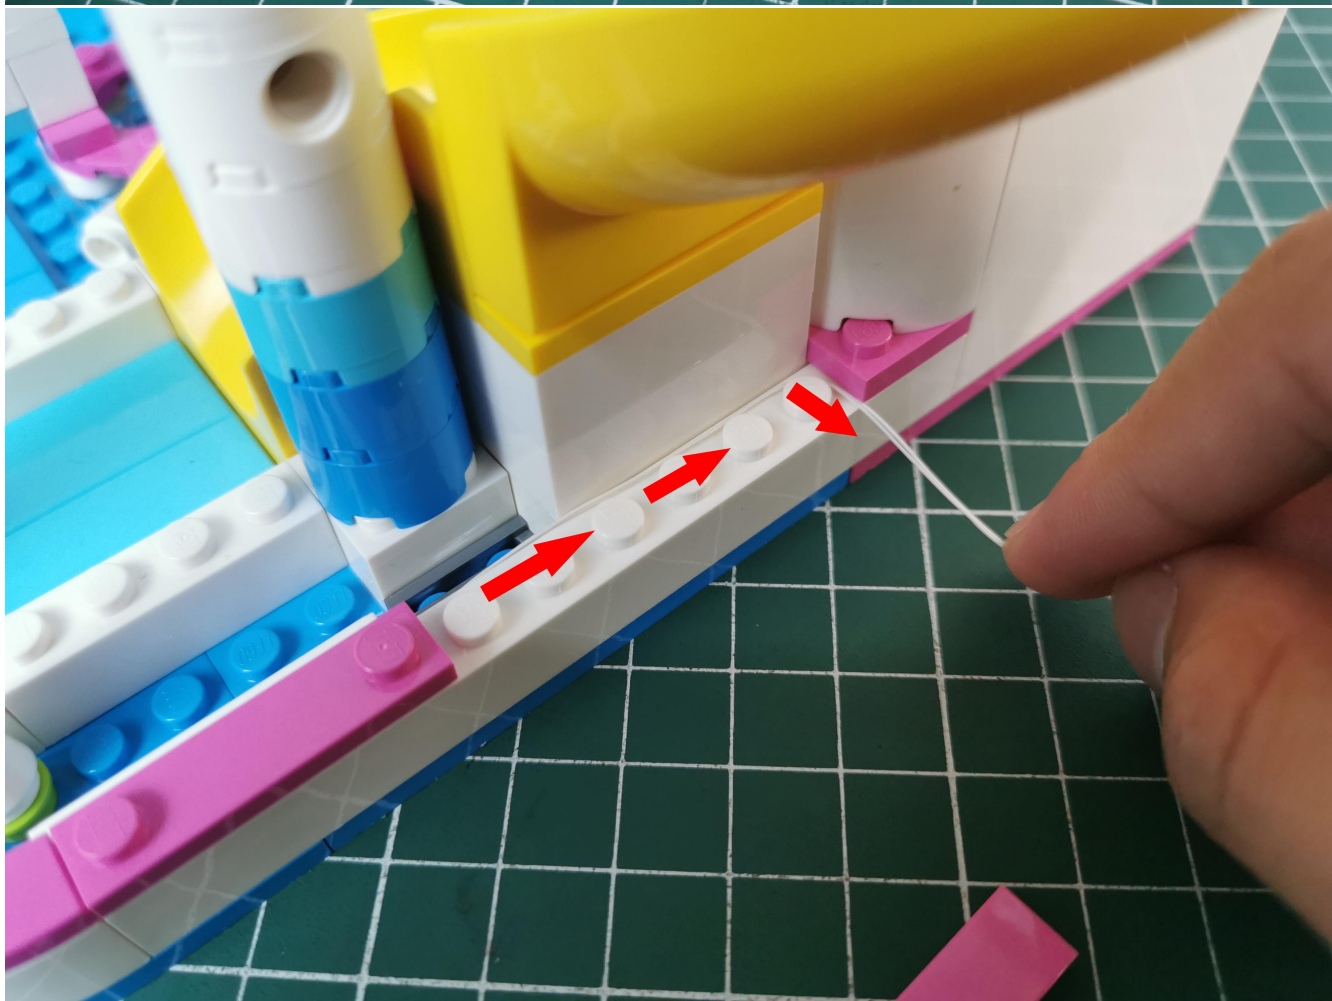

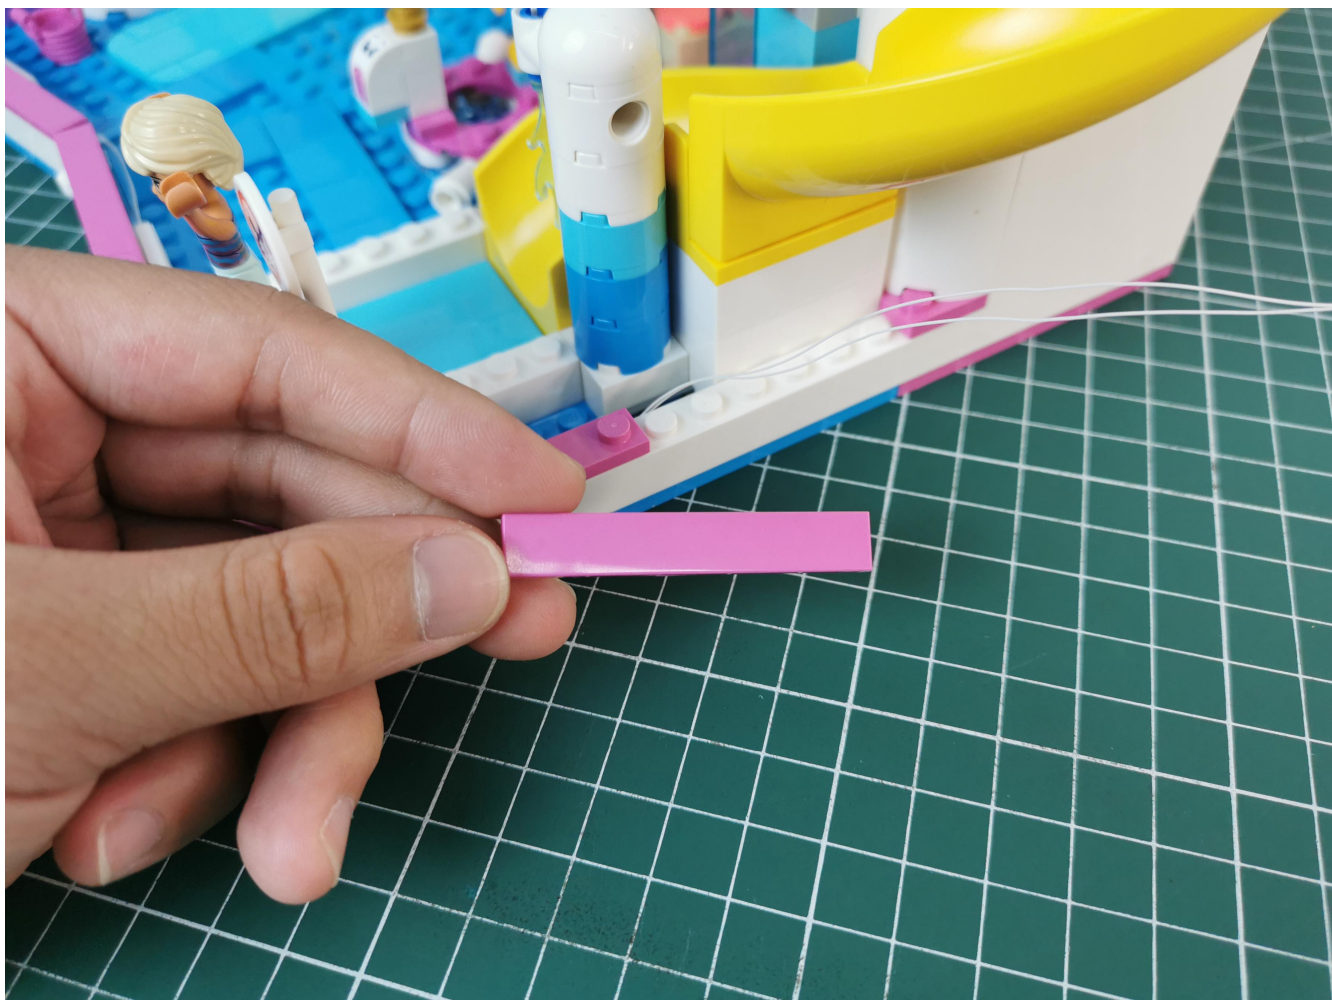

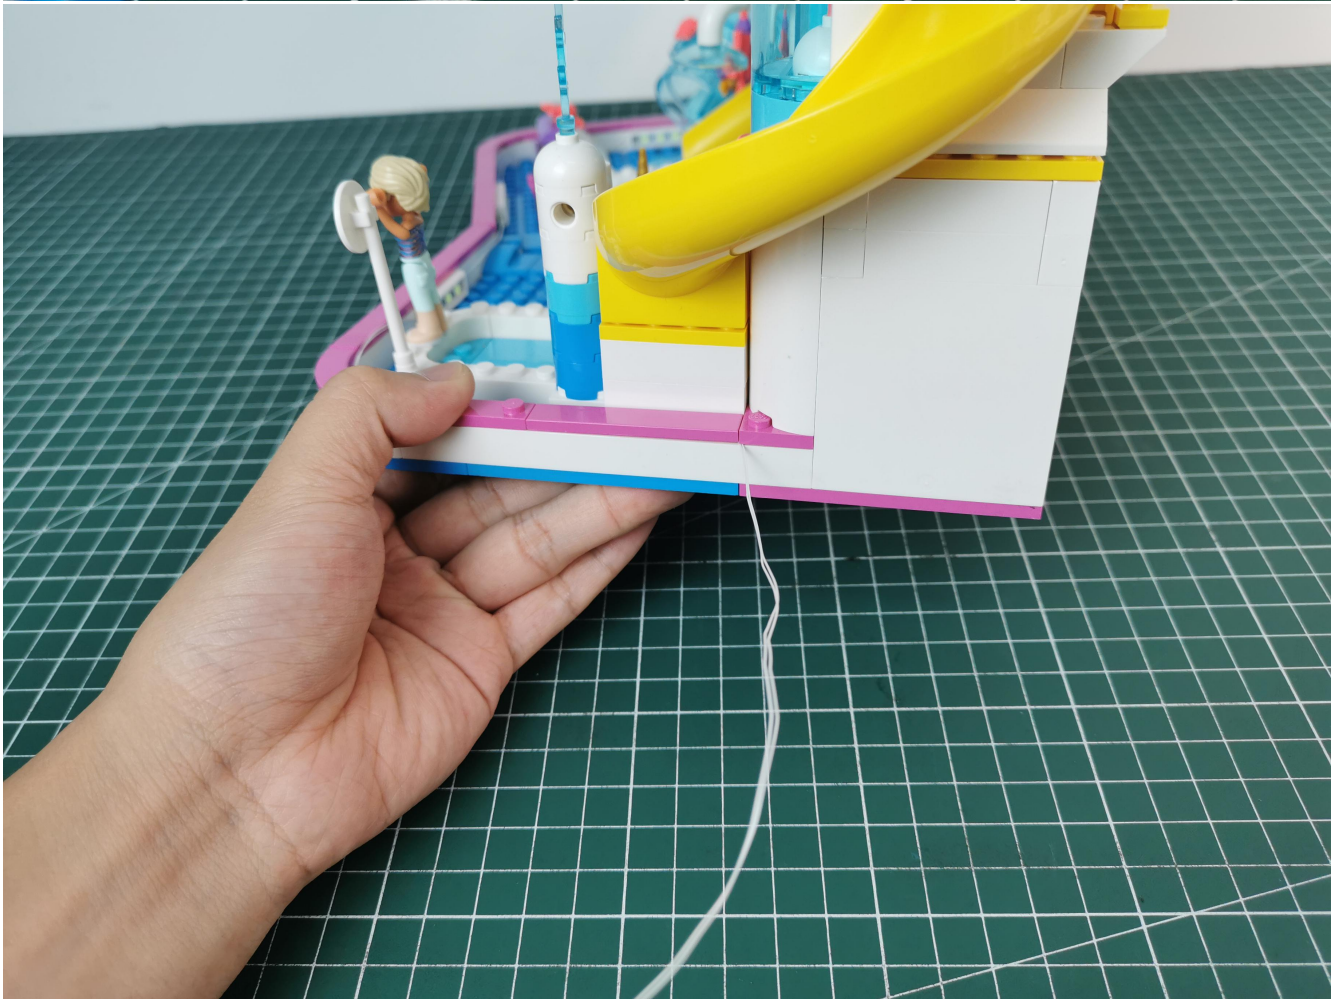

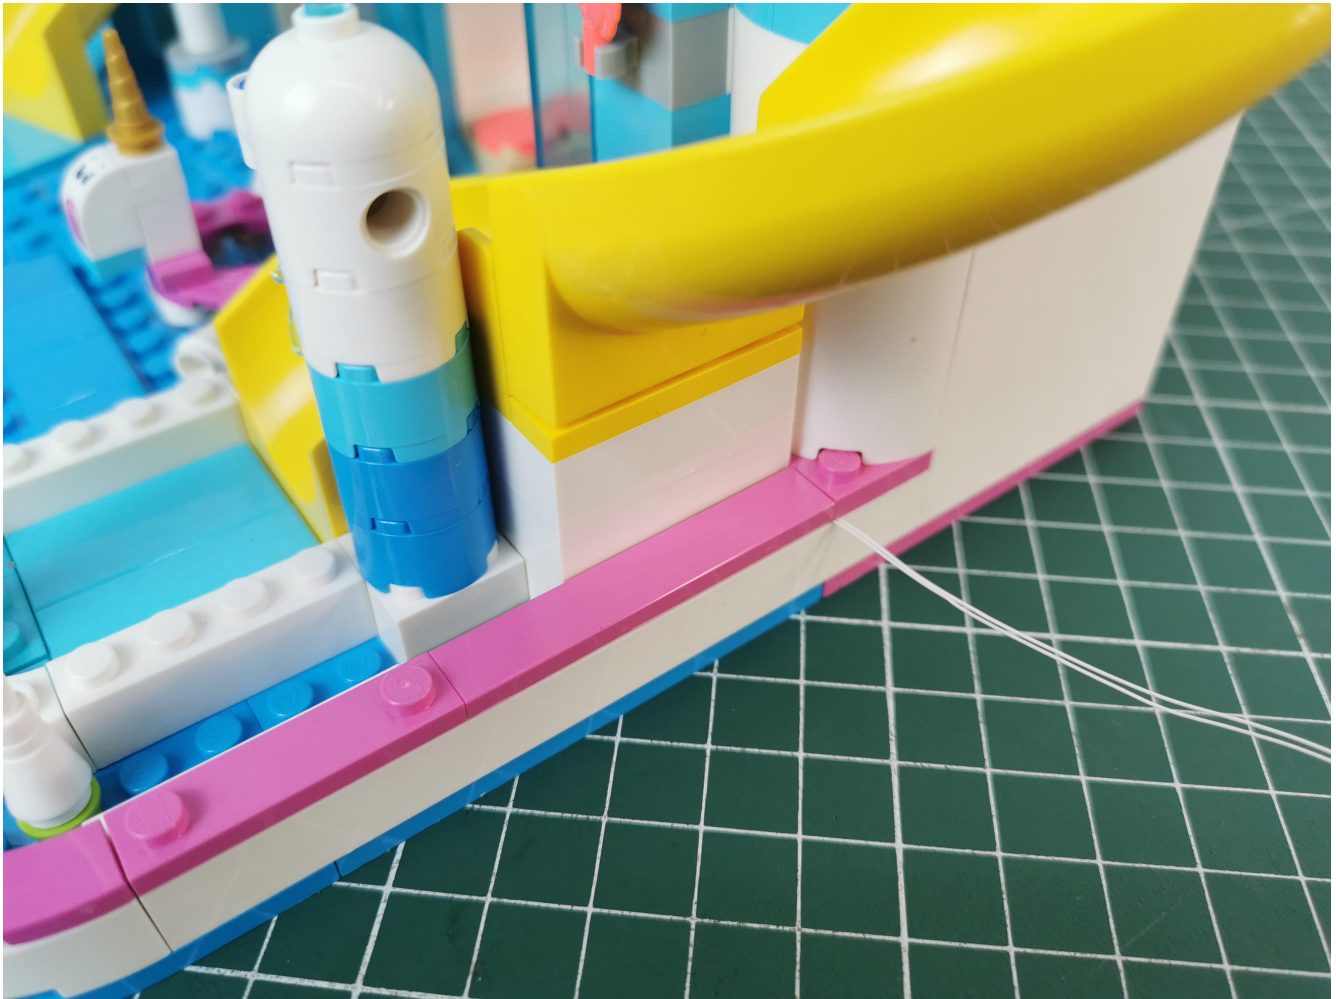

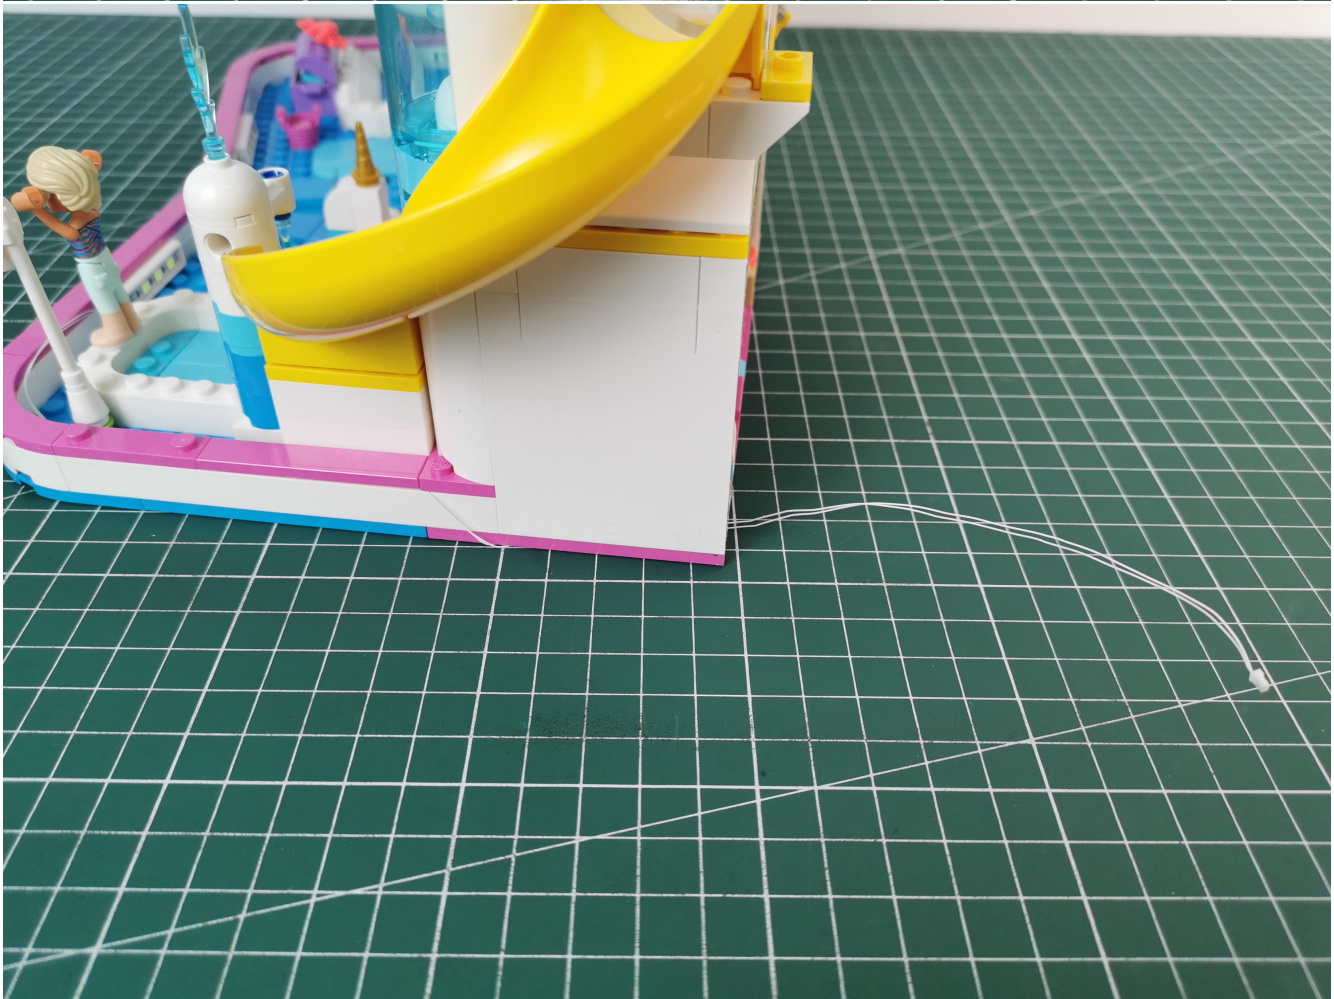

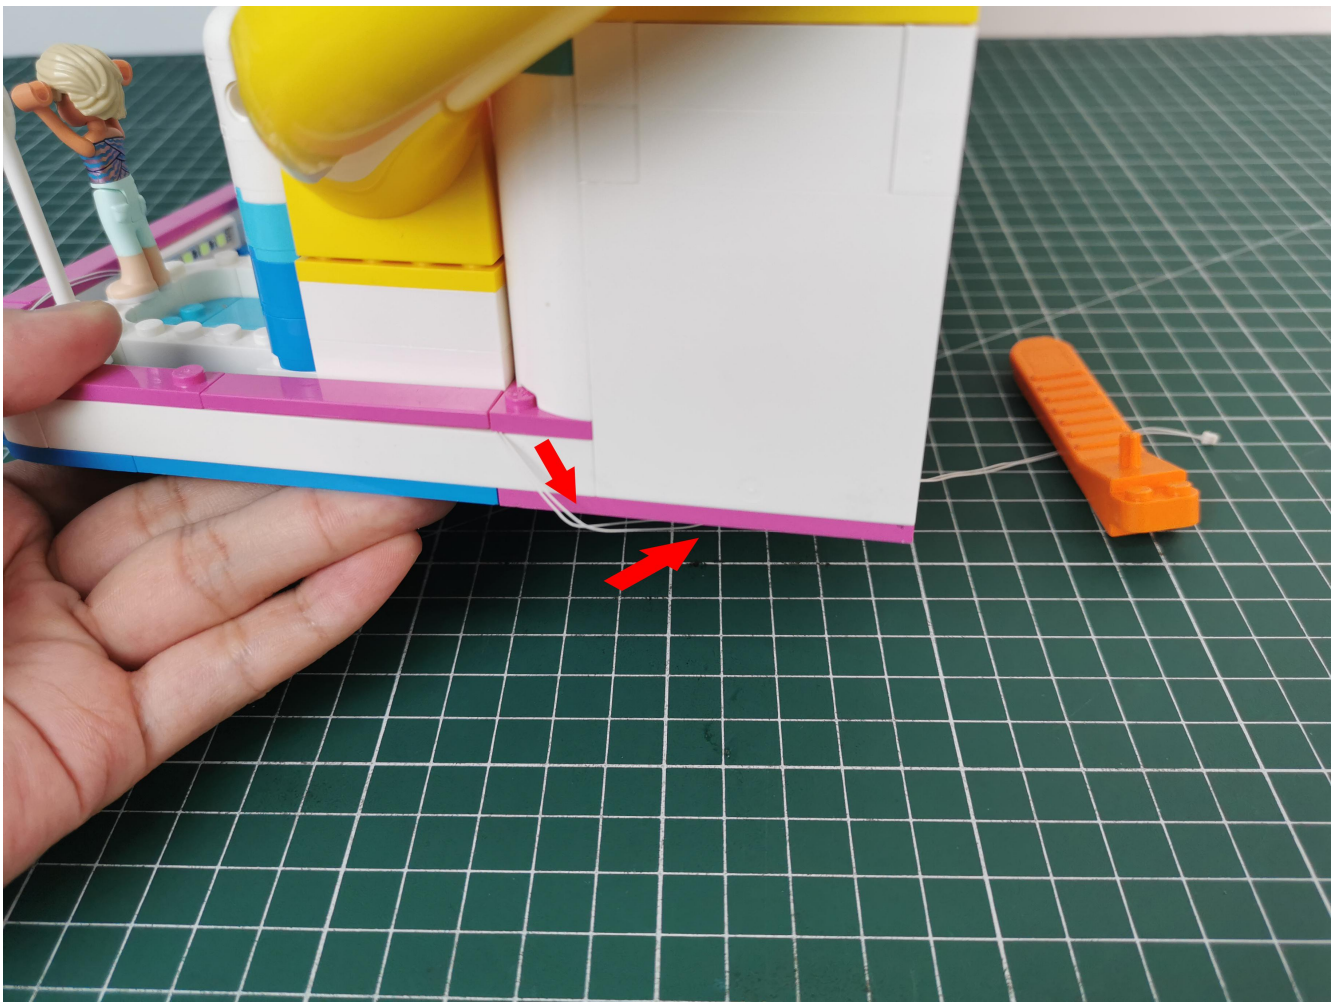

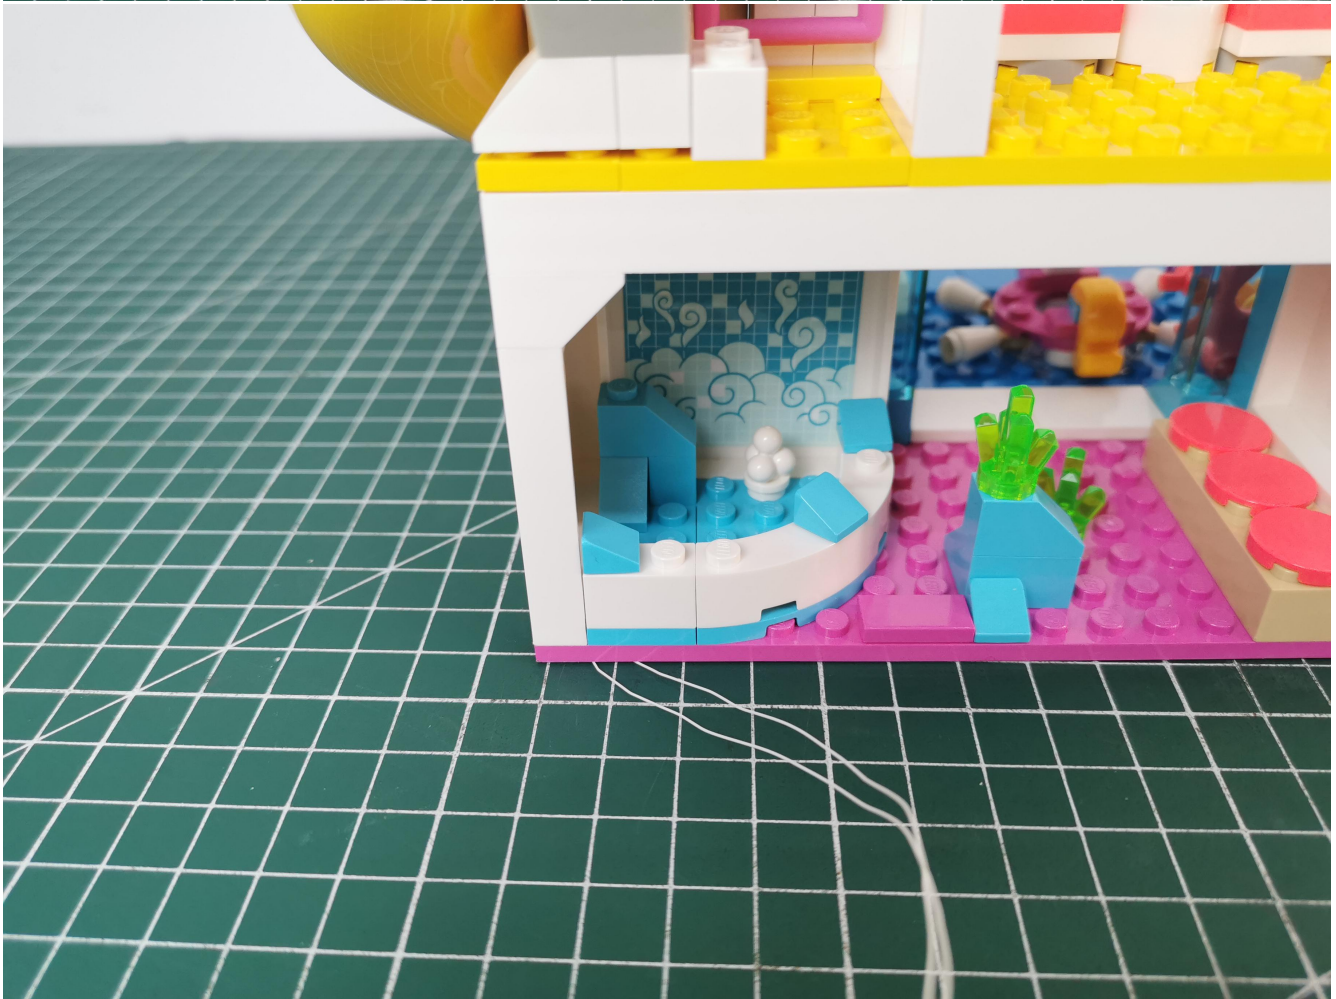

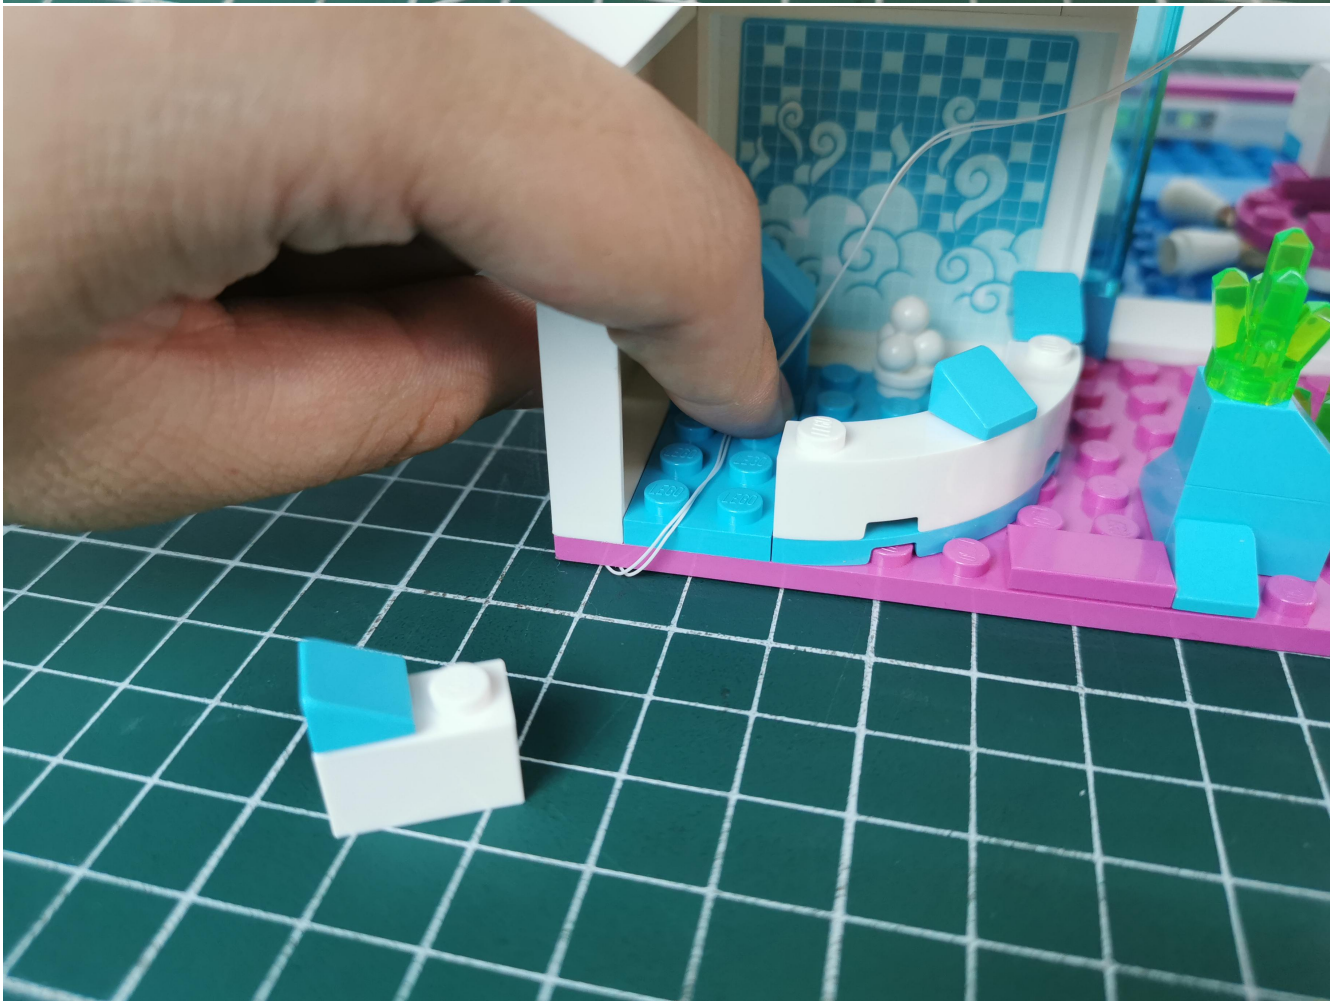

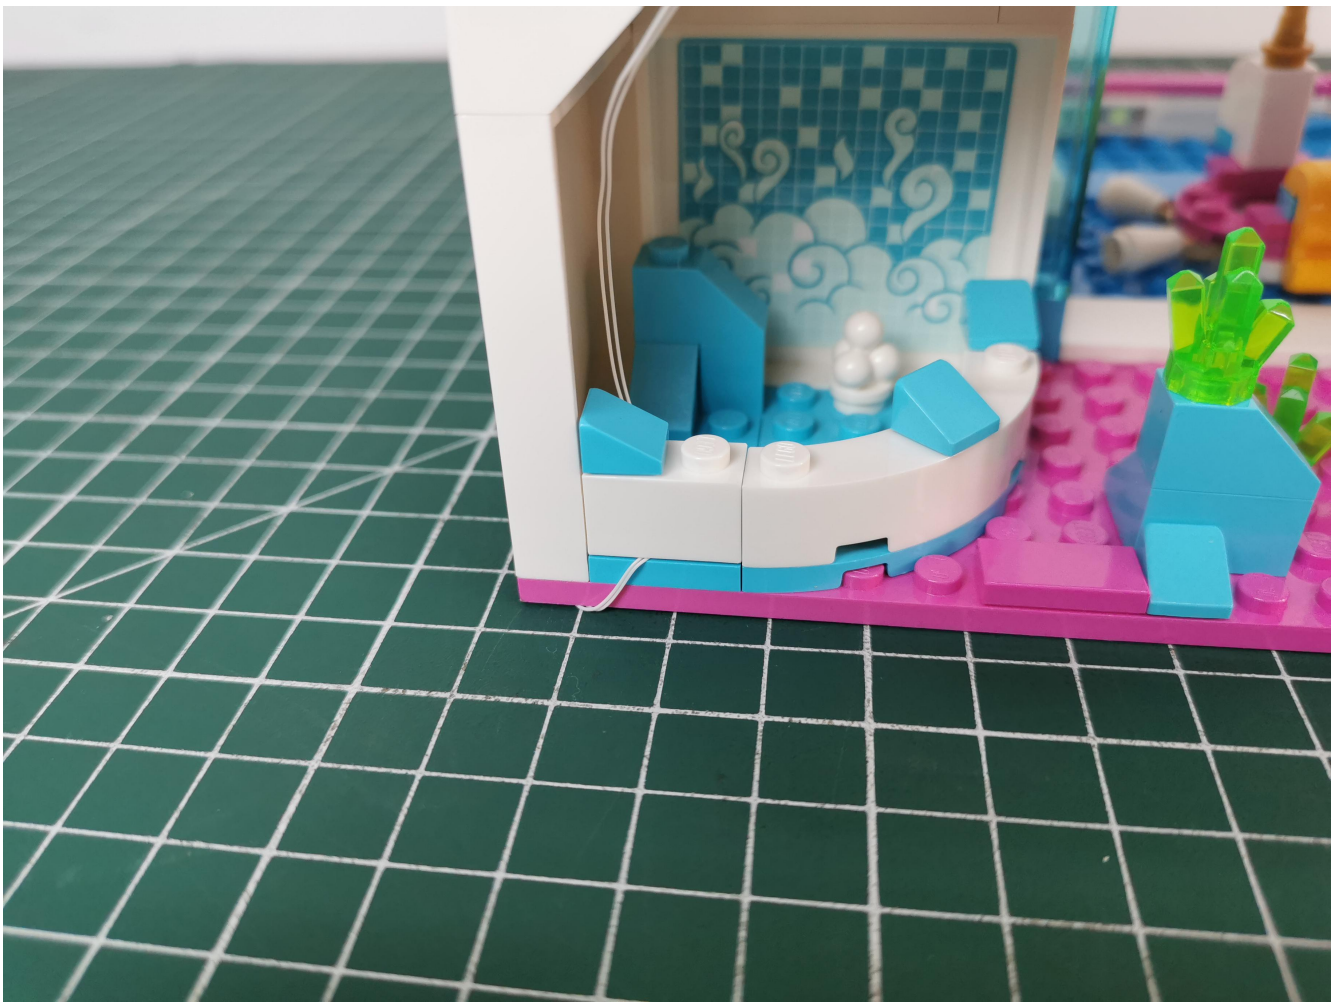

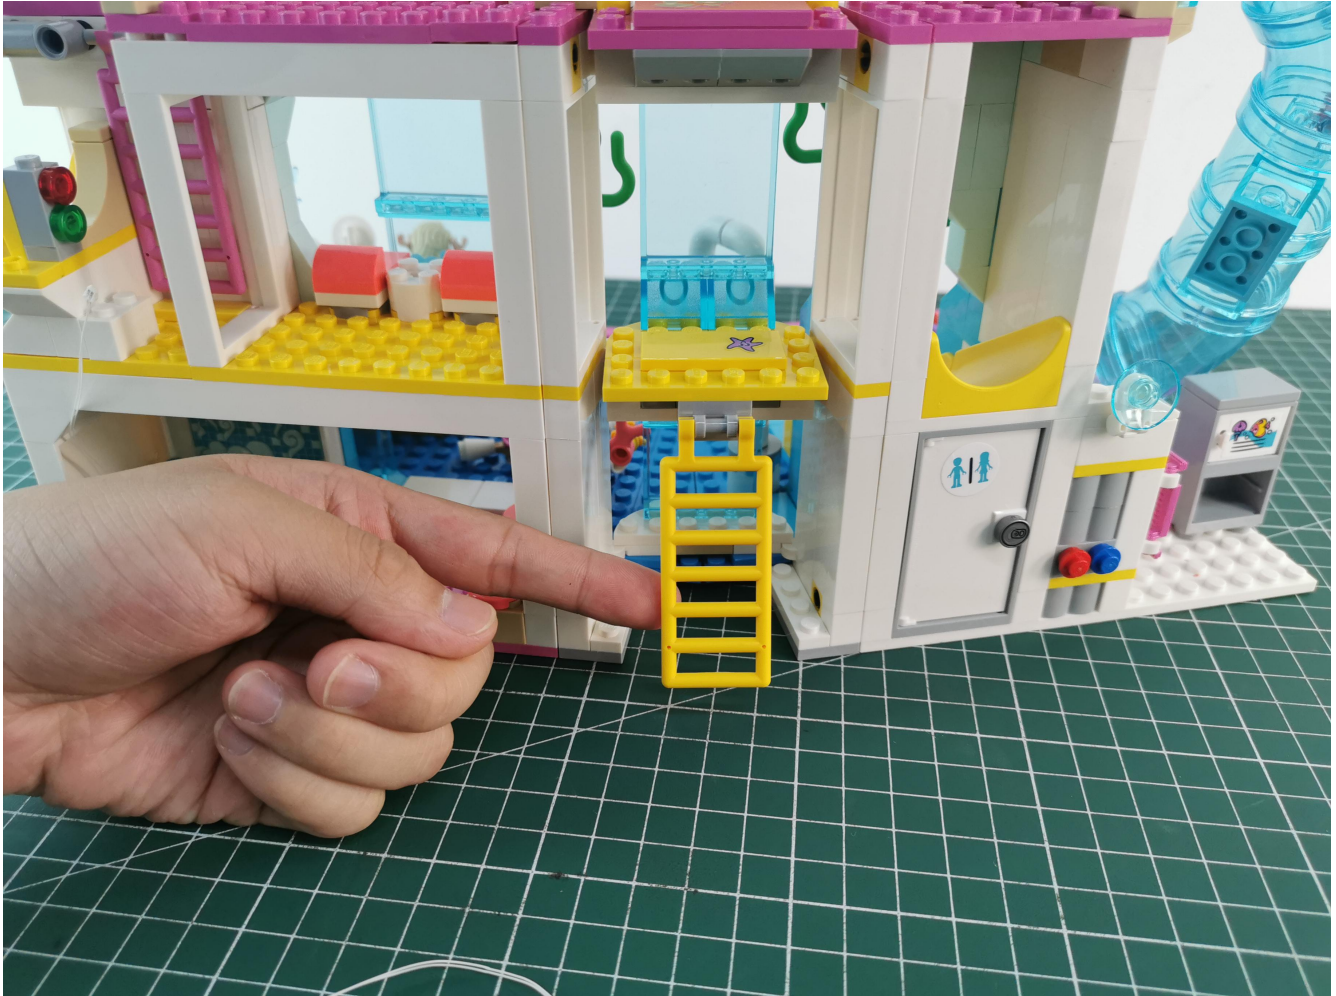

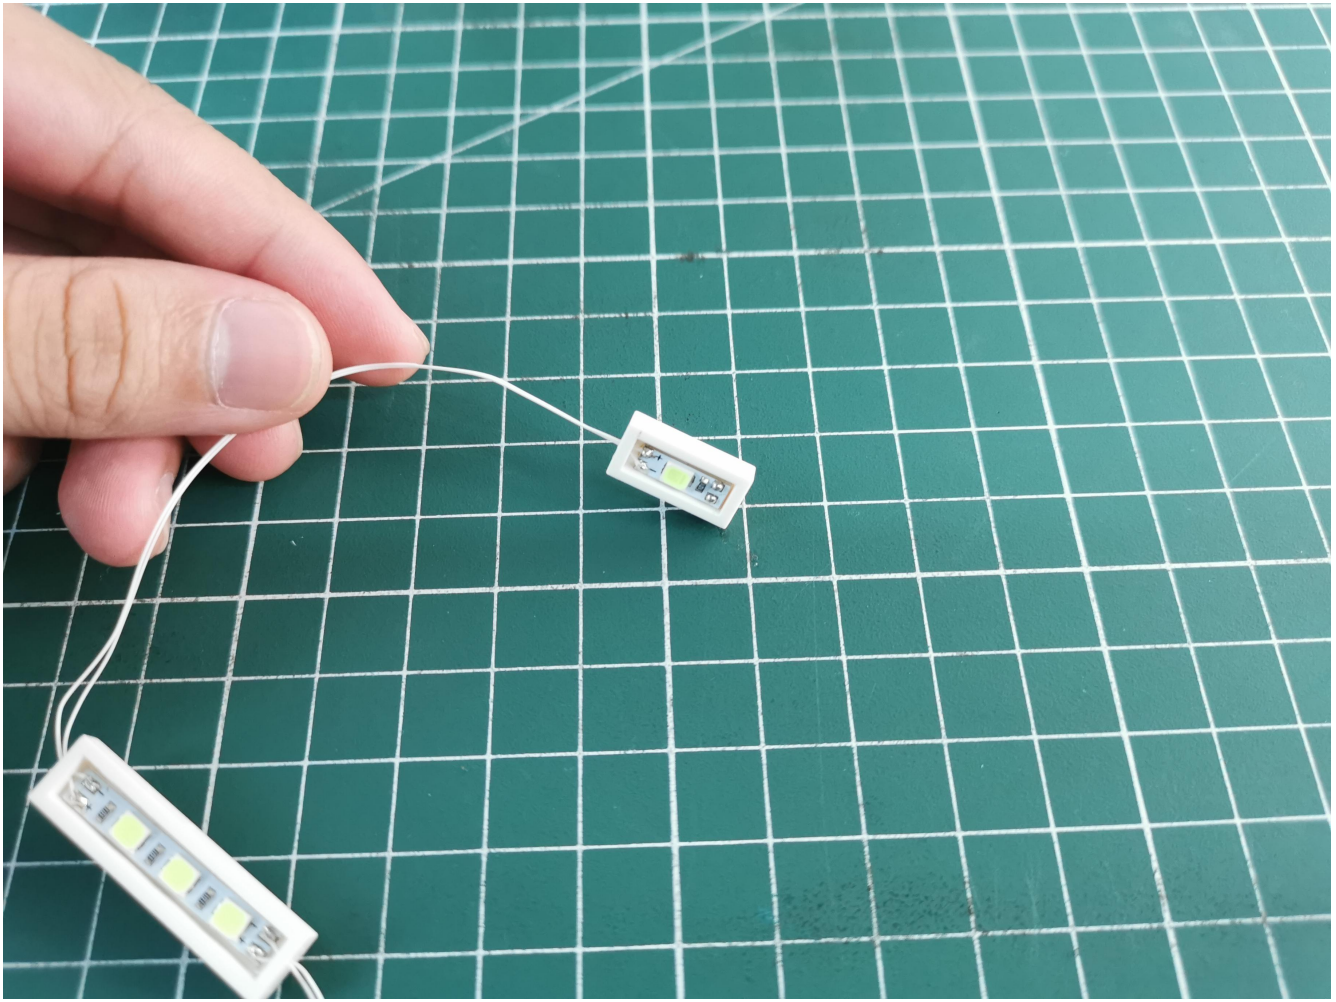

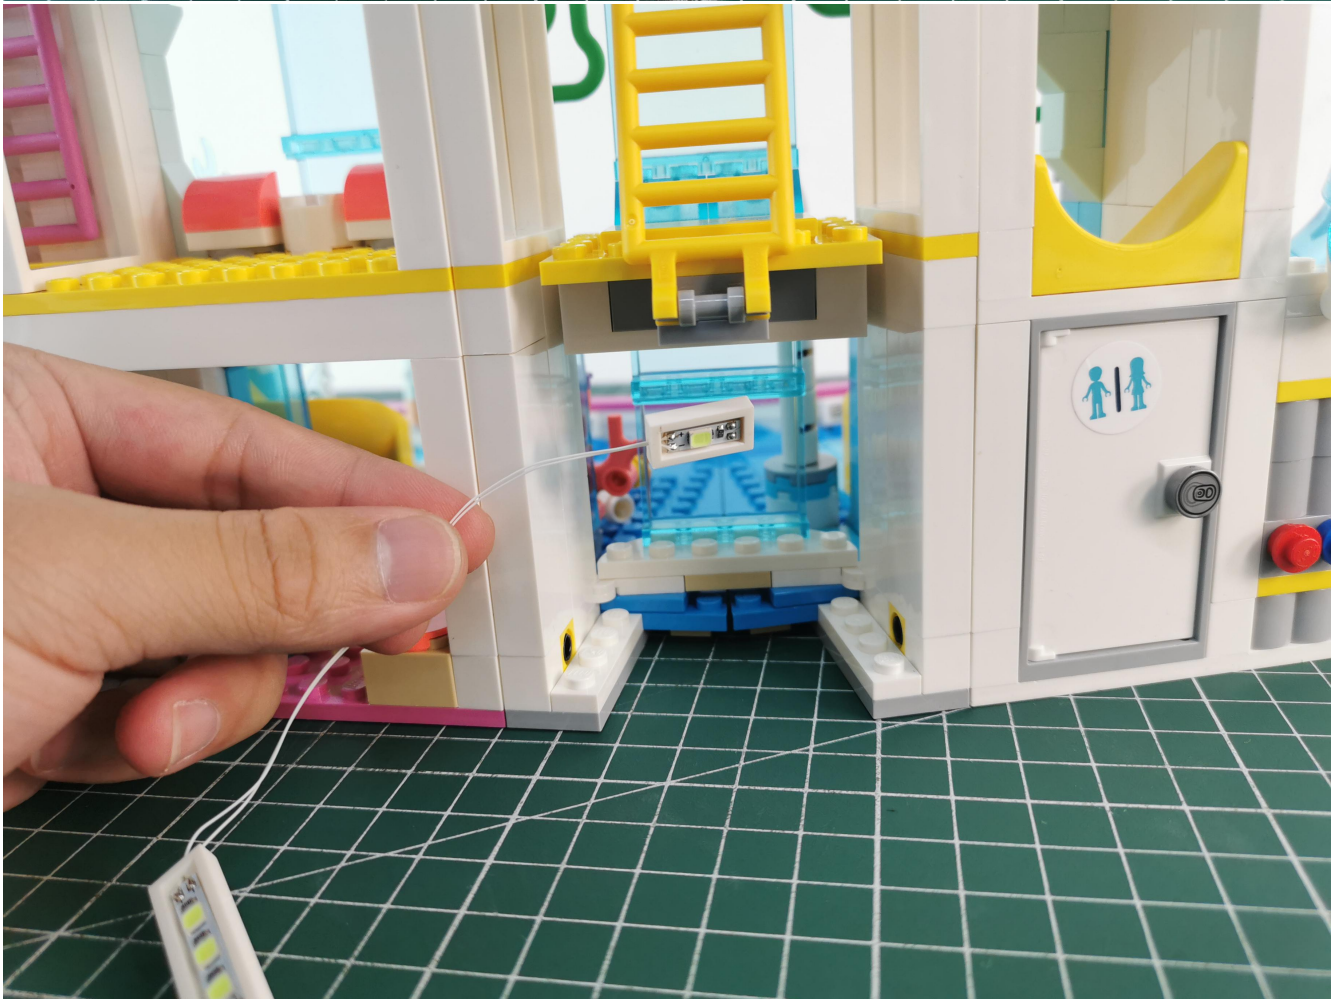

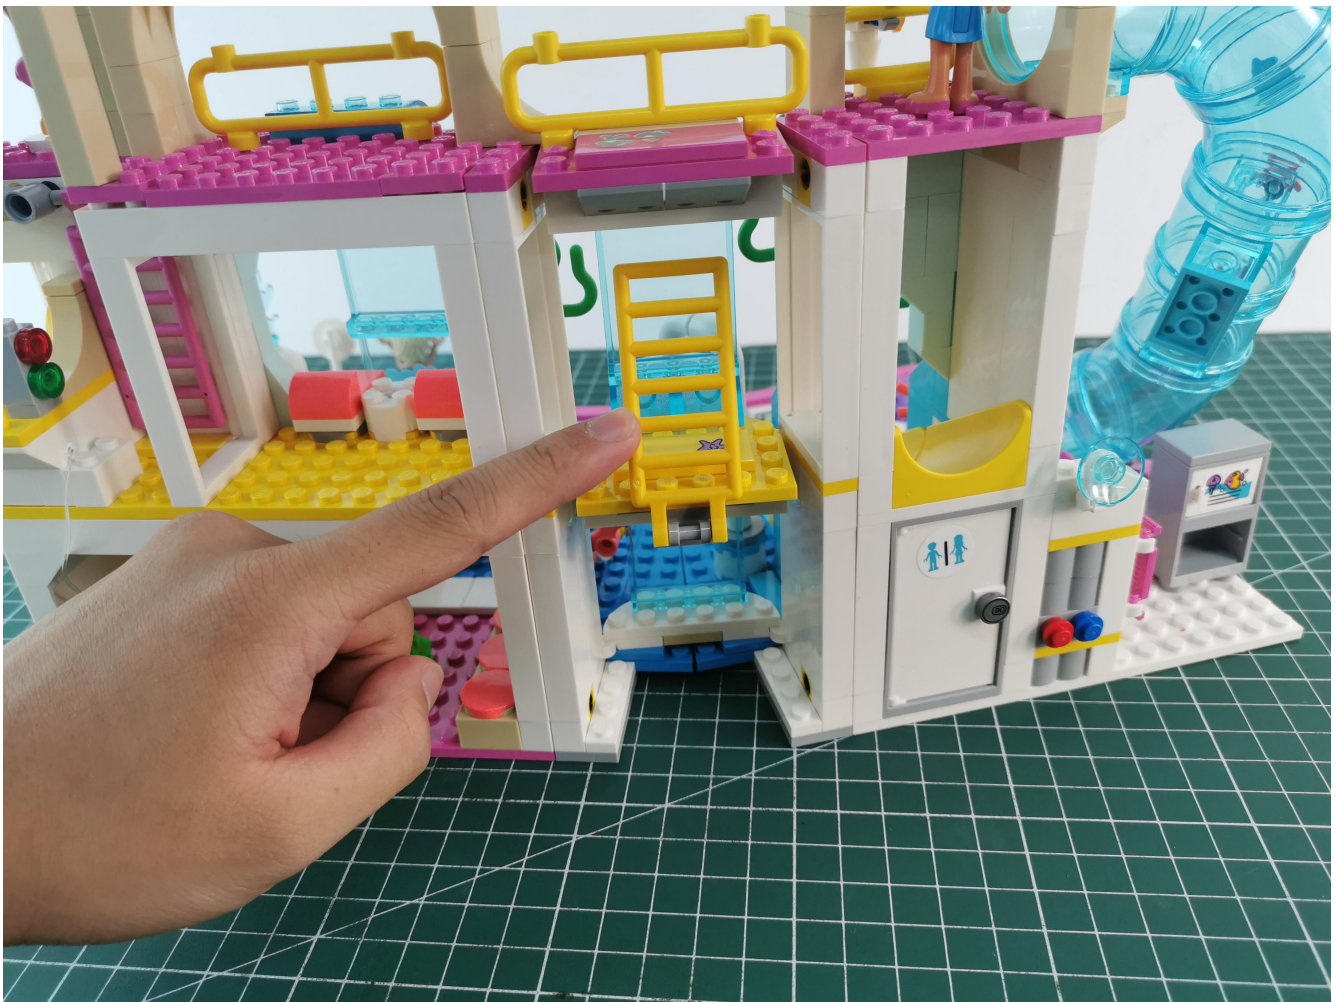

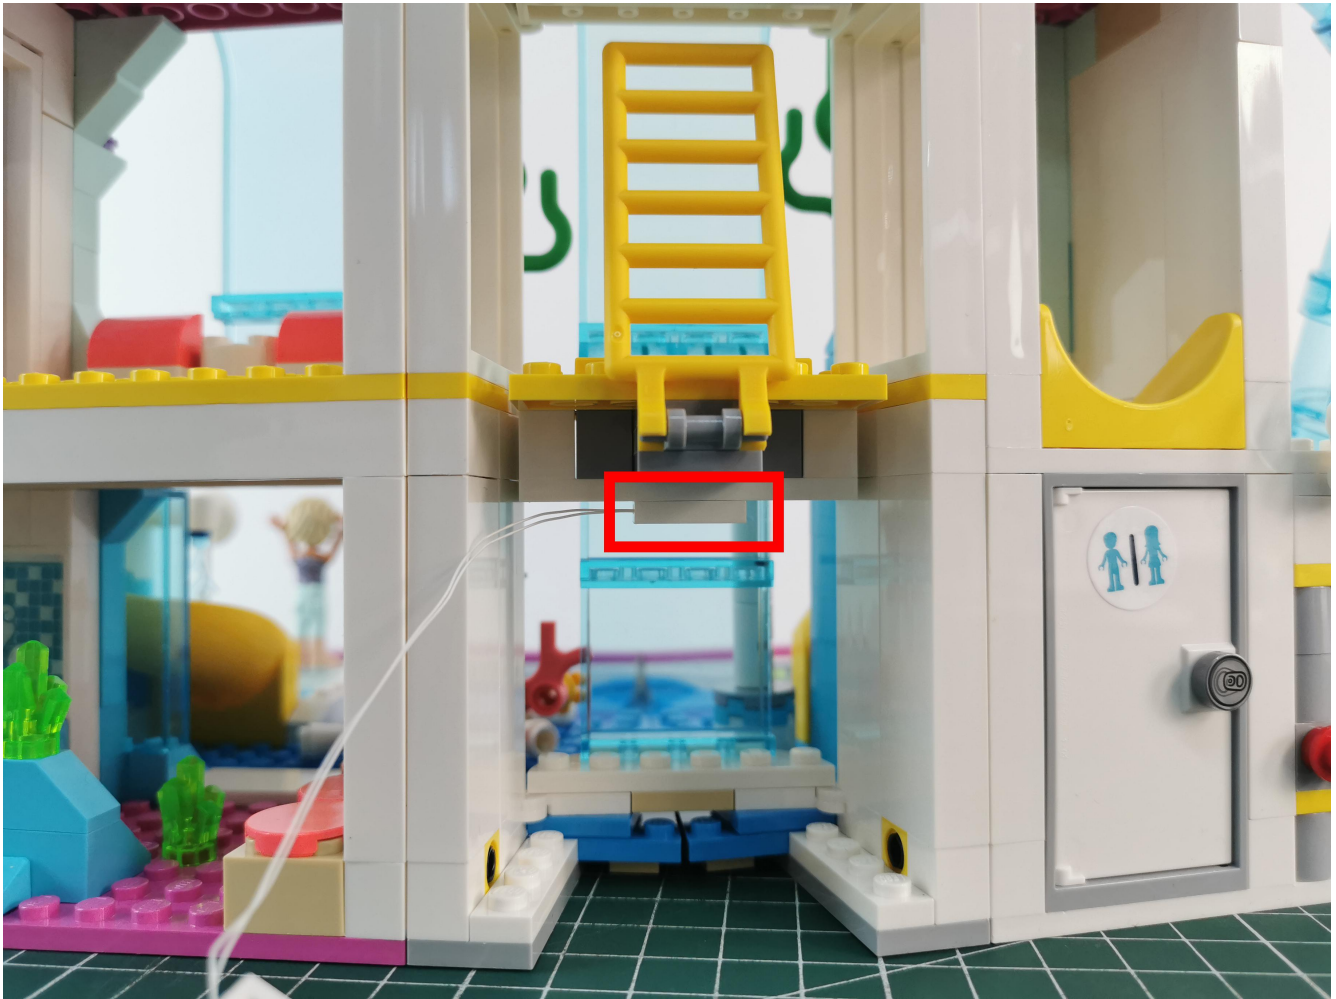

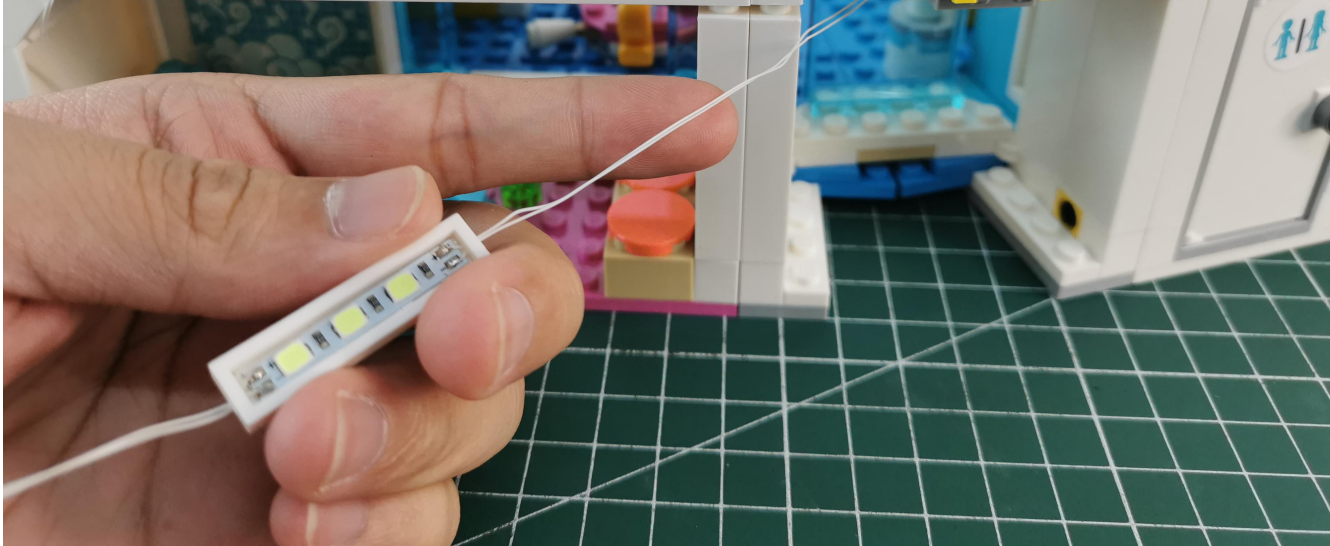

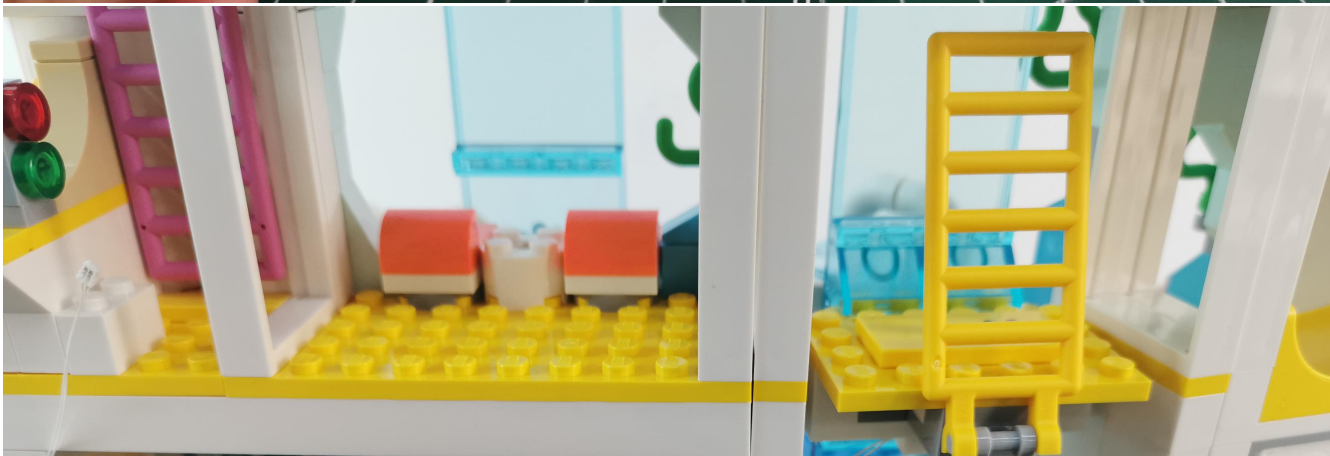

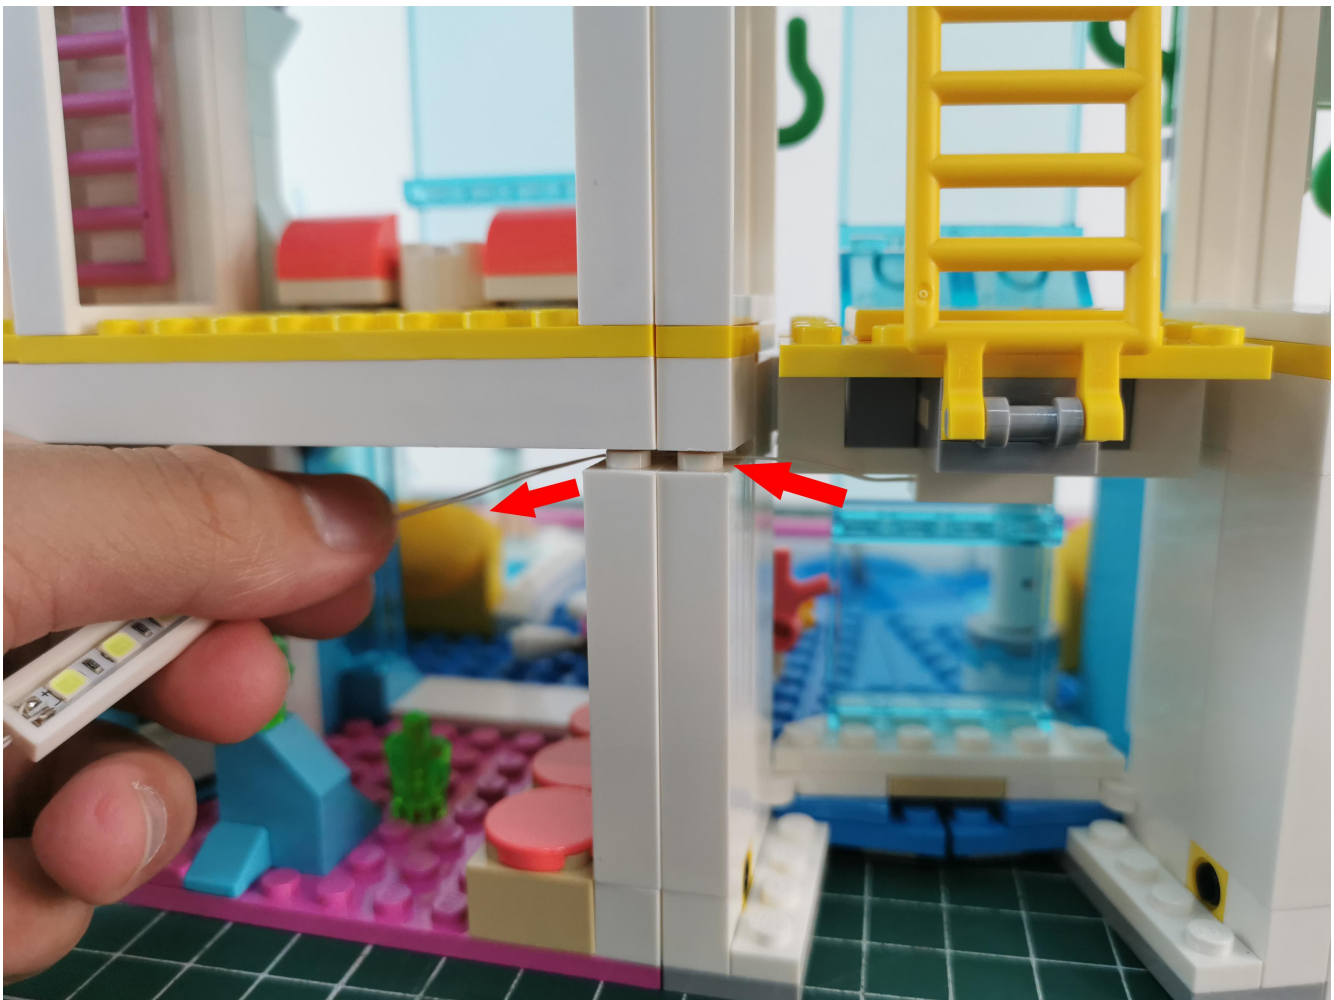

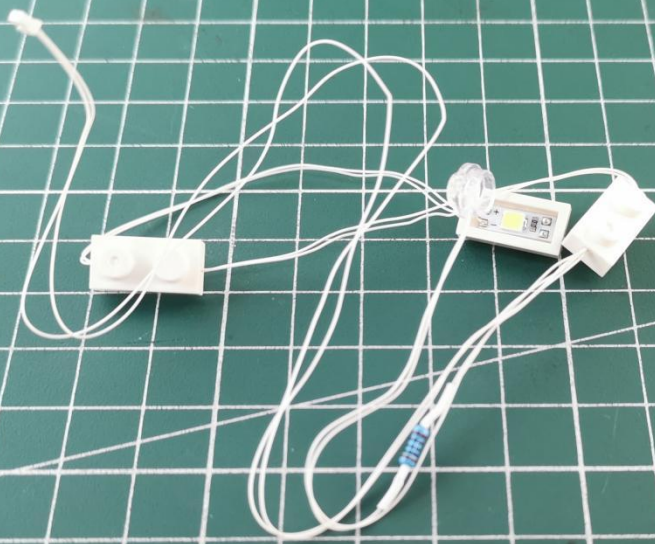

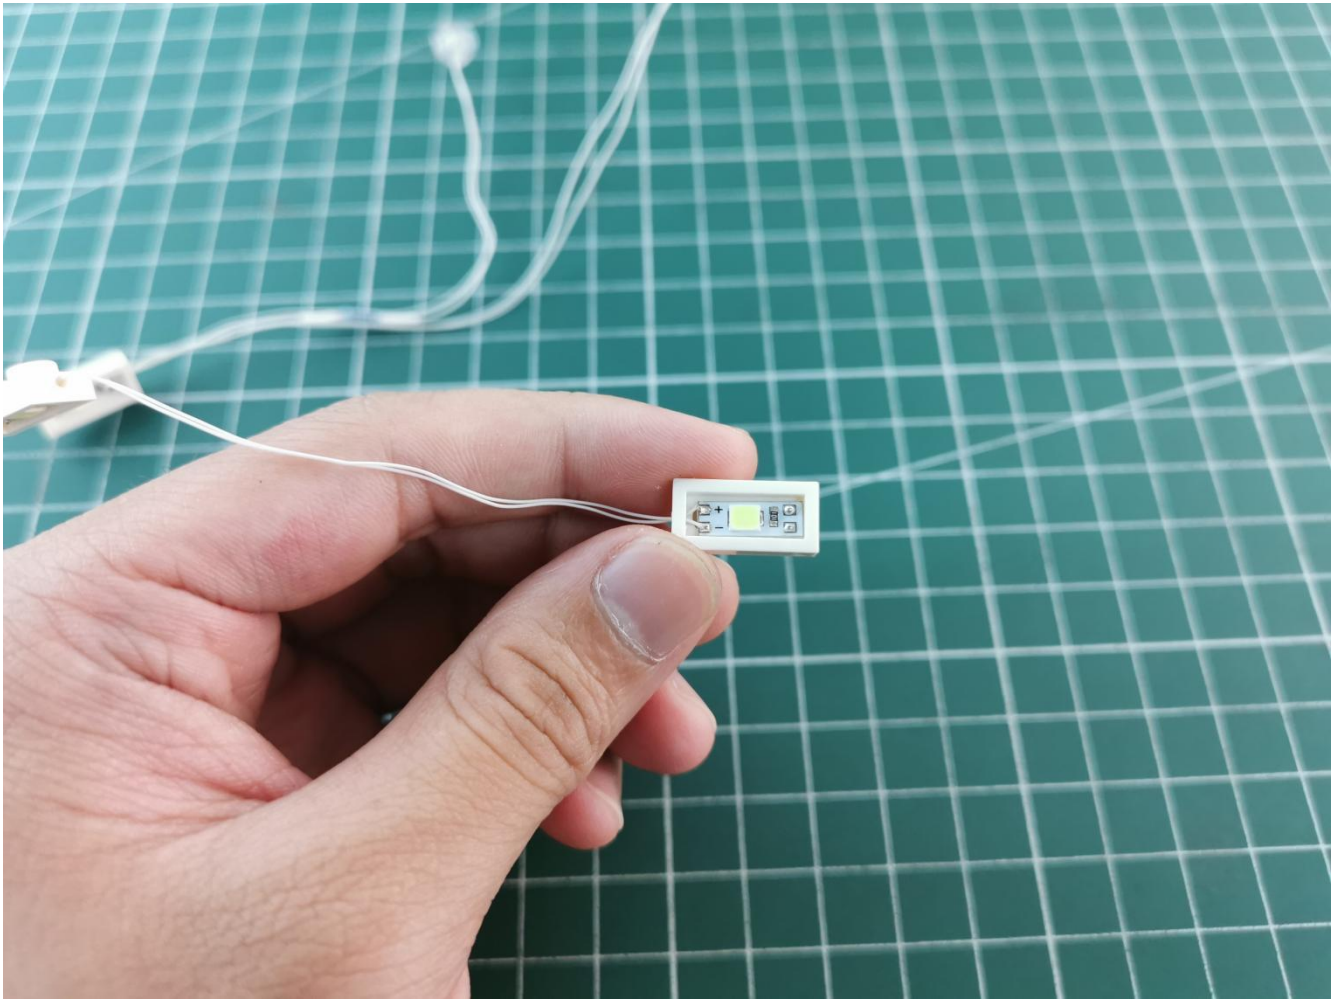

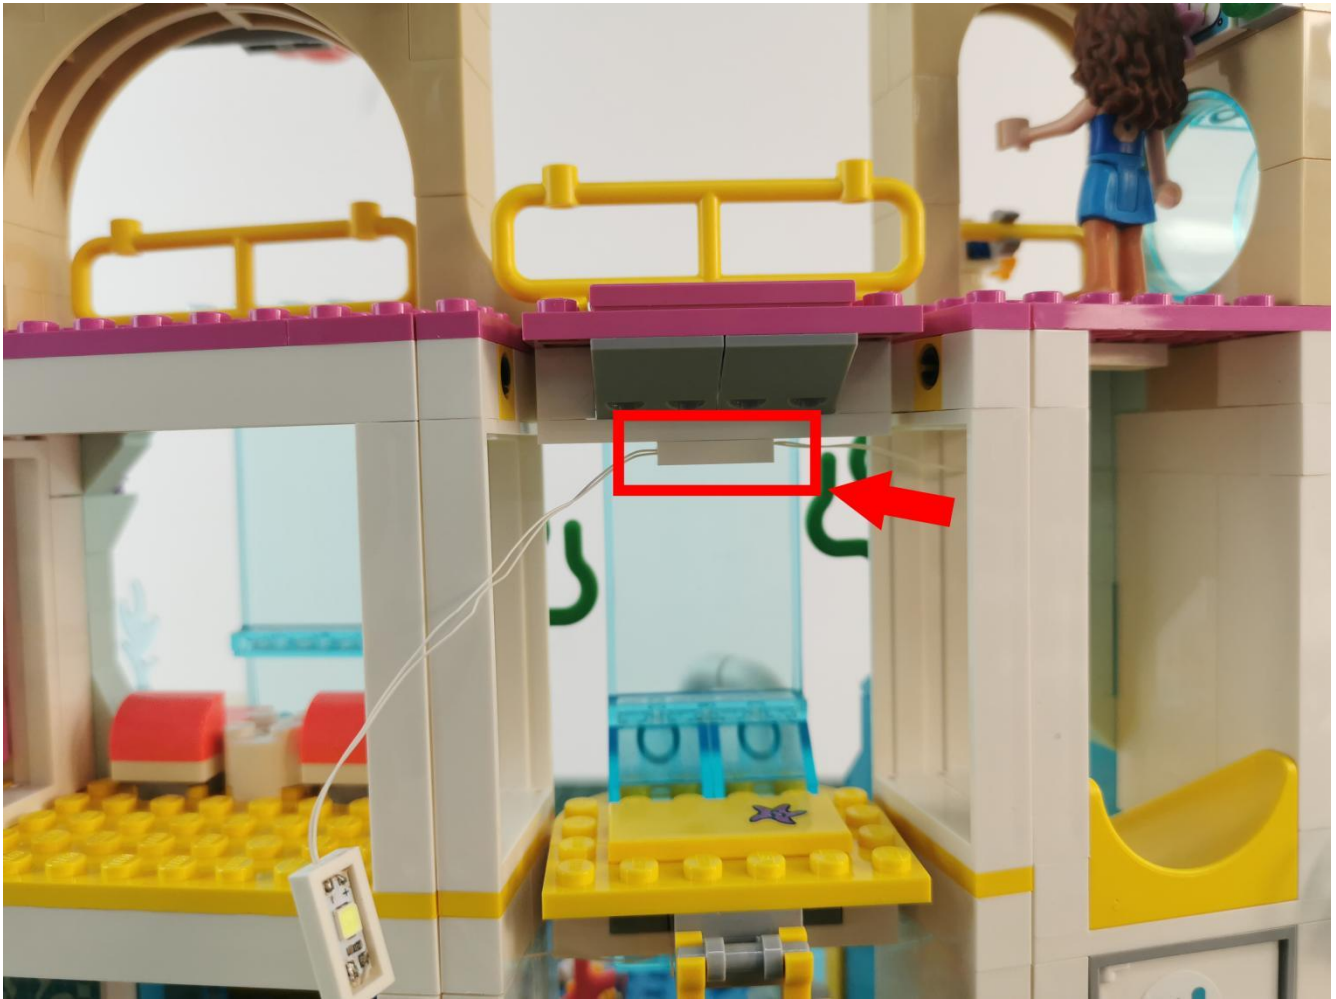

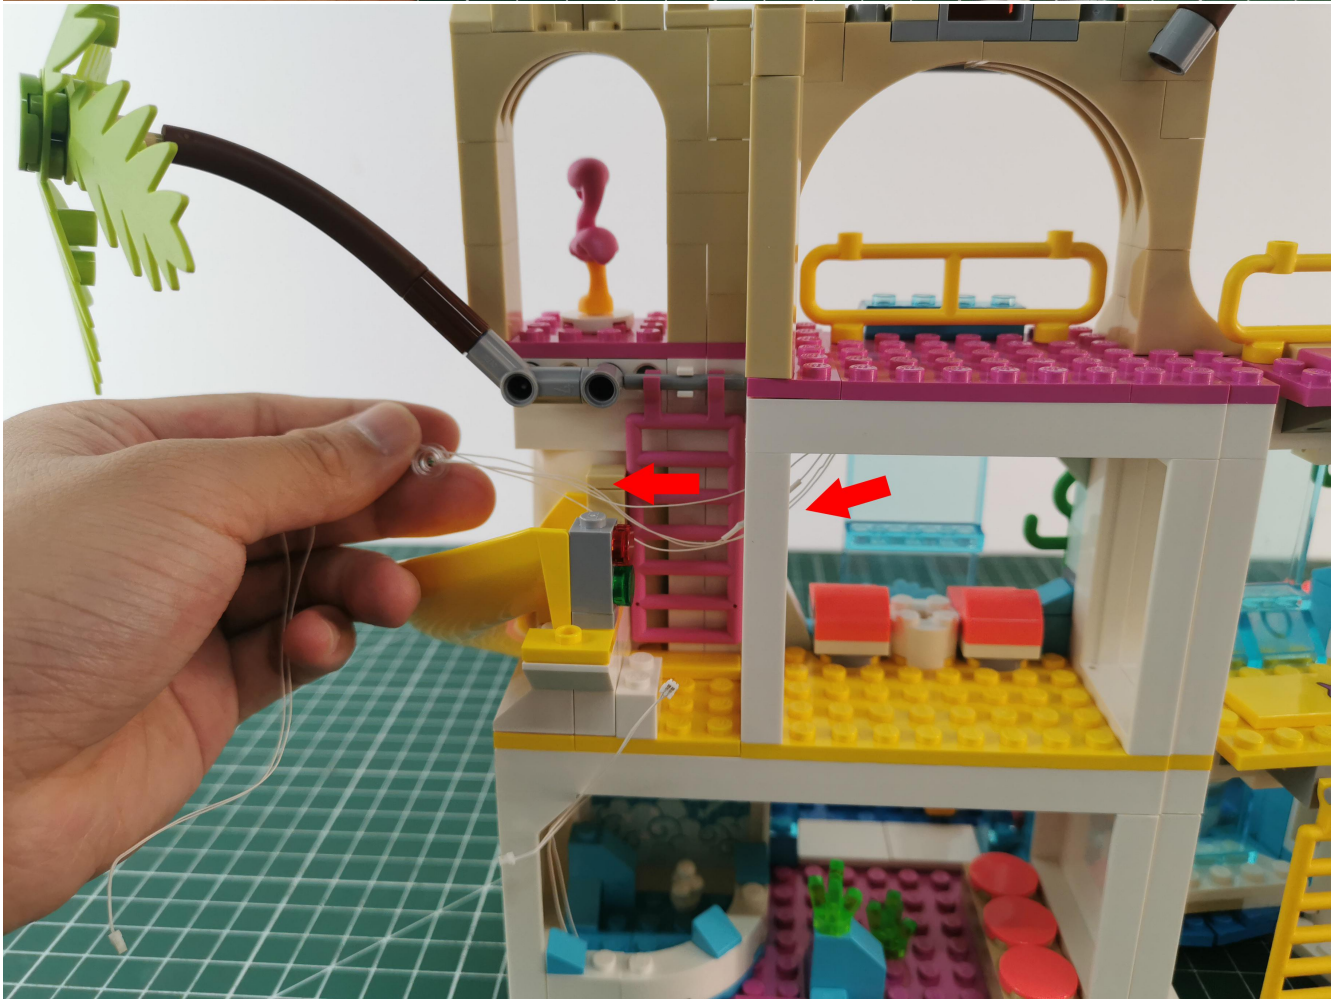

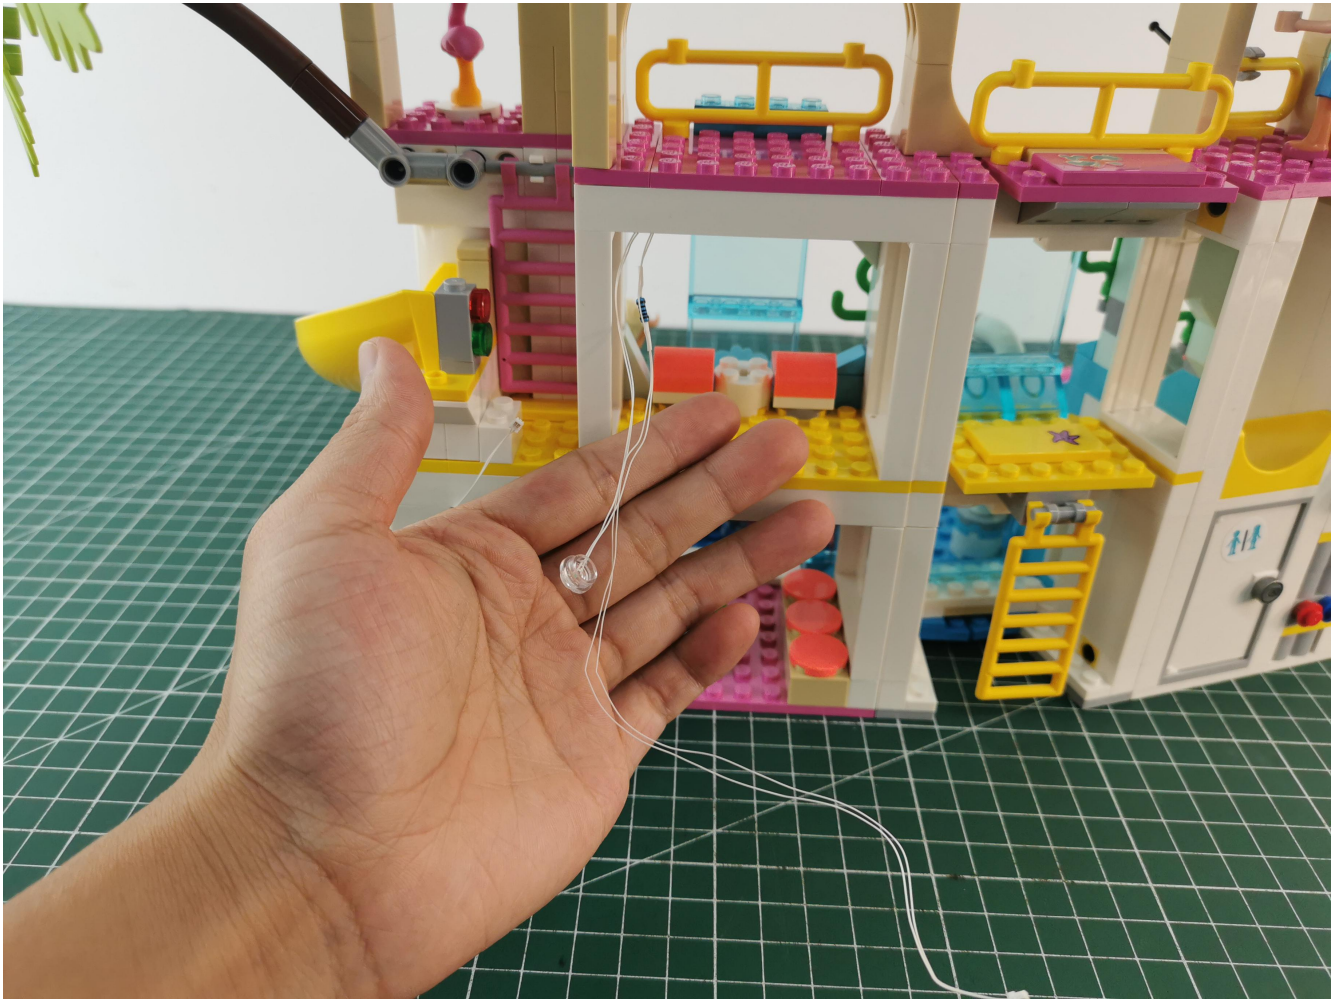

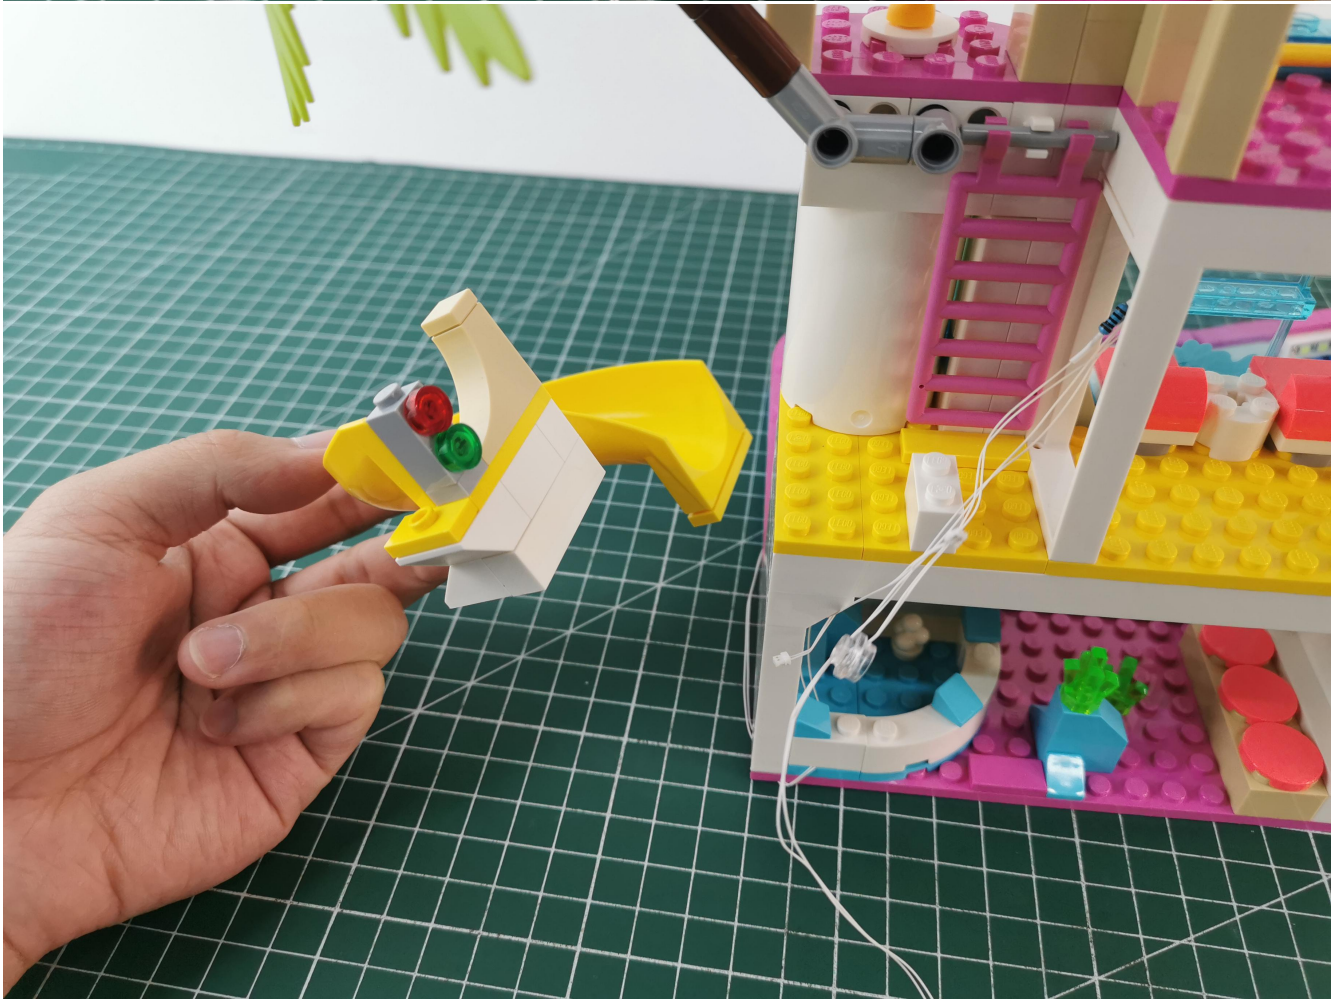

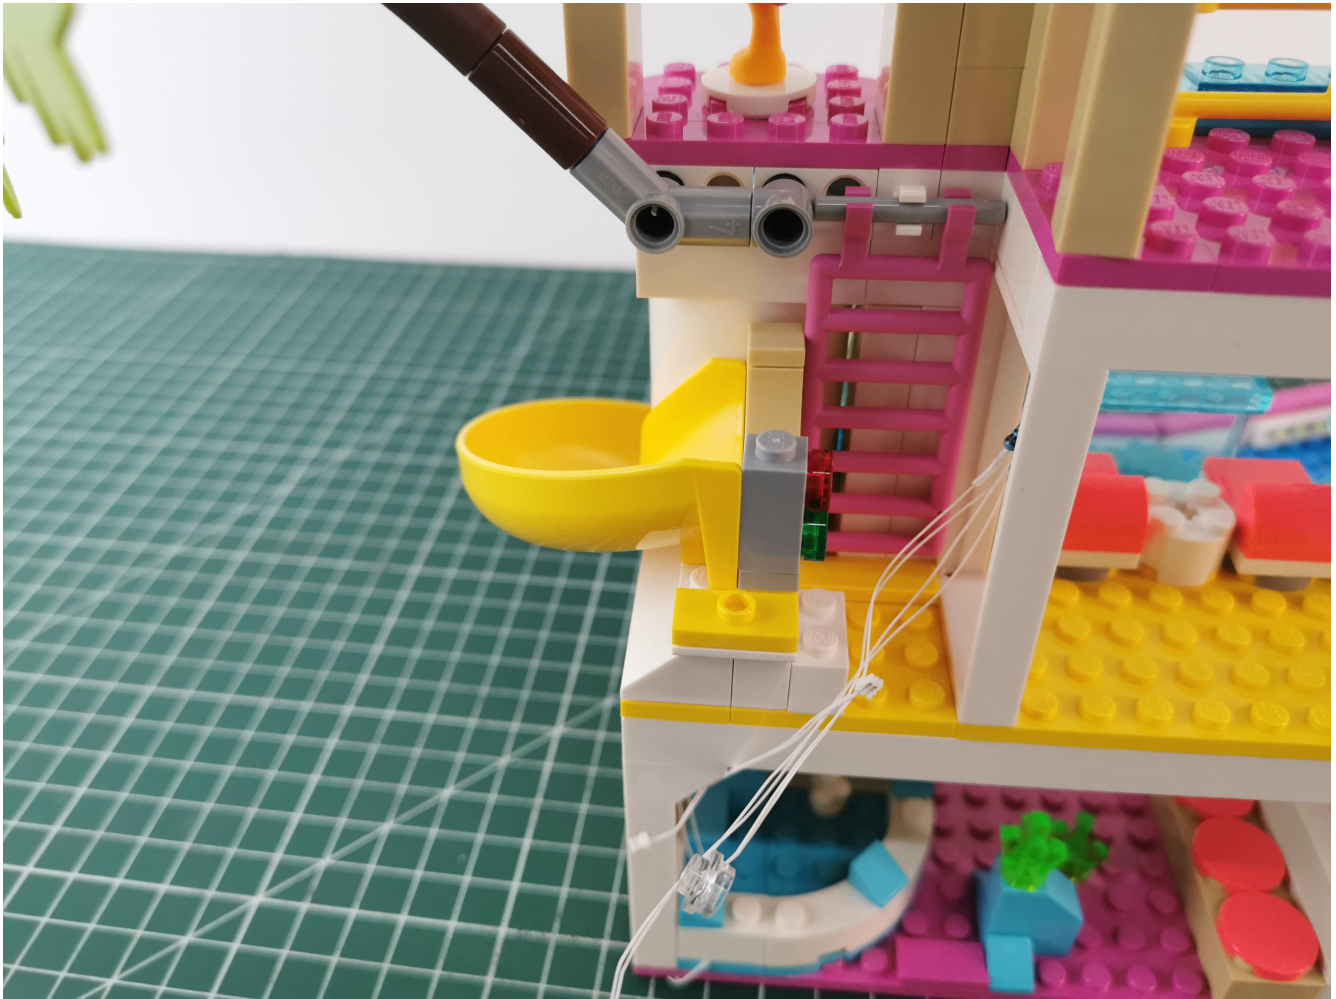

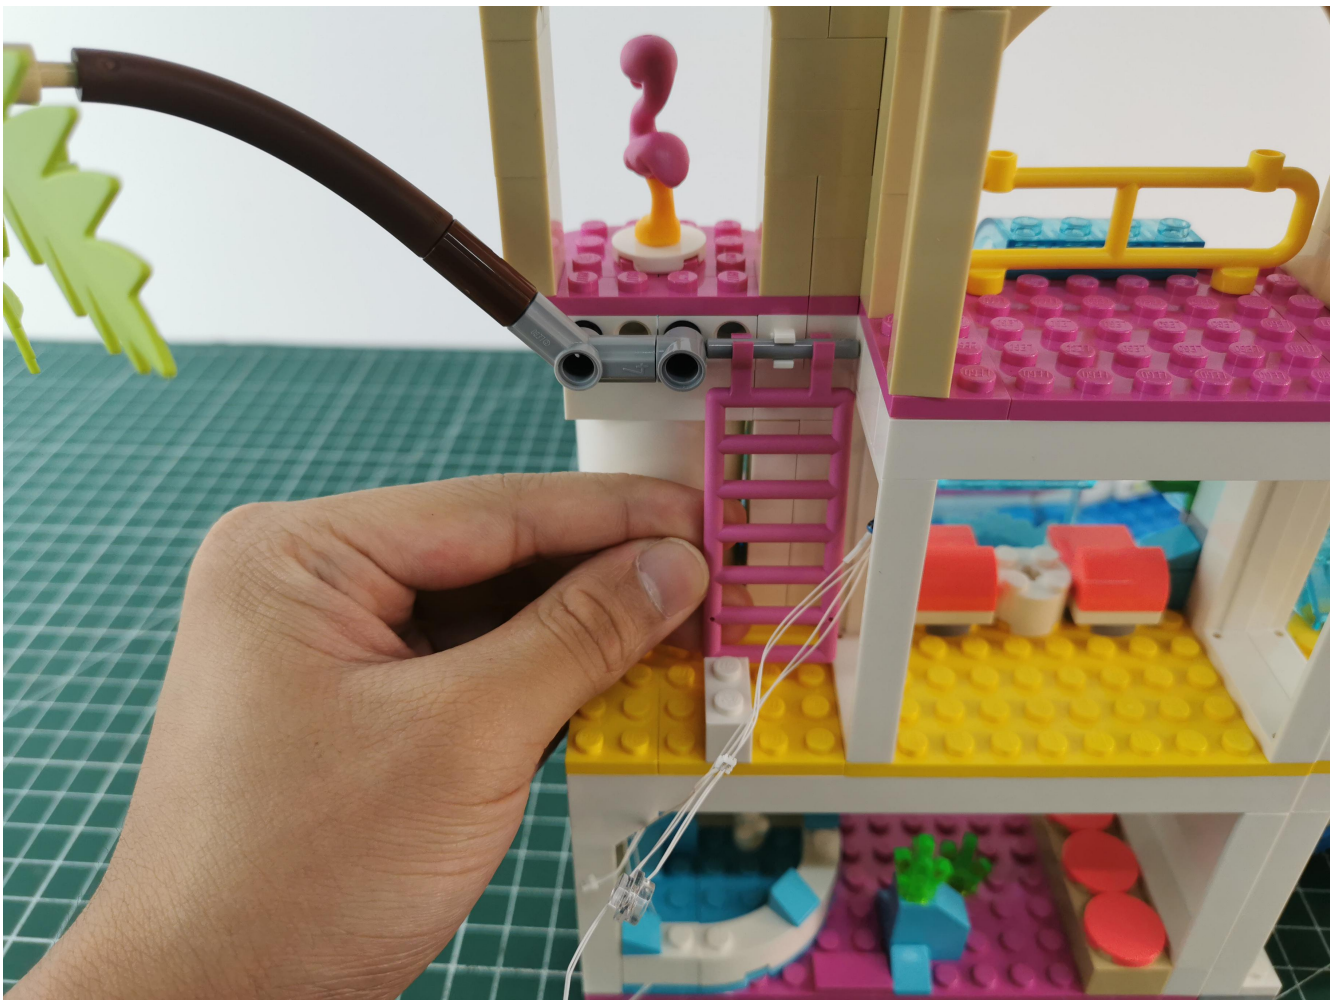

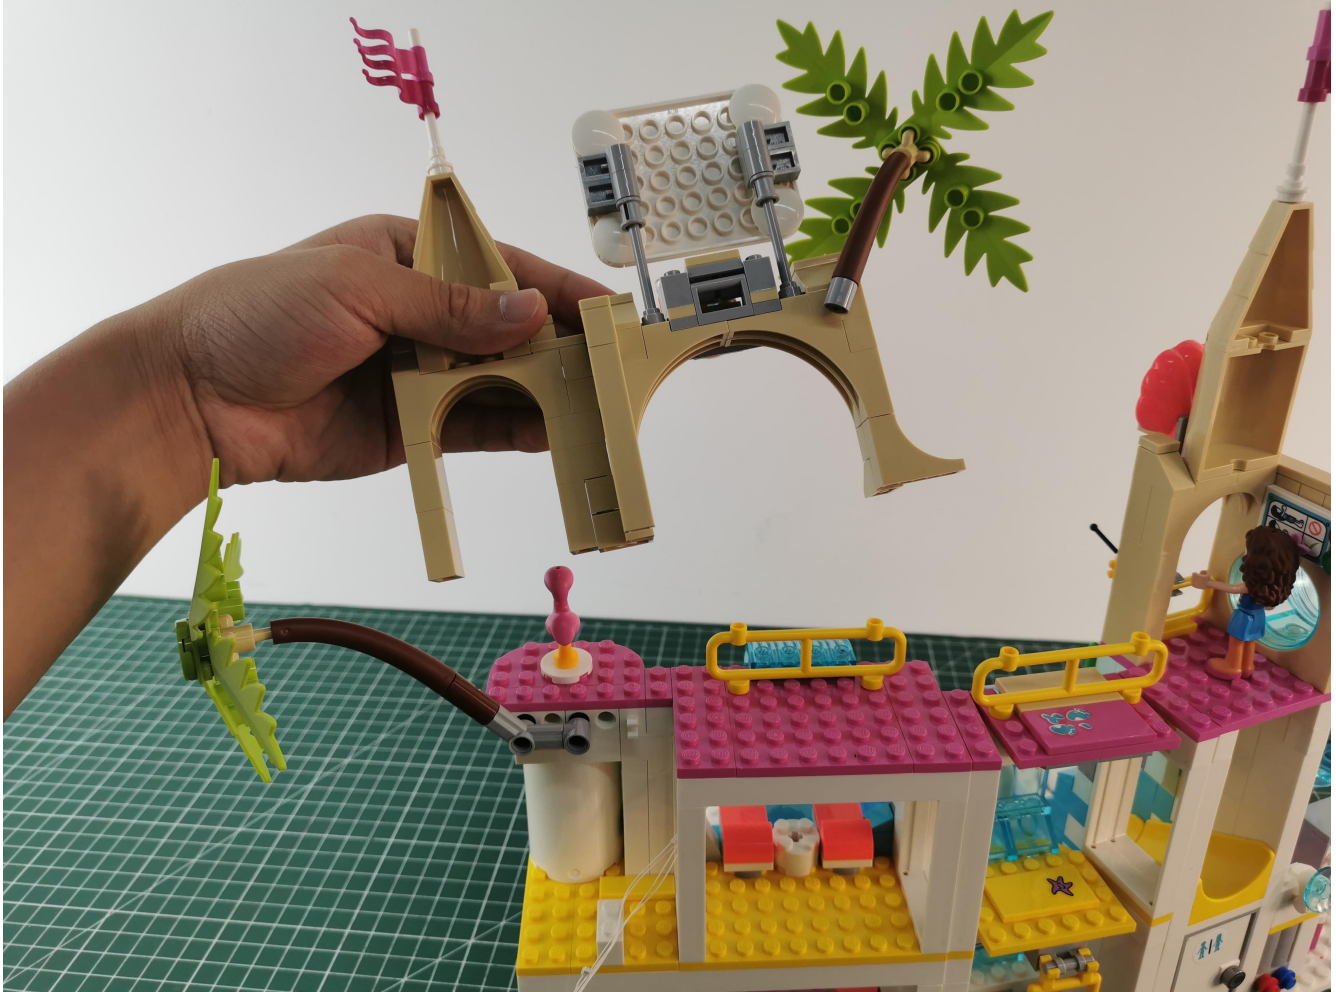

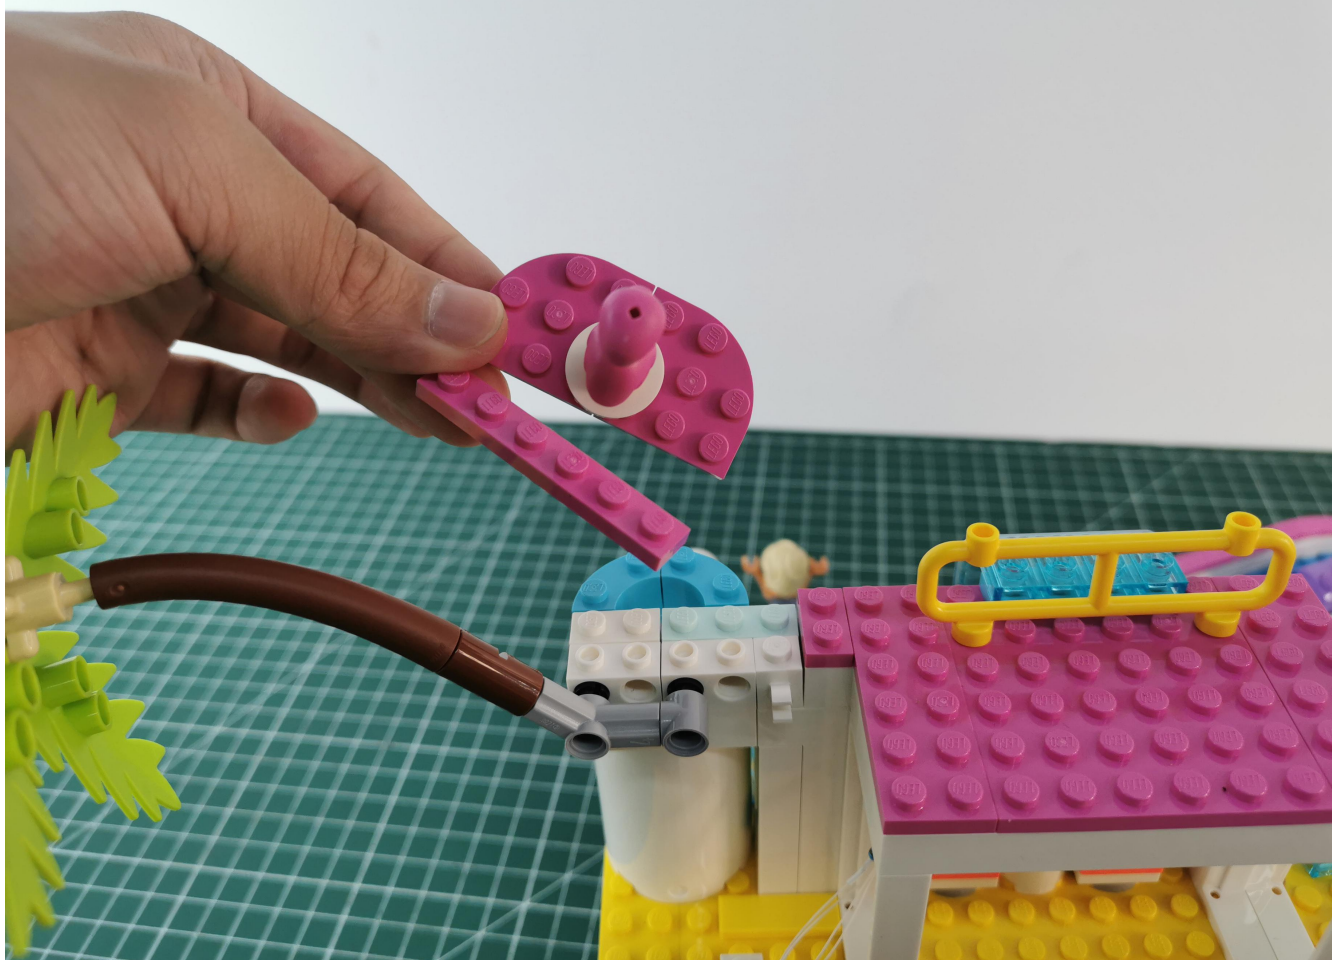

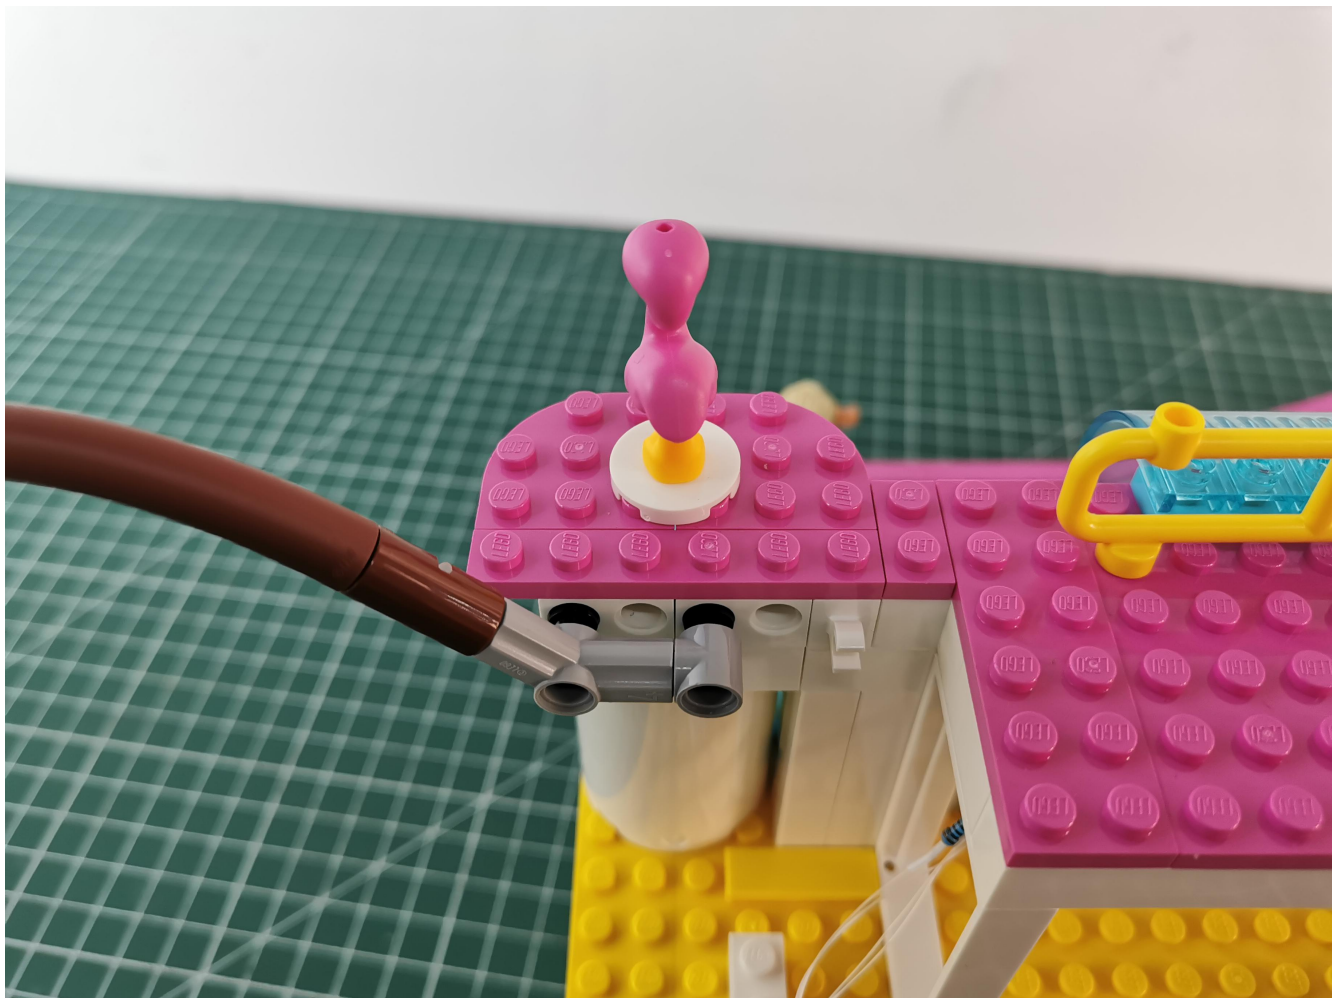

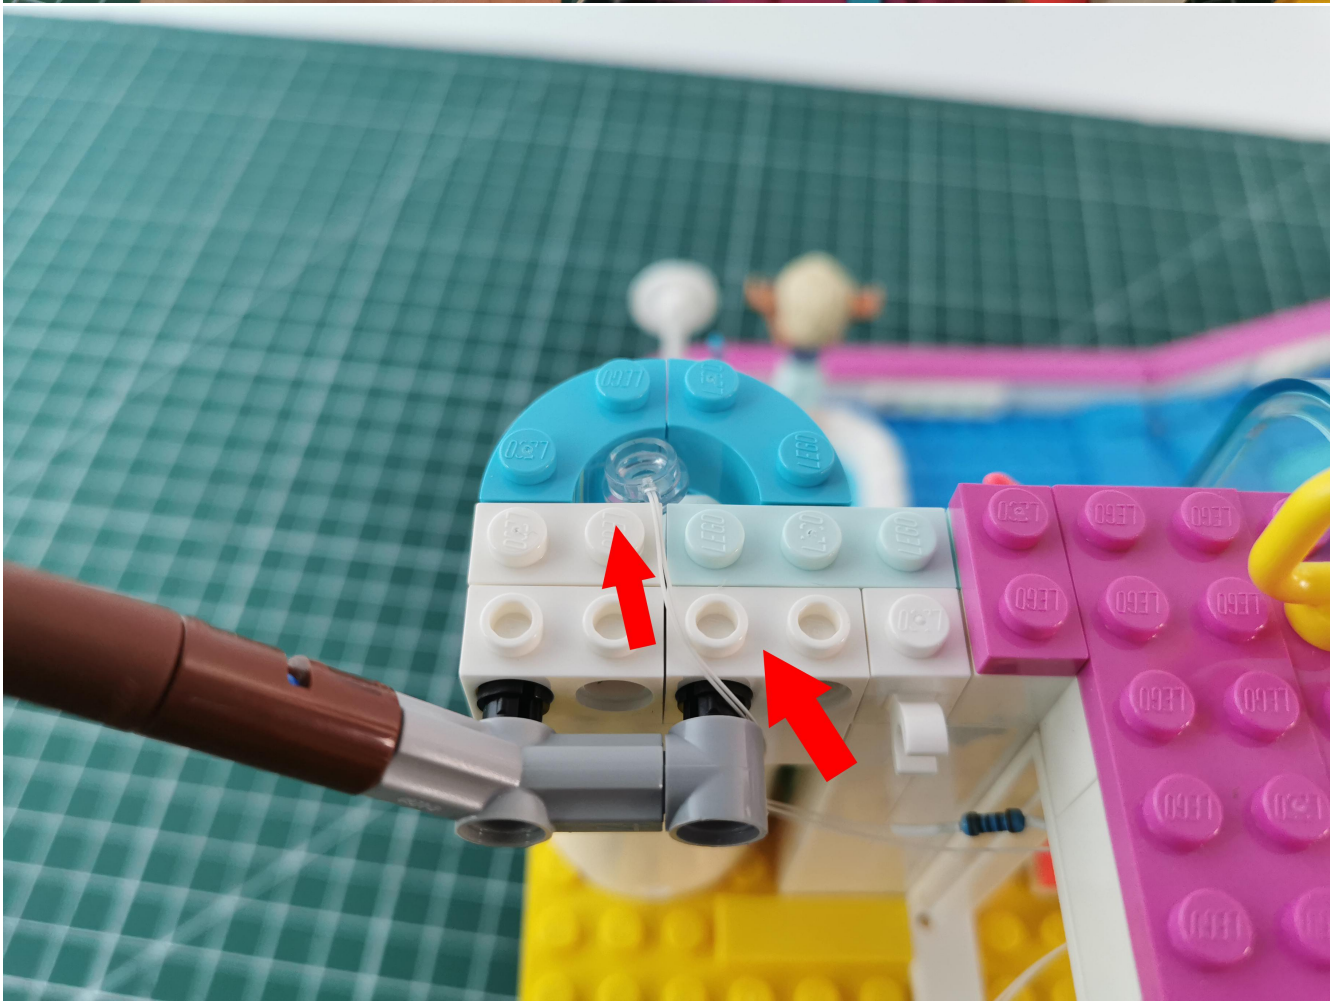

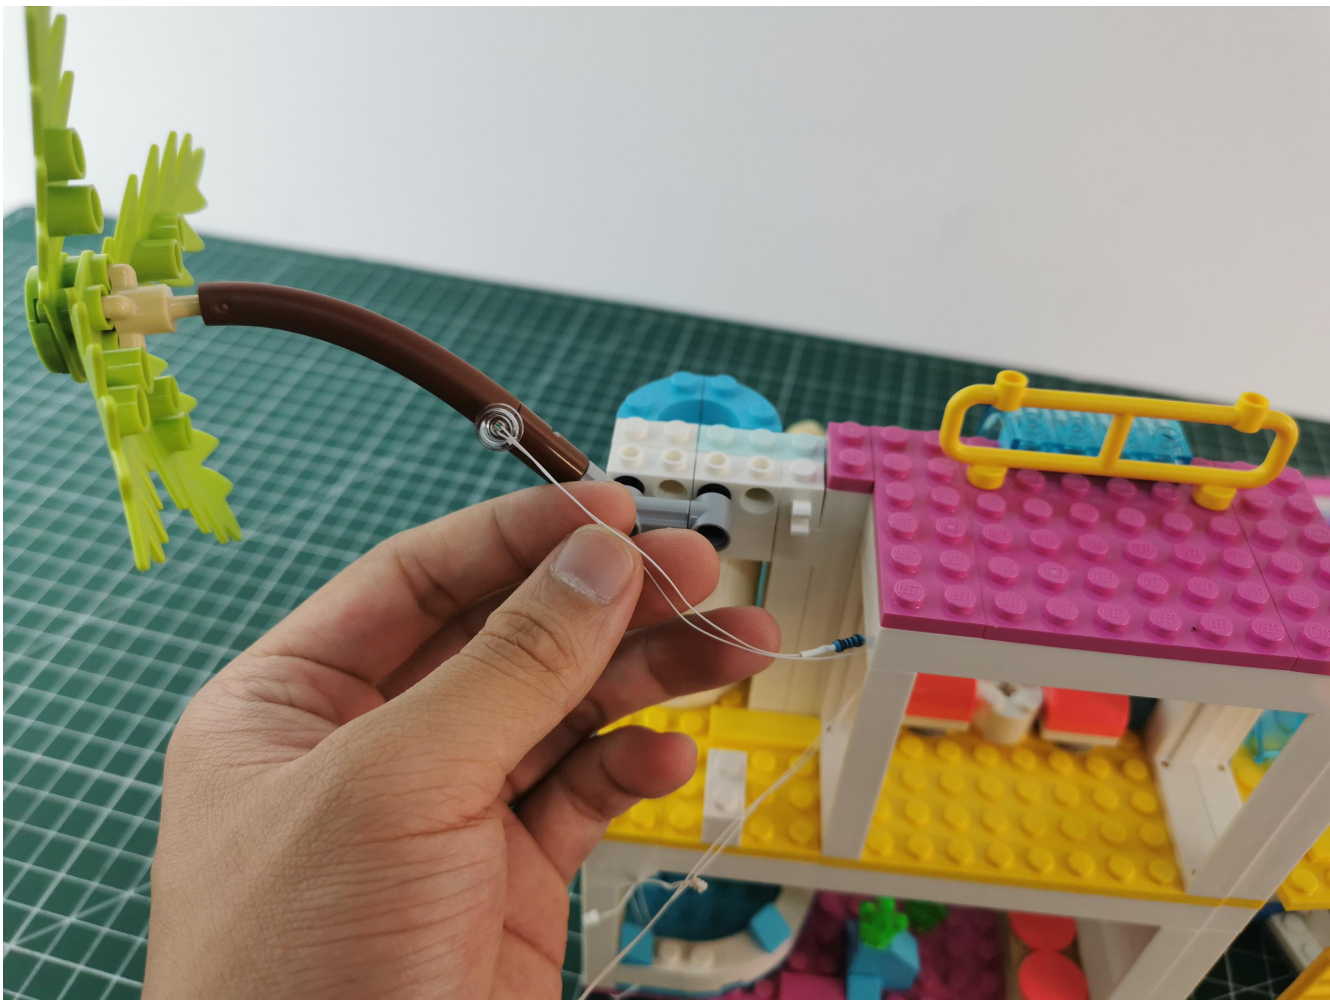

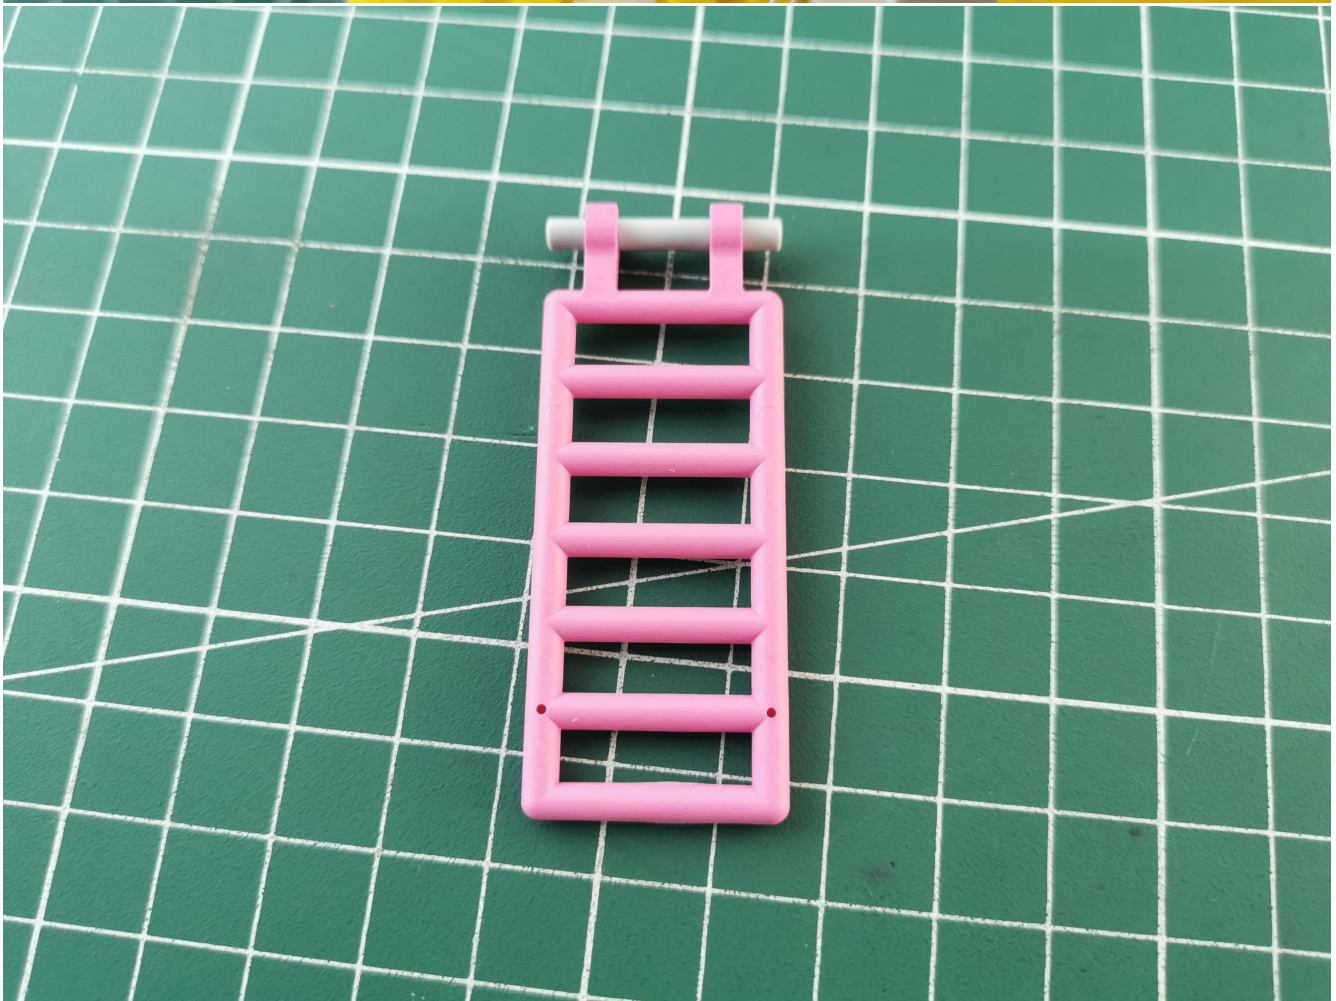

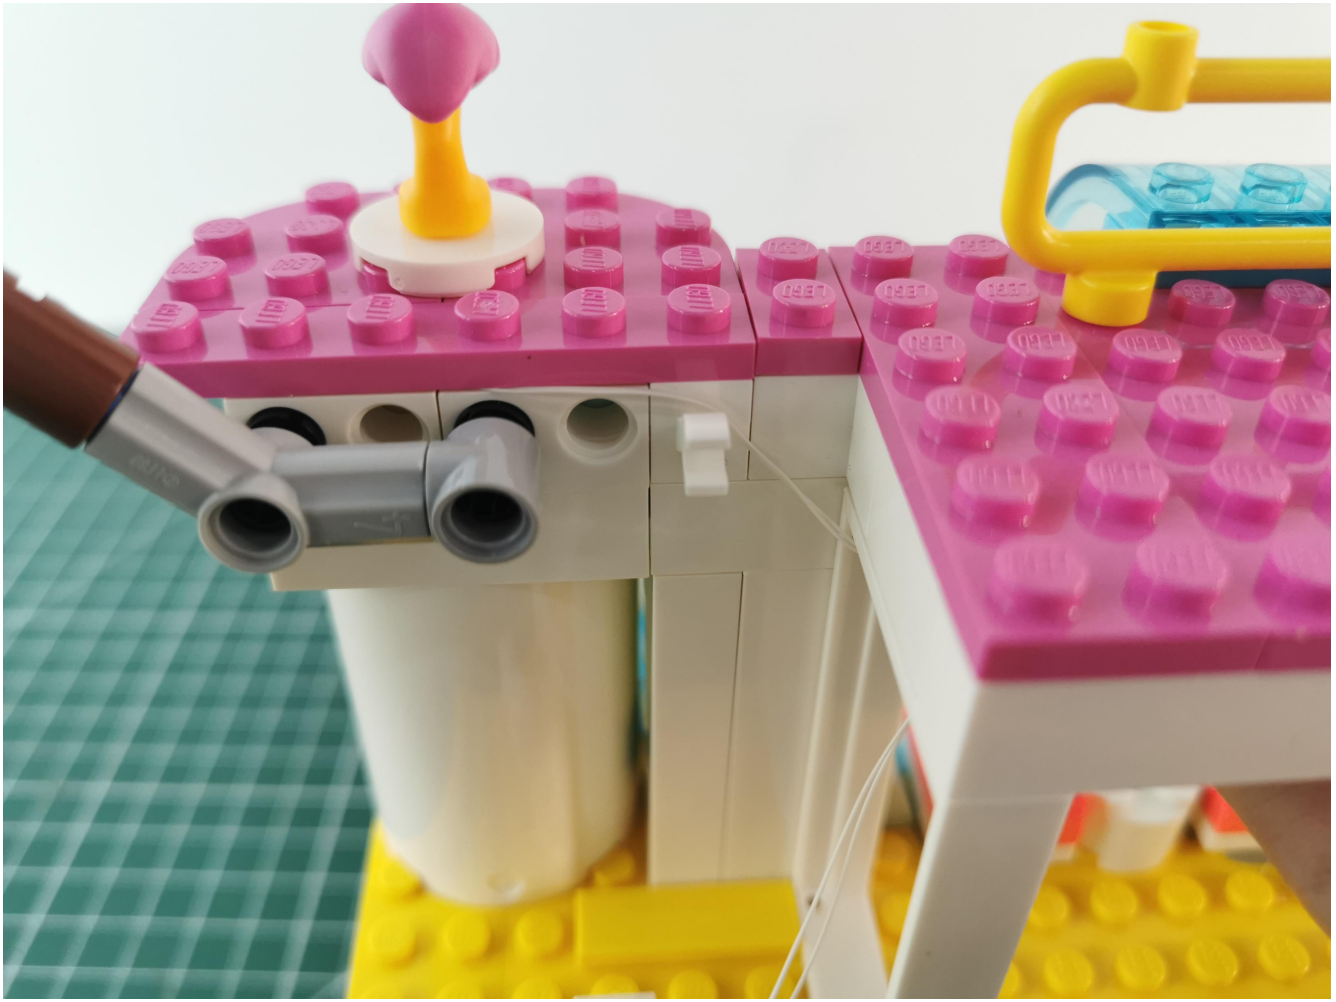

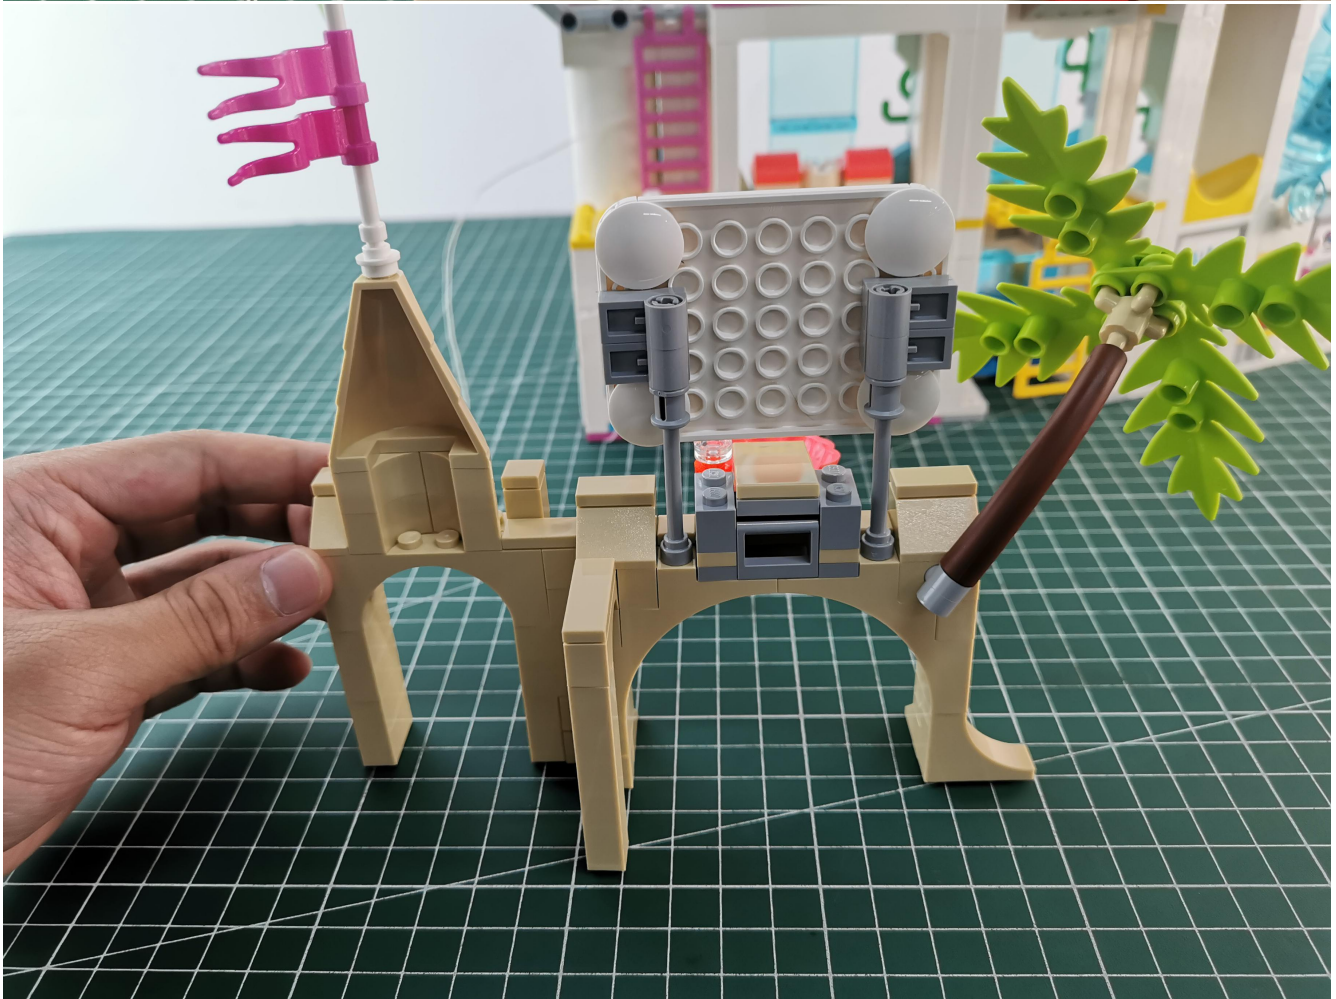

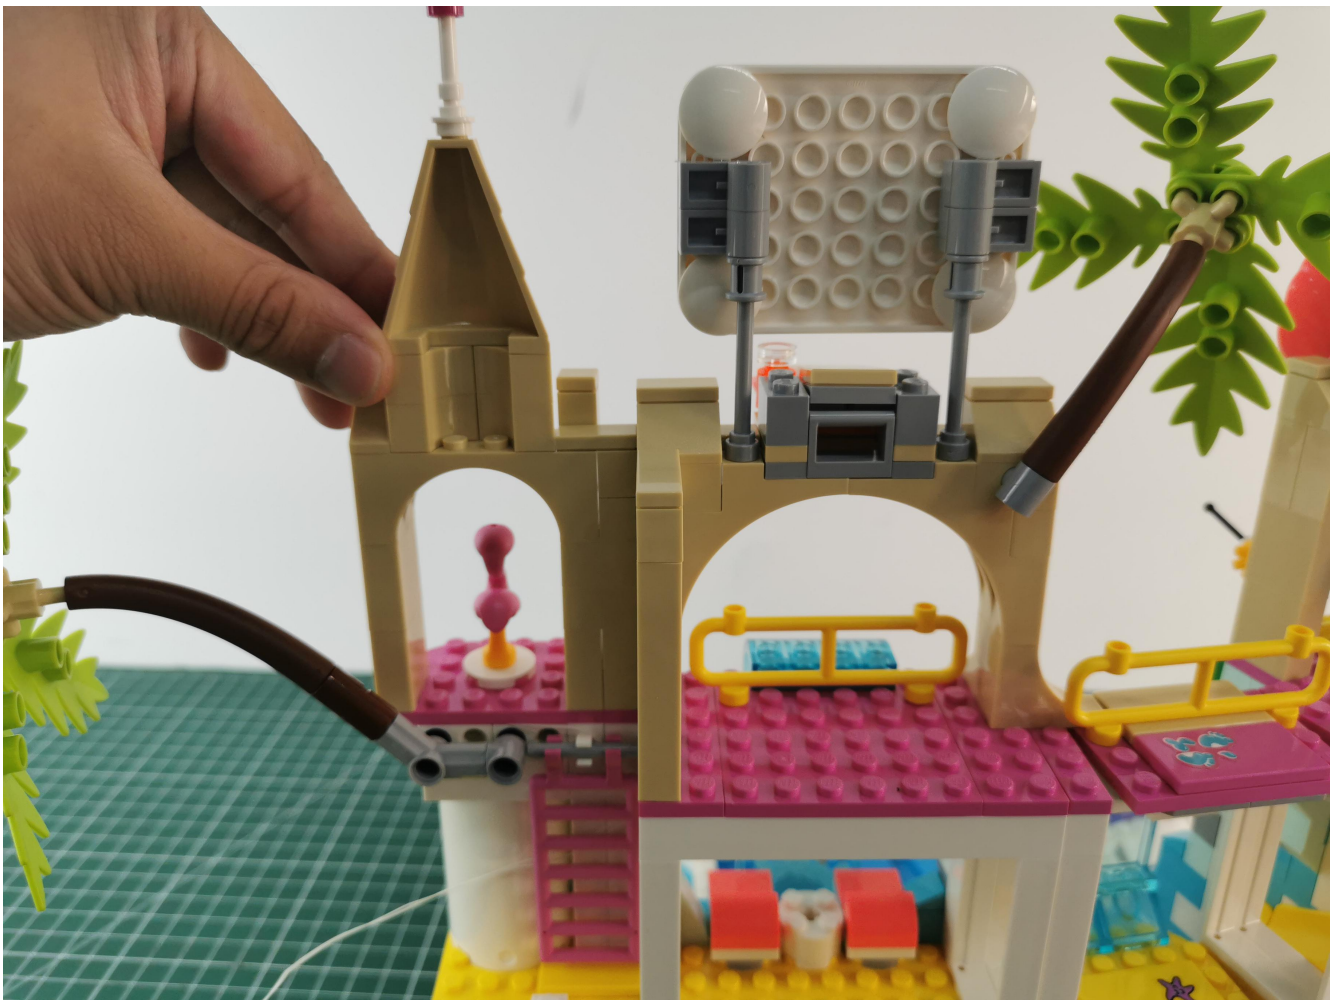

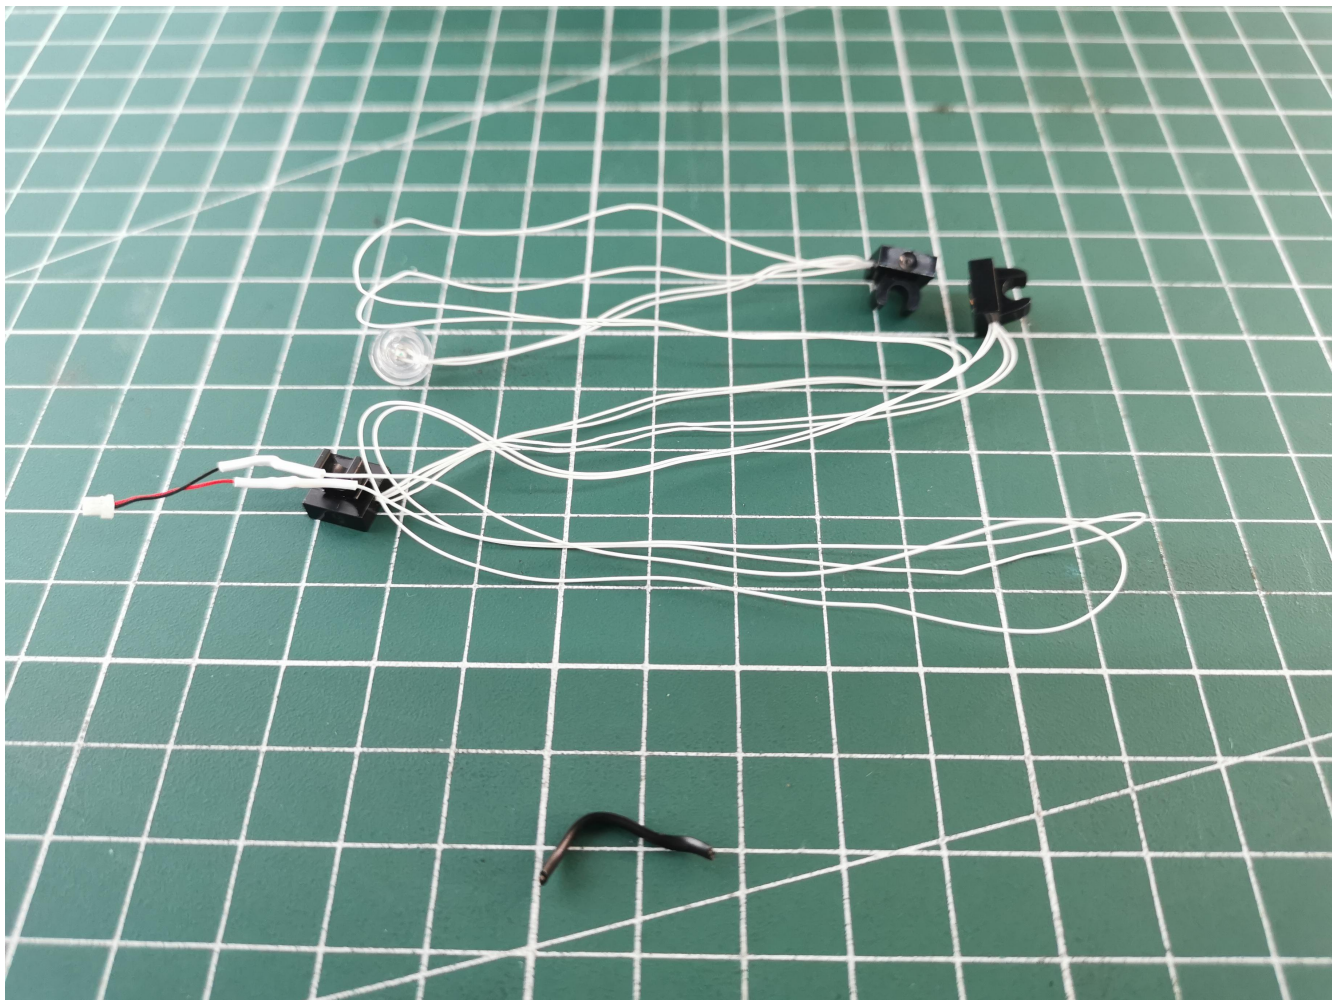

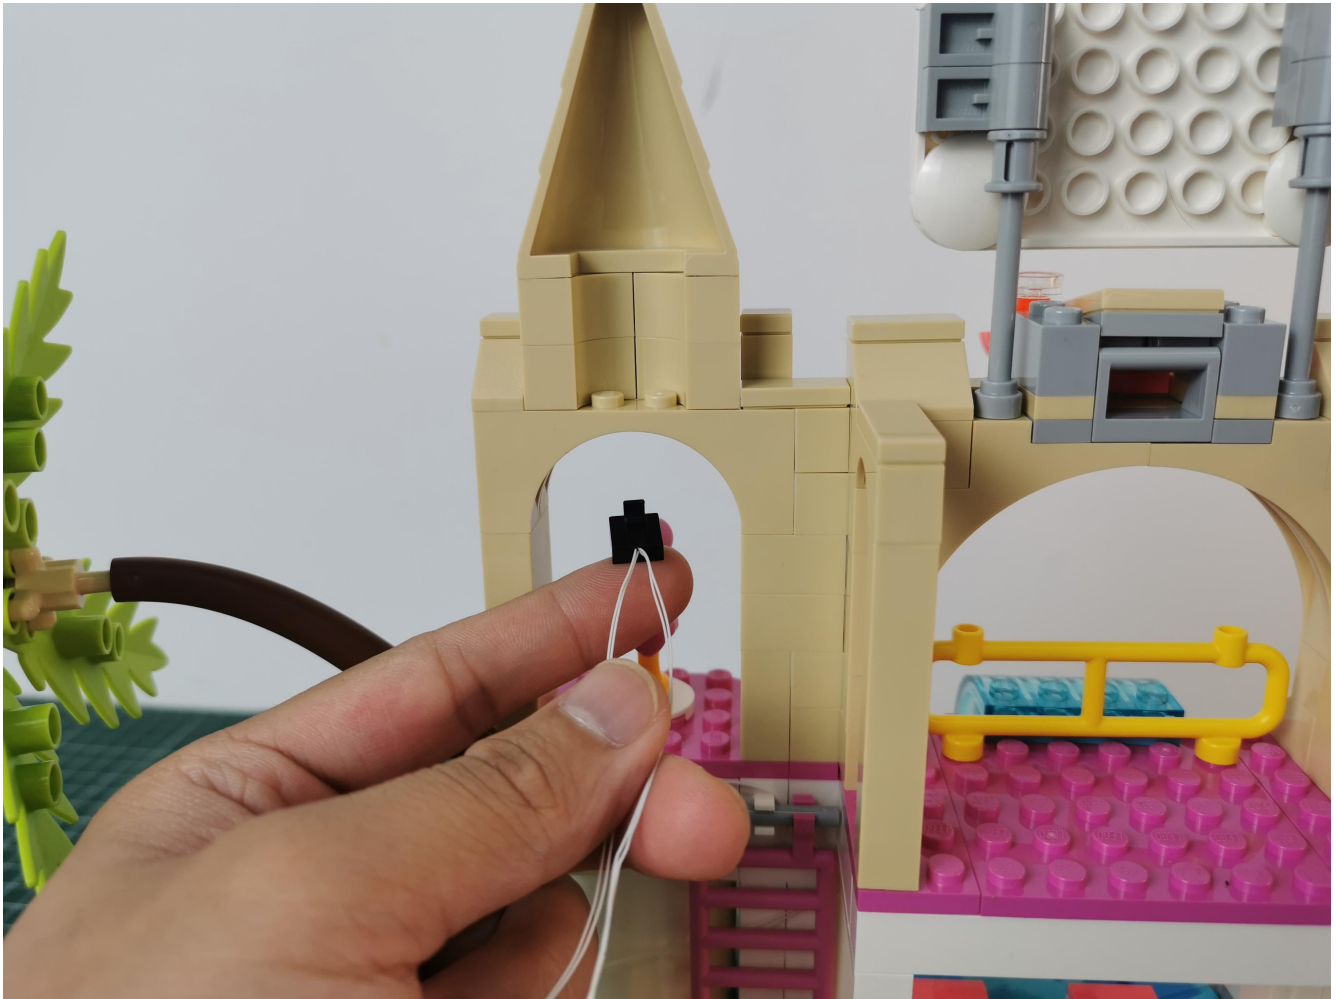

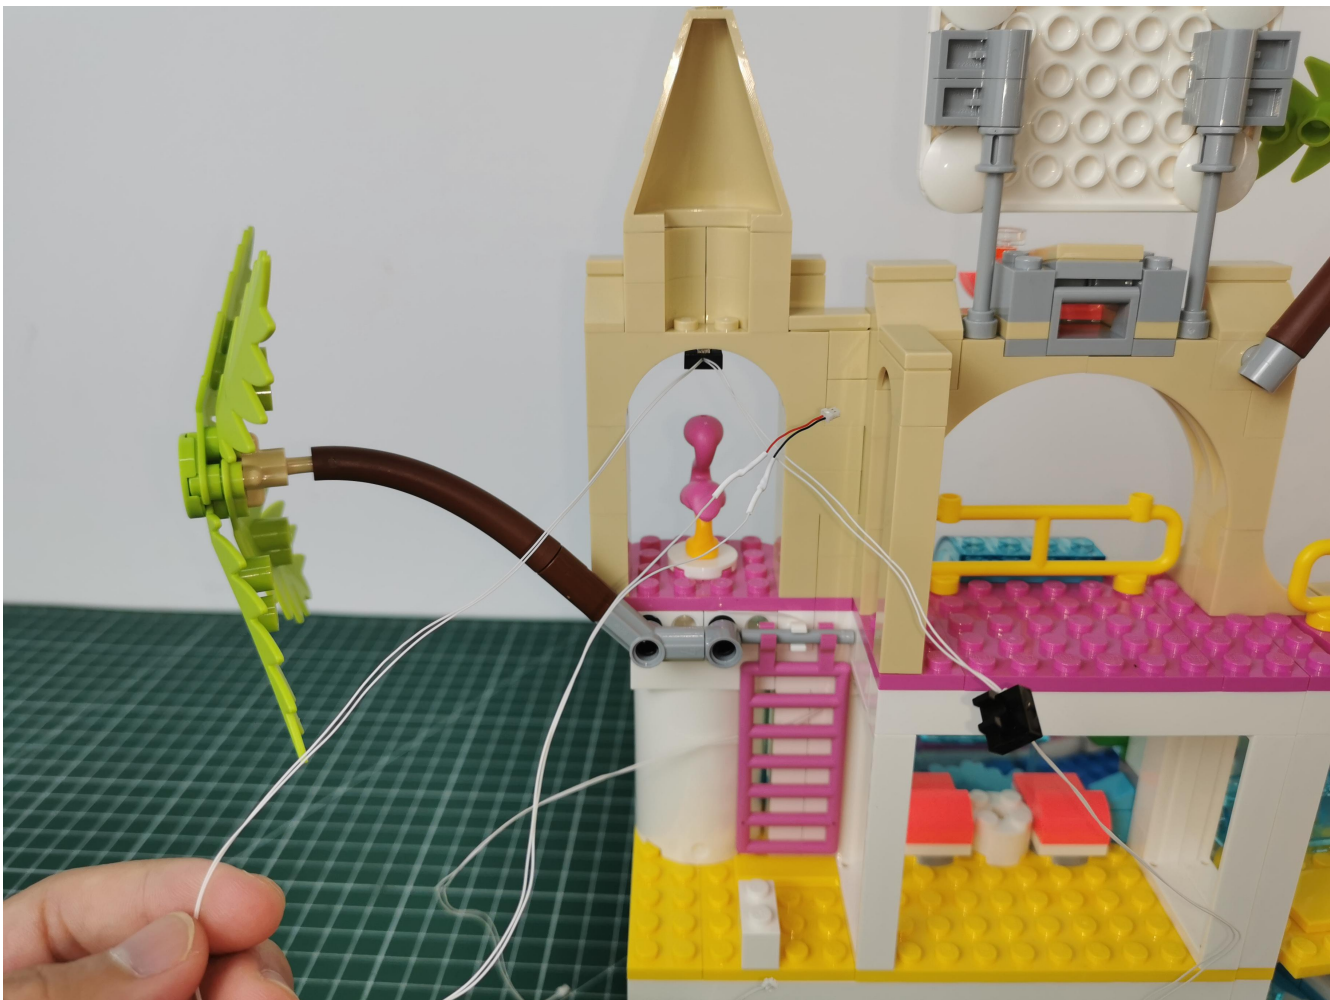

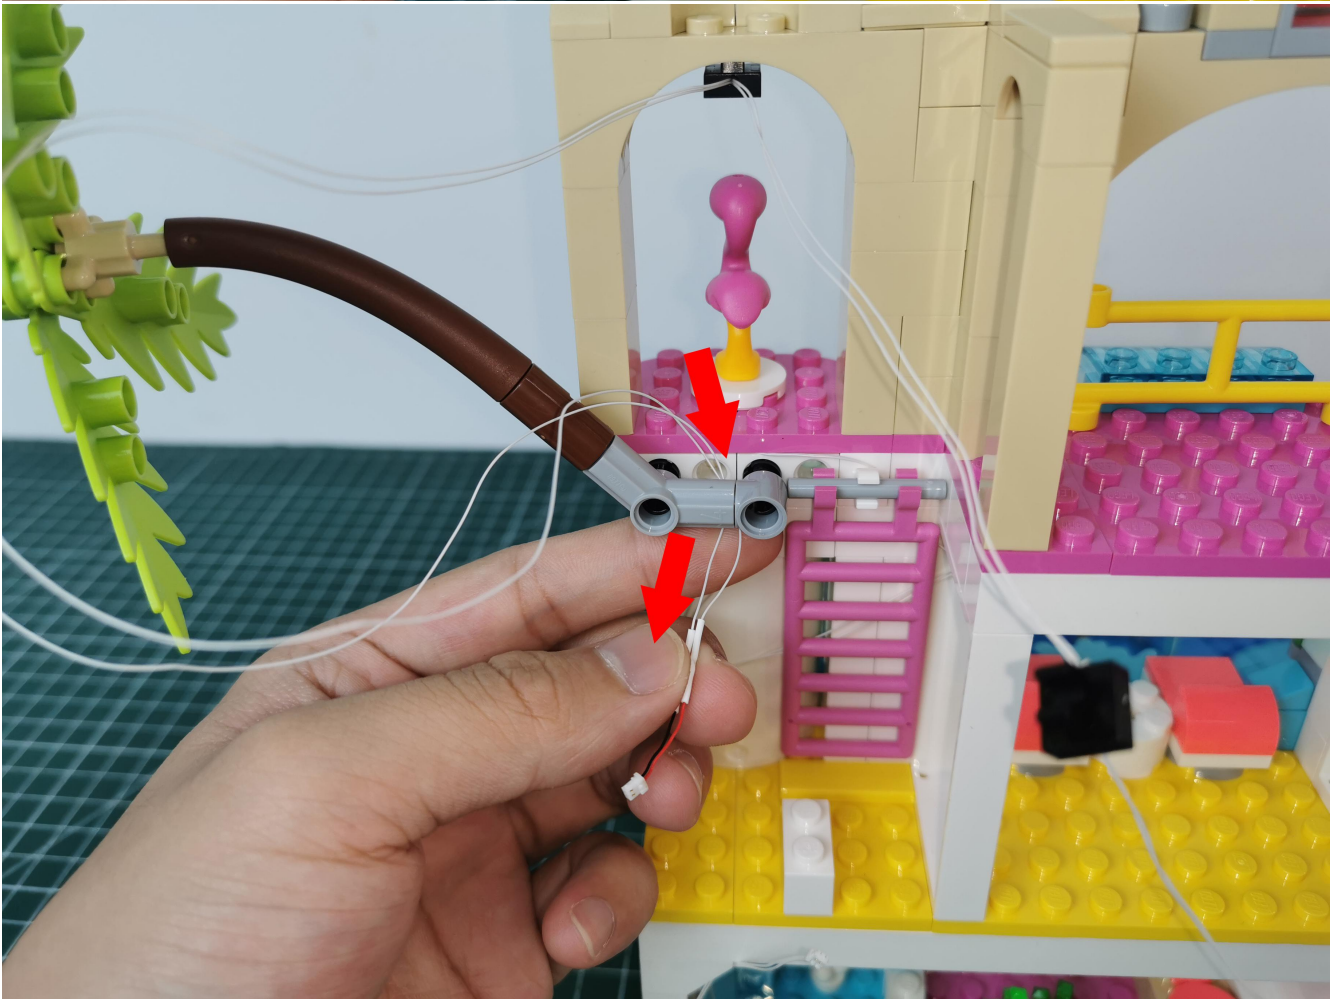

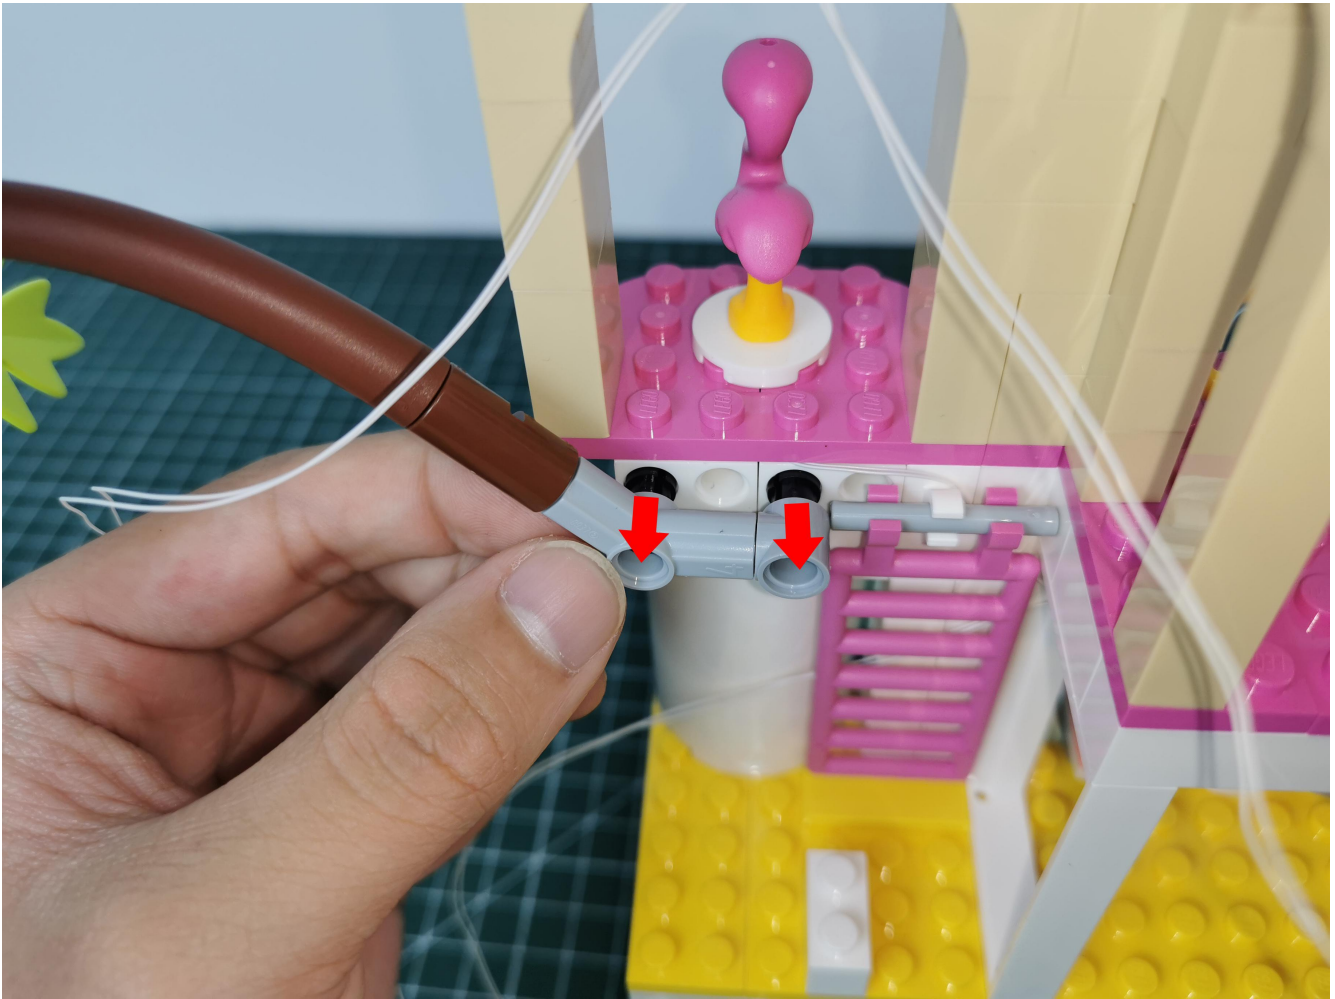

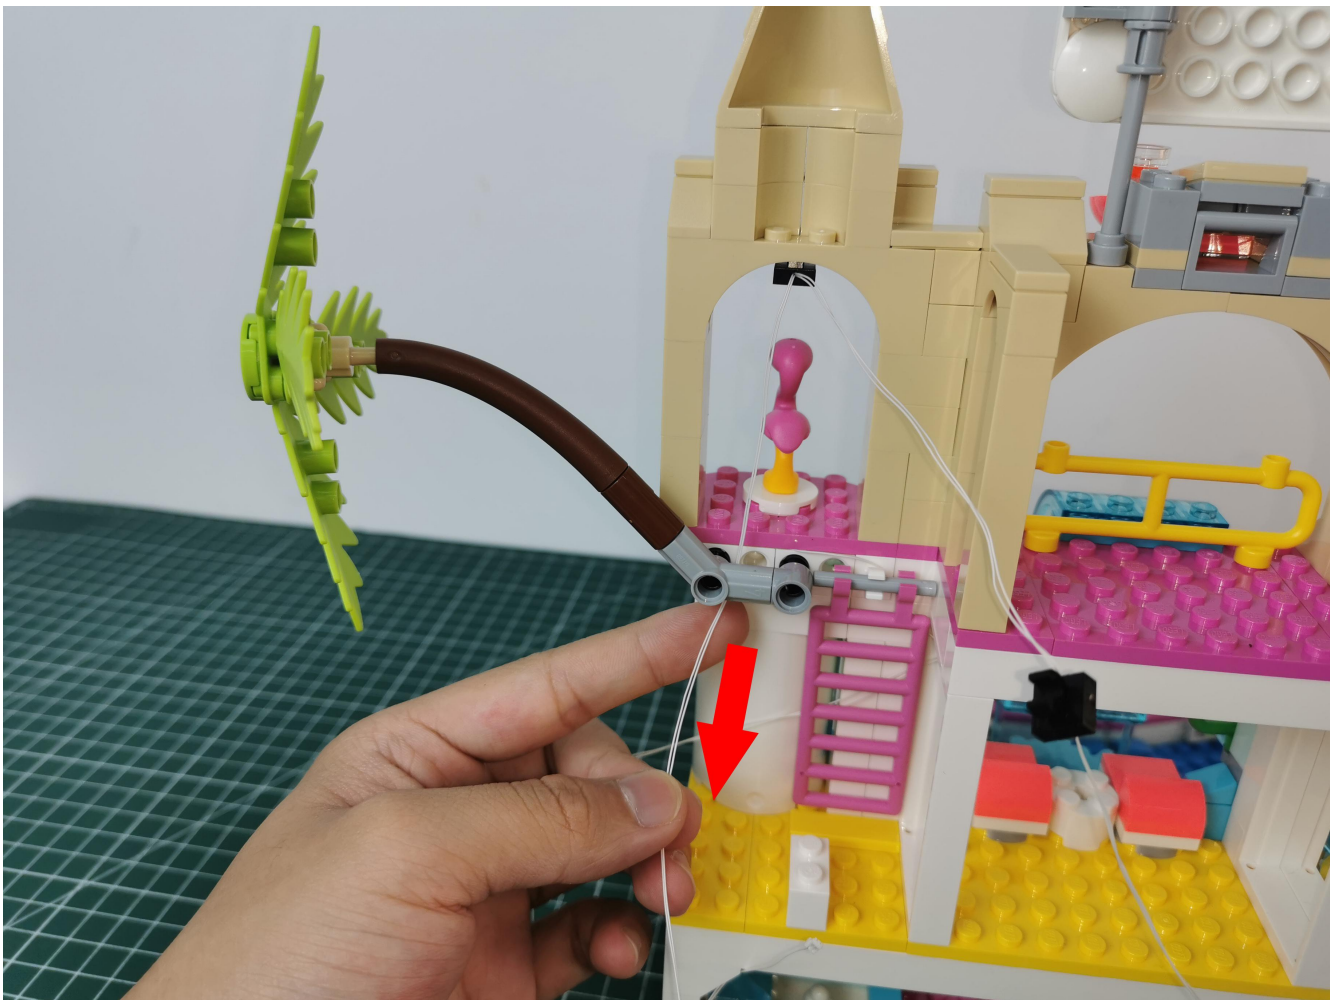

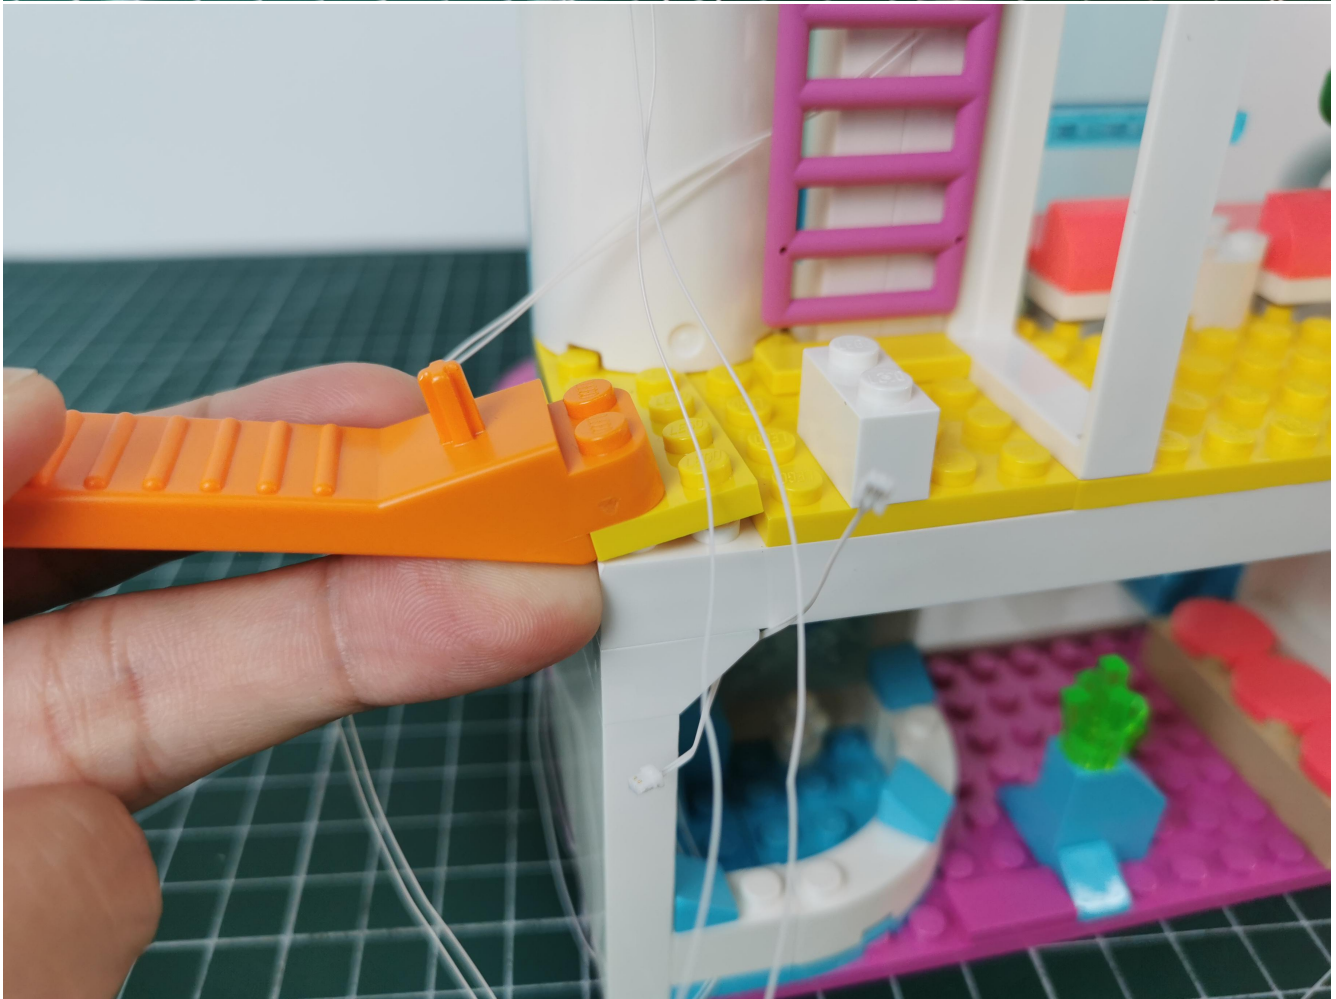

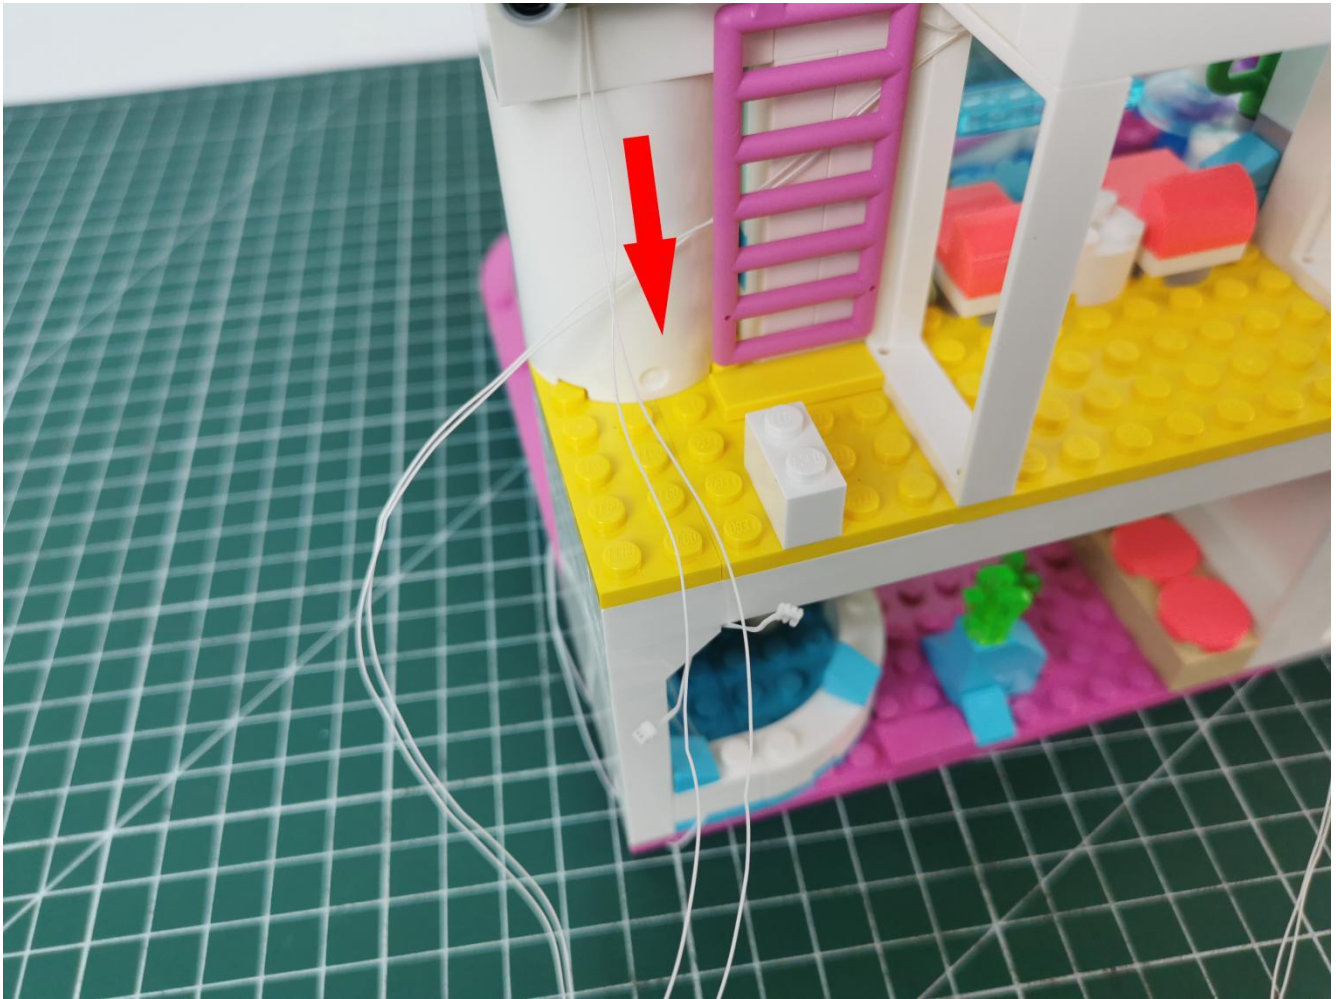

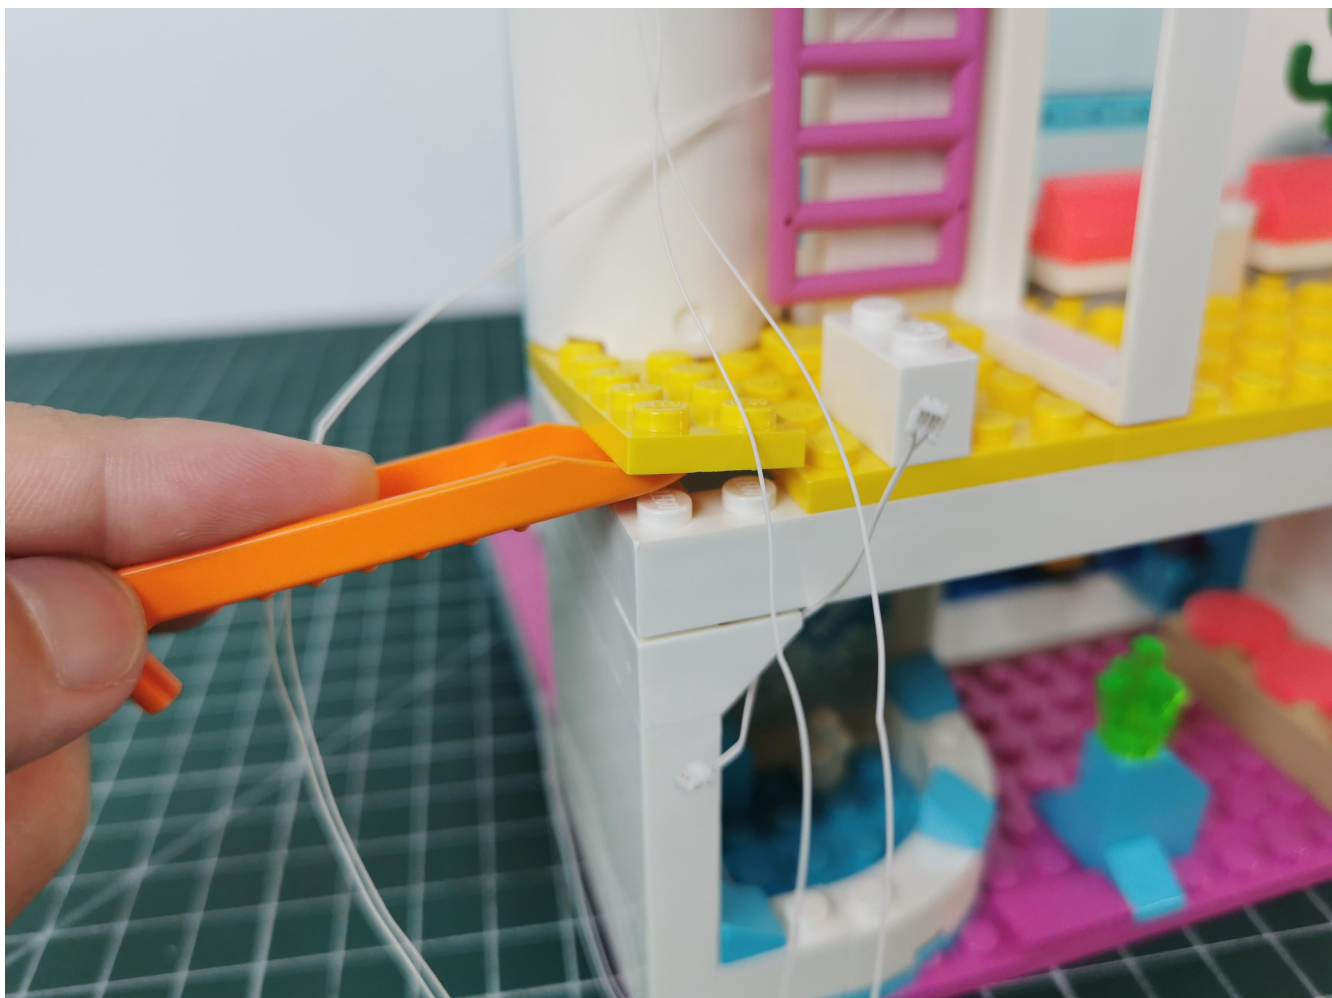

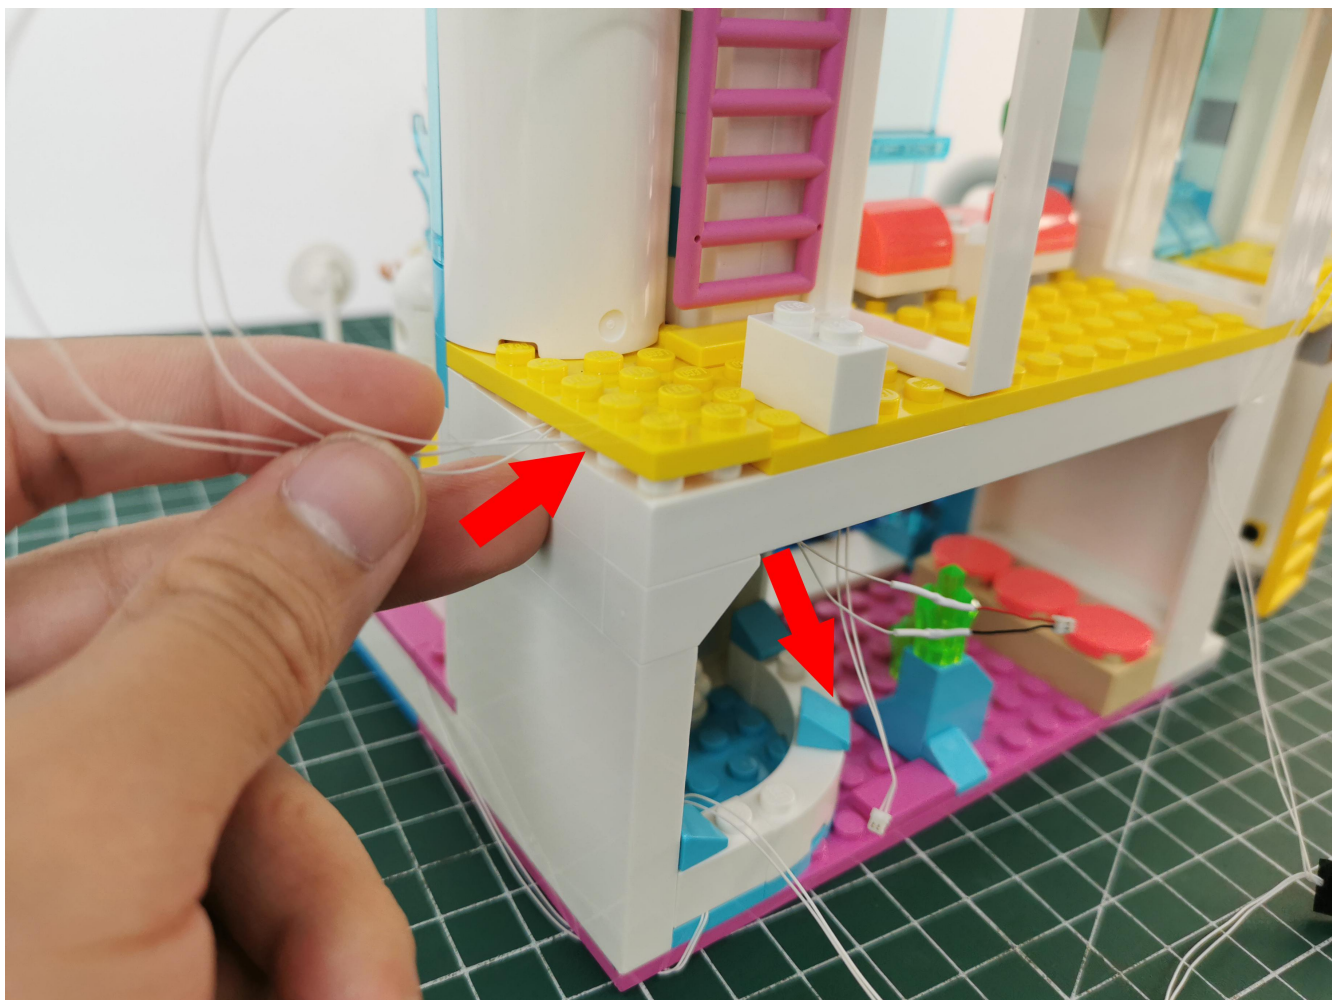

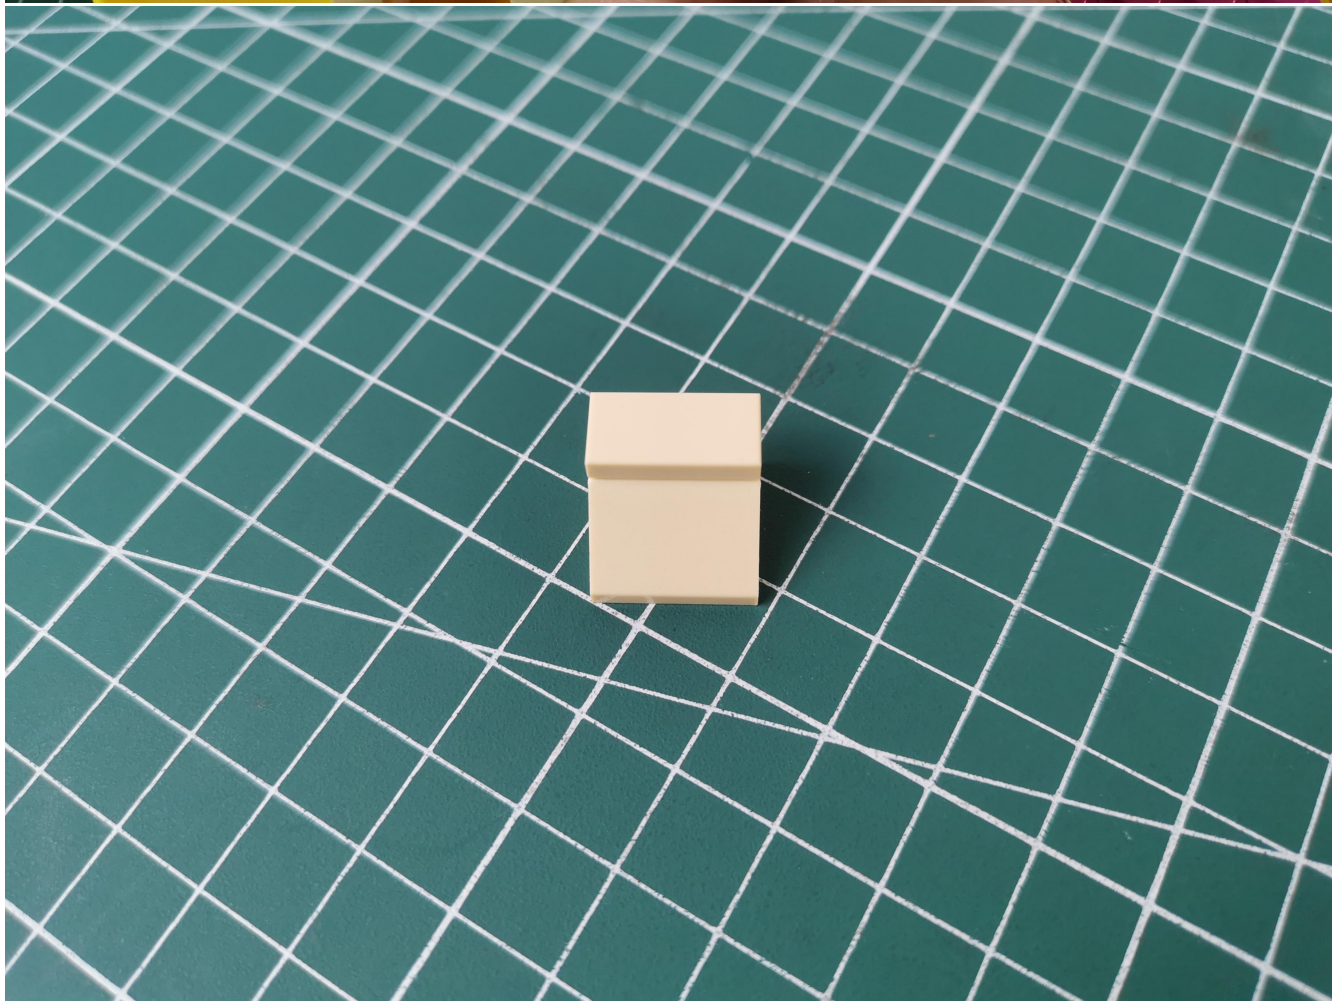

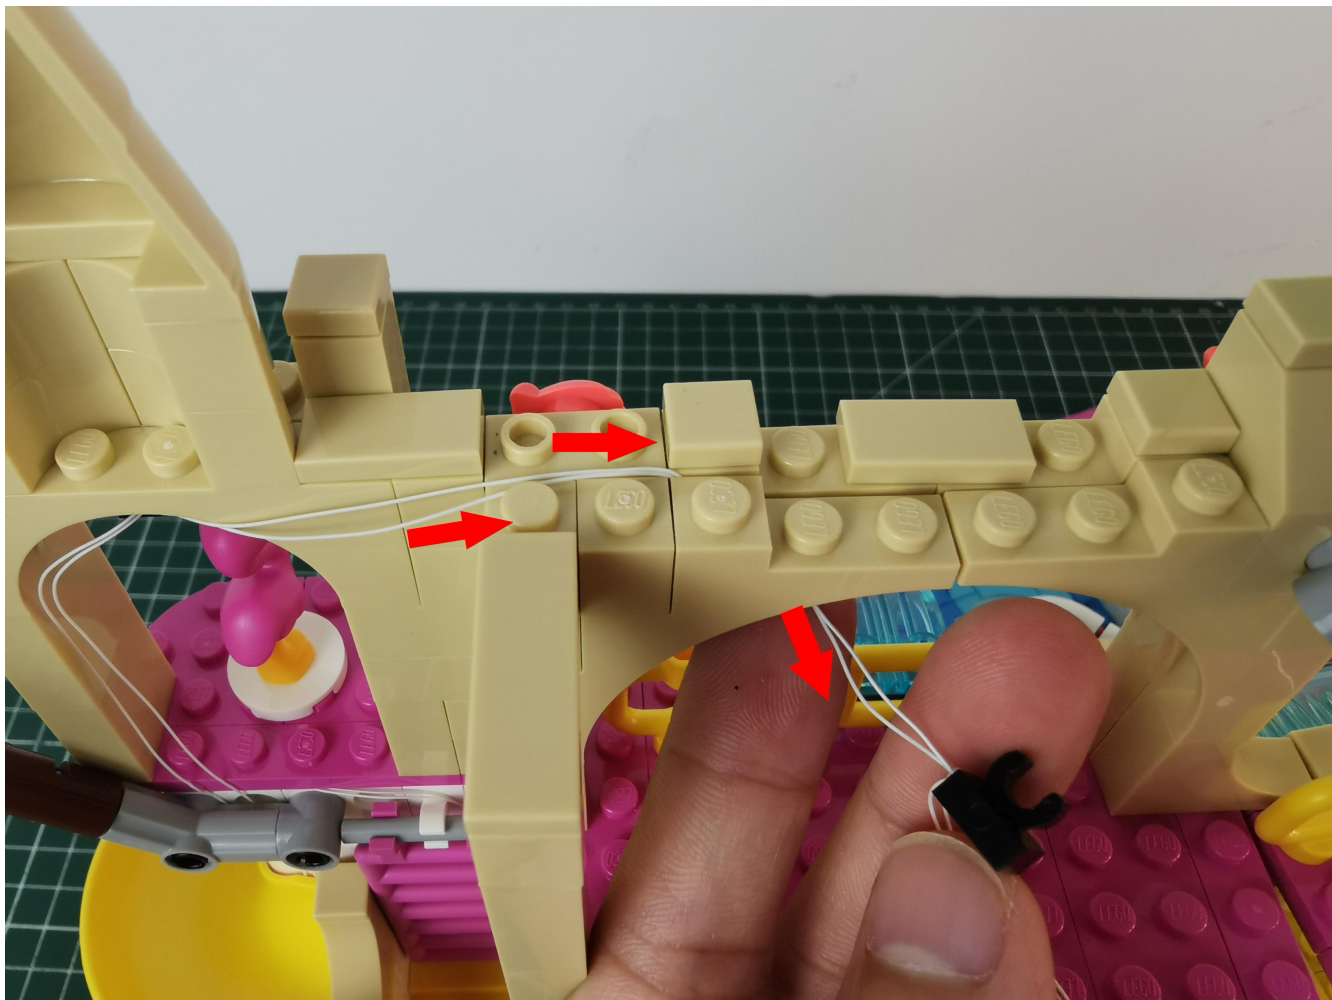

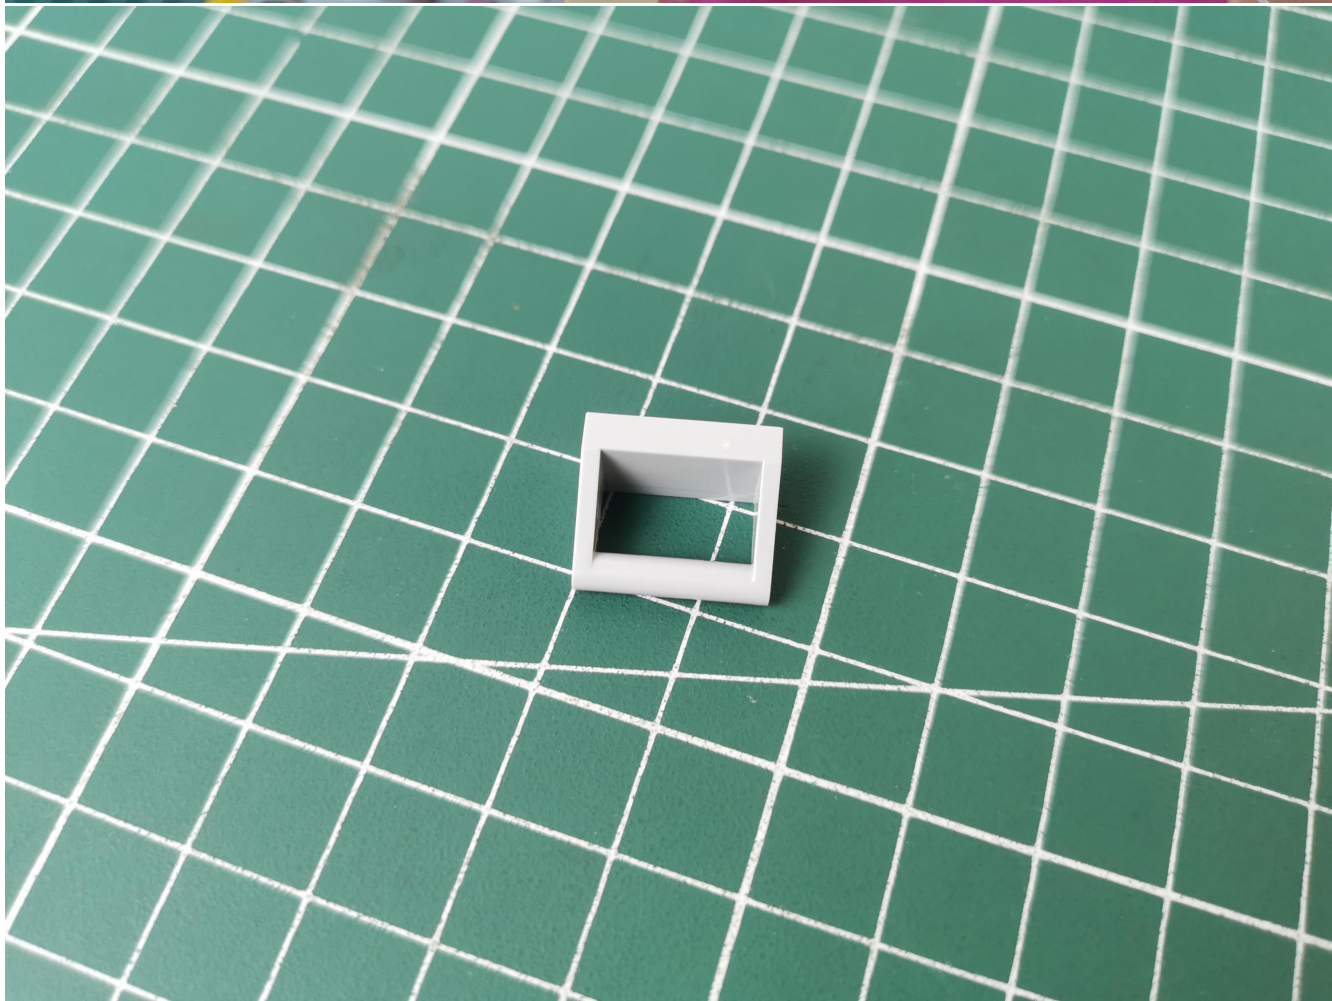

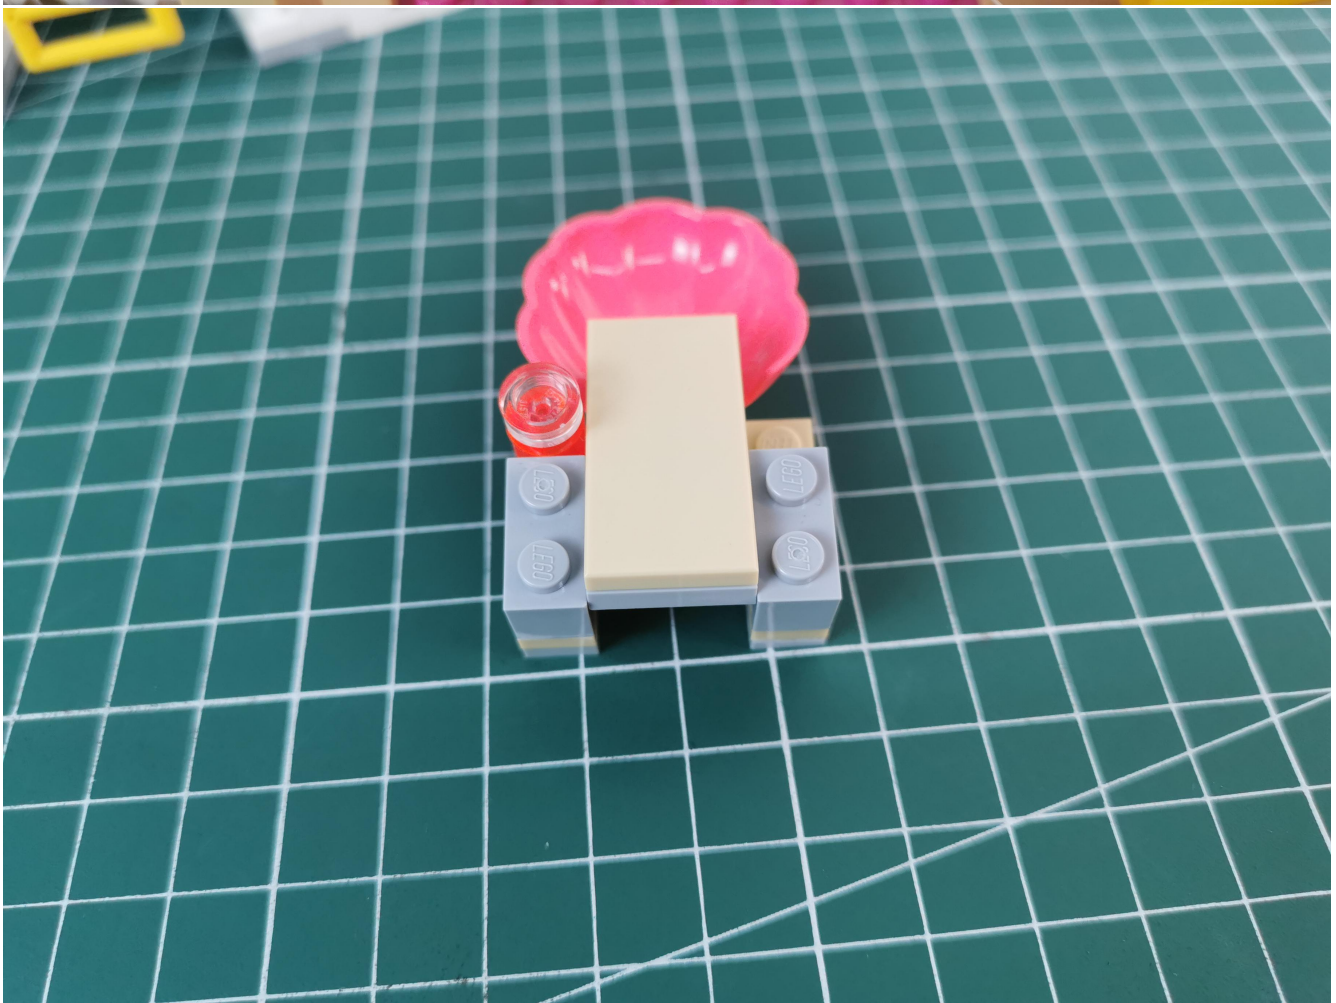

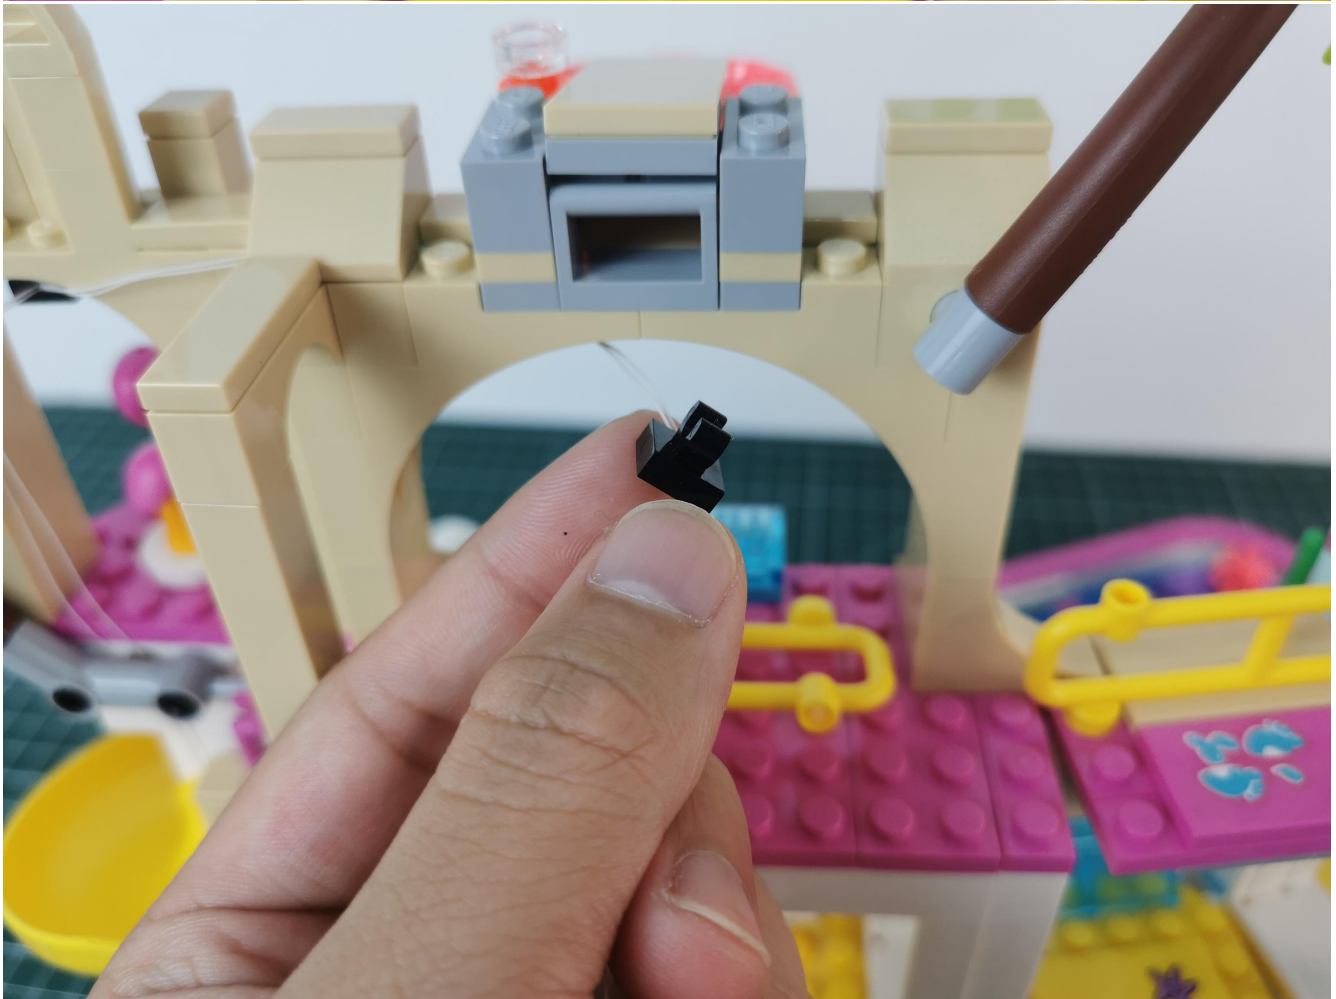

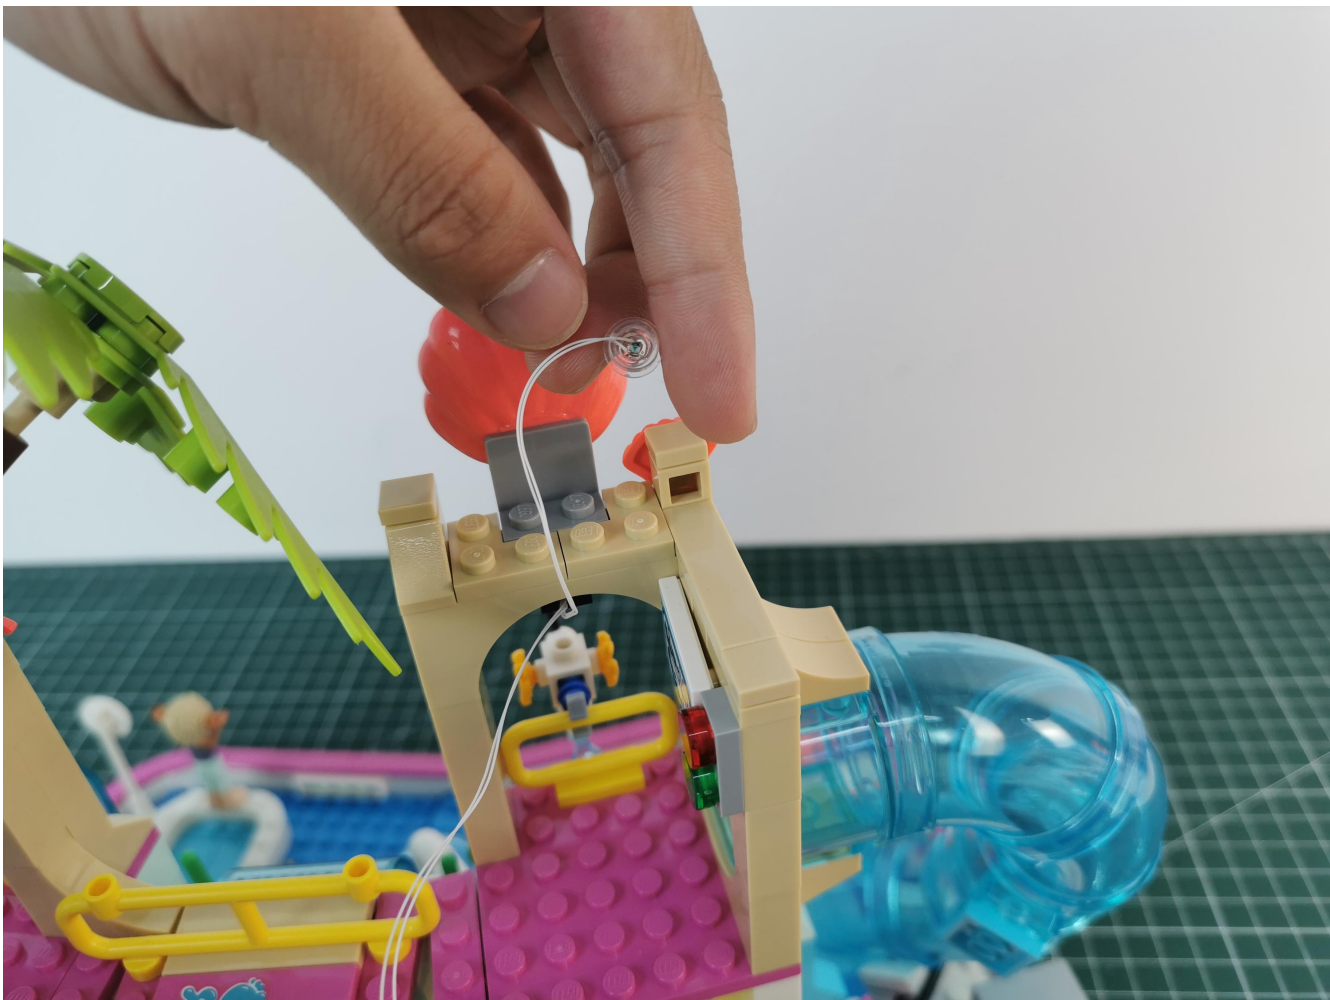

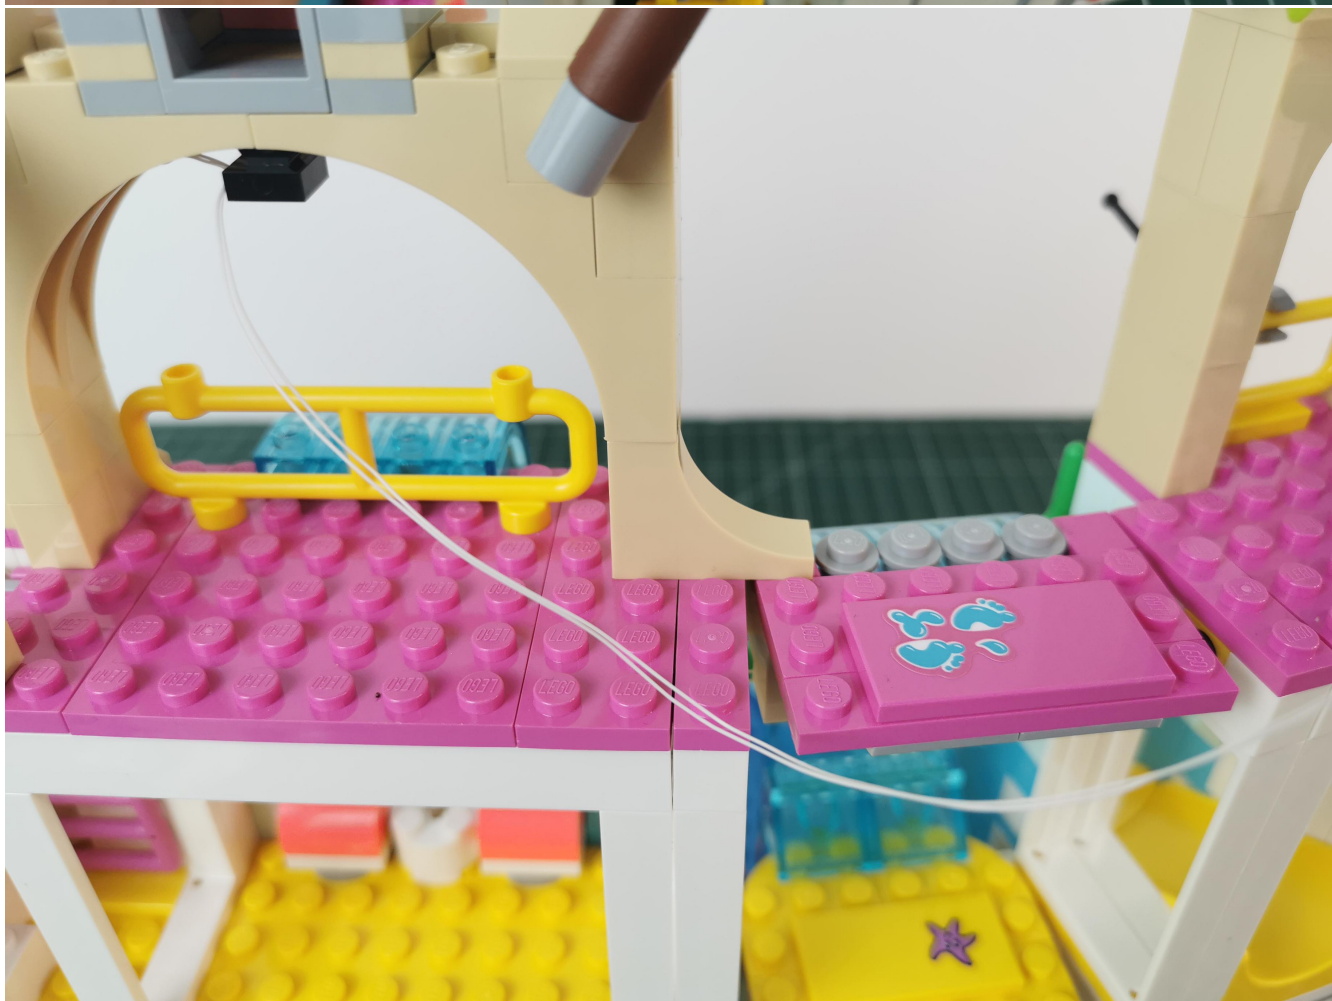

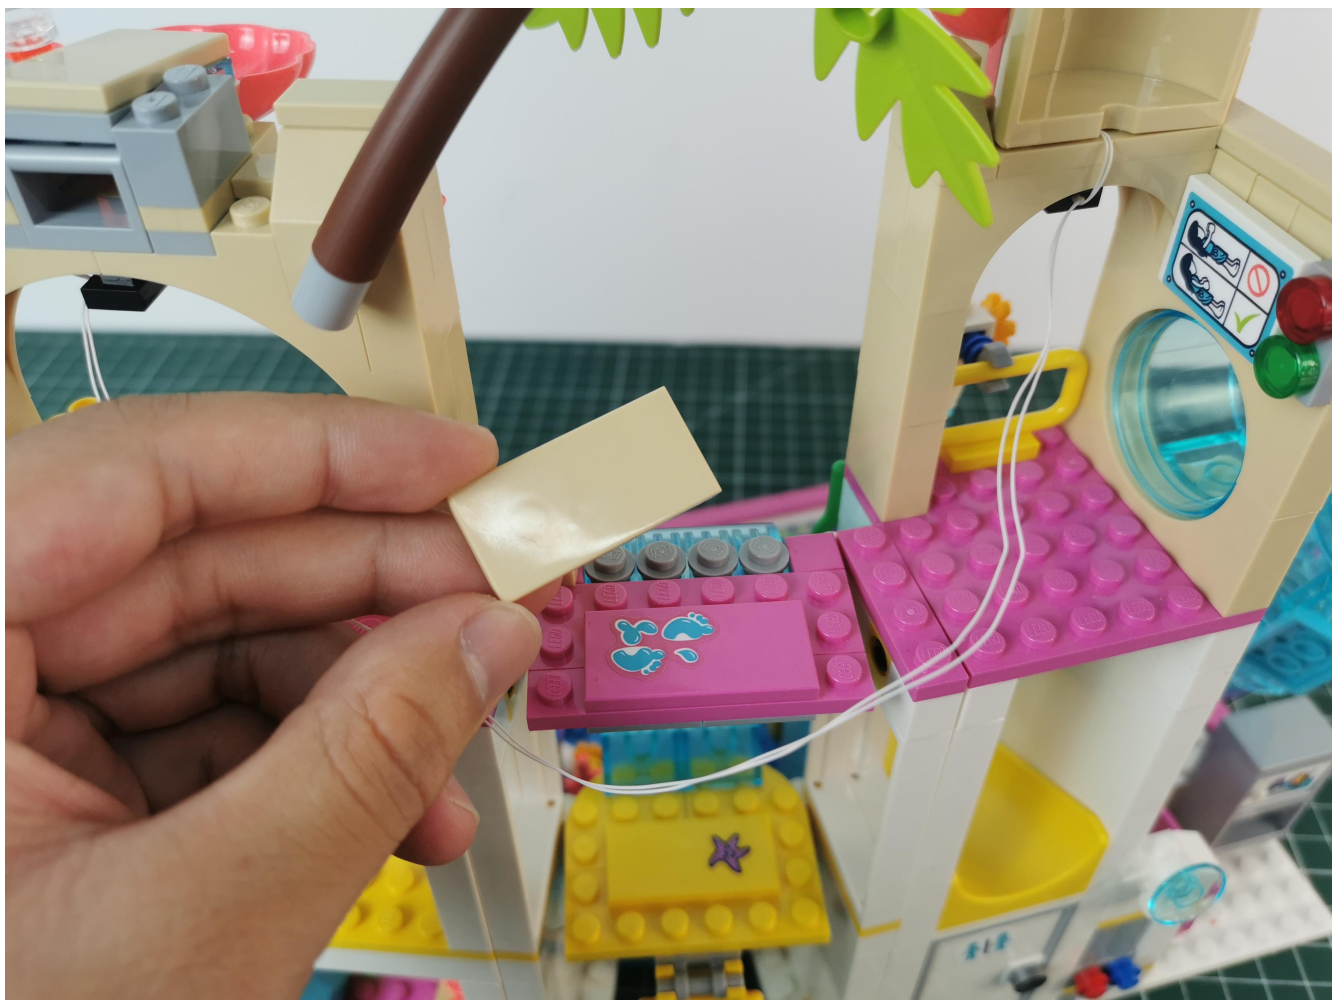

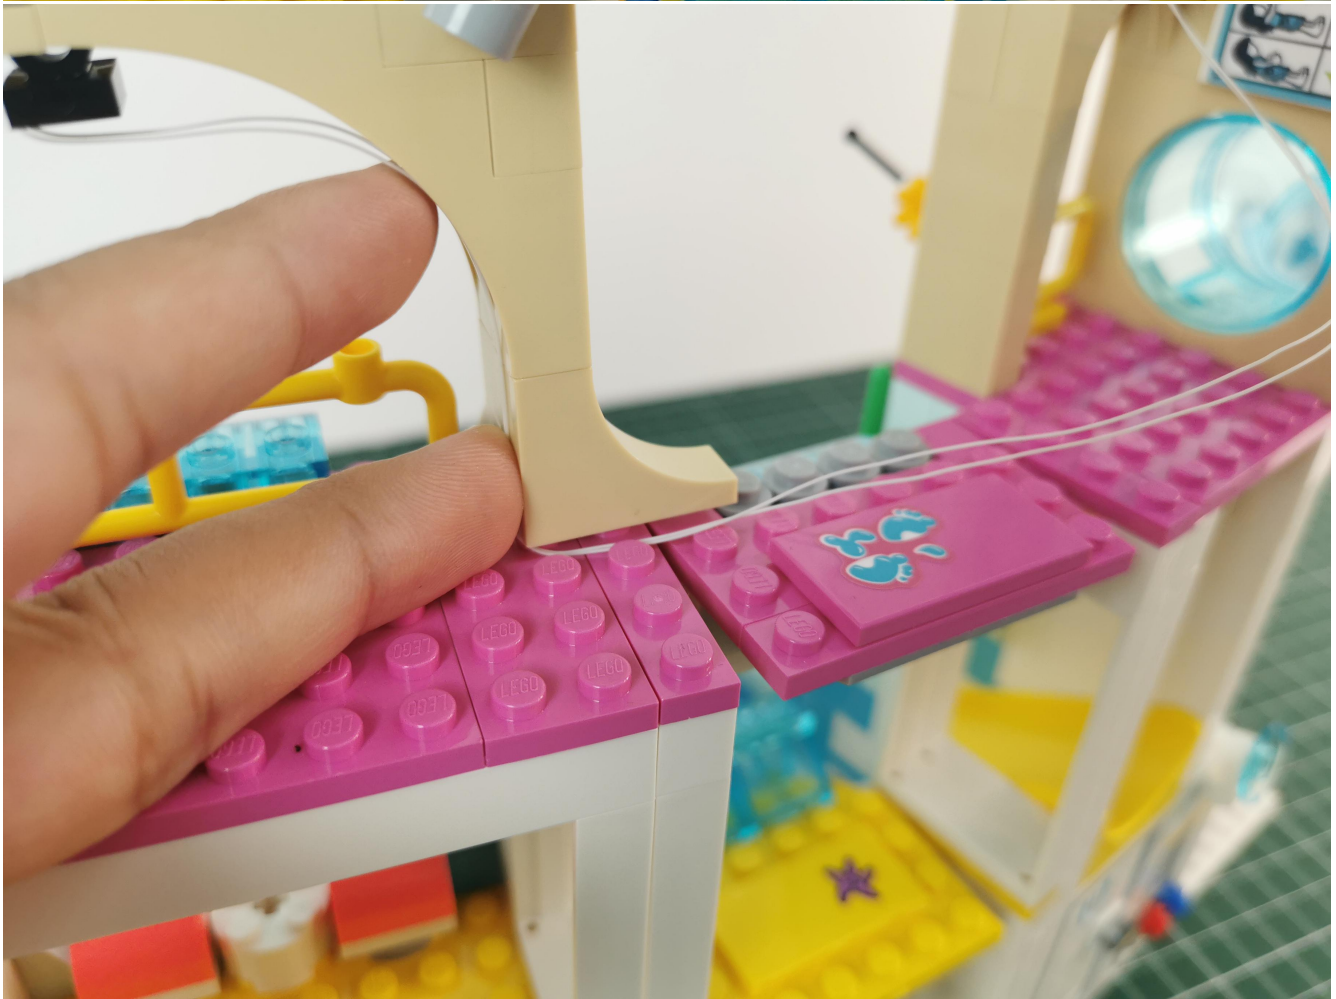

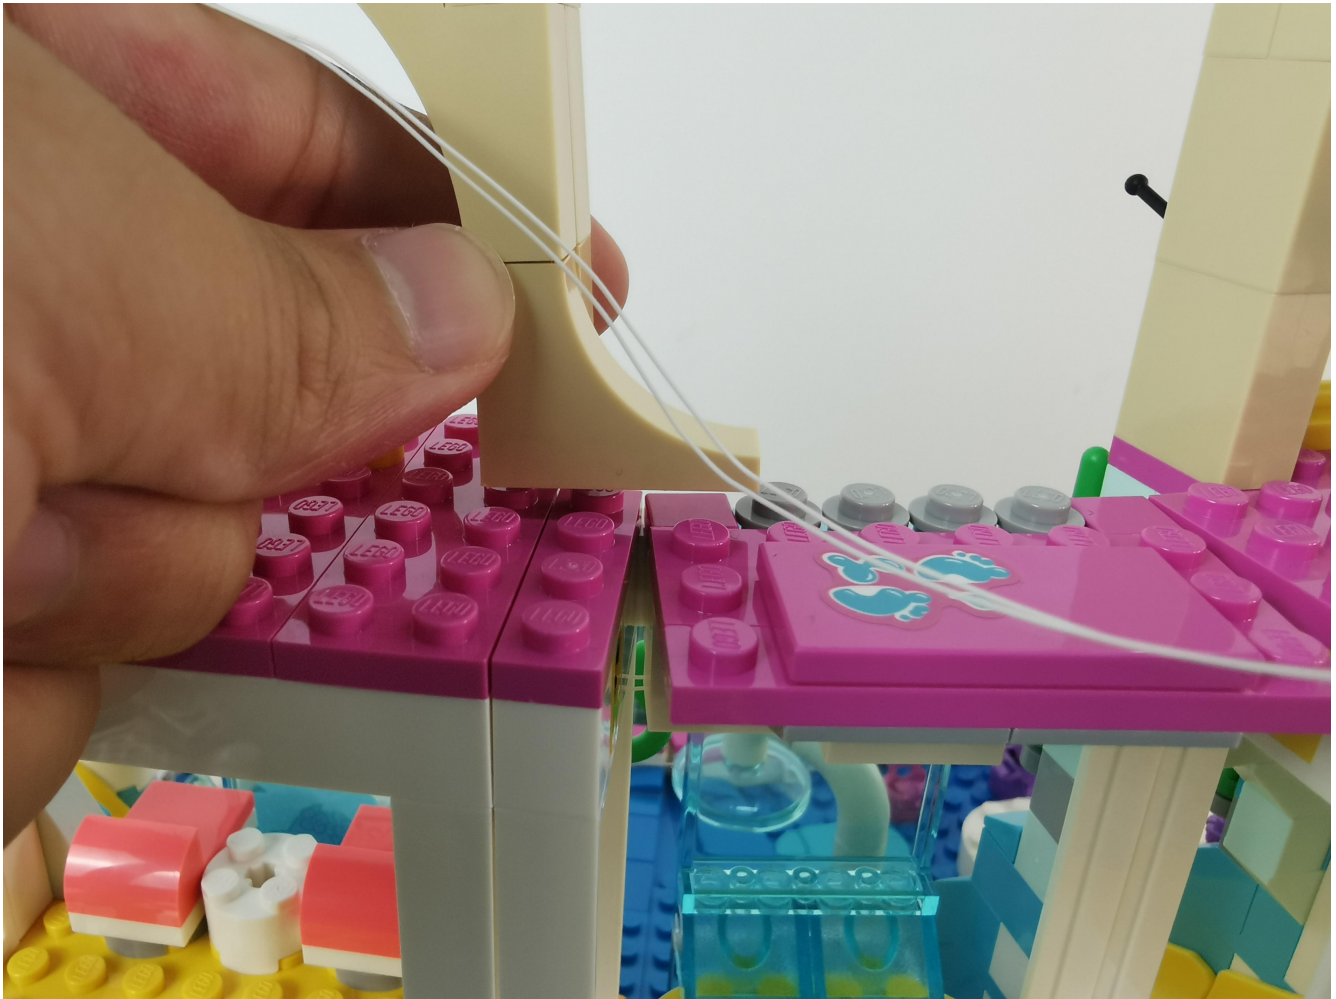

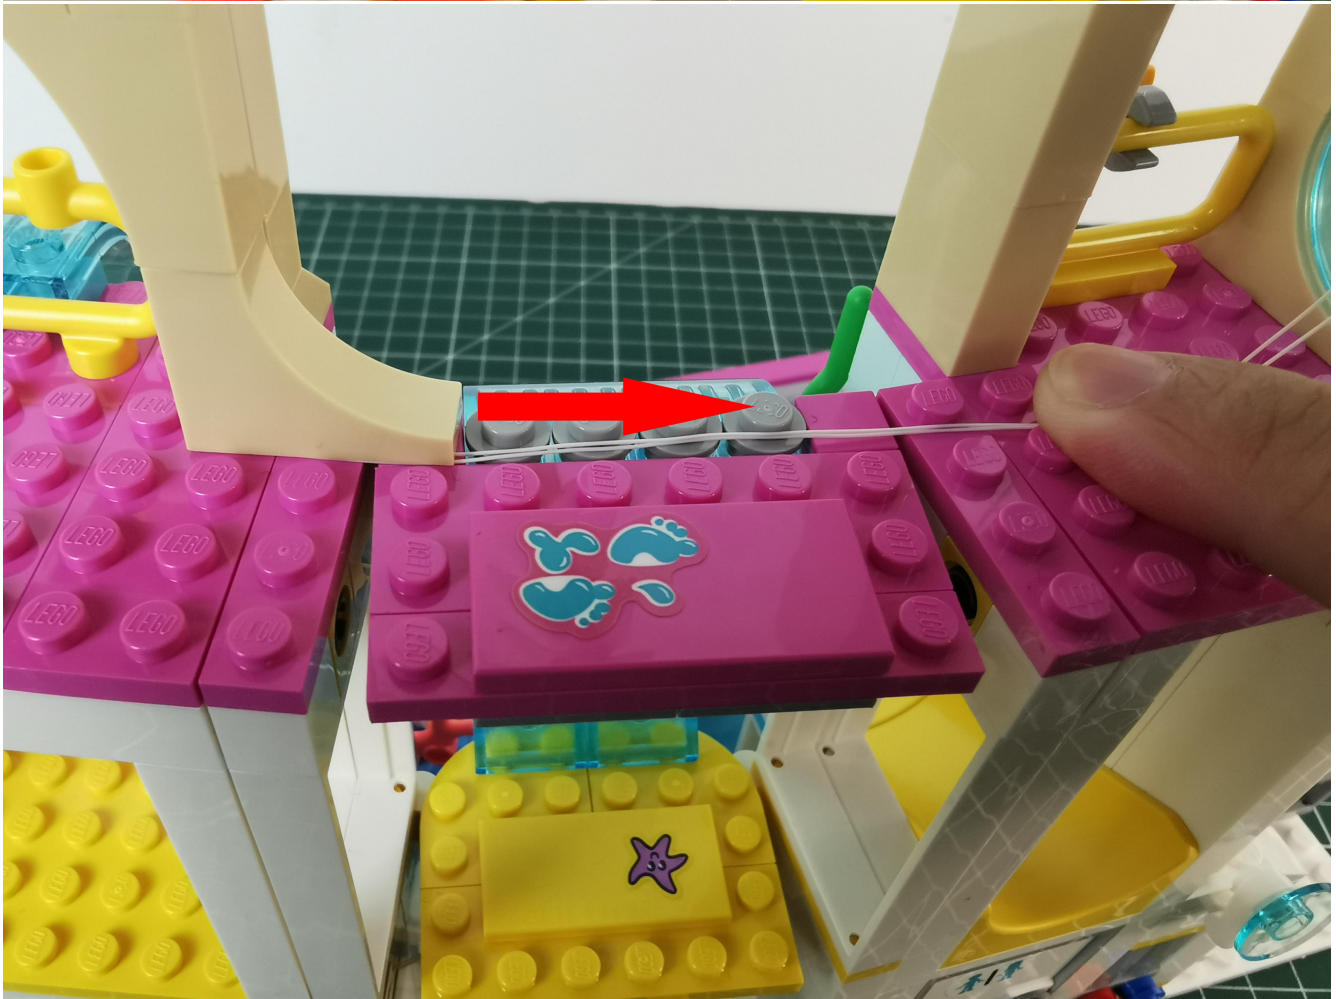

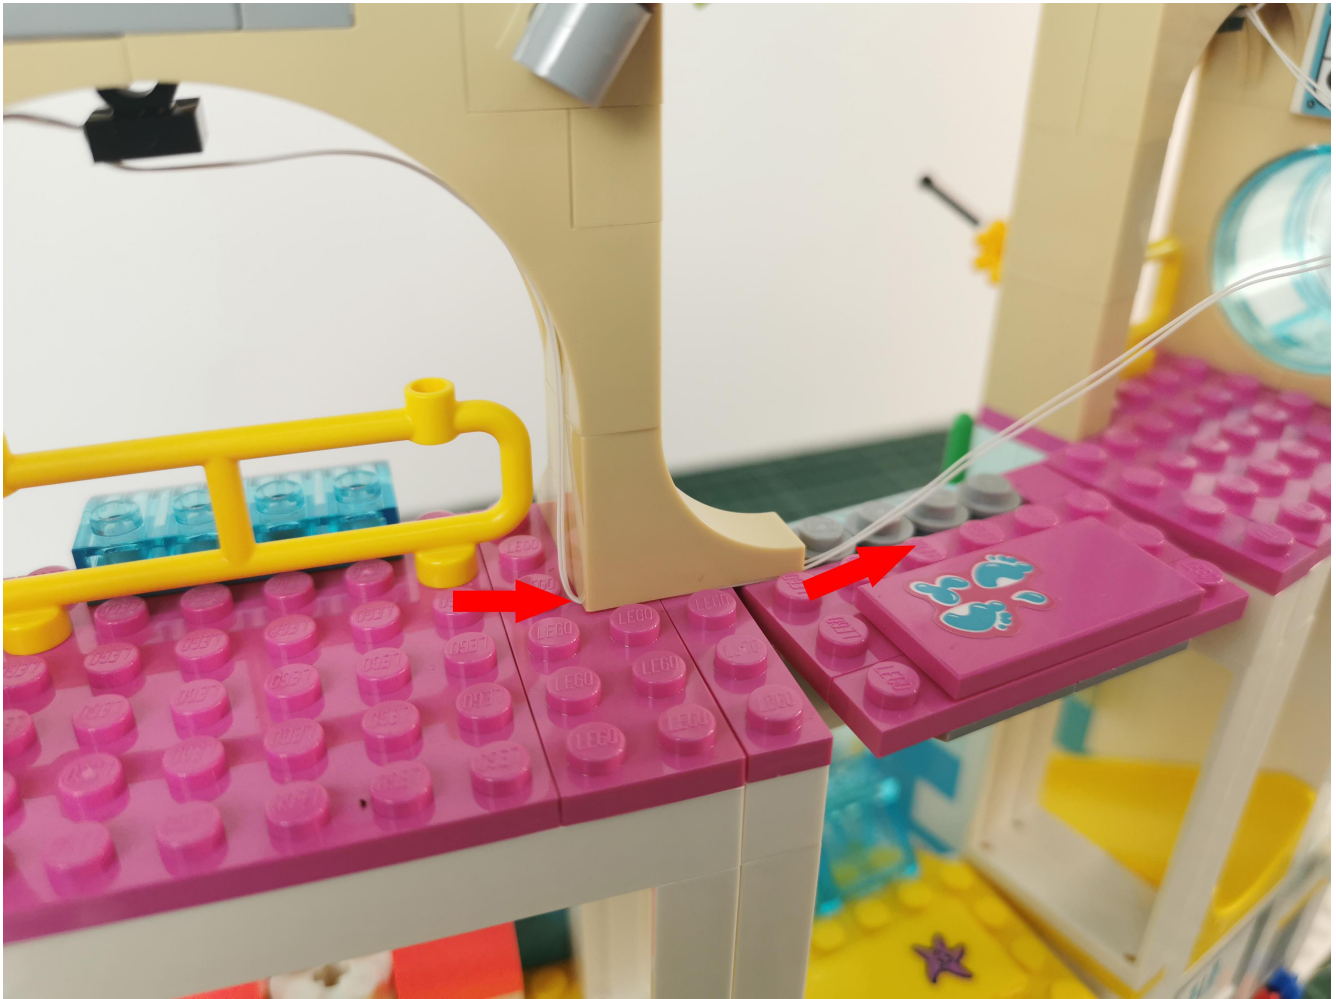

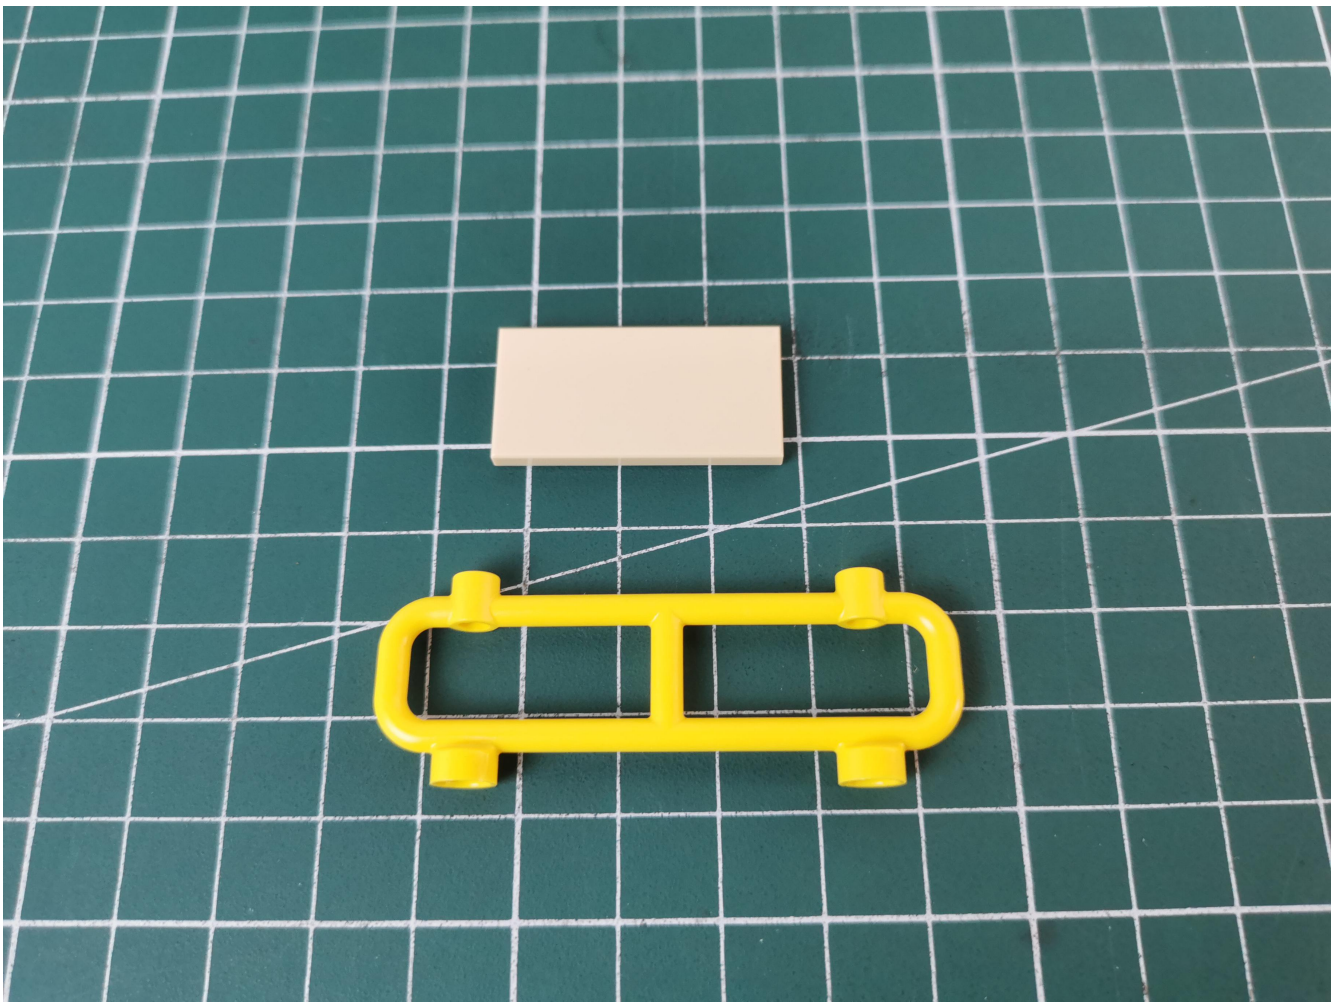

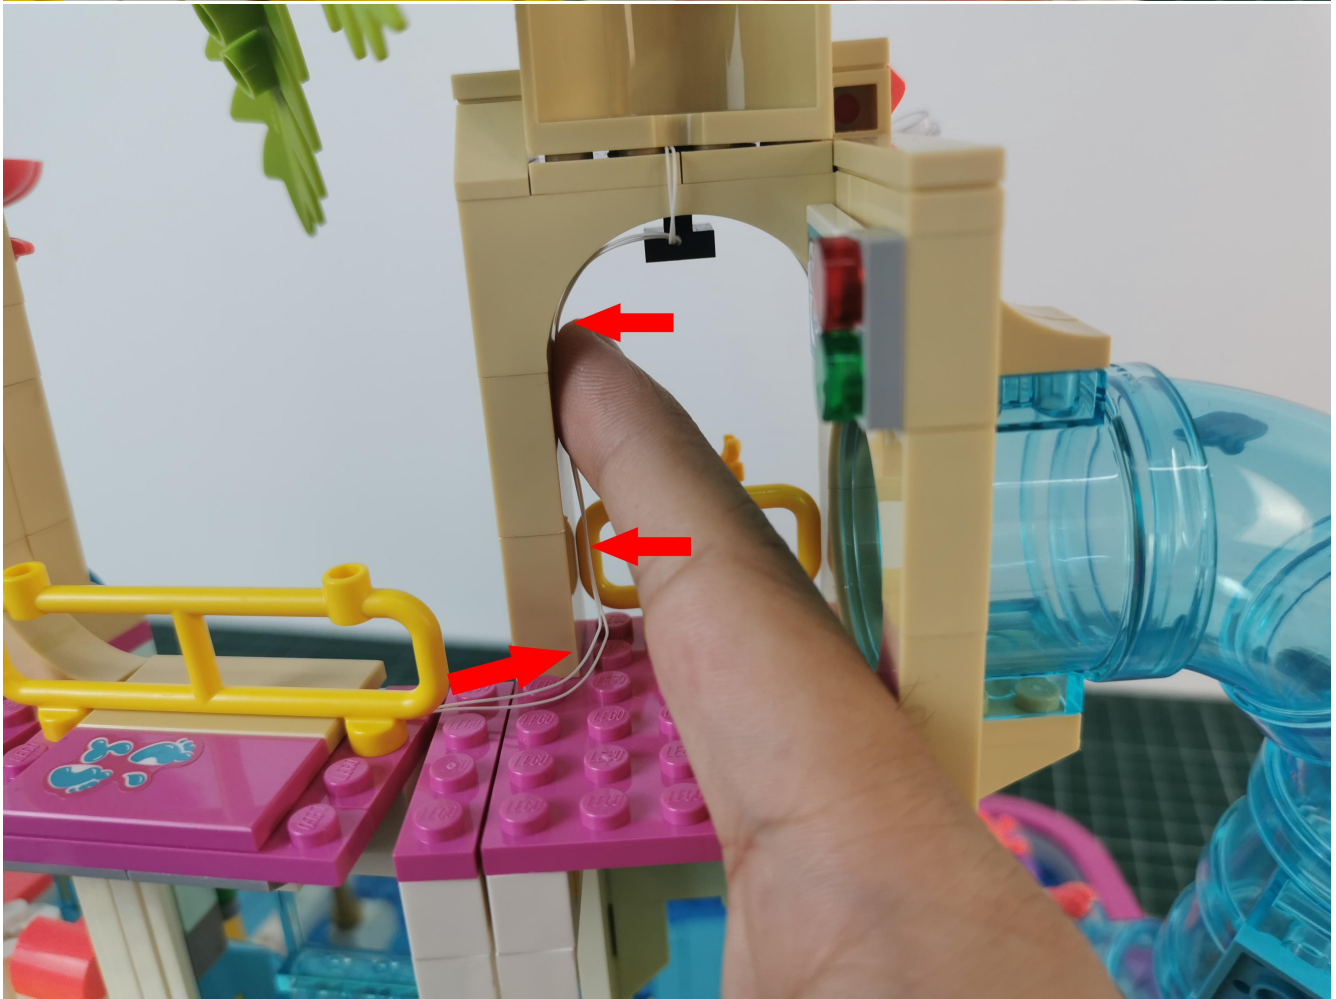

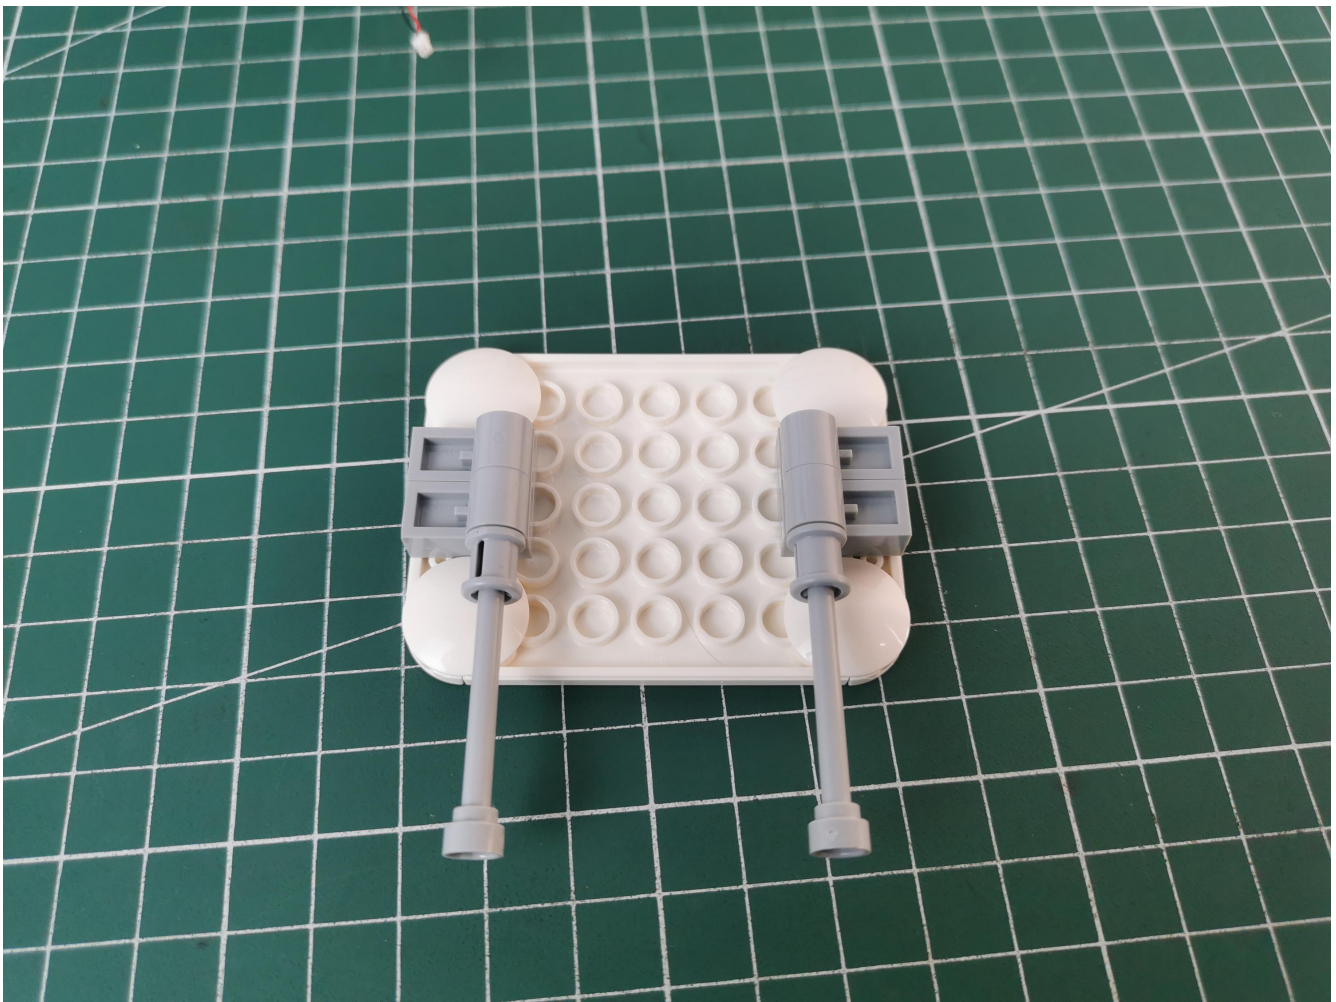

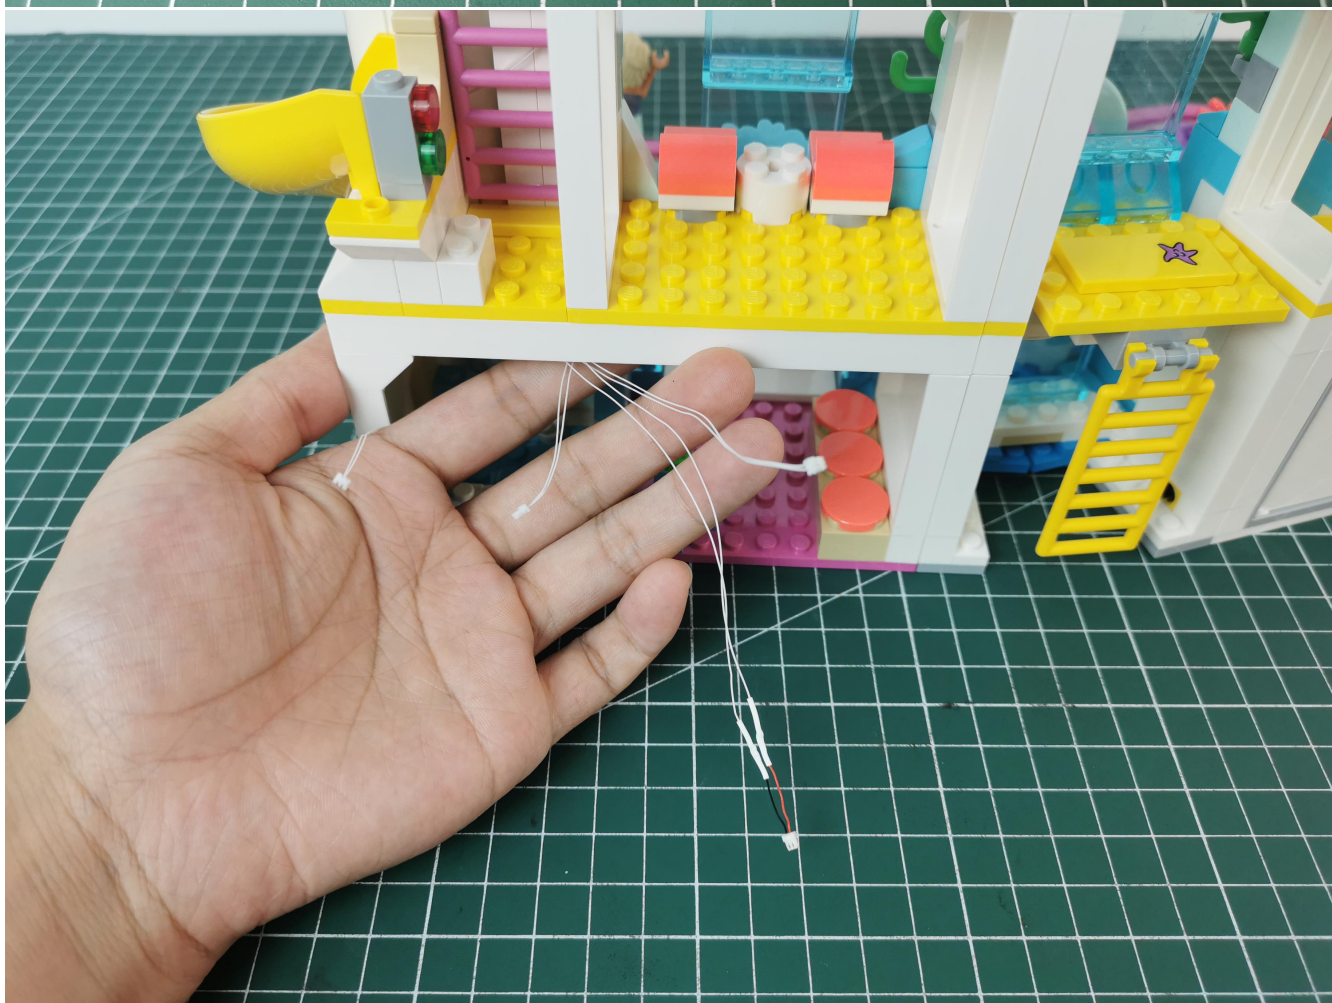

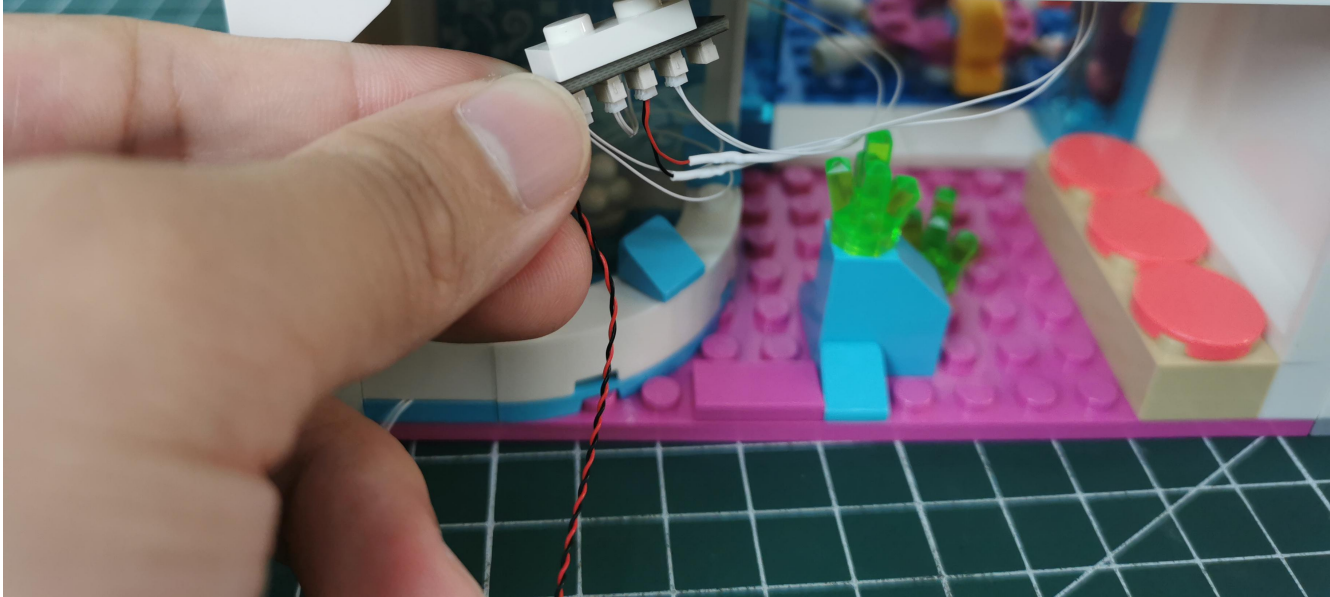

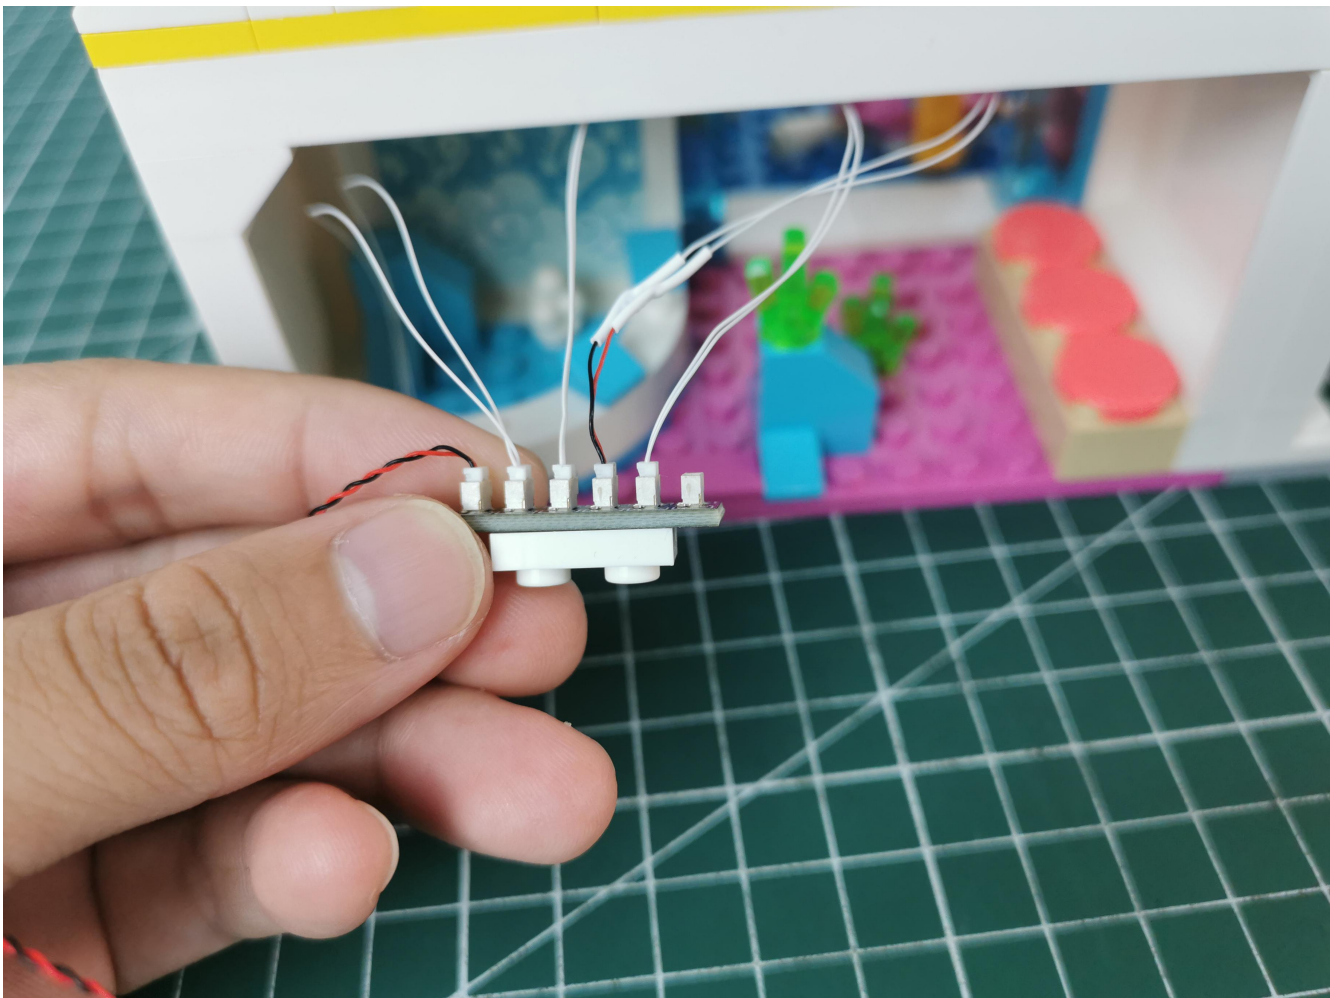

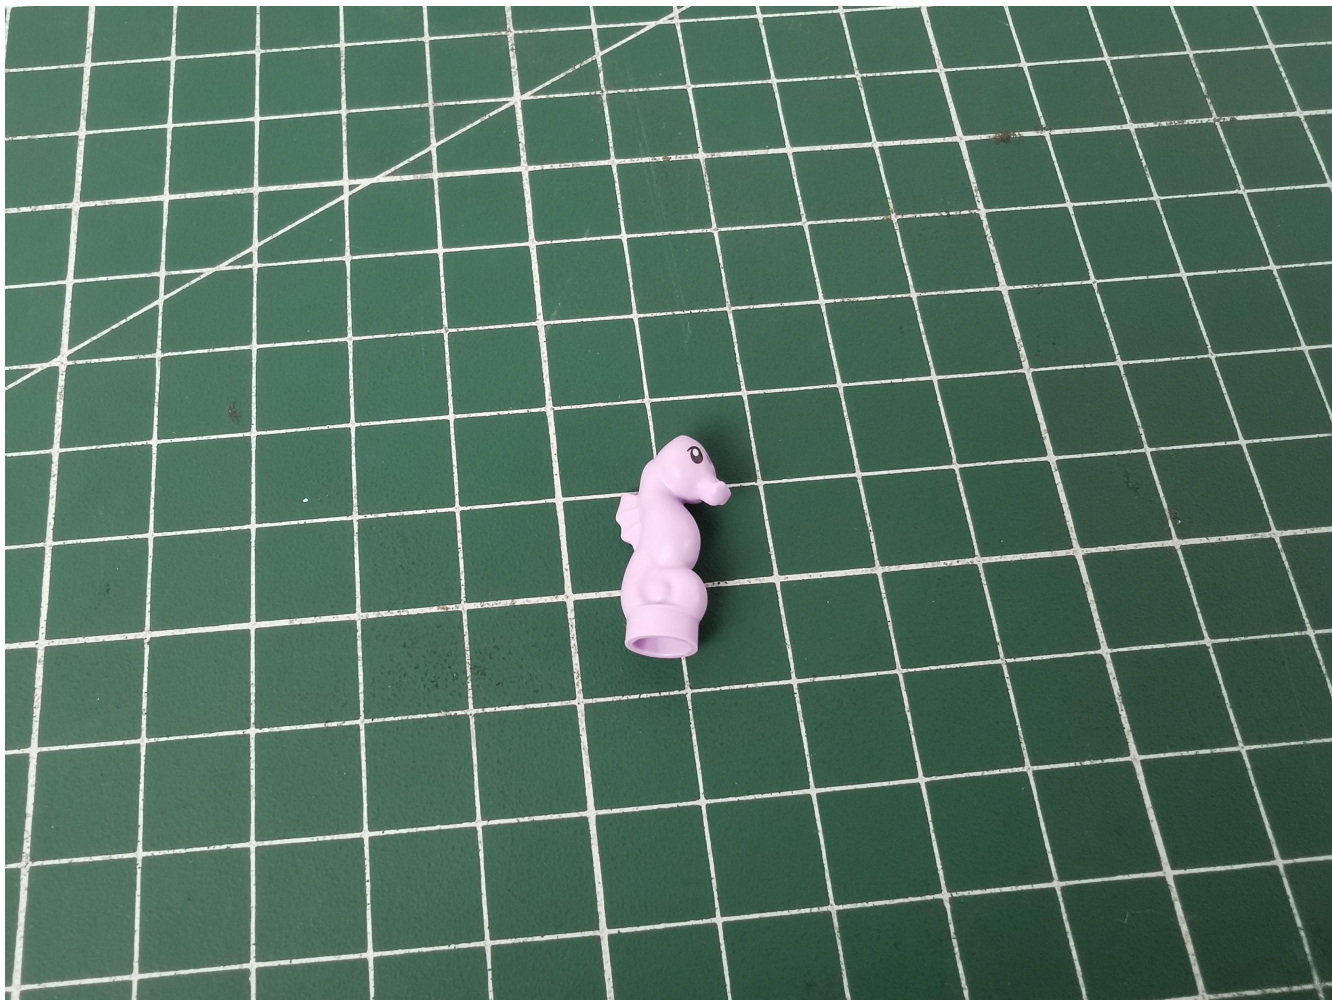

The installation is complete
