

21326 Winnie the Pooh LED lighting Kit (Remote Control Version) LG39

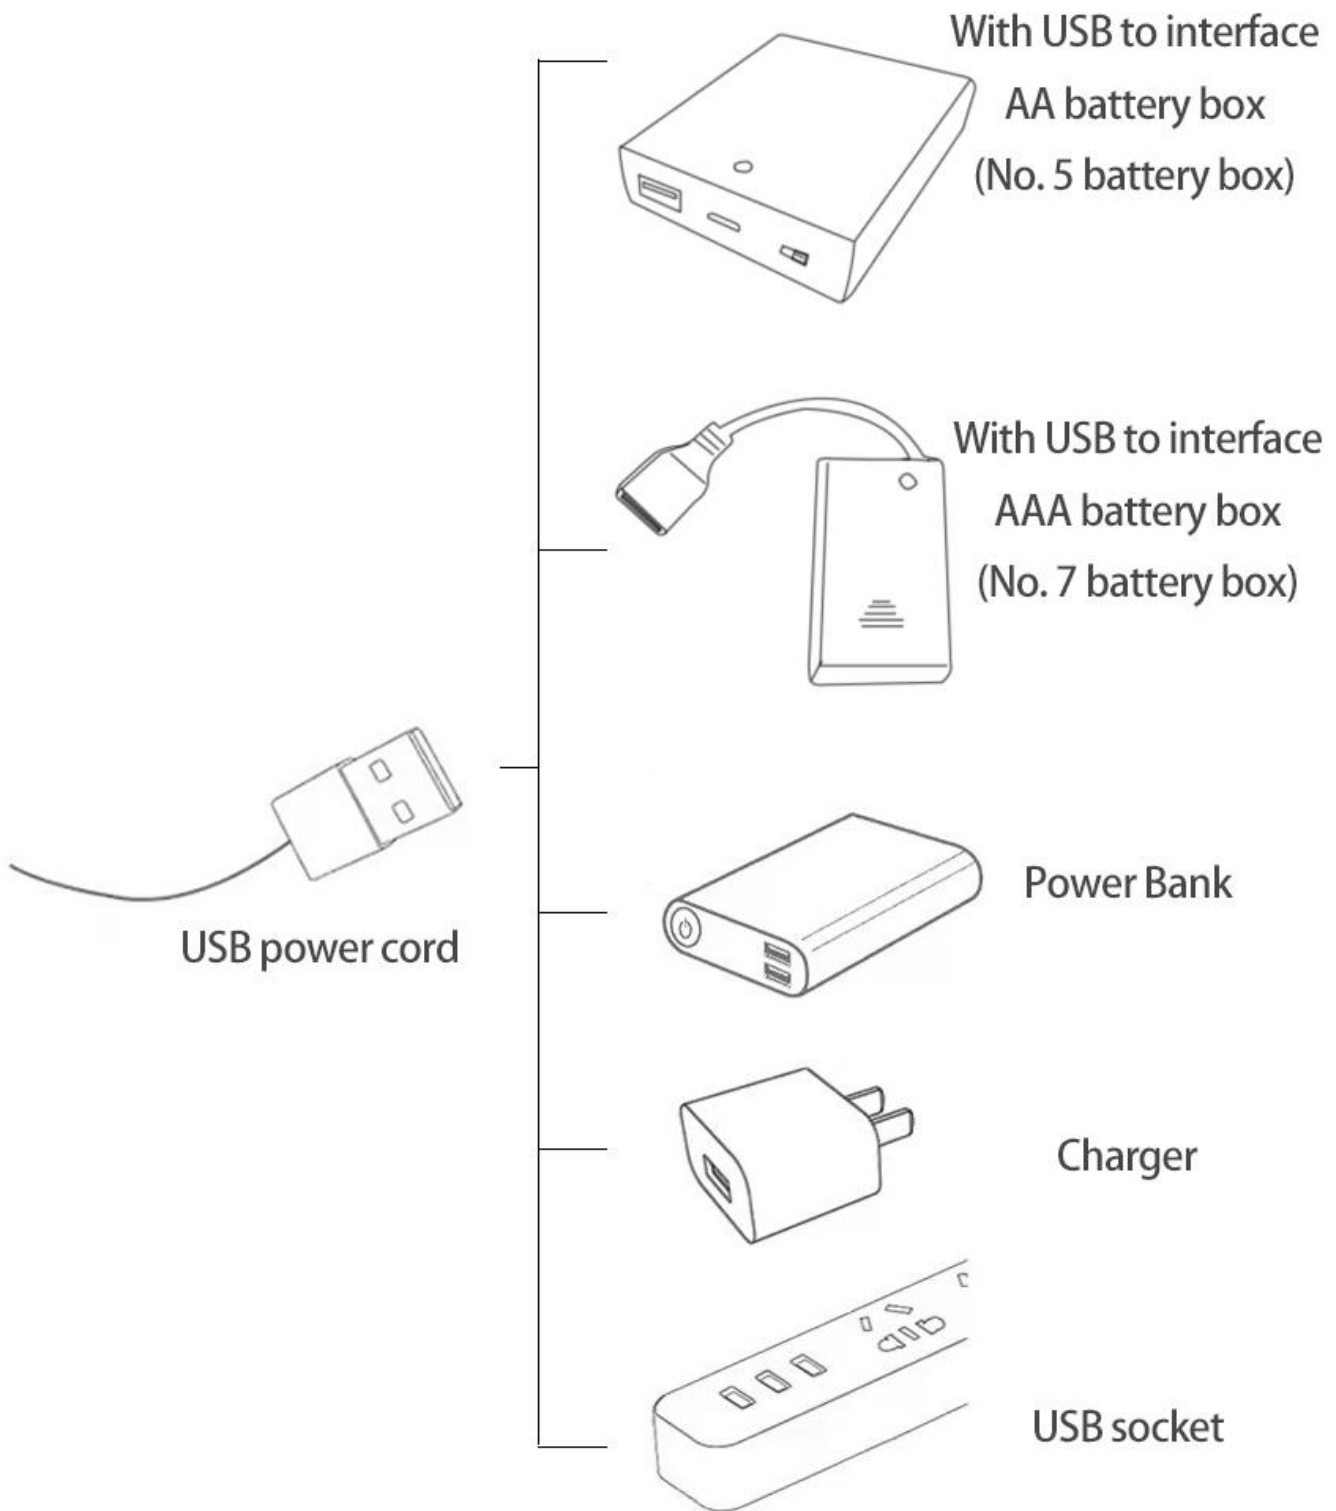

Instructions for installing this kit:

Power supply mode: USB power cord (please bring your own power supply).

It can be energized through a USB battery box (please pay attention to the positive and negative poles of the battery), power bank, mobile phone charger or USB socket. The normal voltage is 3-5V.

USB connectors to connect devices

There are 5 bags of this product, and AA batteries are a gift. (Excluding battery box)

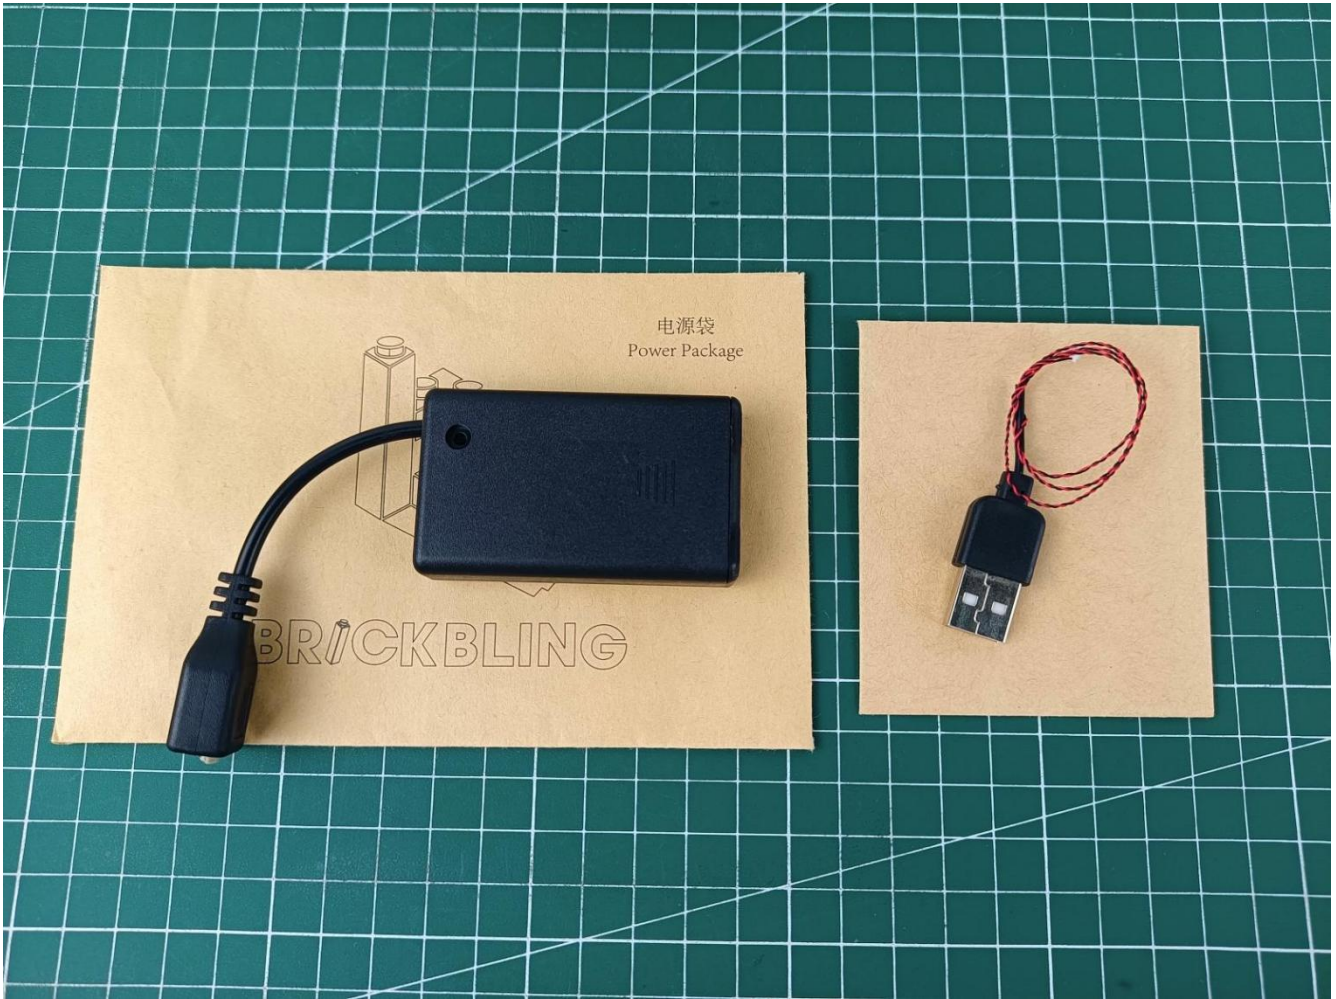

Open the bag from the place where the red line is drawn, don't tear it from the middle, so as not to damage the lighting

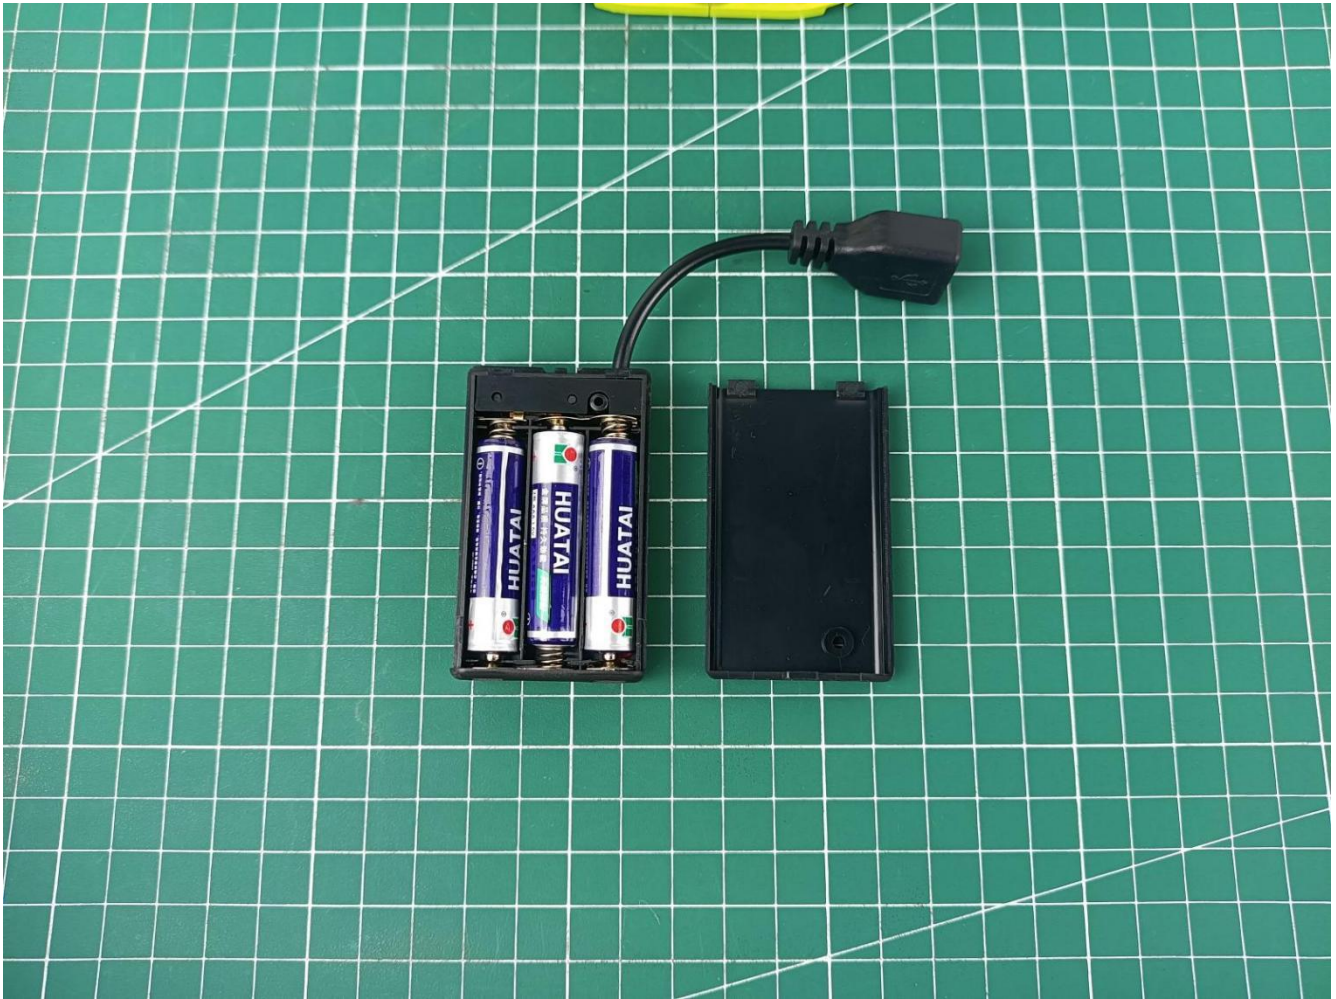

Lighting test:

Take out the accessories inside (accessories include: AA battery box, 30cm USB power cord). The following power supply methods use AA battery box (battery self-supplied)

Install batteries in the AA battery box (please bring your own batteries).

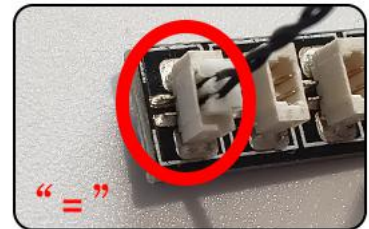

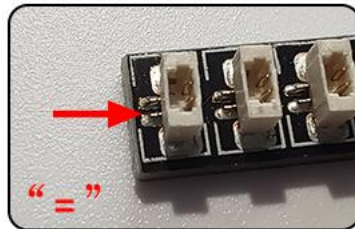

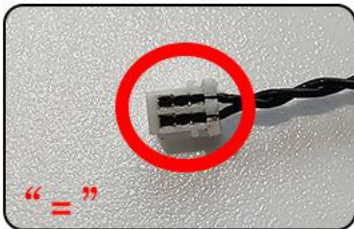

Plug the USB power cord into the battery box

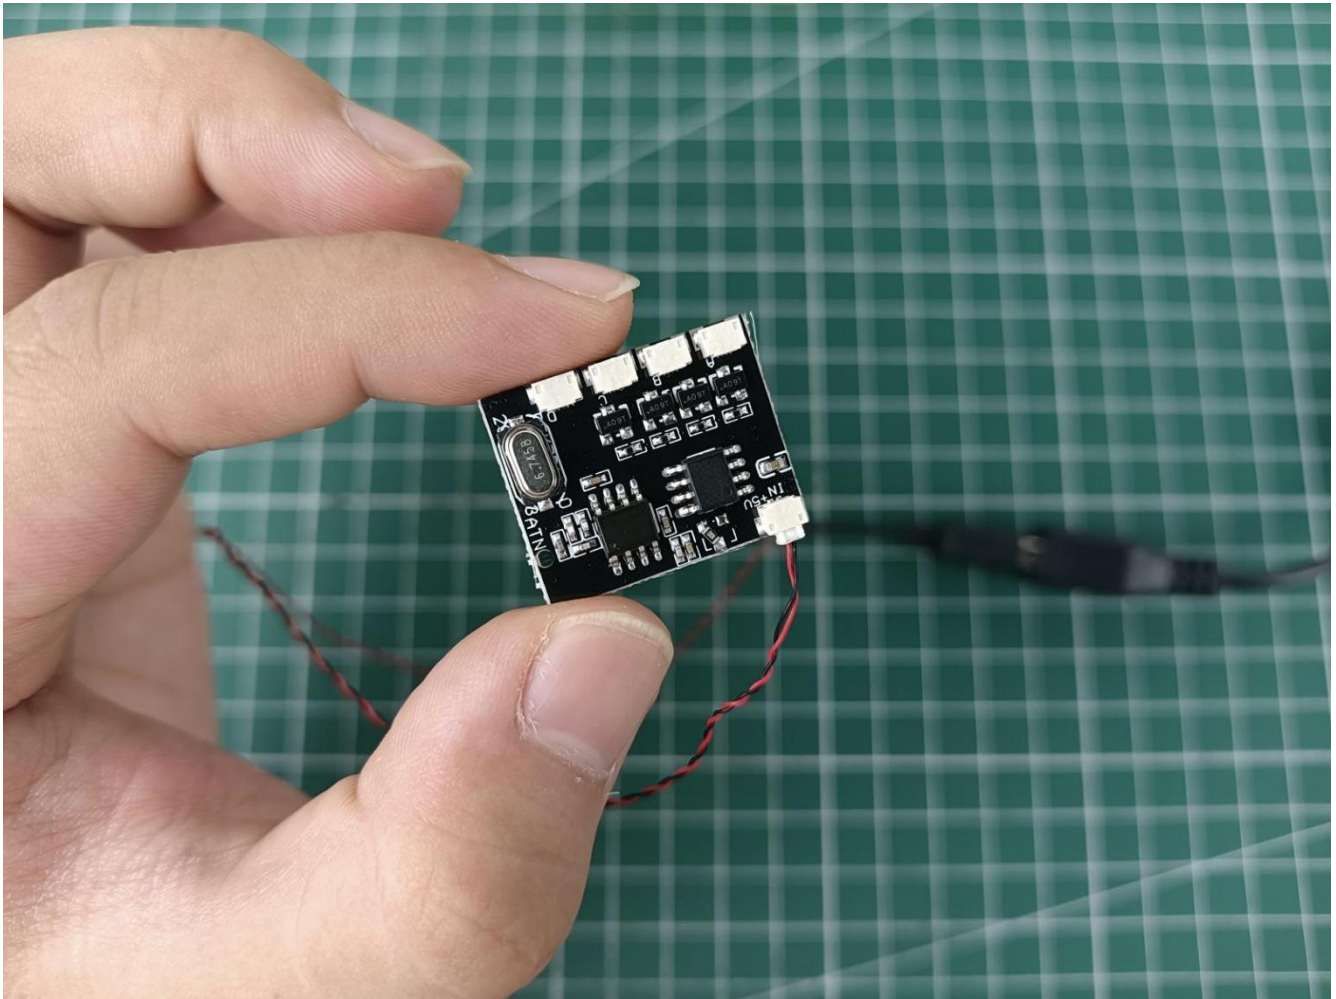

Disassemble another unnumbered belt, take out the remote control and remote control module

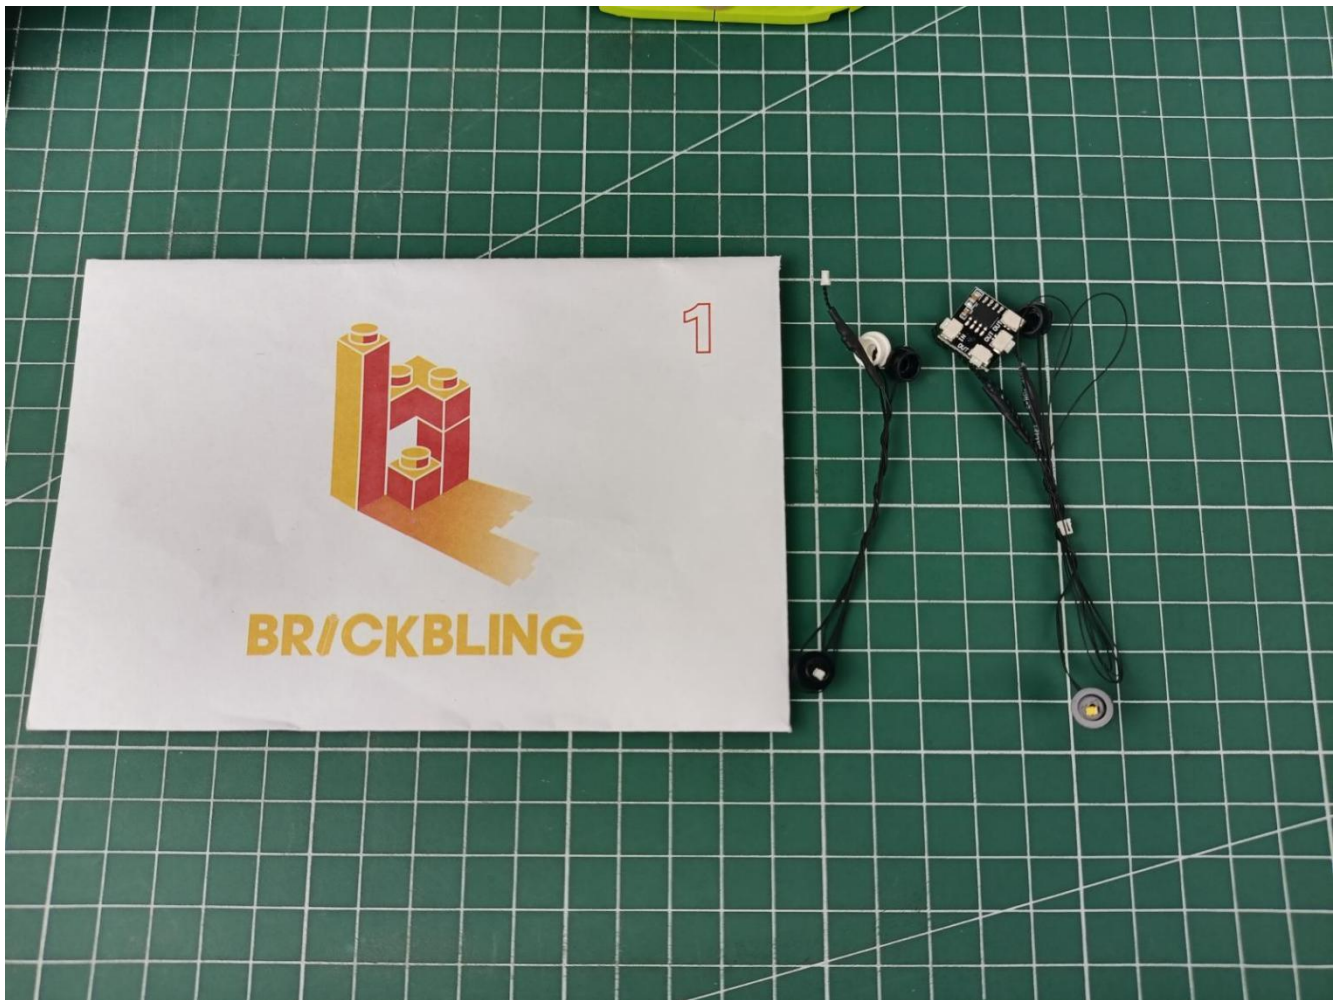

The two are connected through the interface, the connection method is as follows.

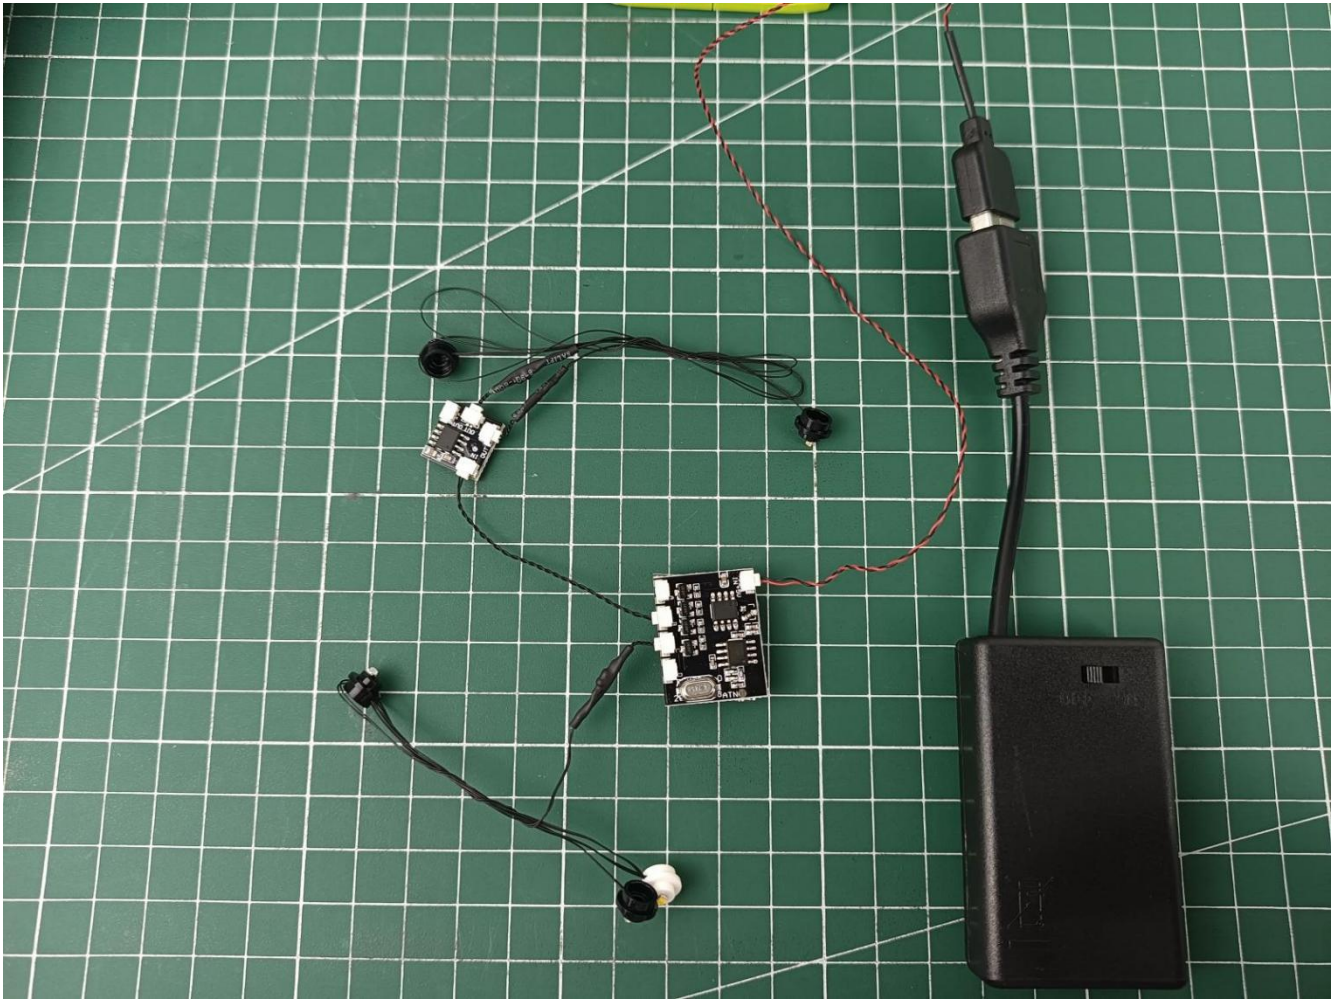

Insert the USB power plug into the IN socket of the remote control module

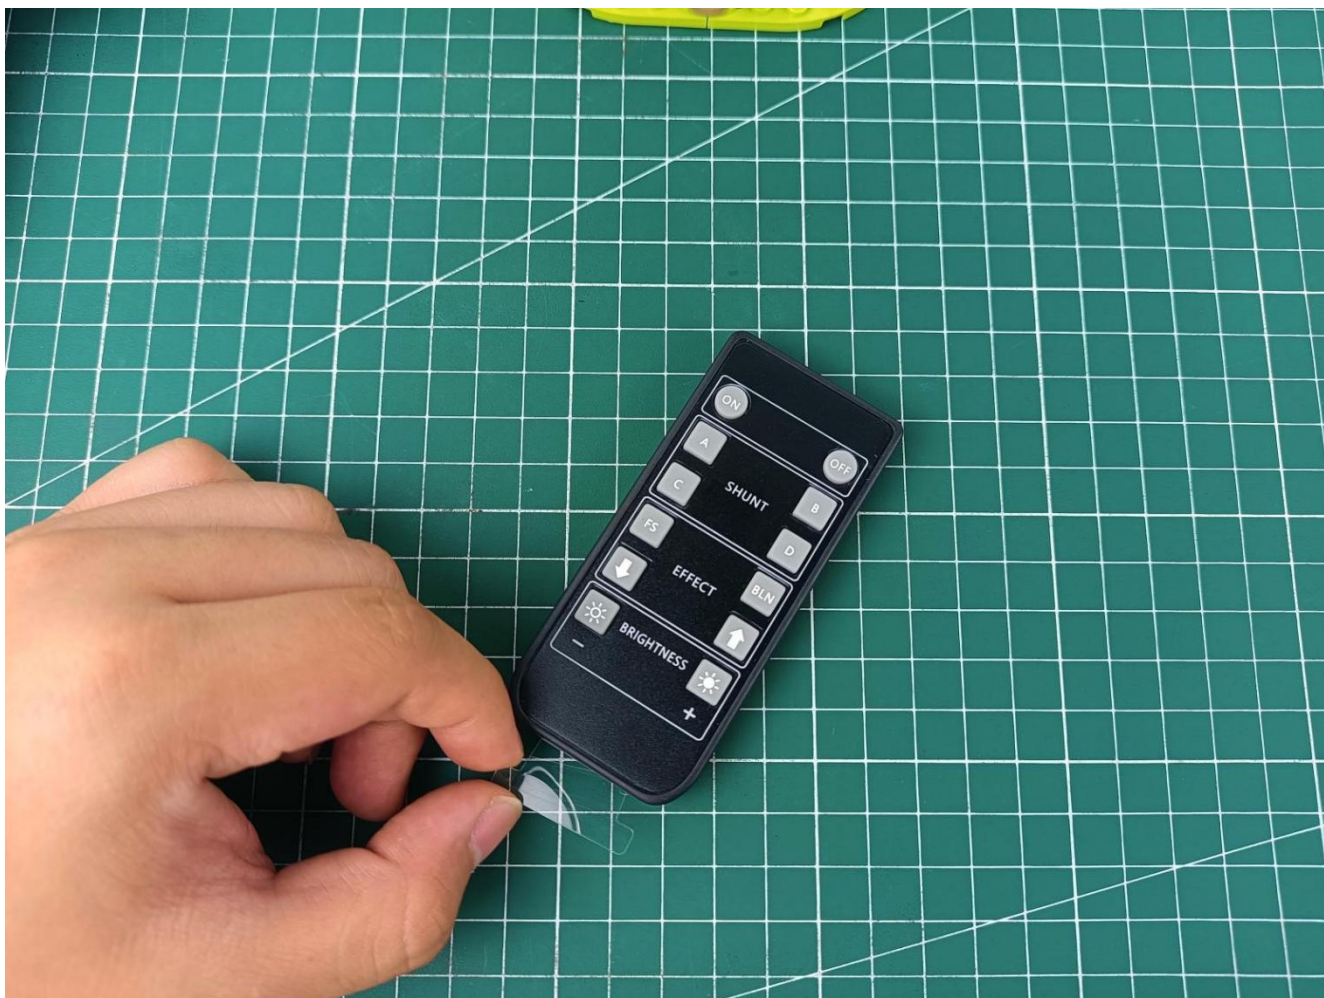

Take out the lighting from the bag marked "1"

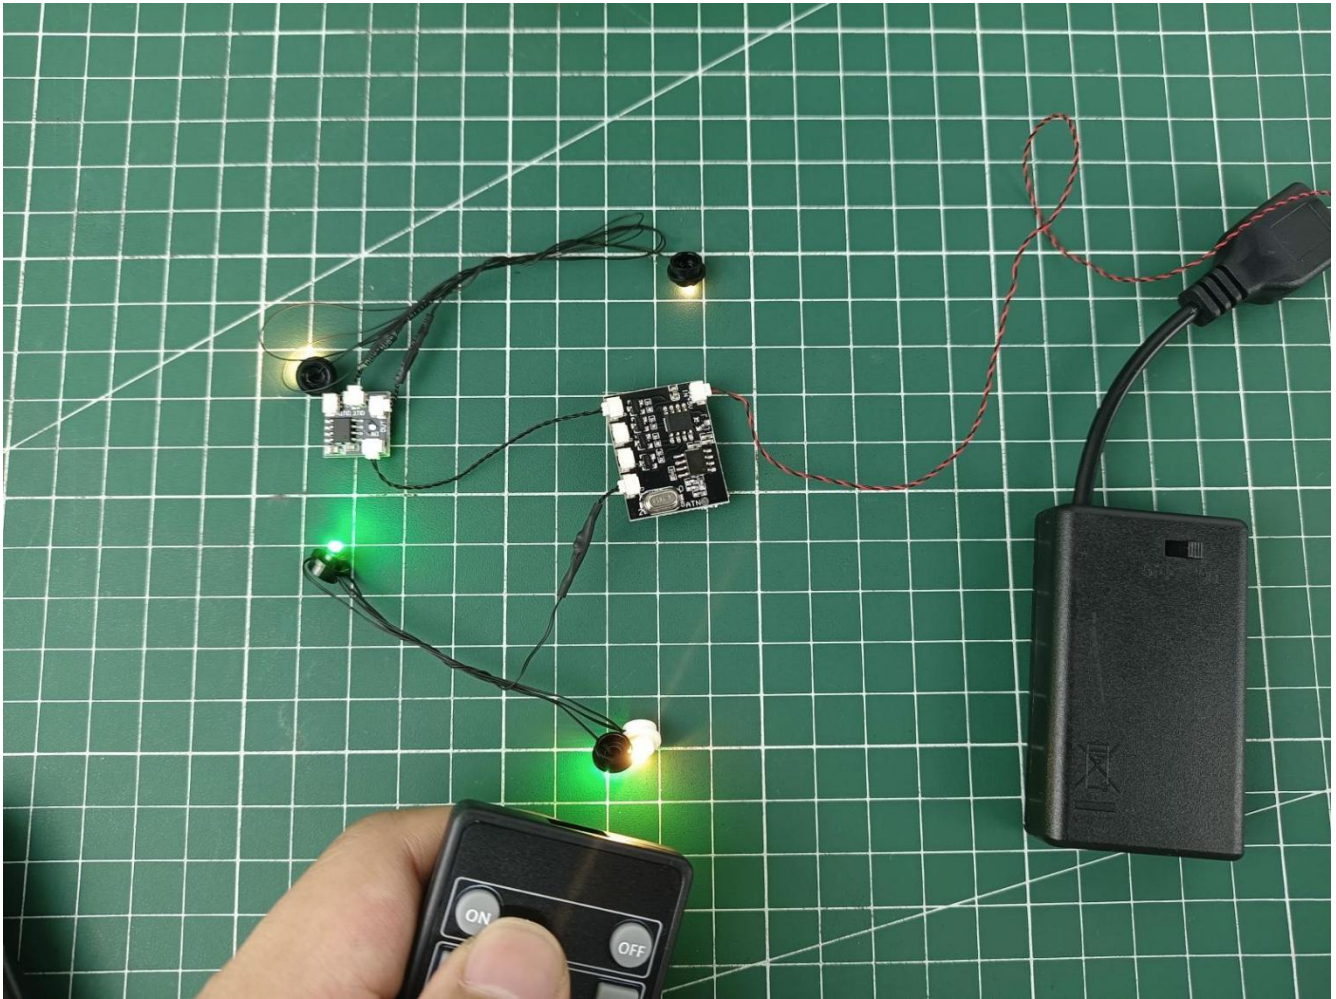

Insert the plug of the lamp group into any OUT socket of the remote control module

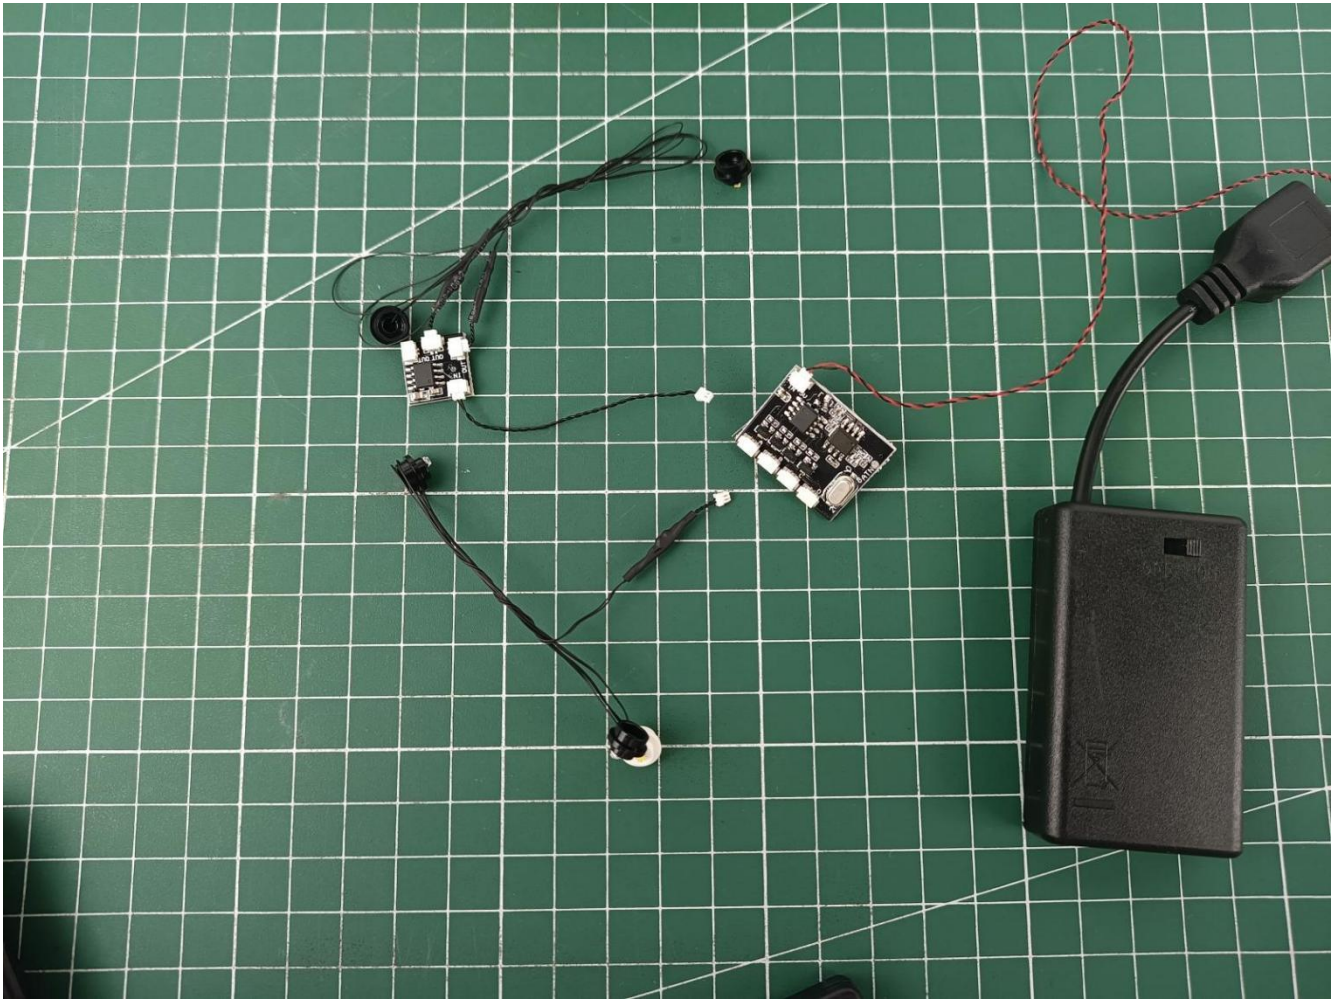

Take out the remote control and pull out the insulating gasket underneath

Turn on the switch of the battery box and click the ON button of the remote control to test that the light is normally on.

After the test, turn off the power and leave the module on the power supply

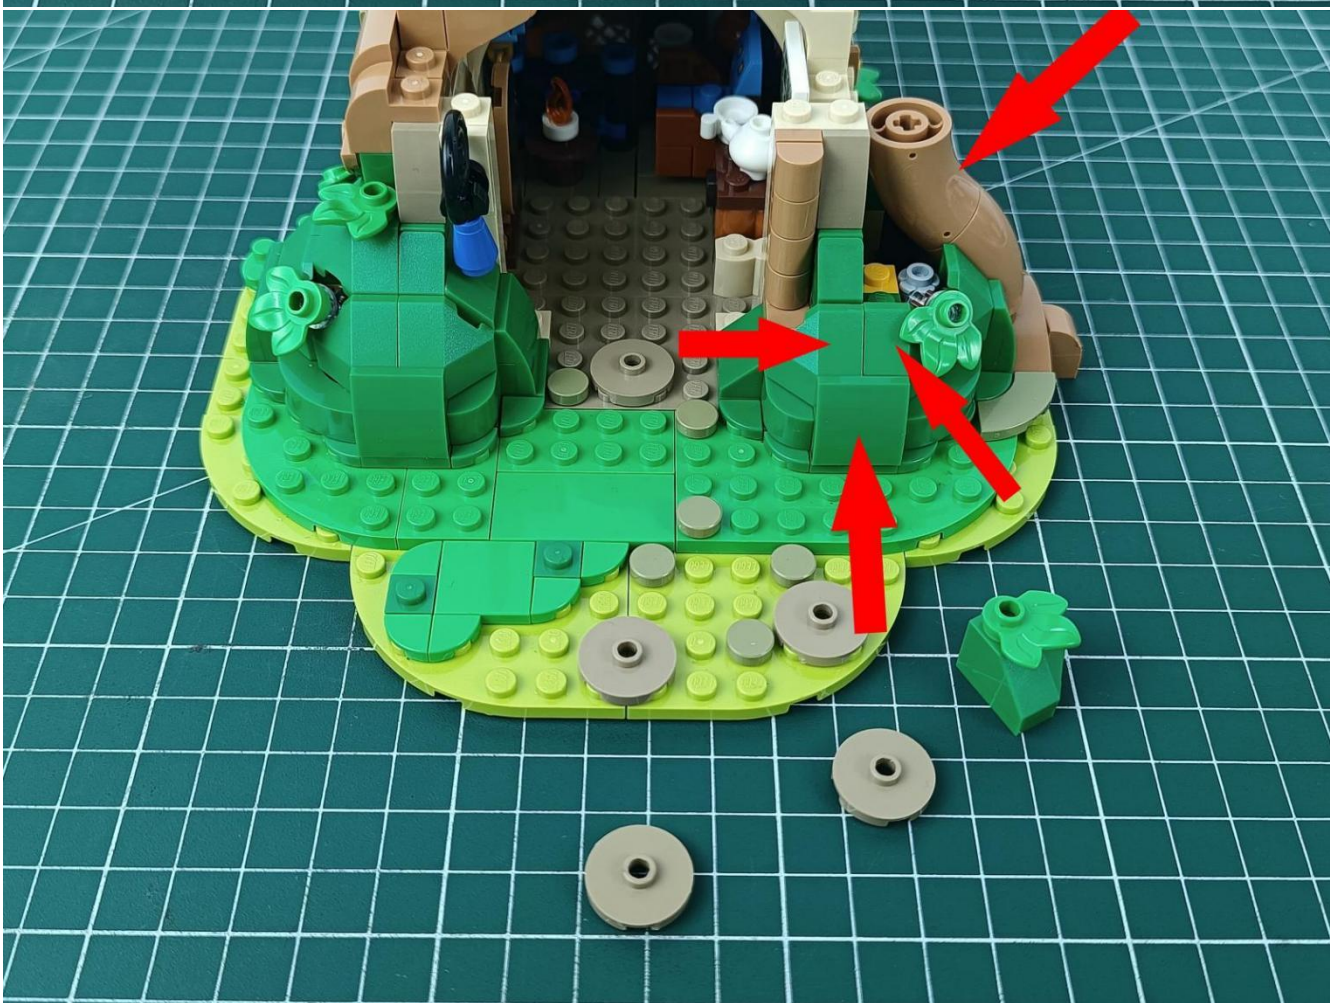

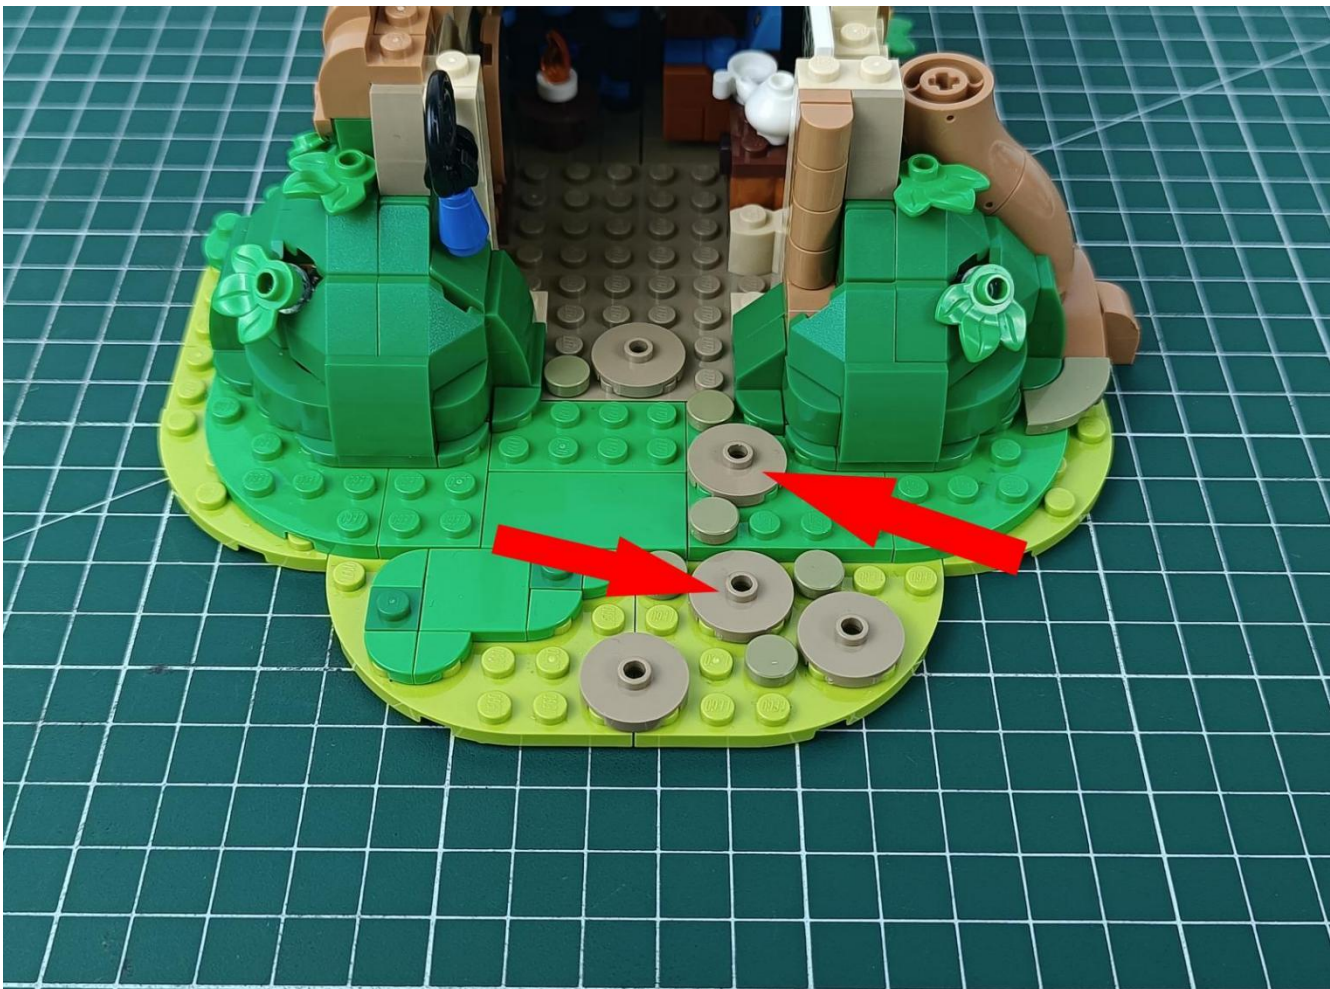

start installation:

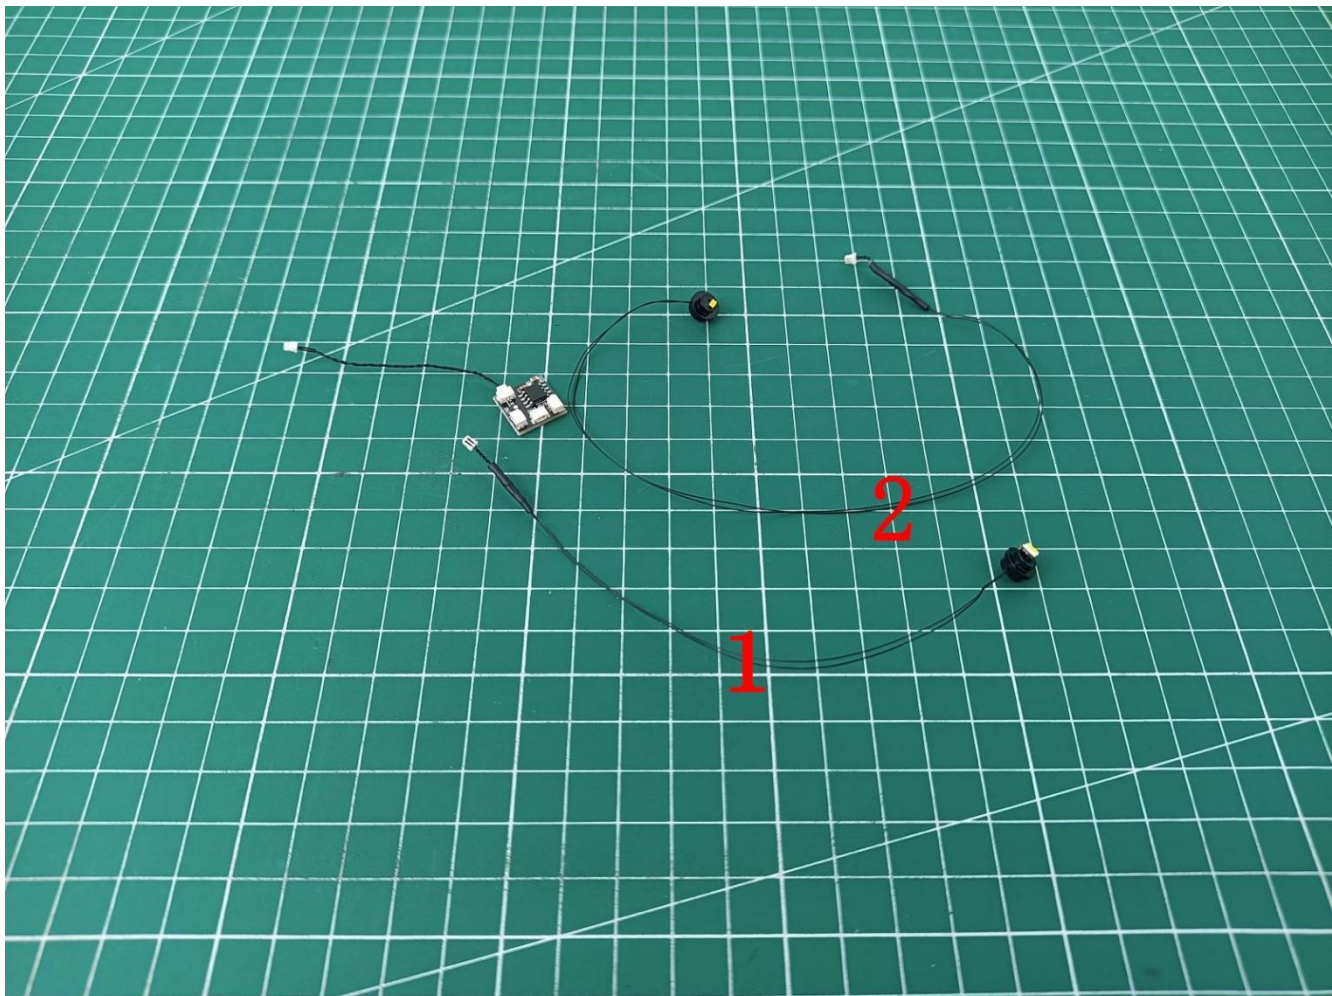

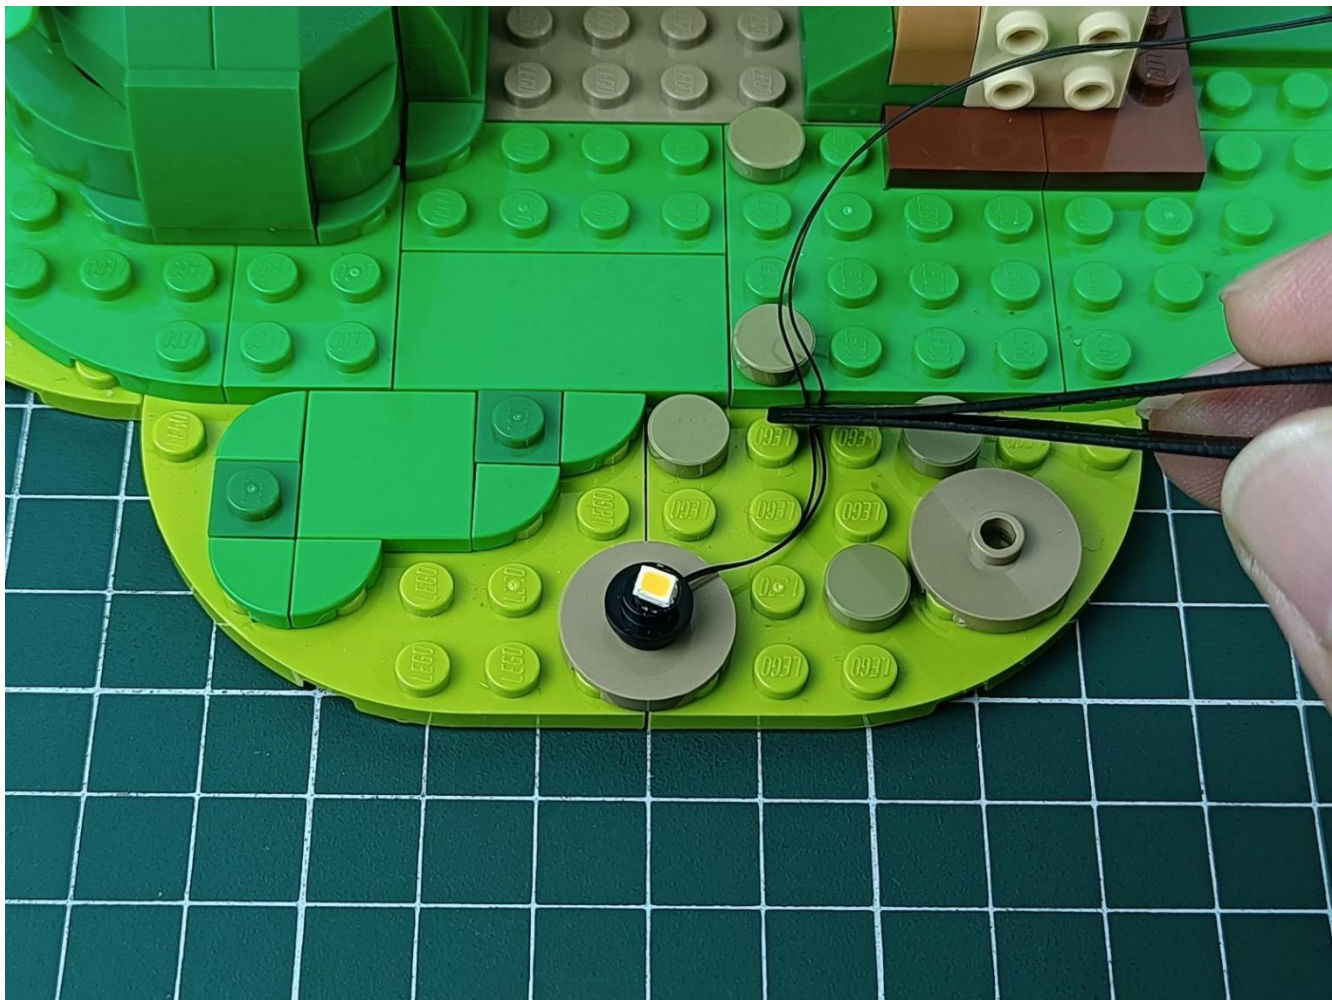

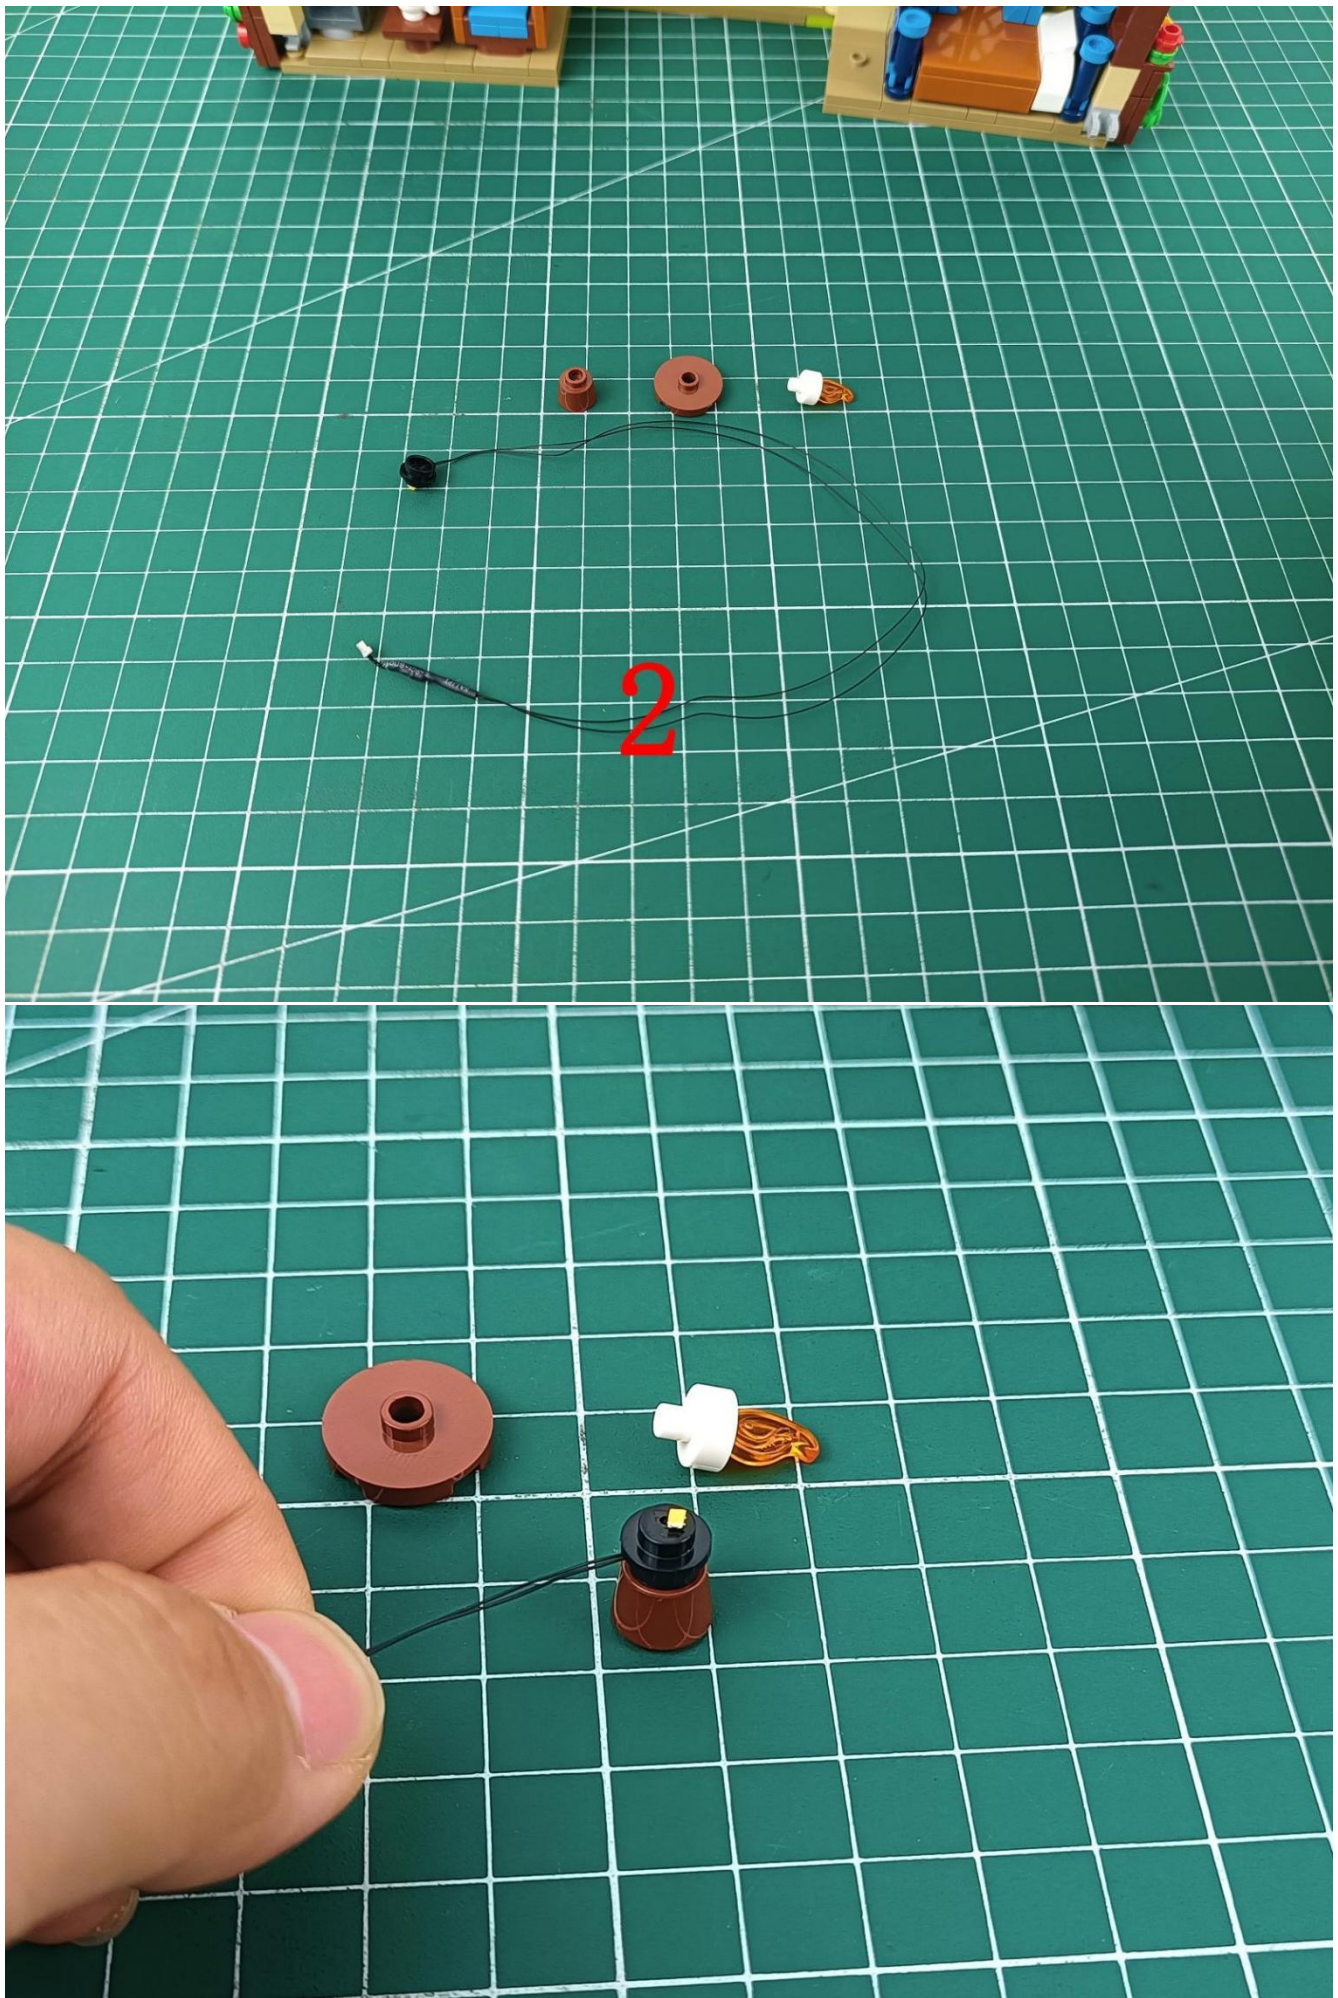

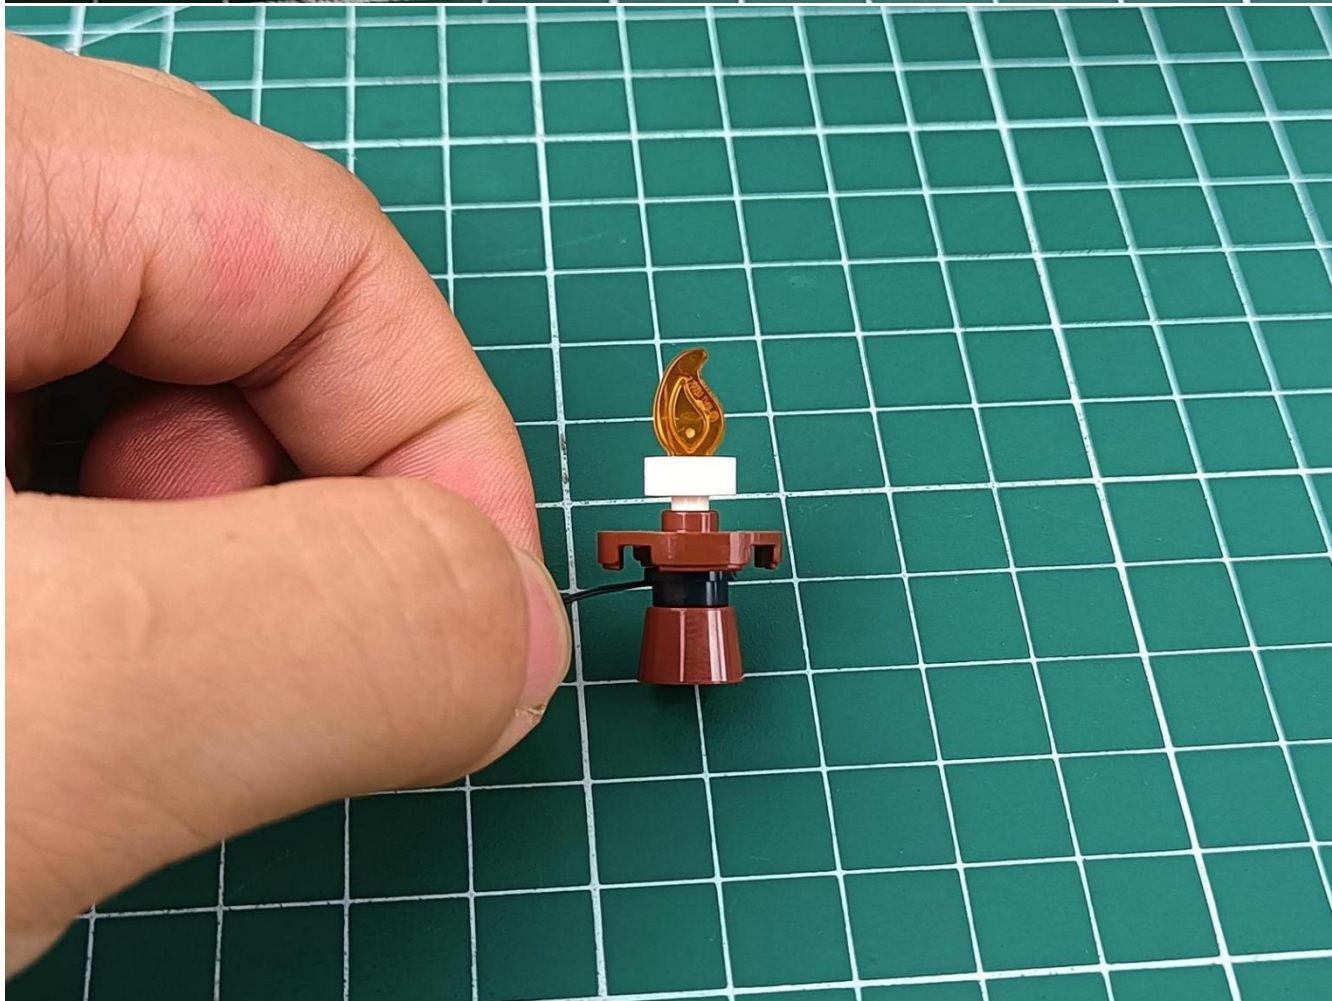

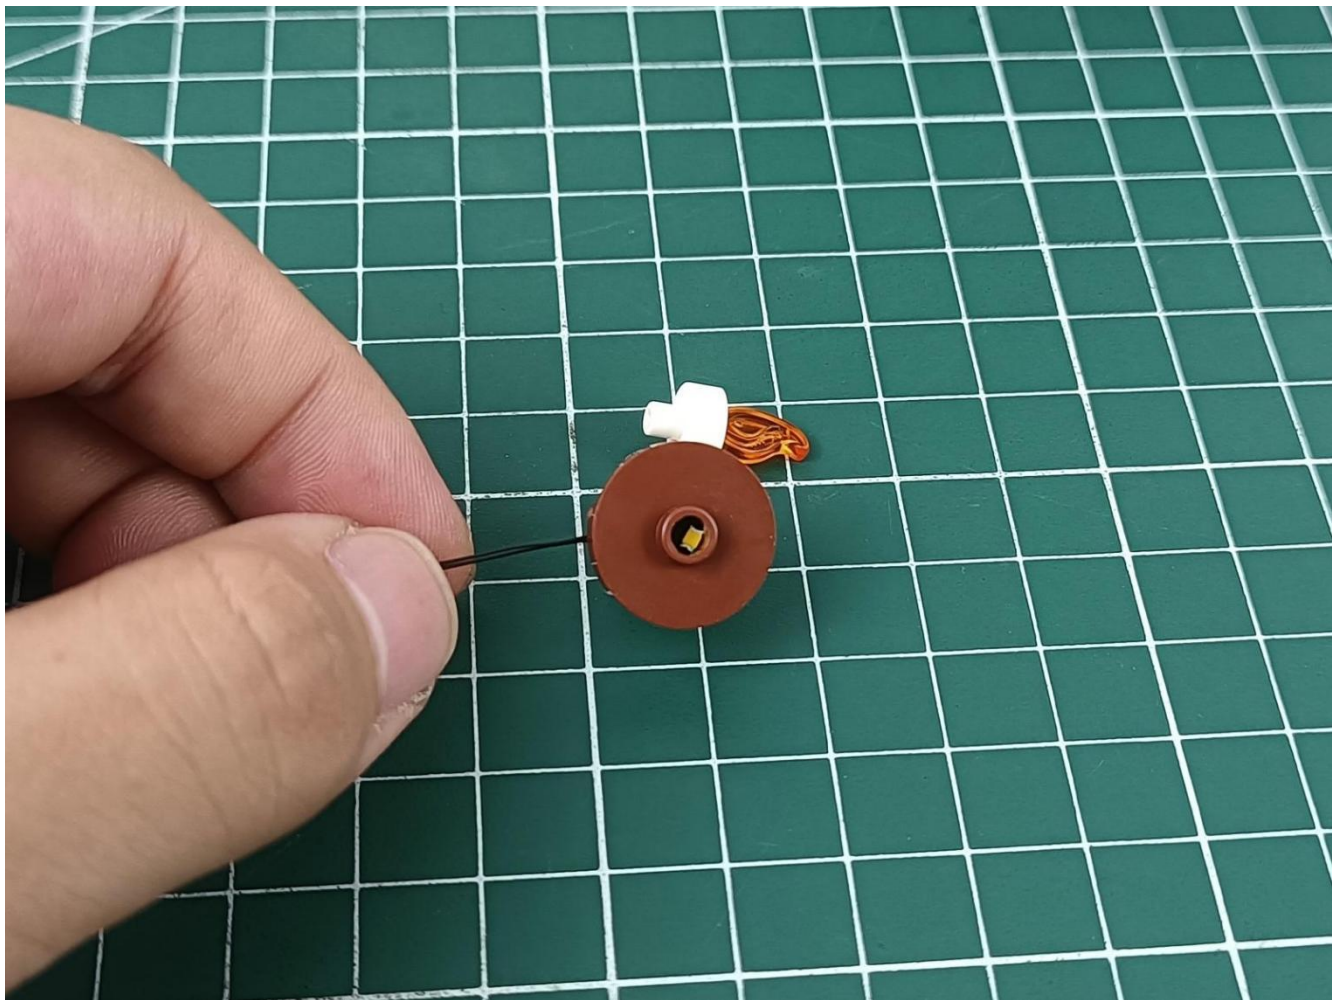

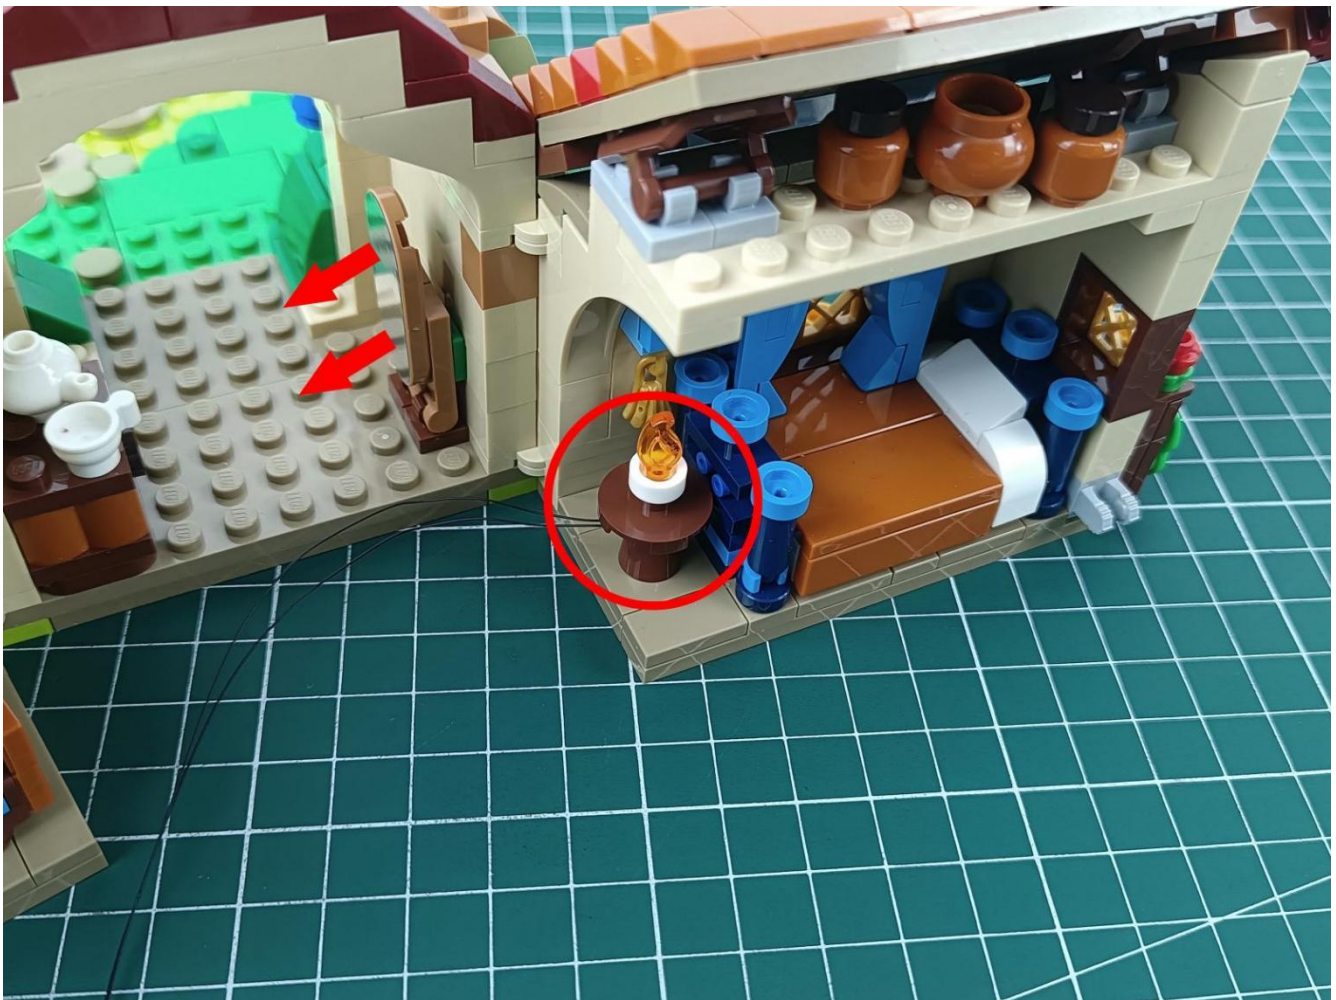

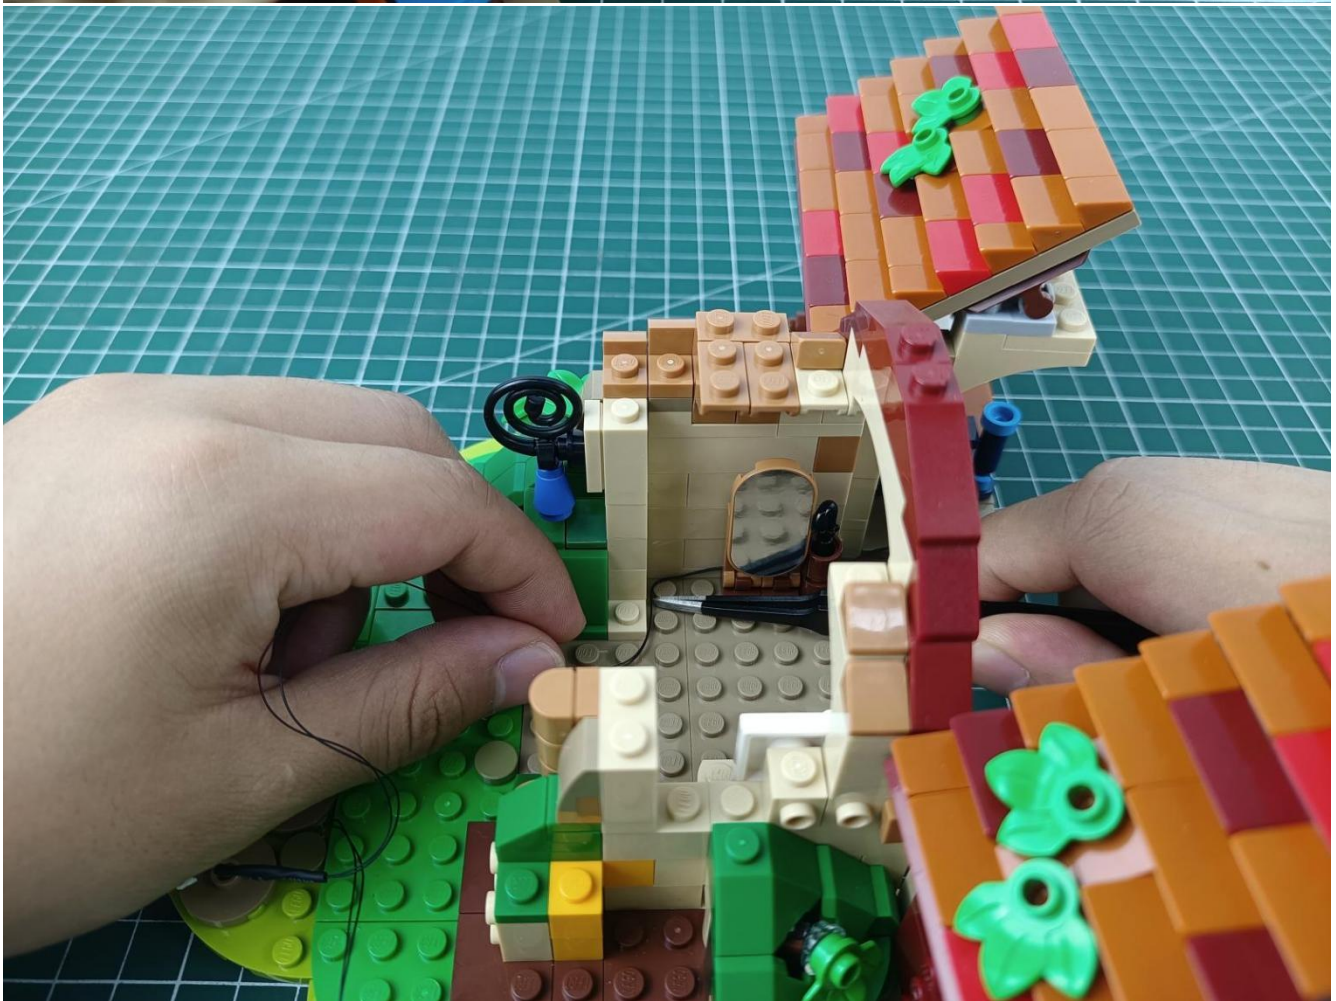

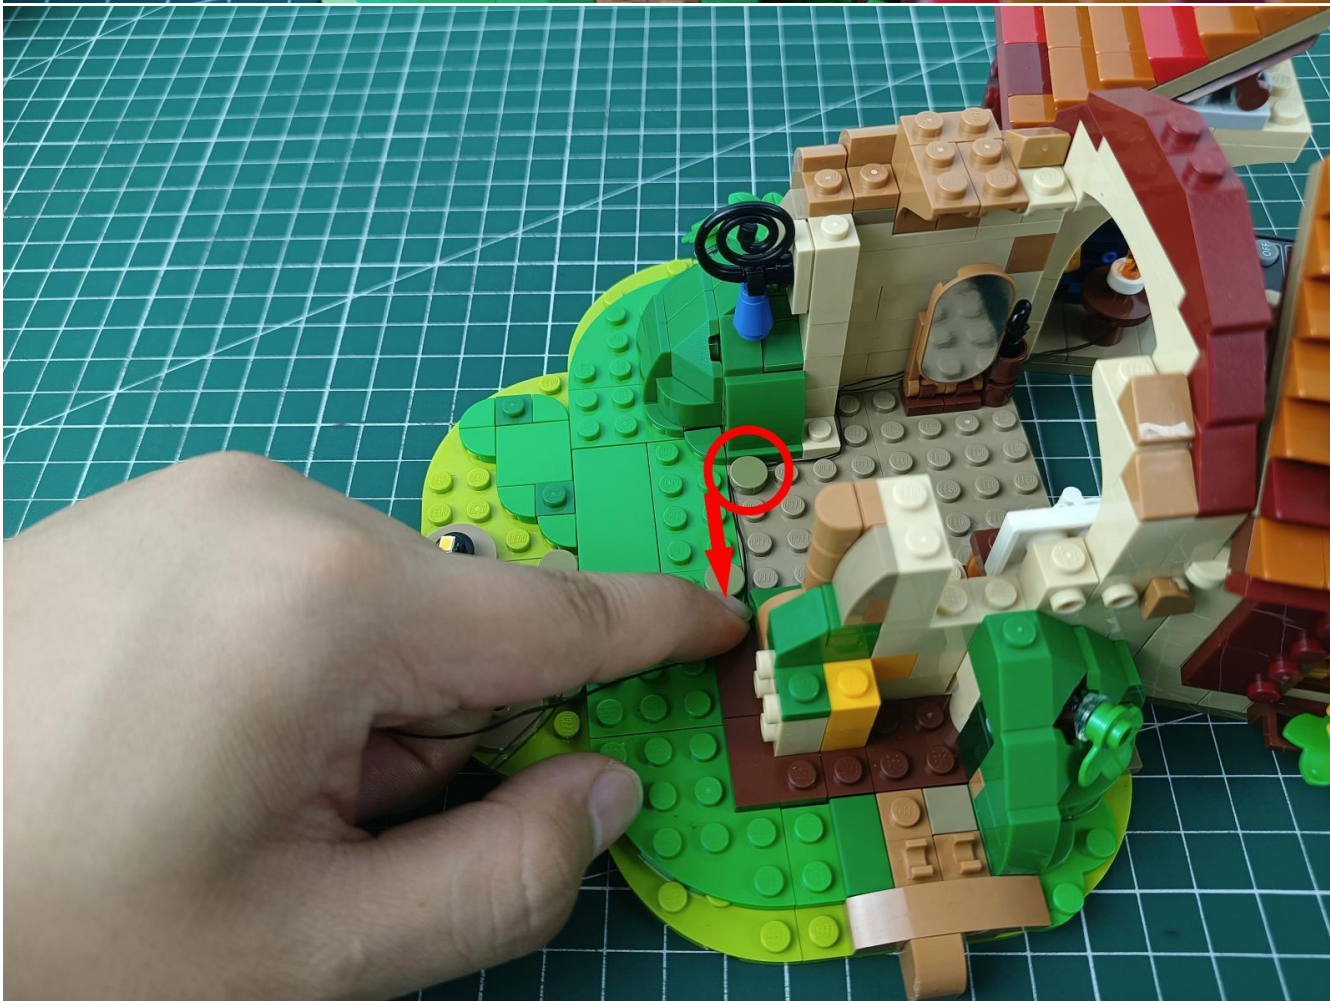

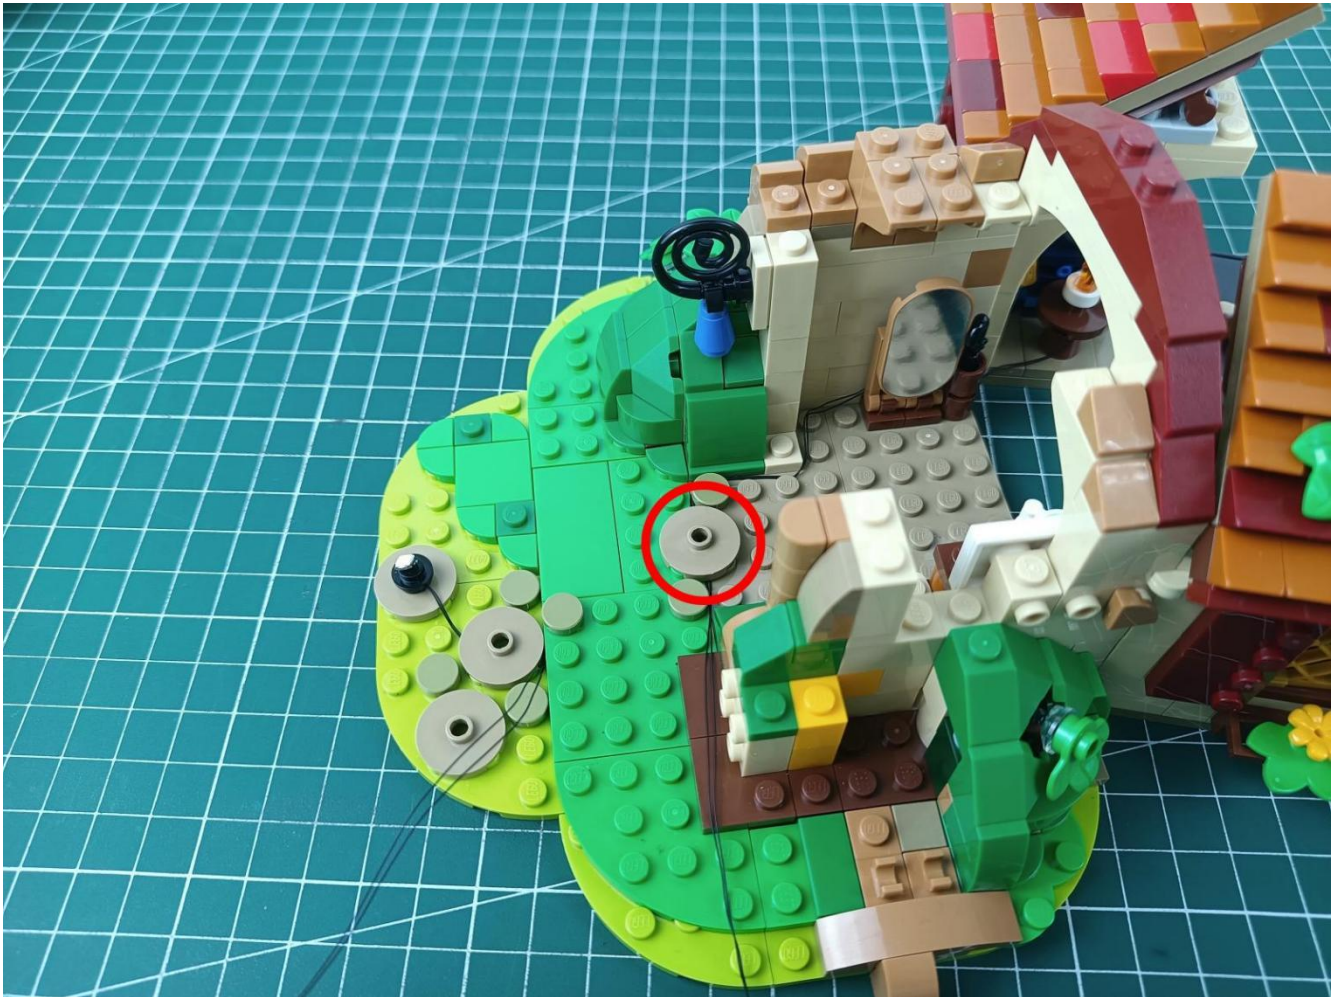

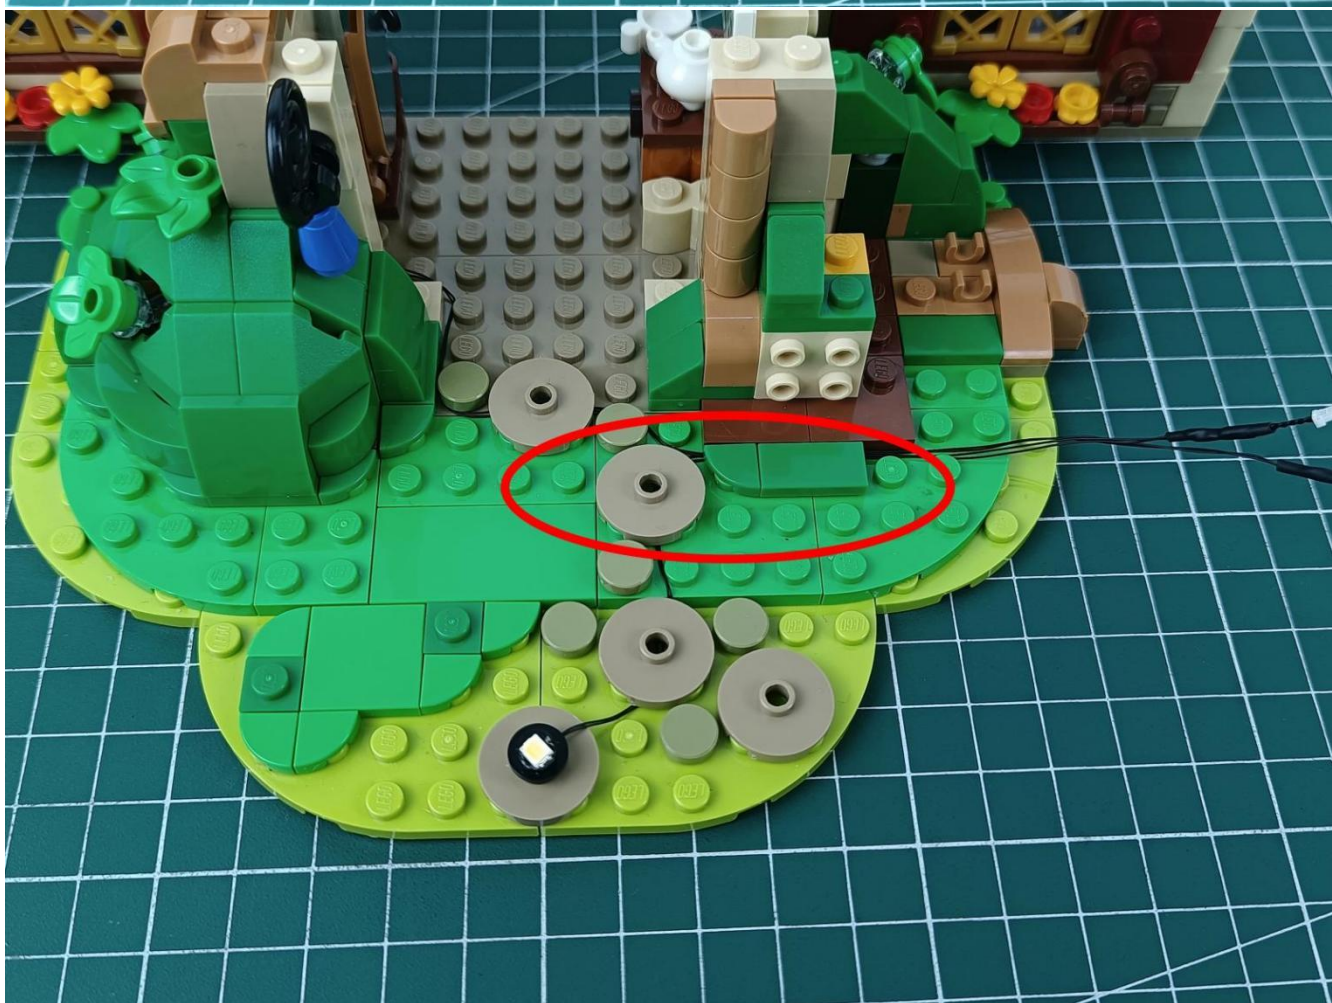

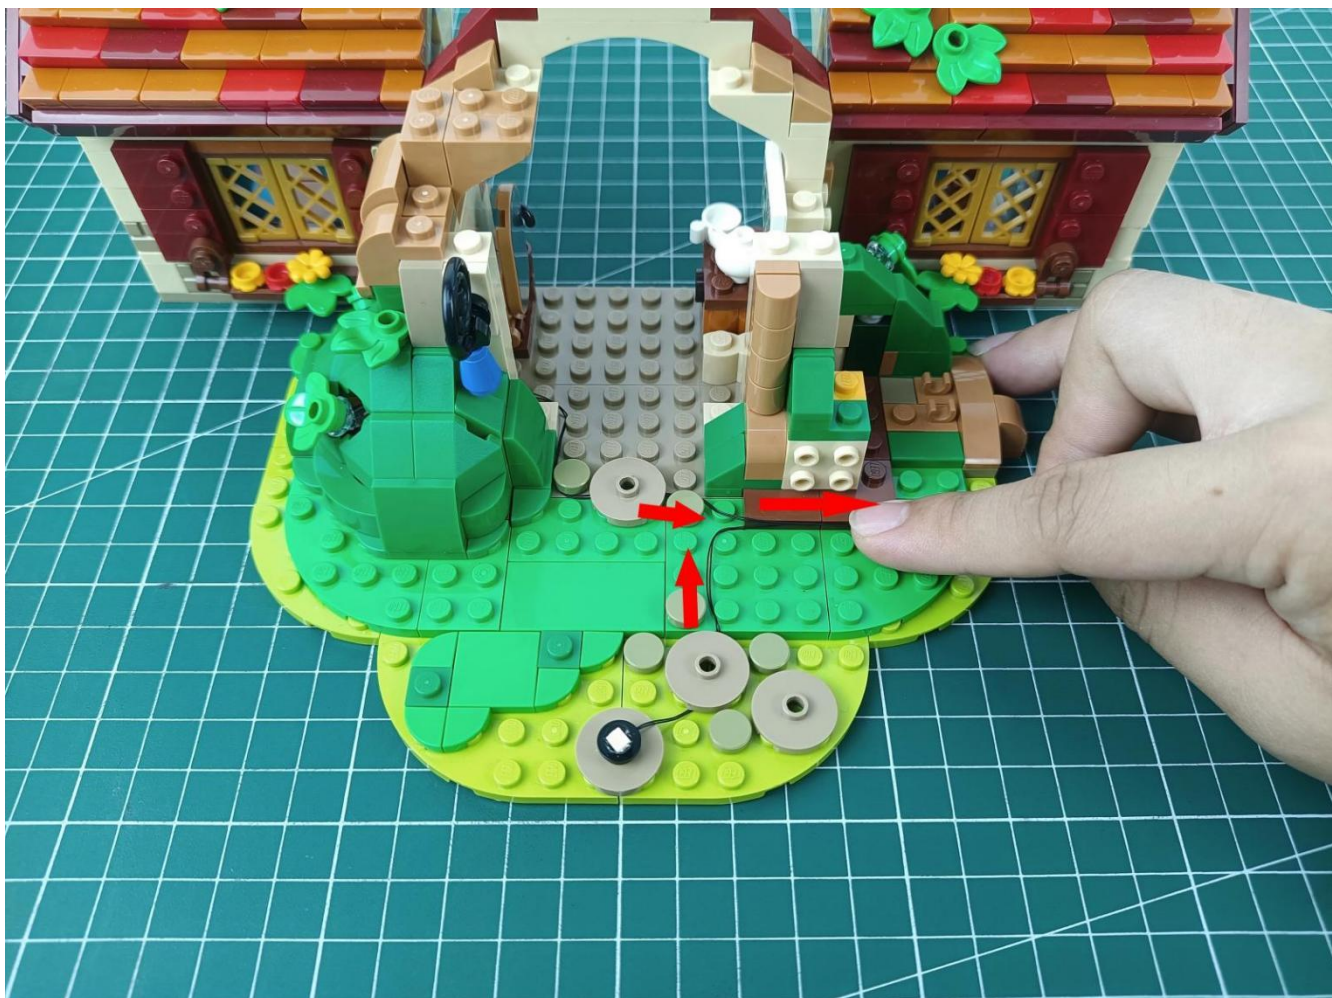

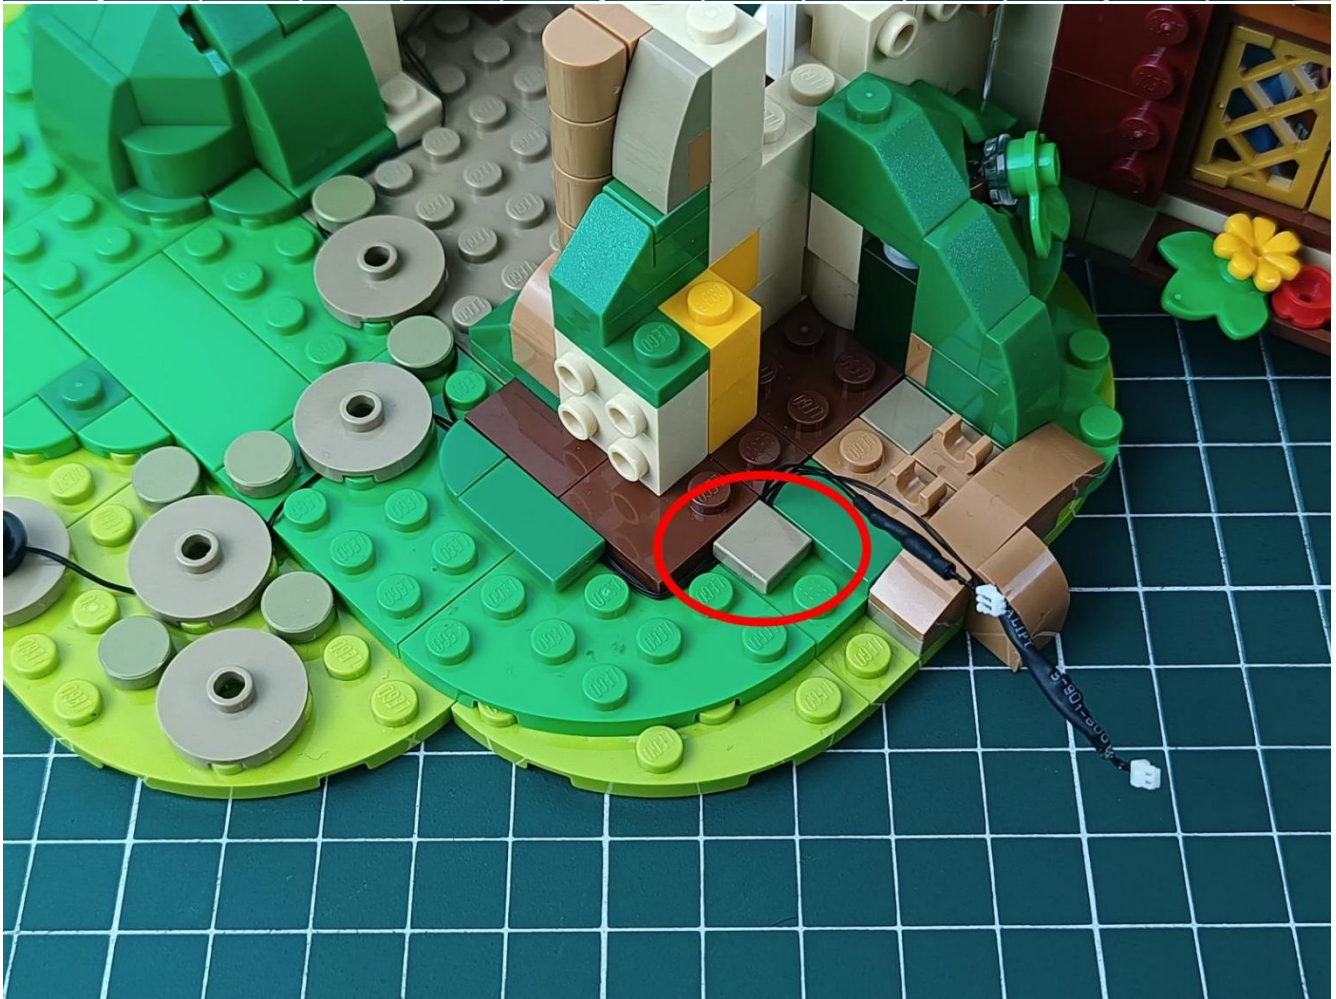

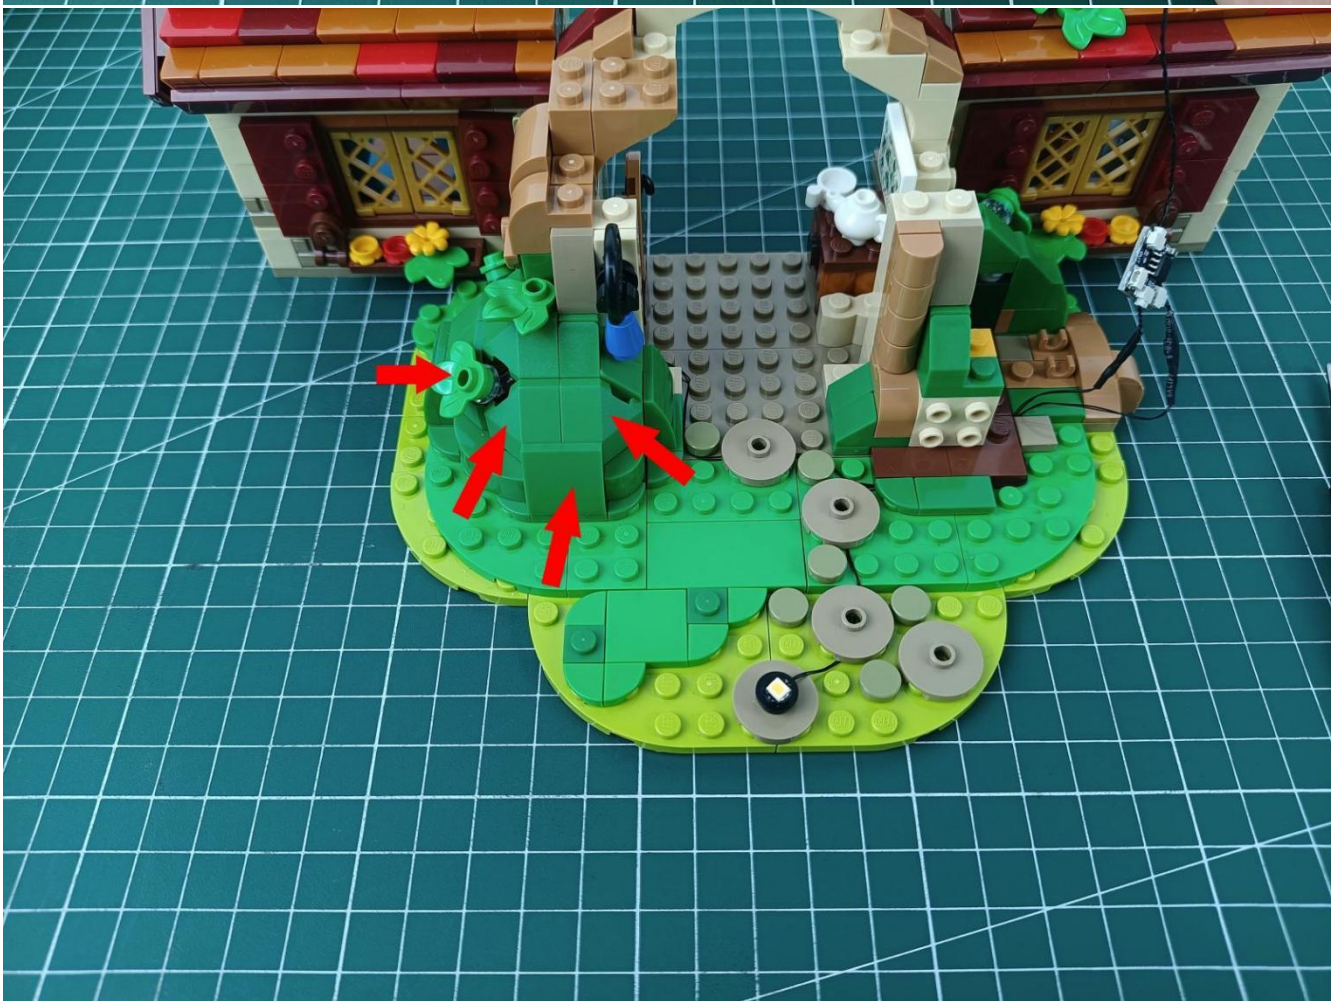

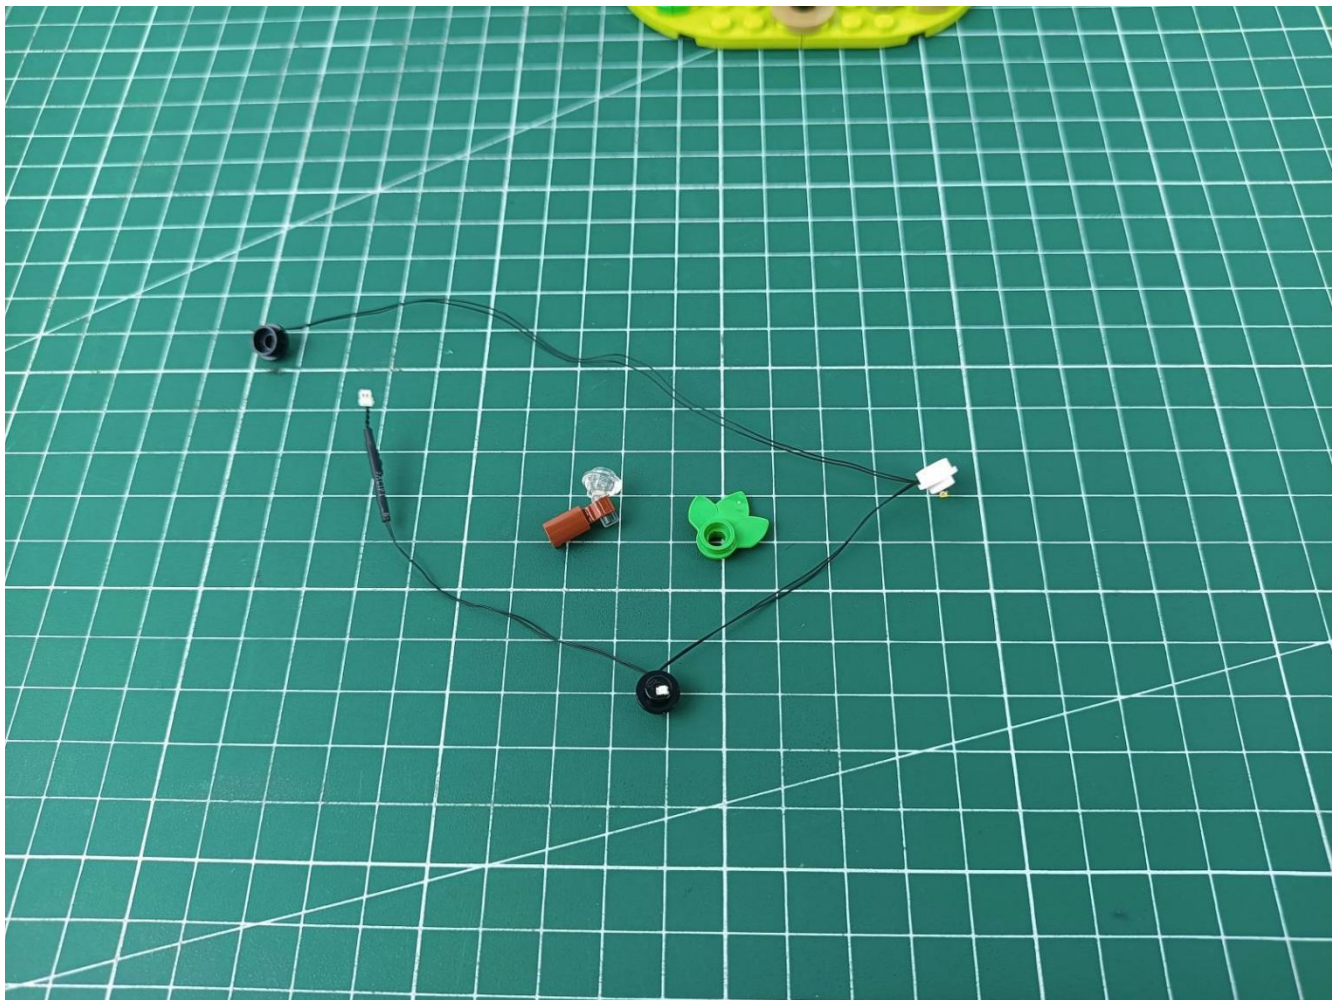

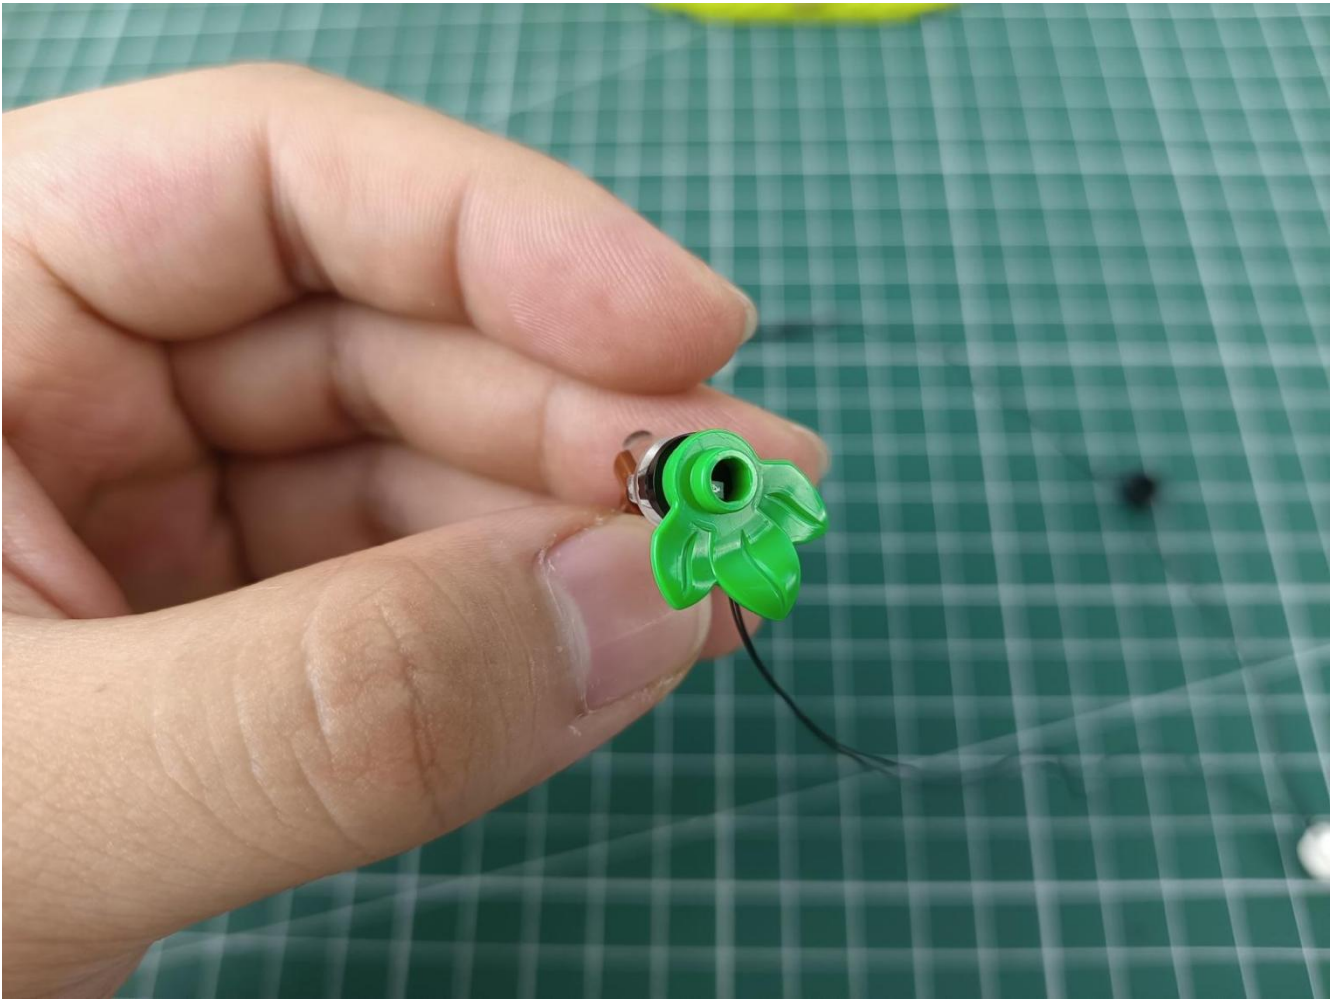

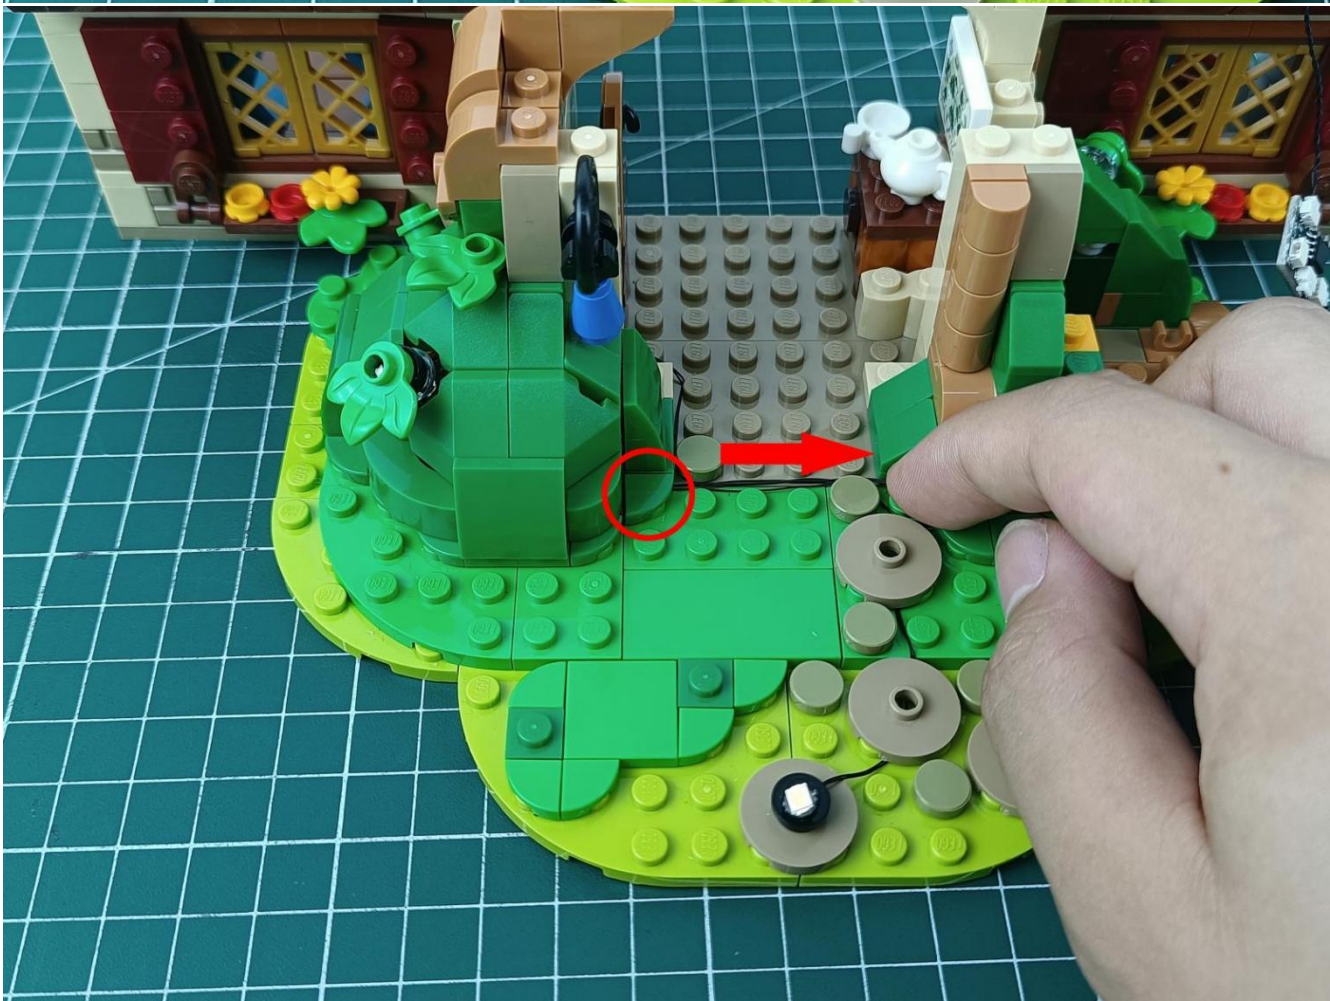

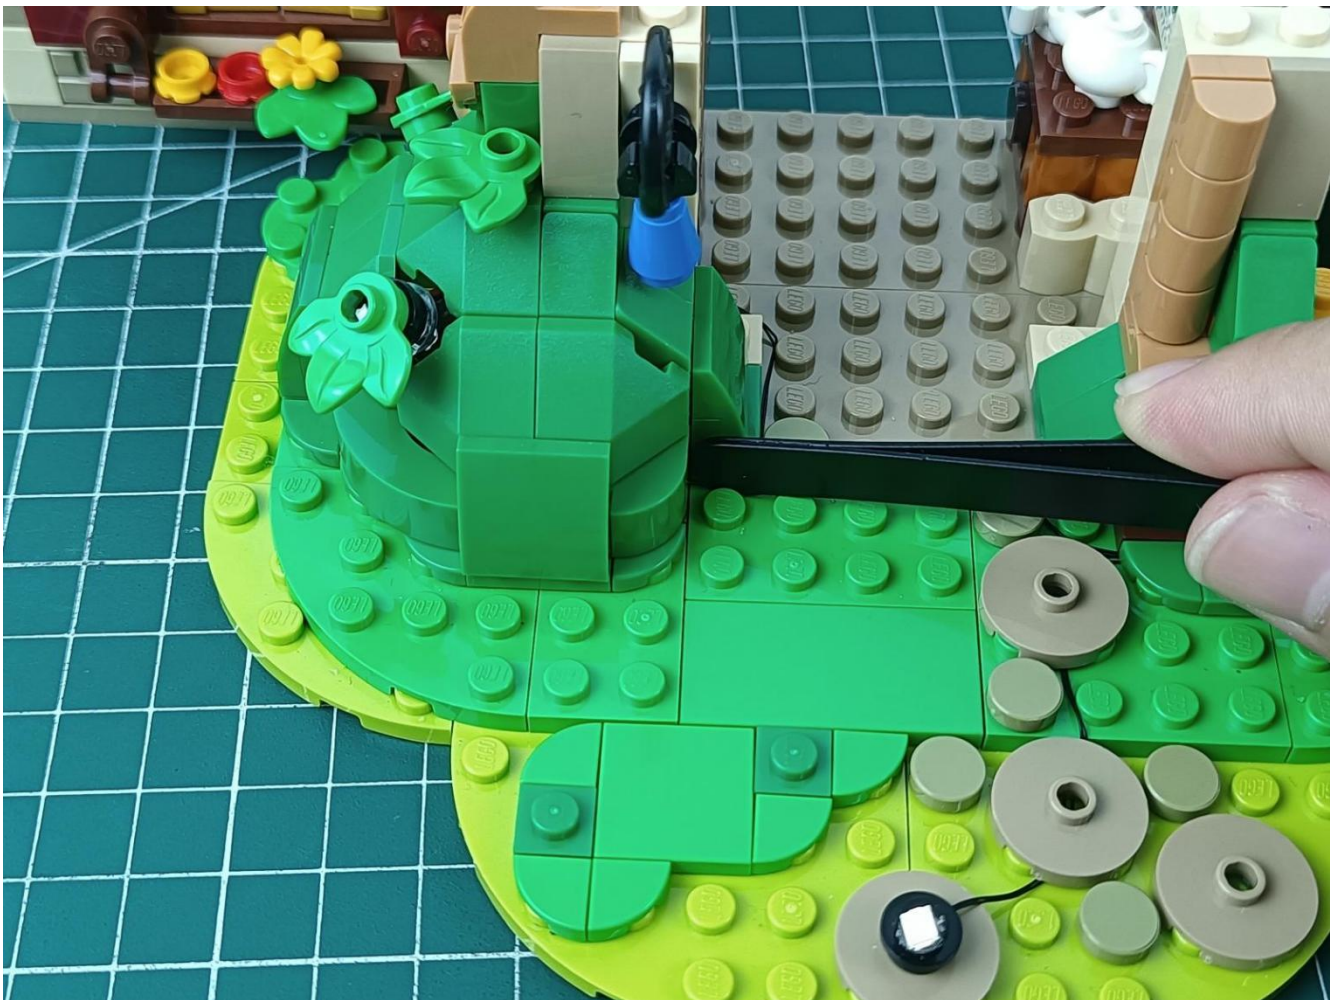

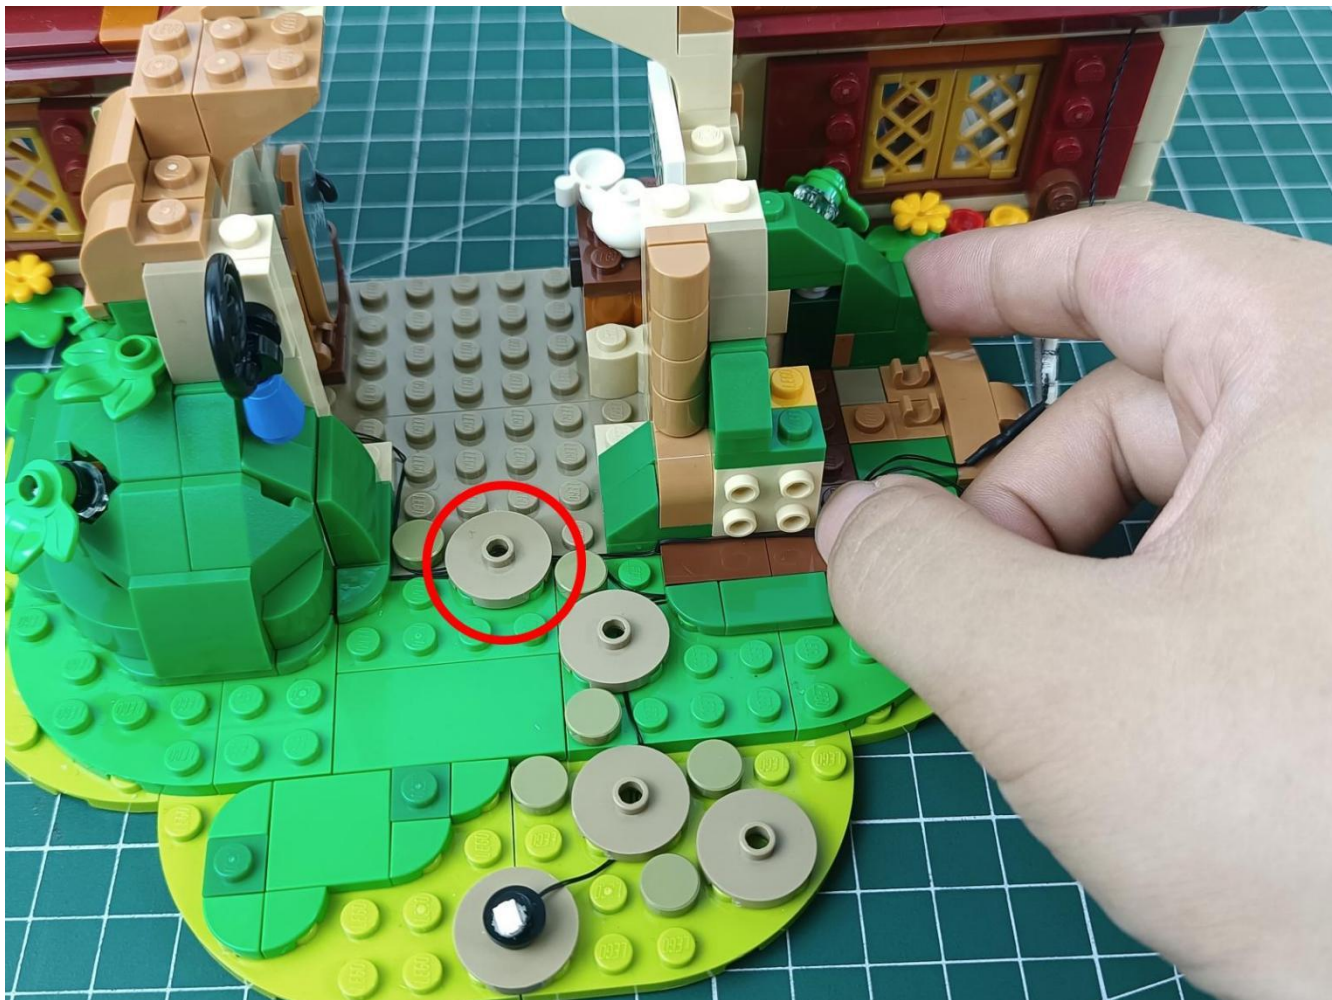

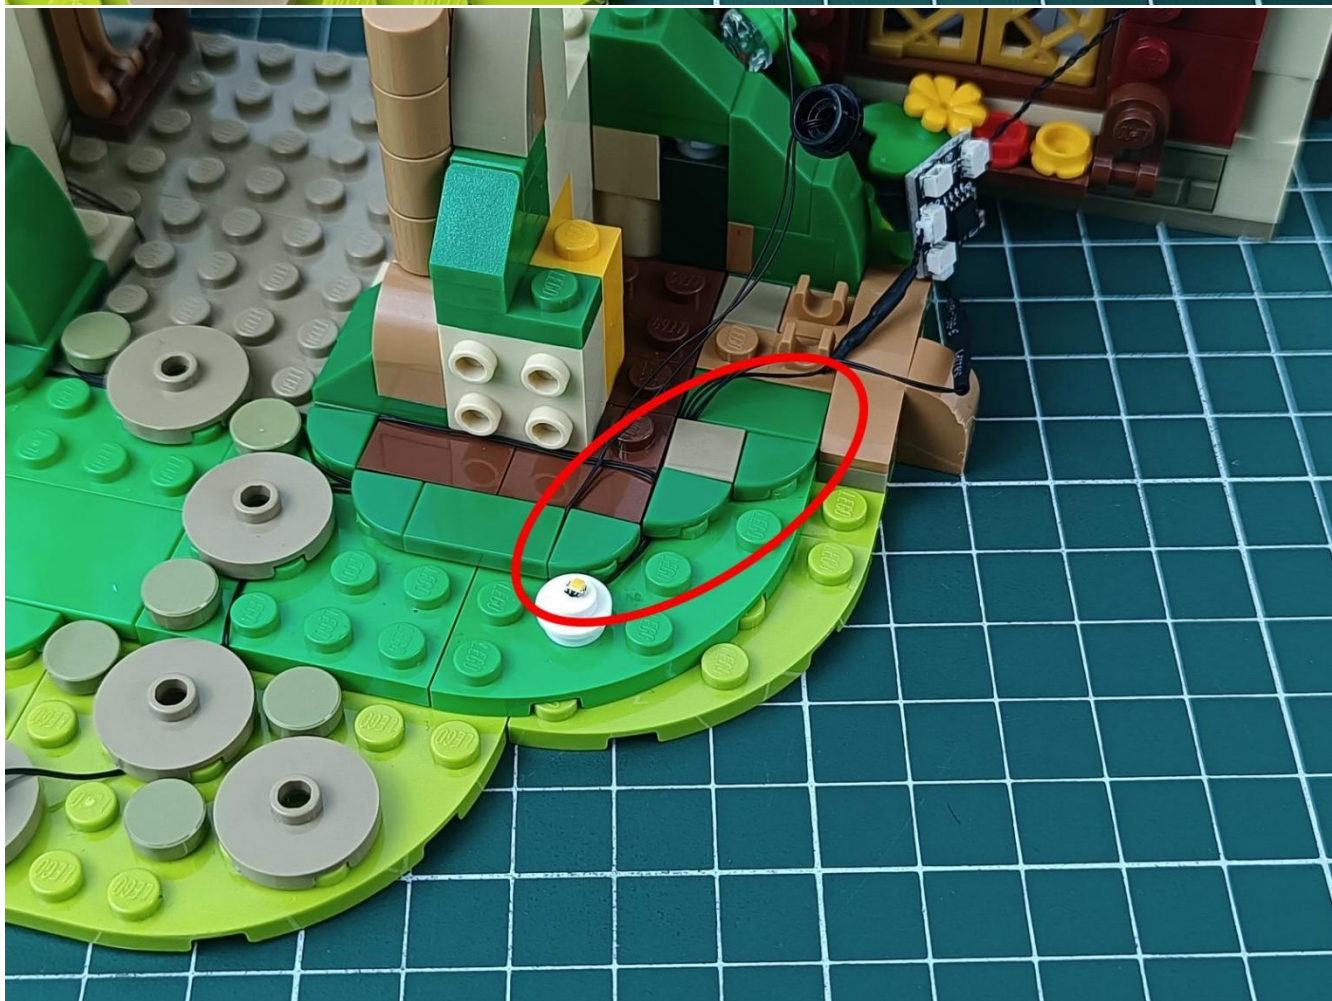

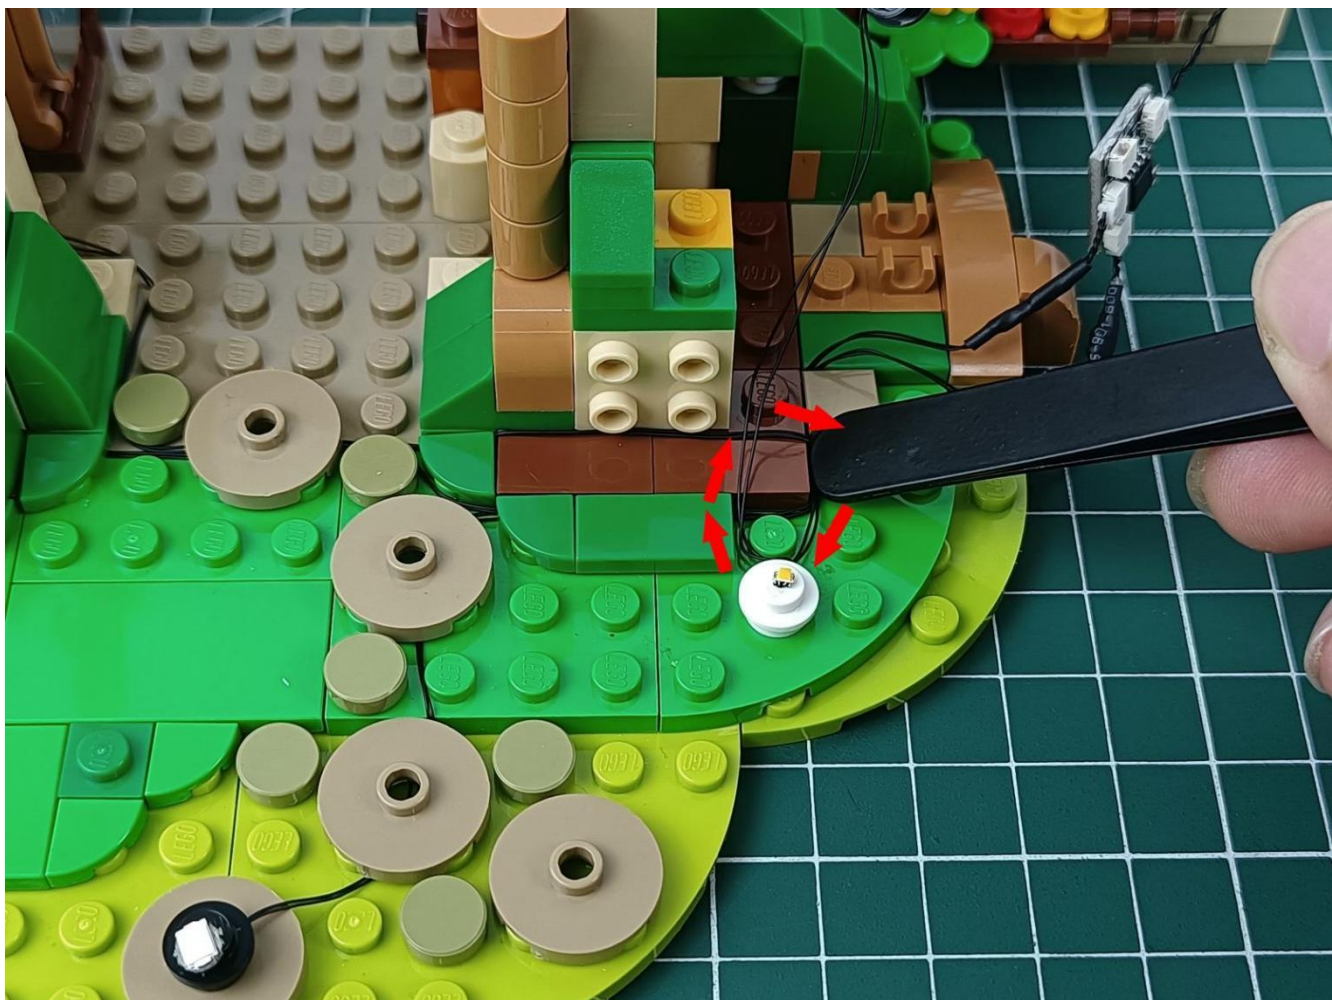

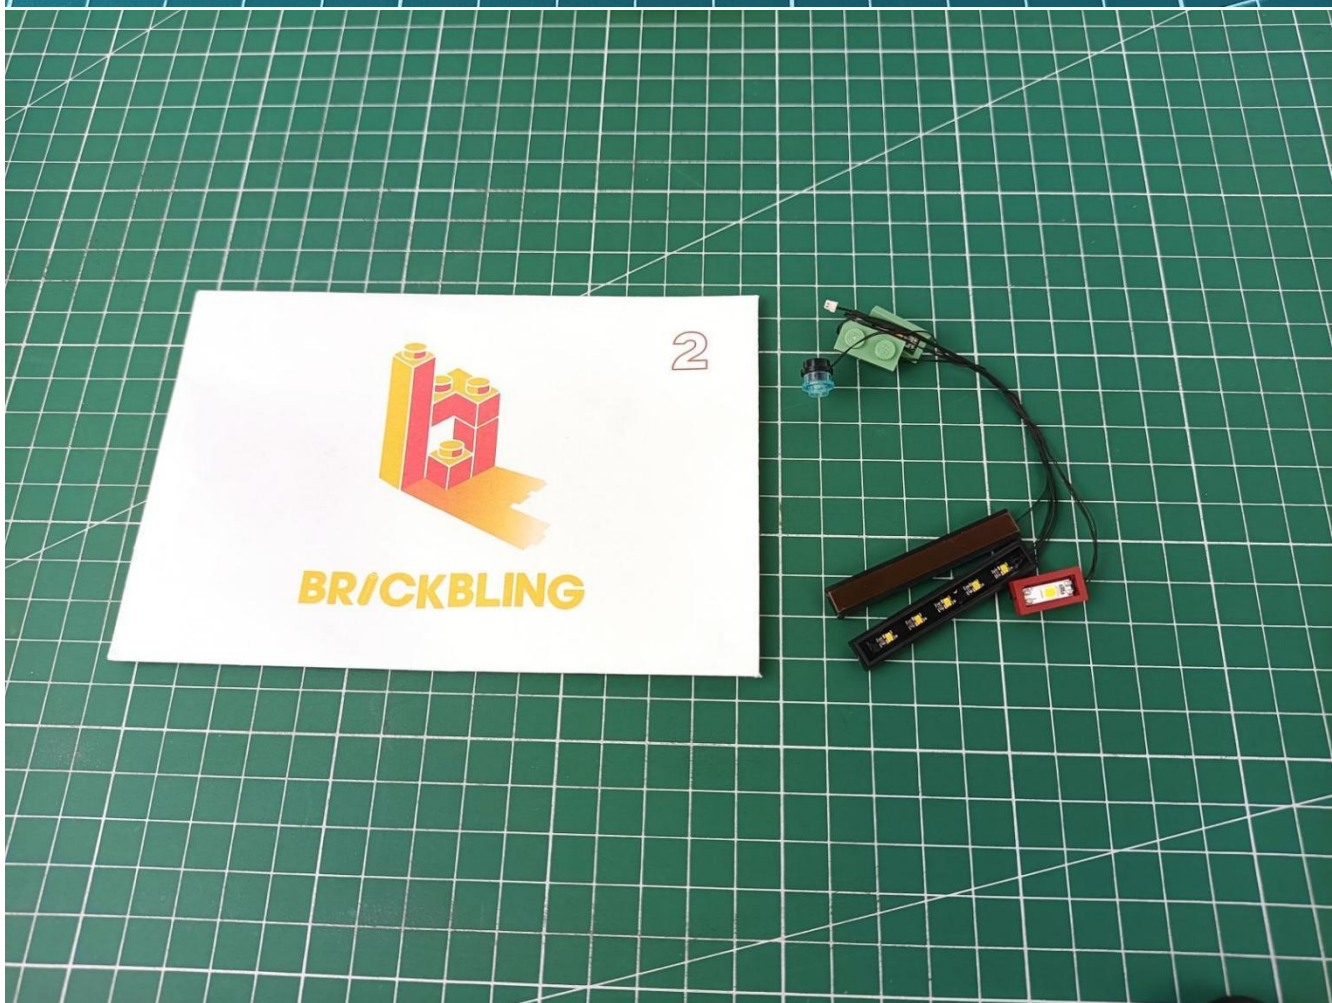

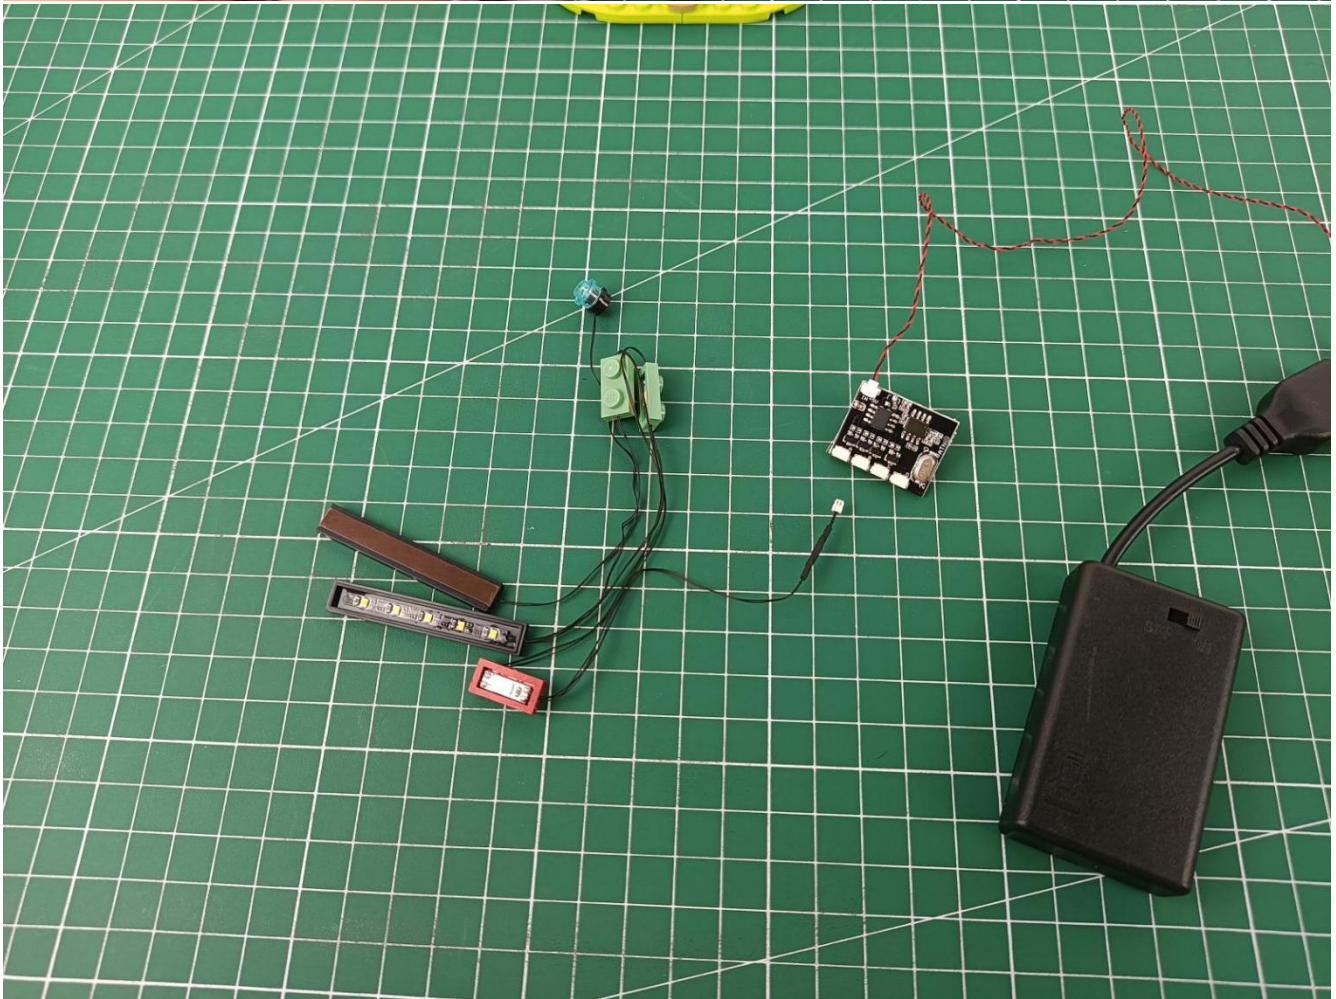

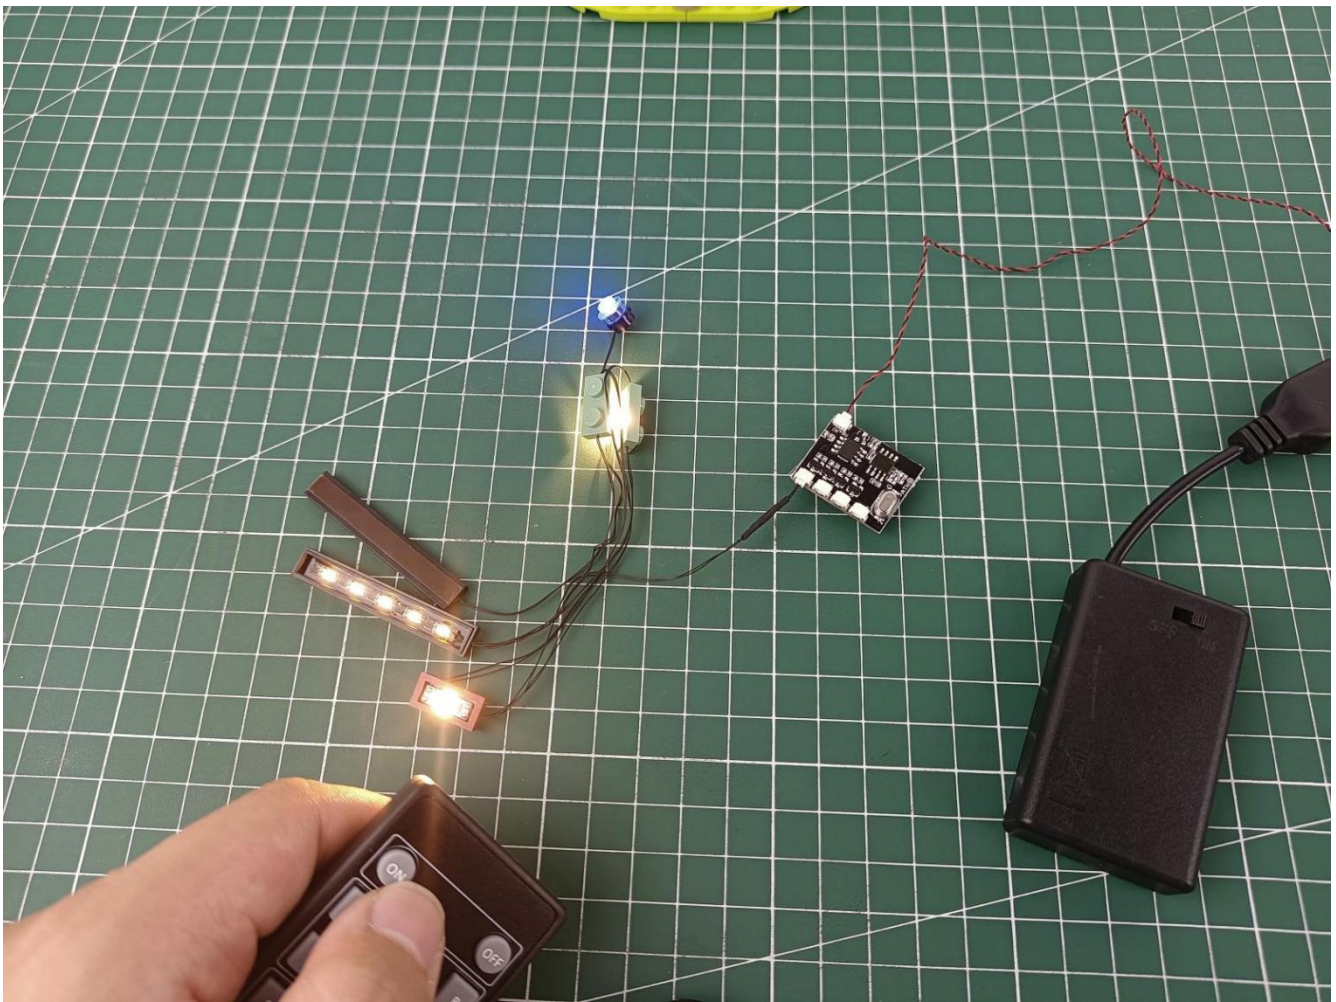

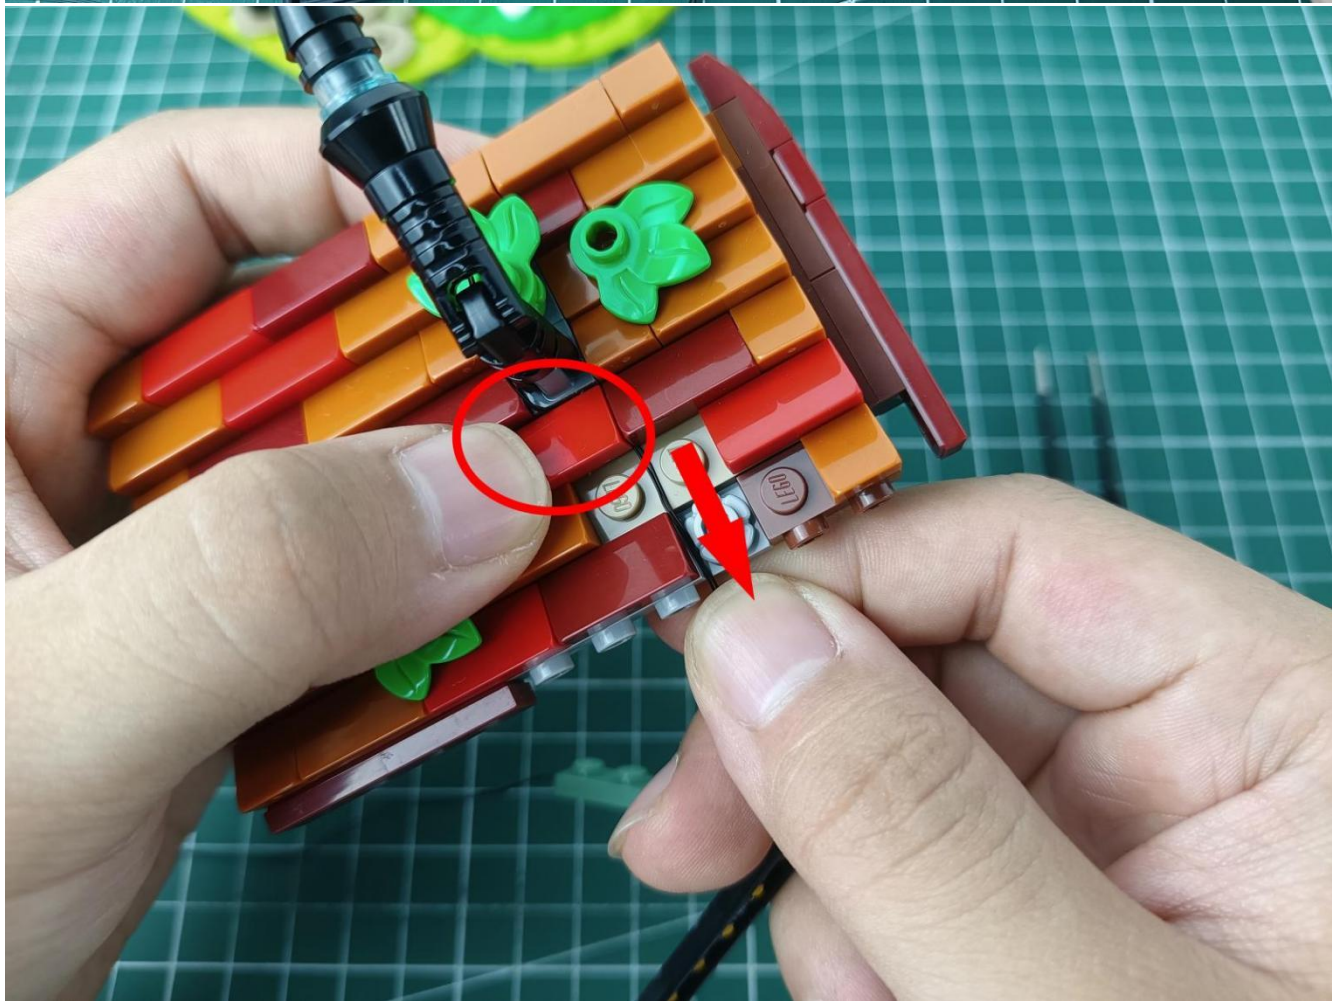

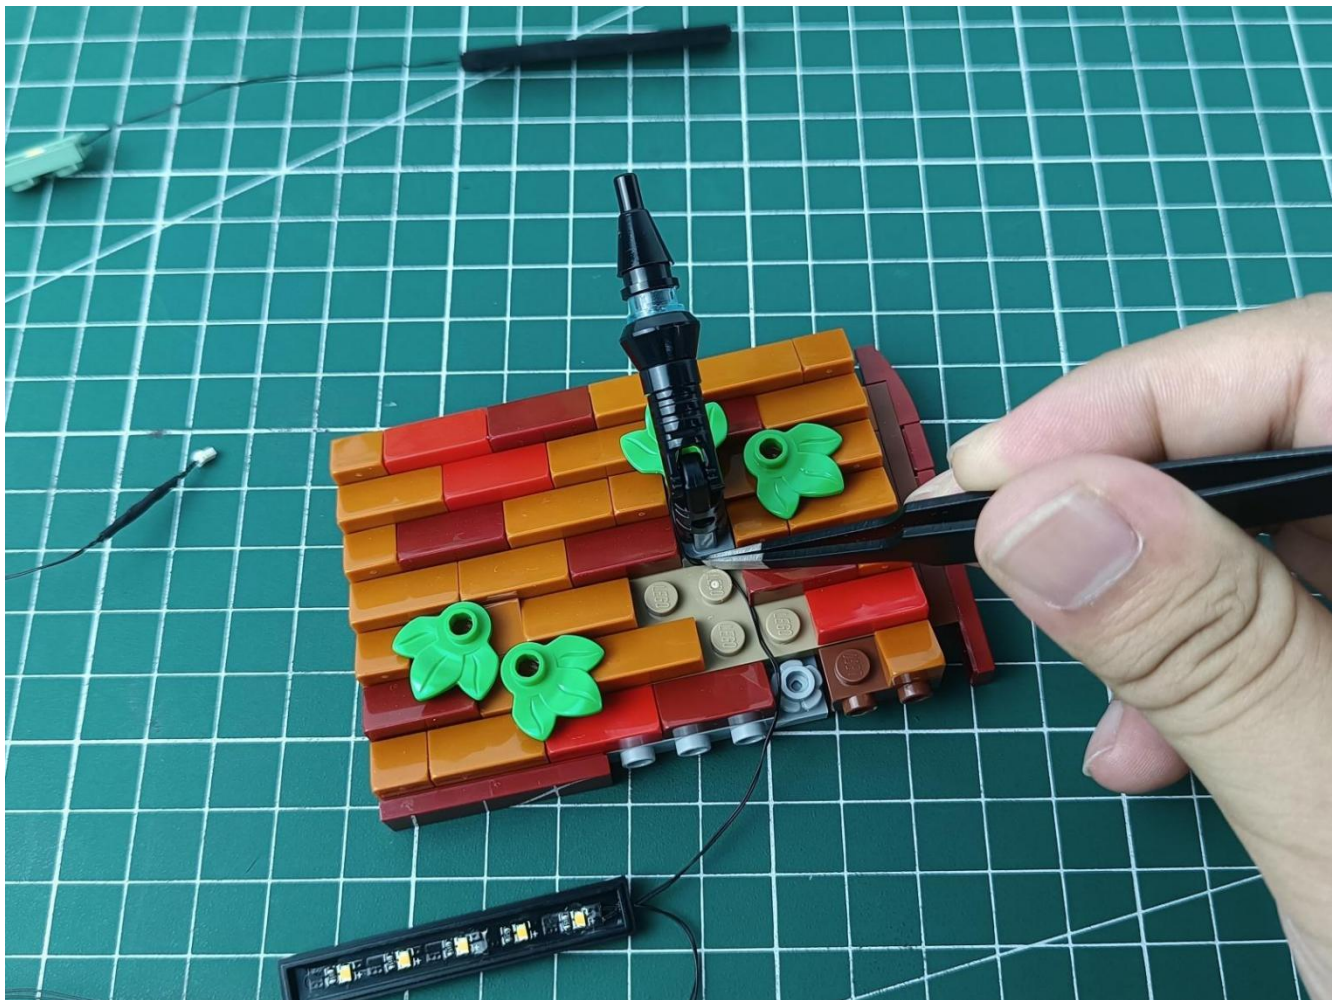

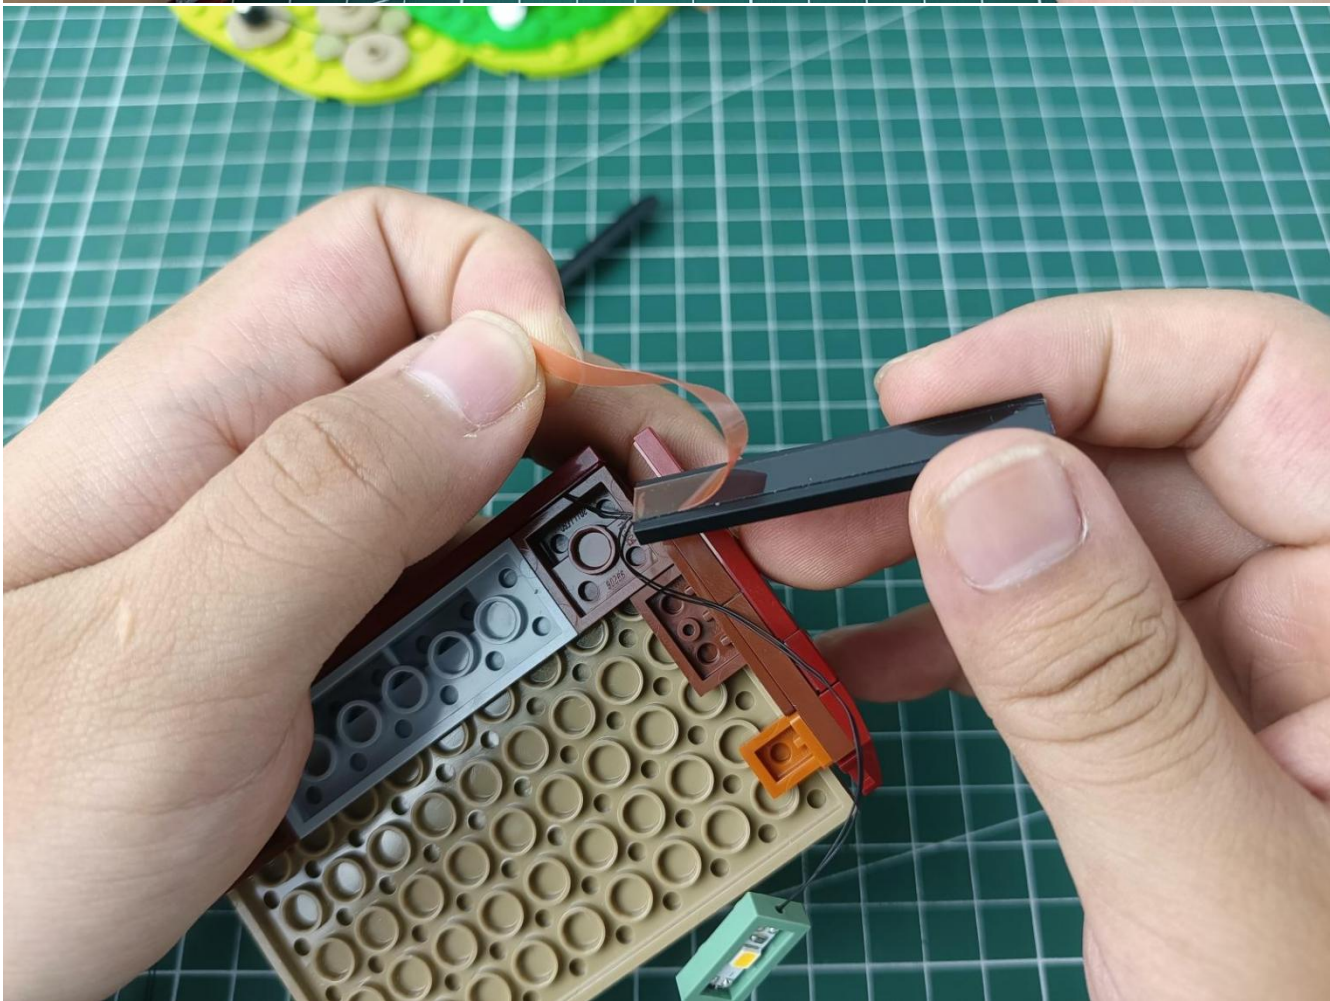

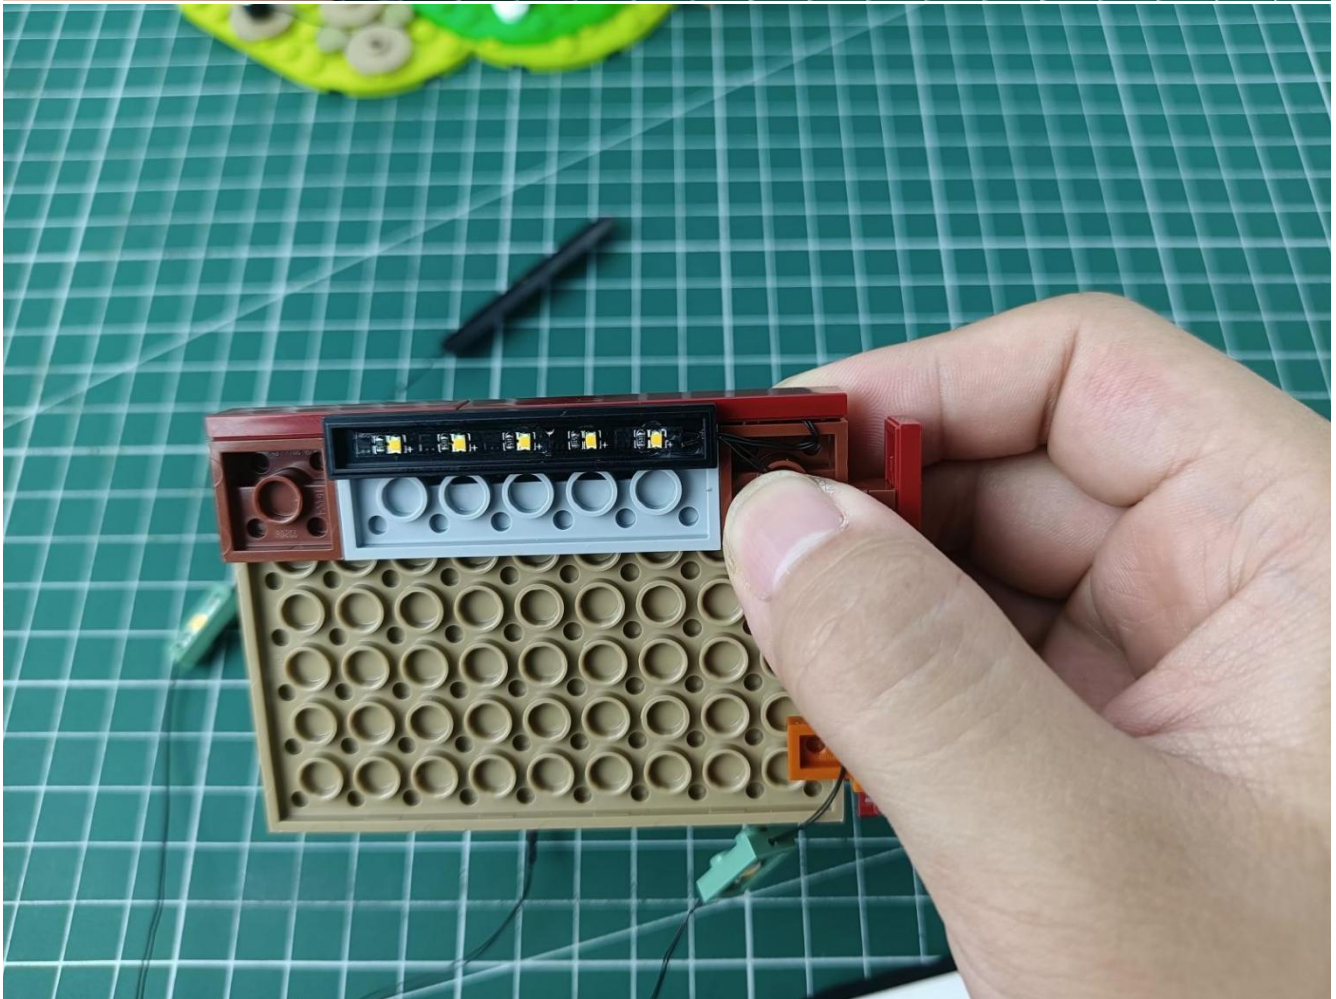

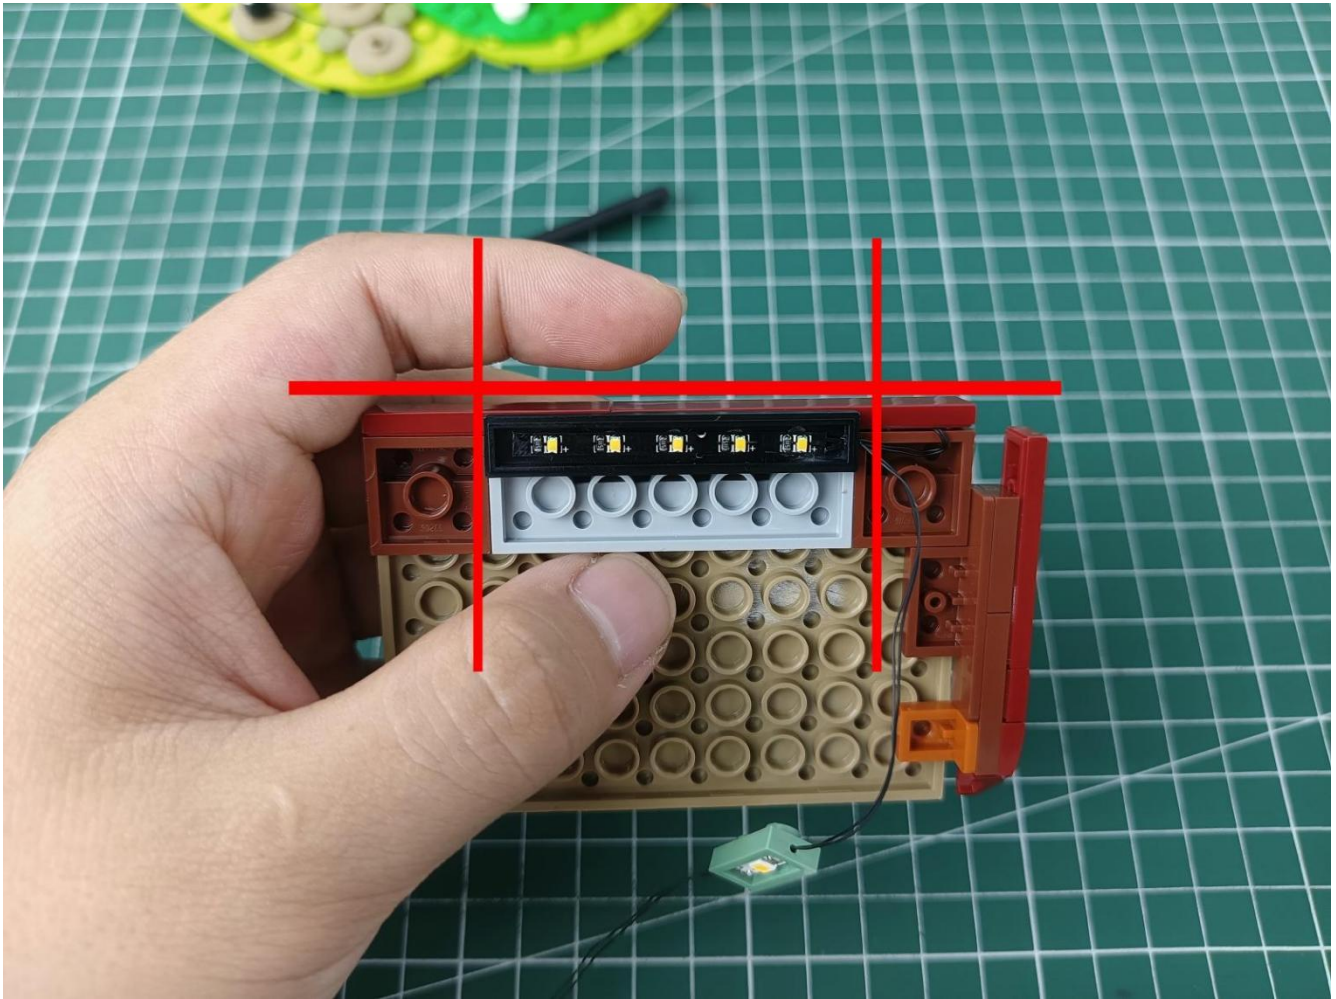

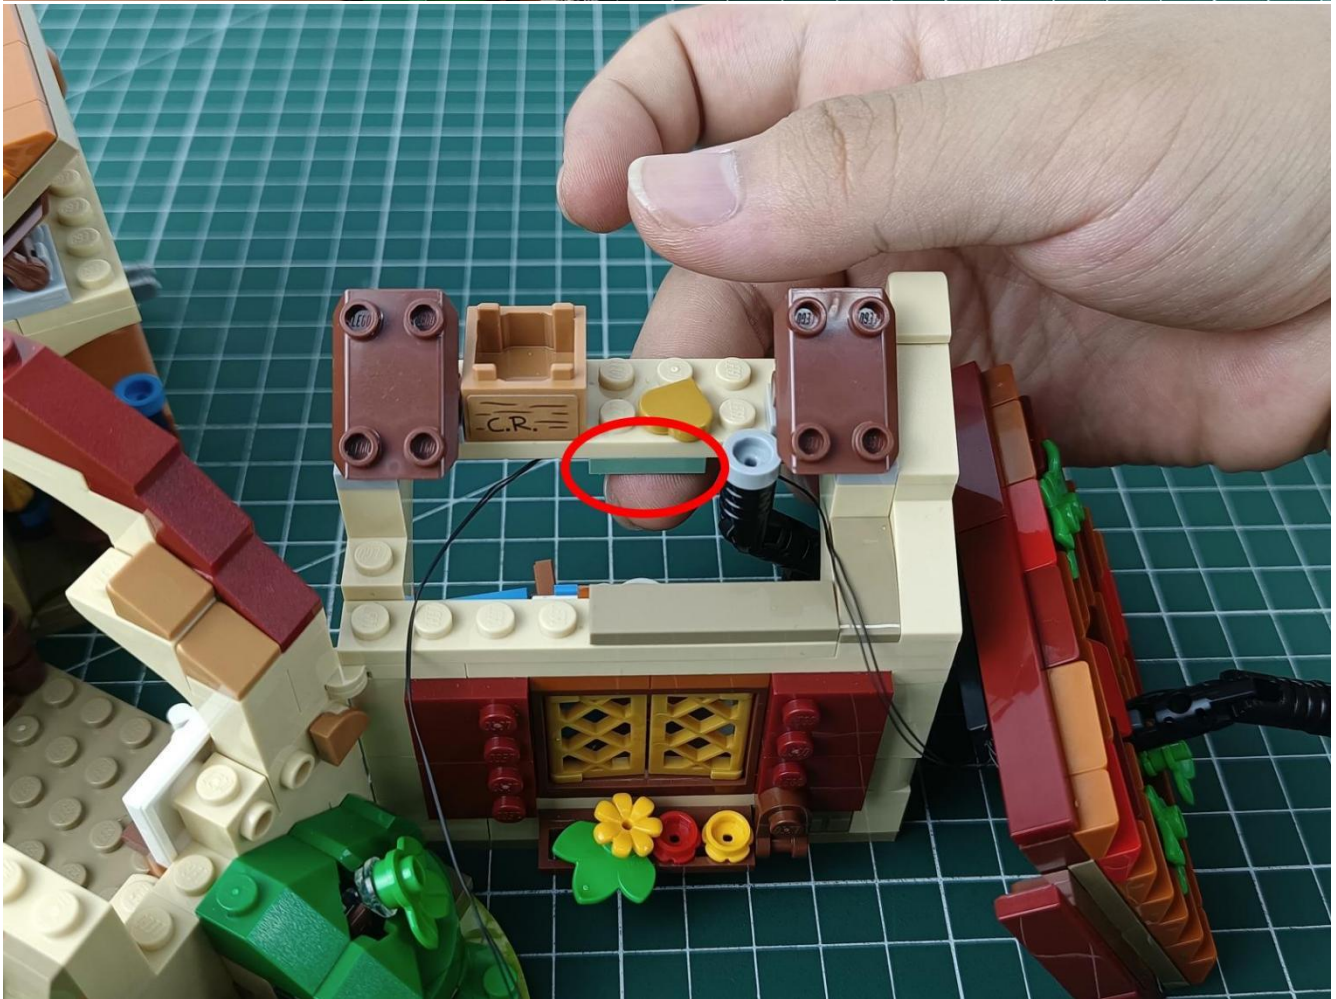

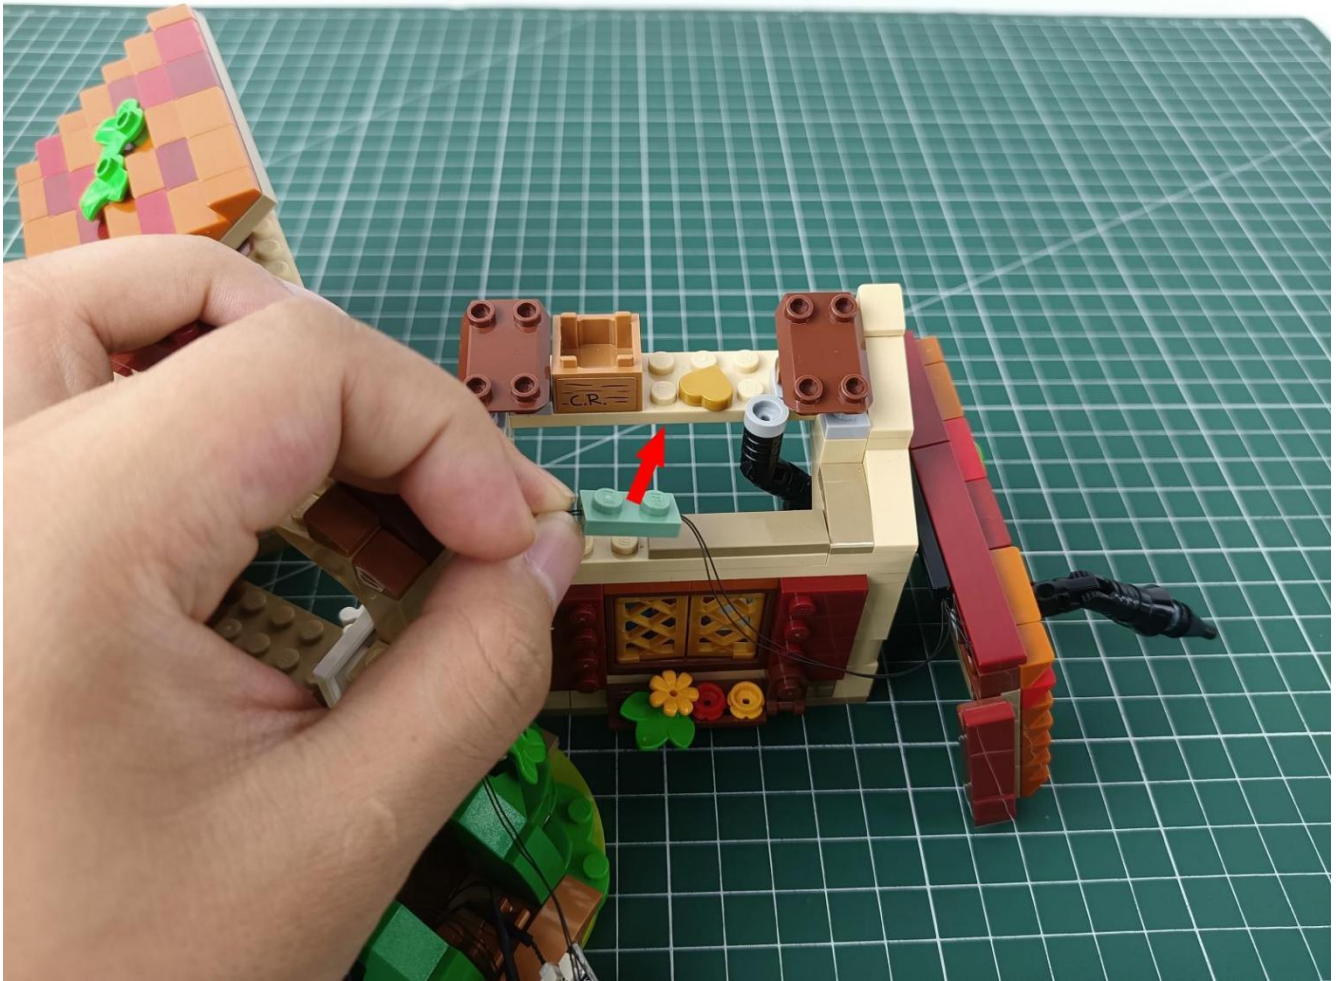

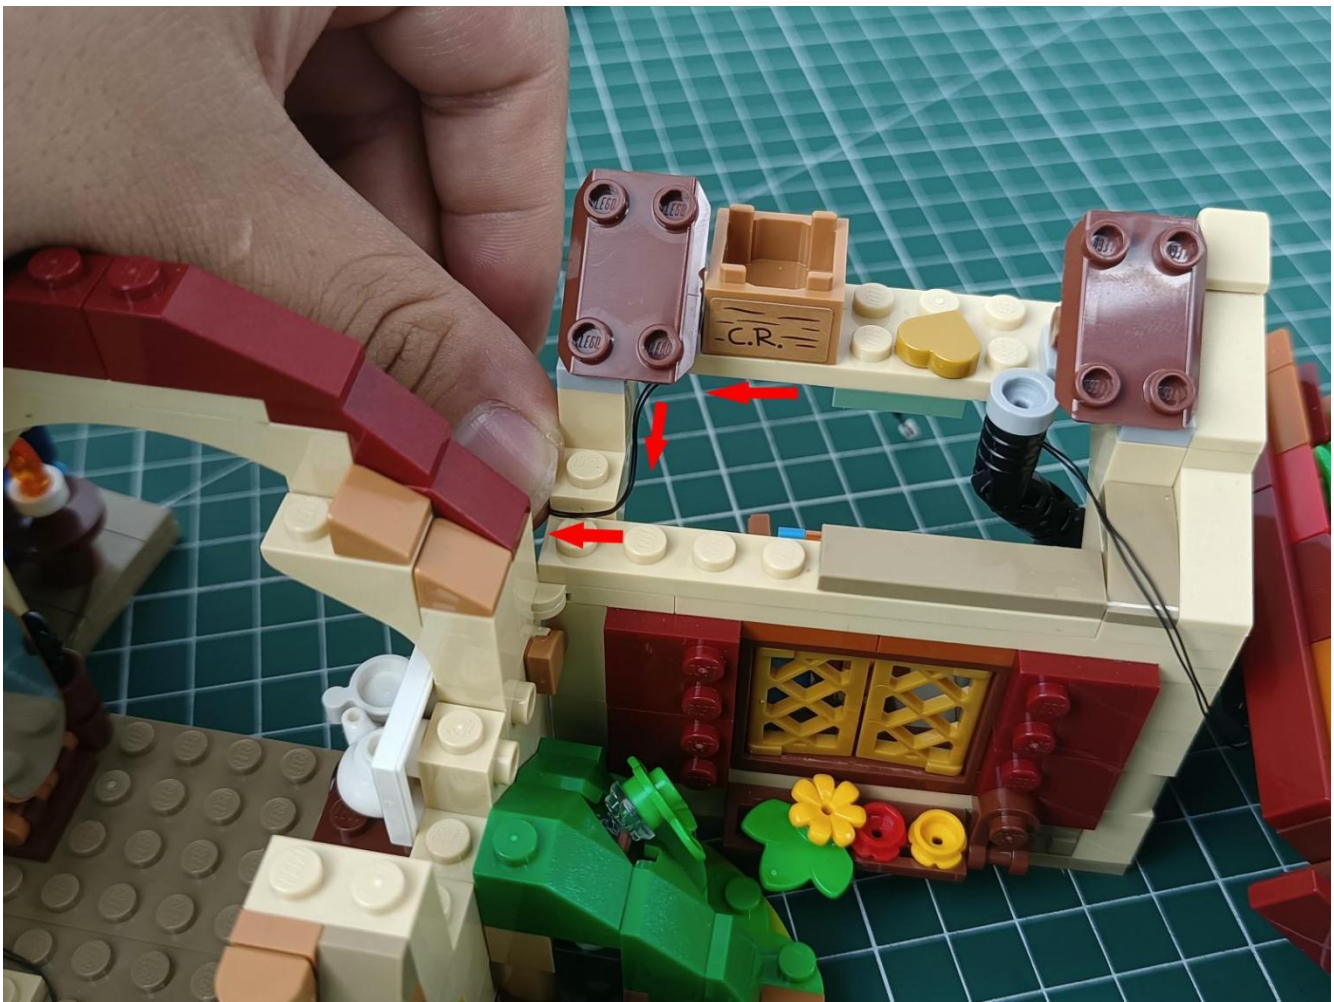

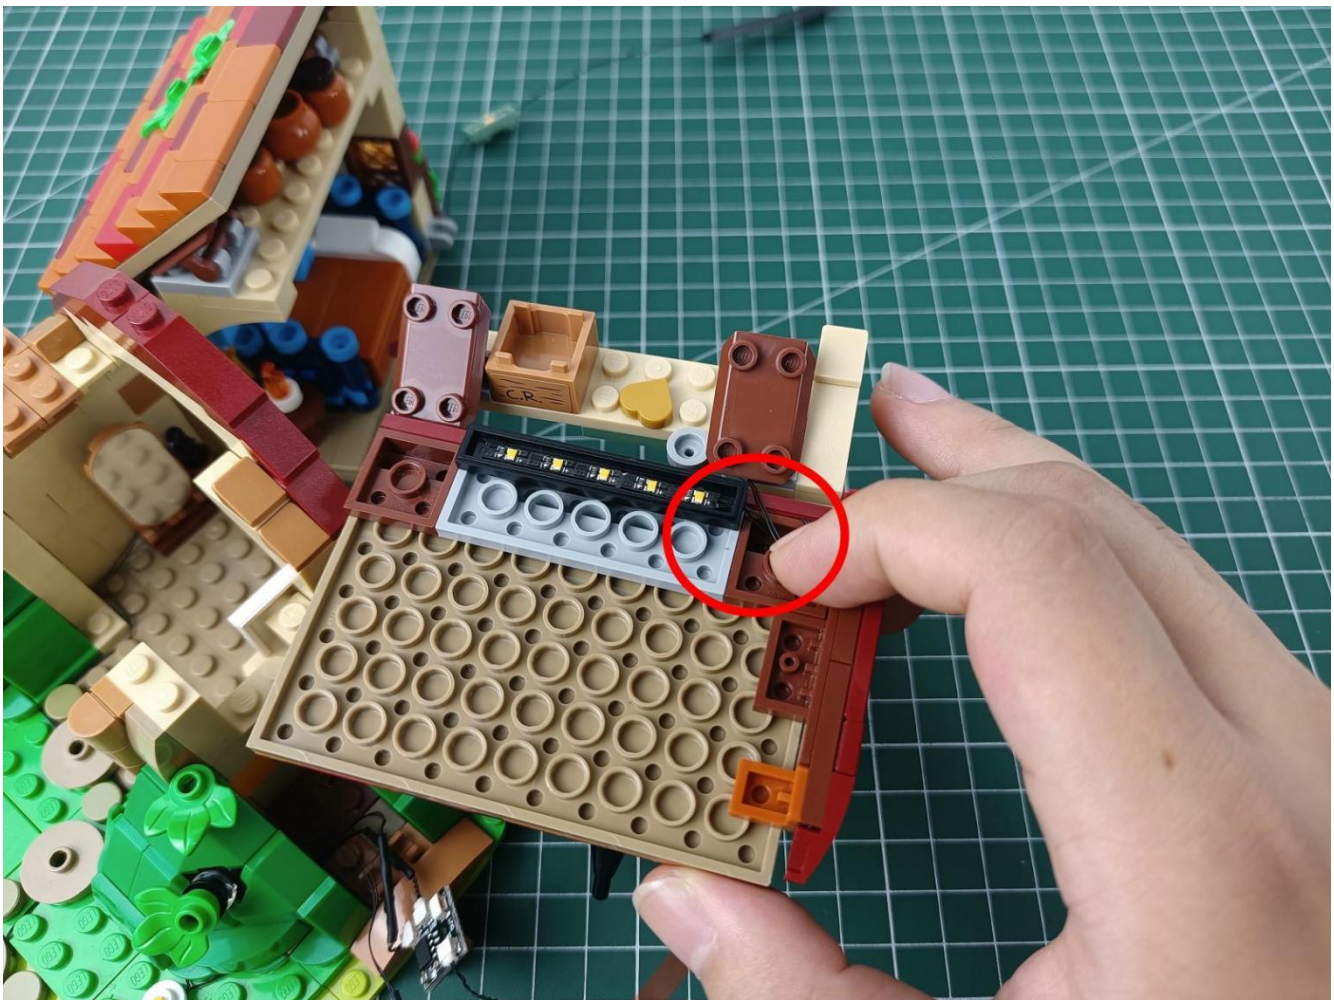

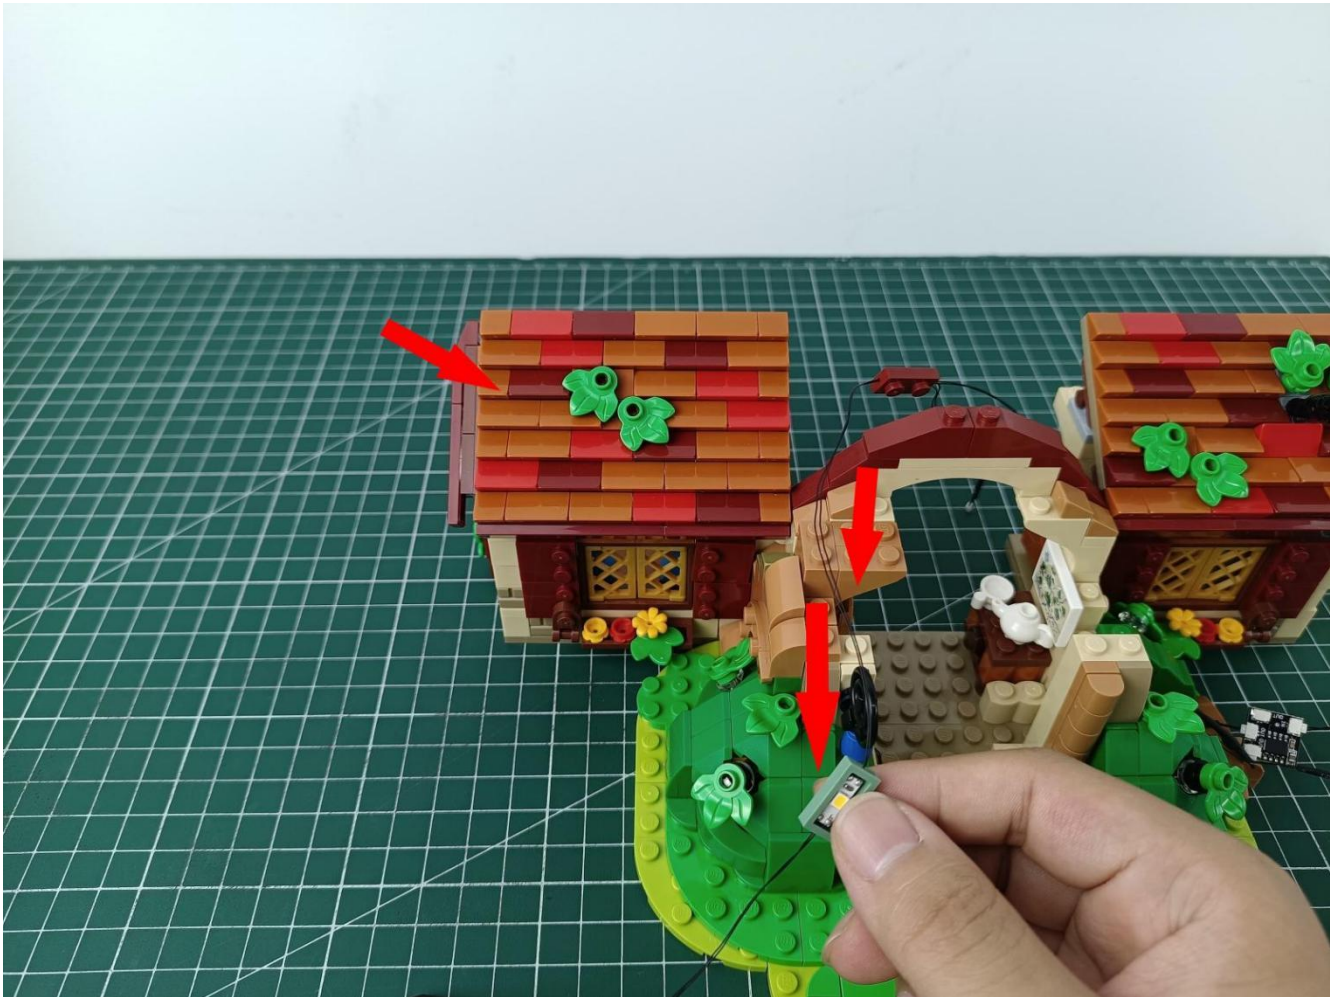

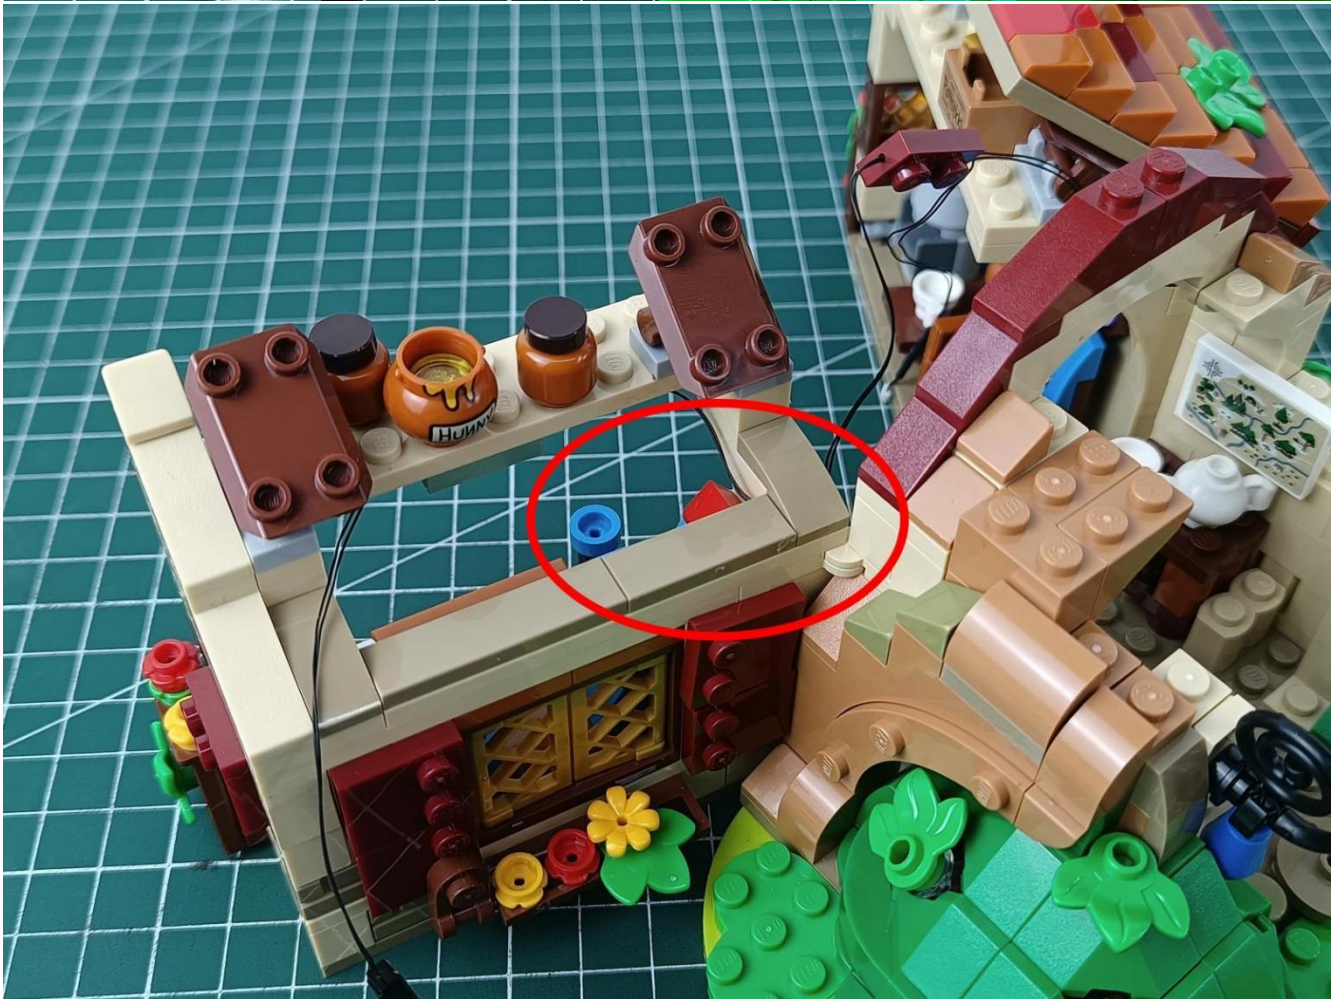

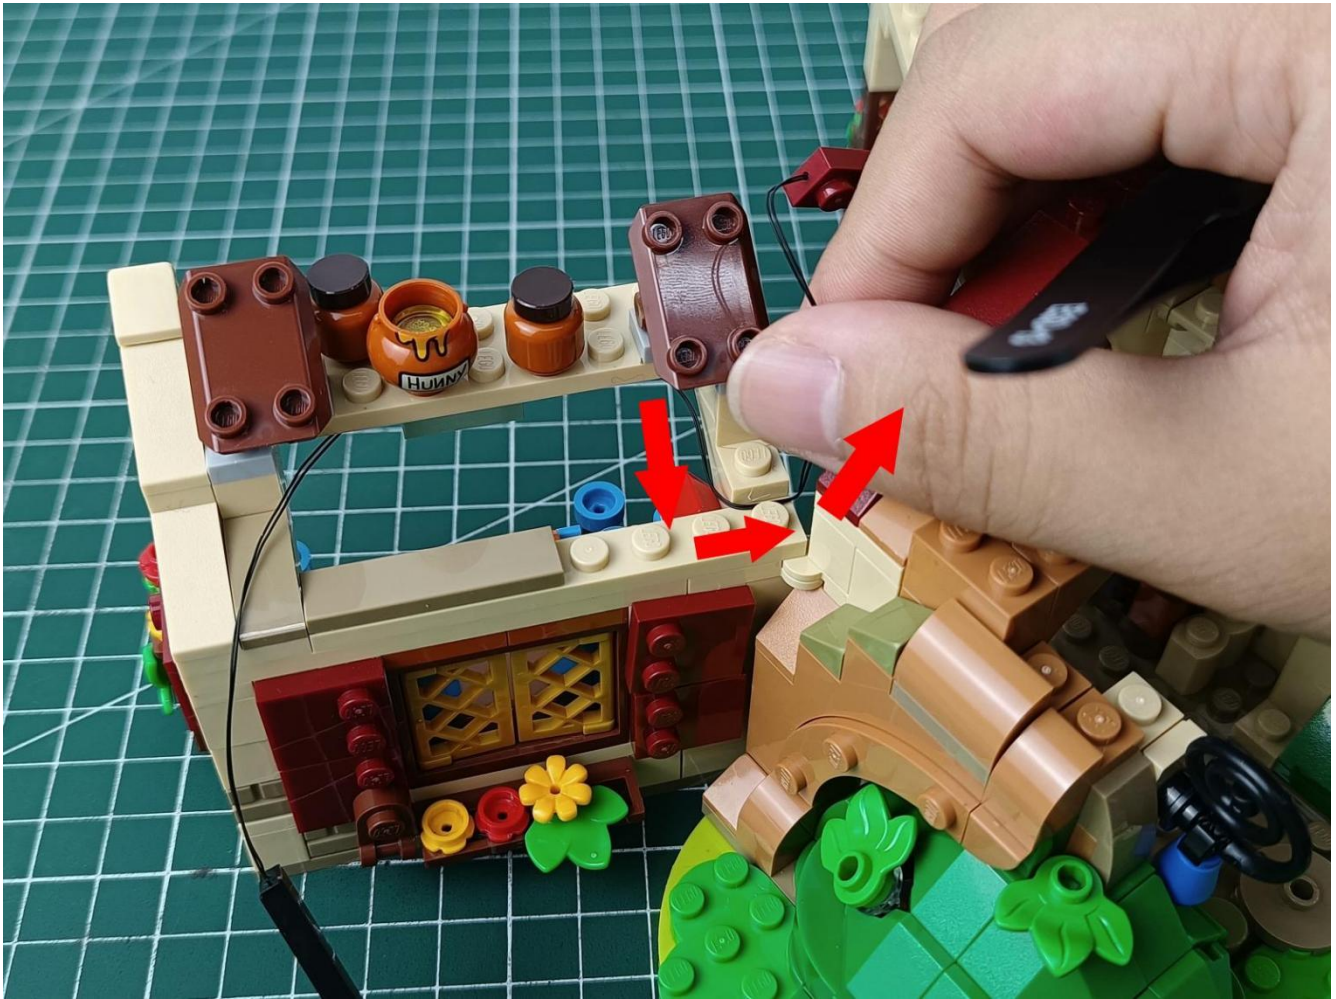

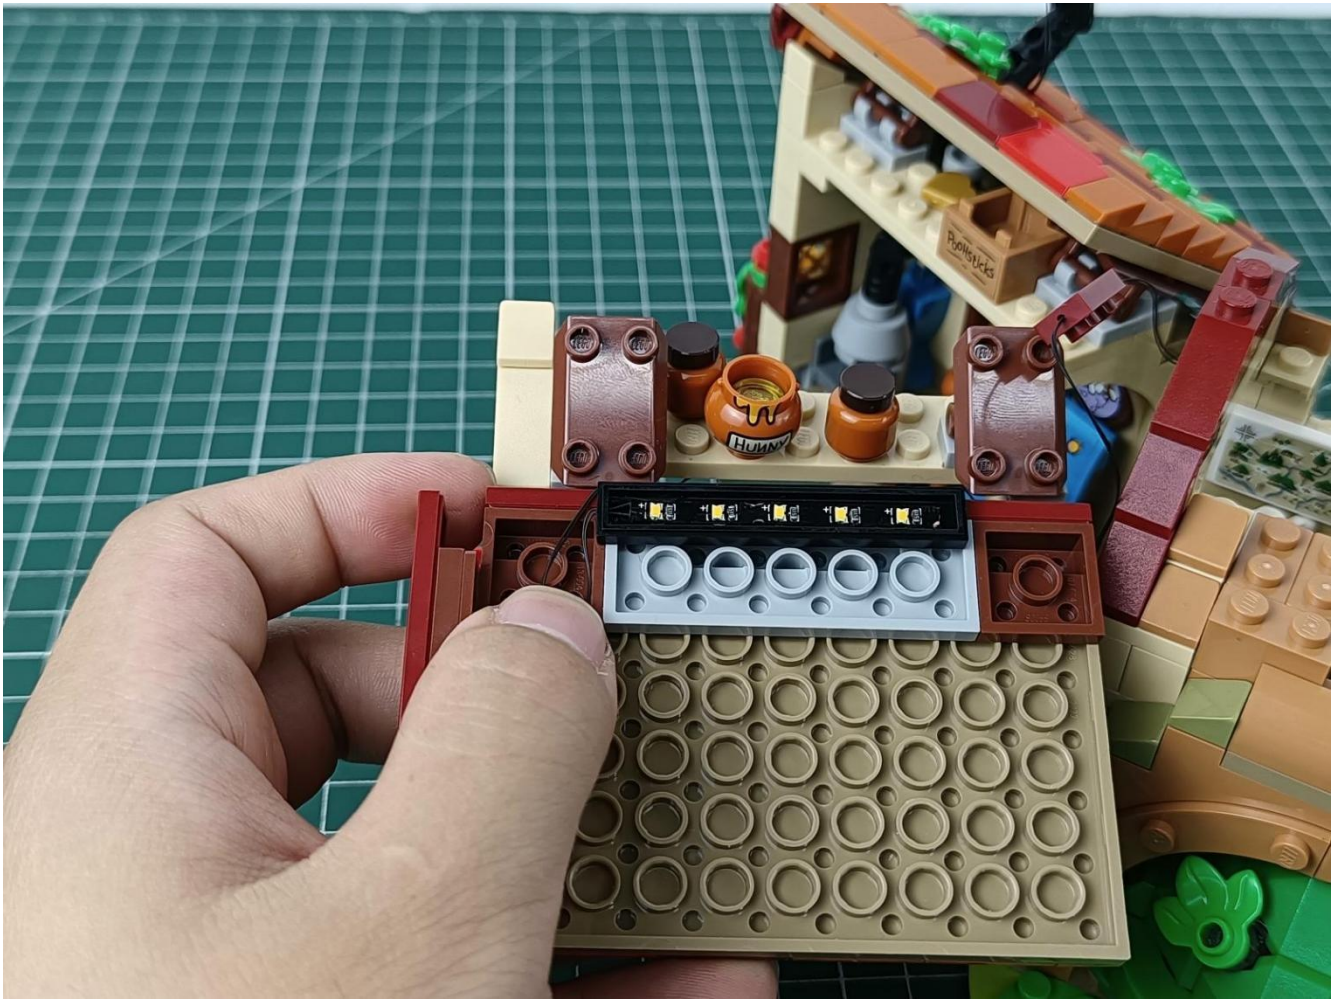

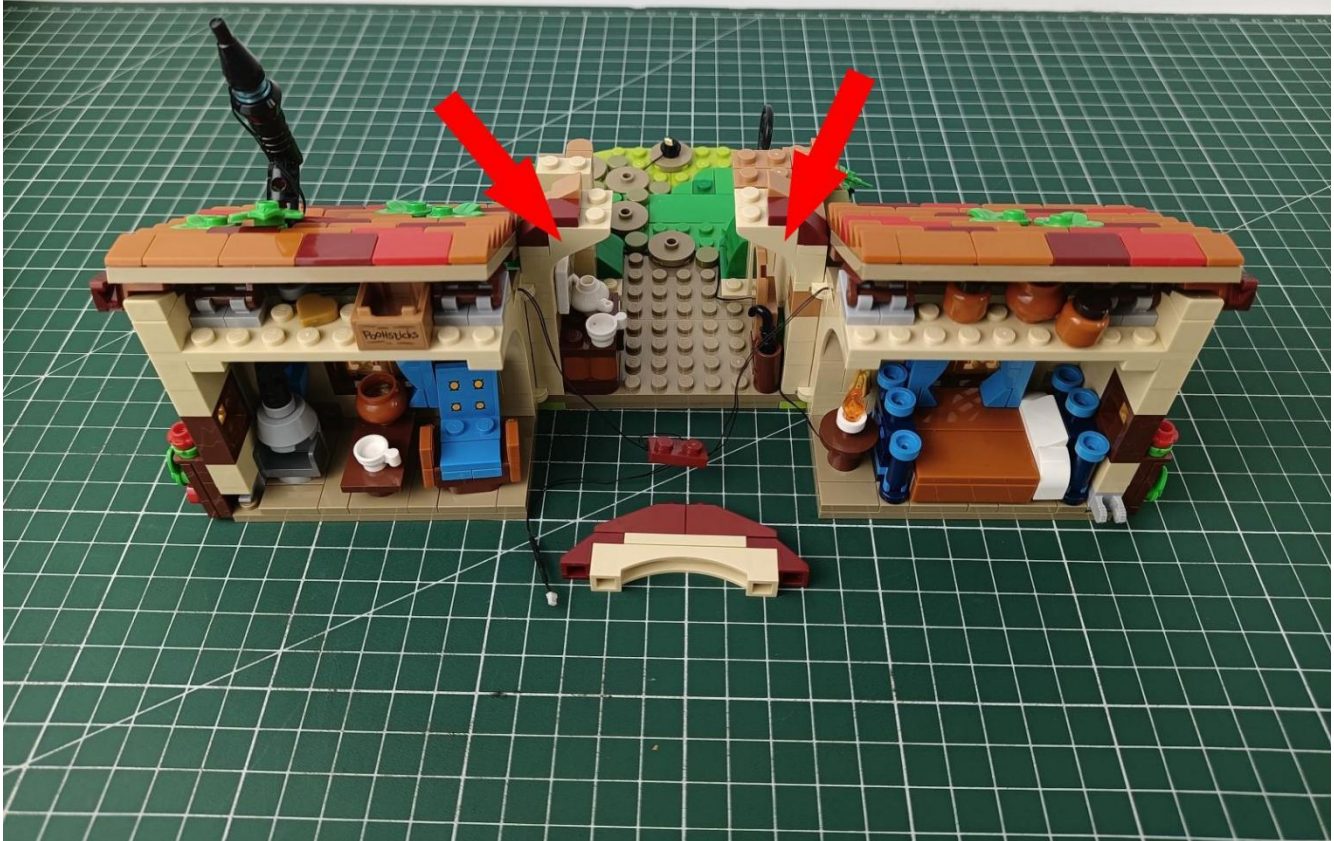

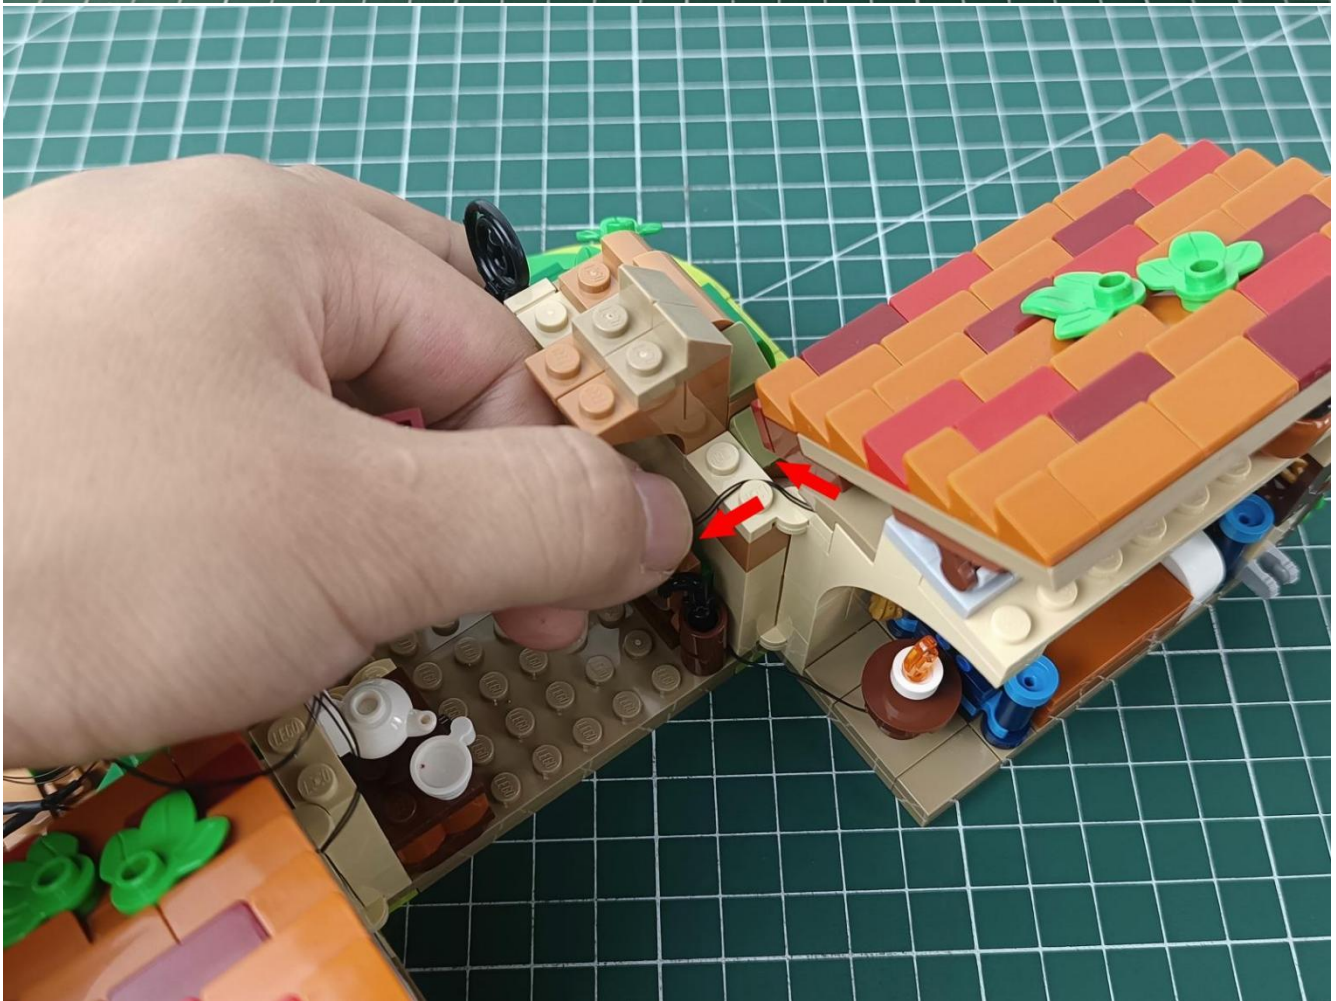

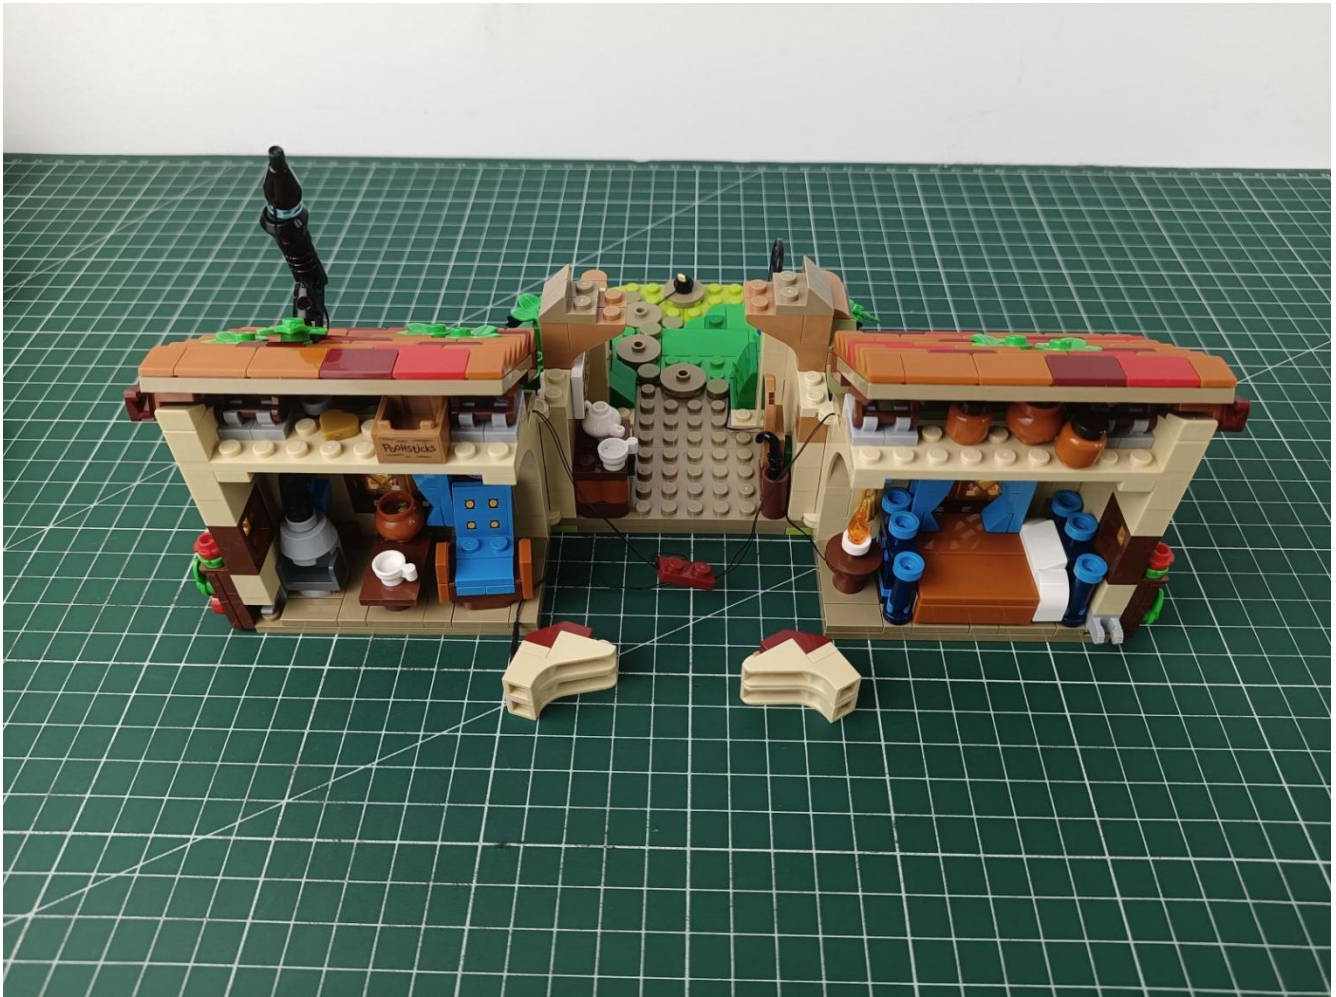

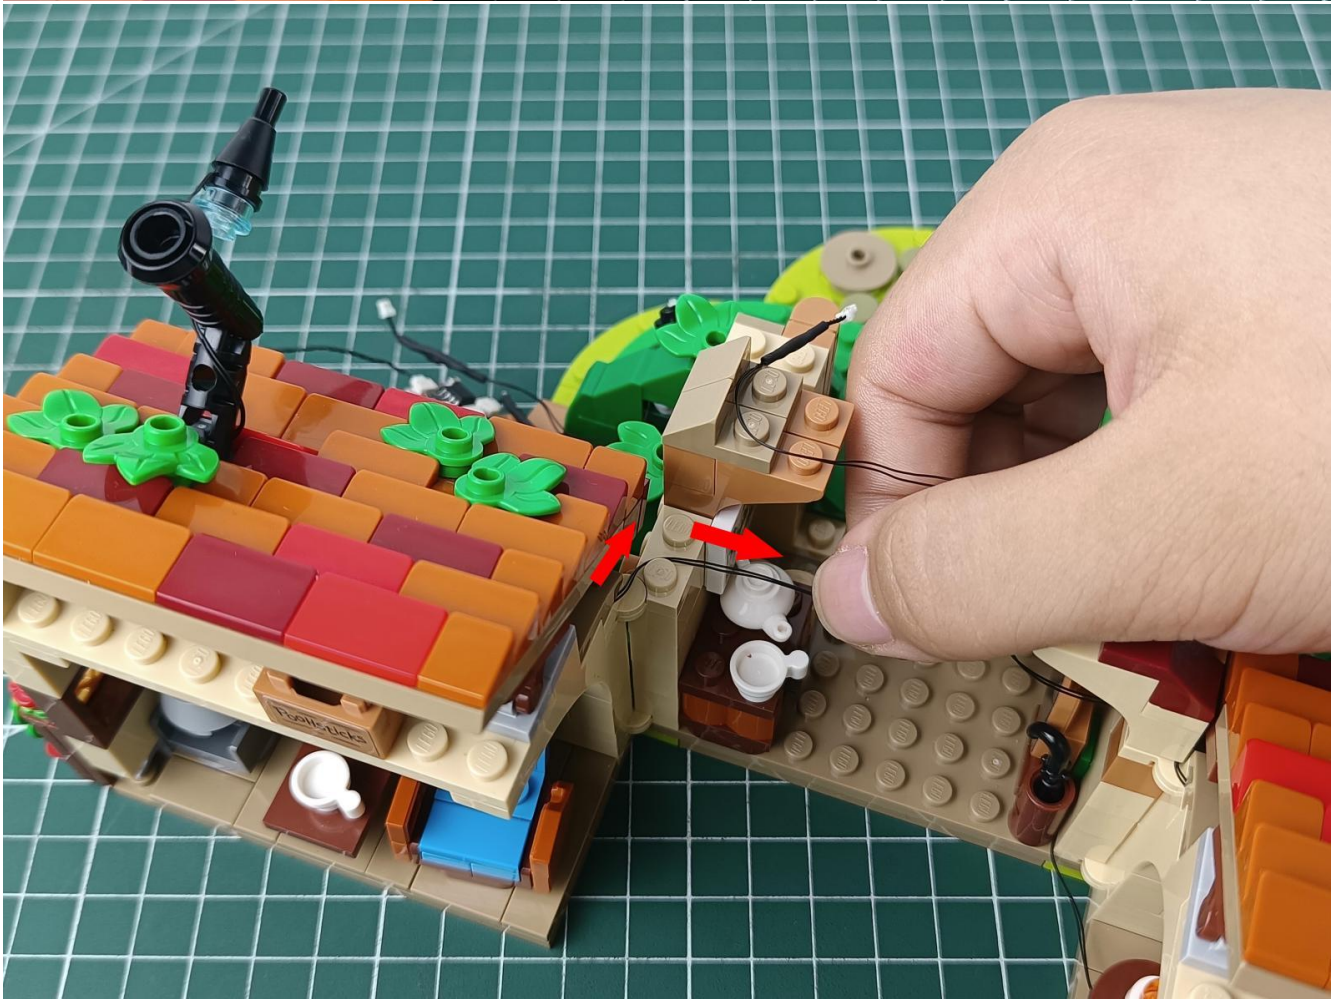

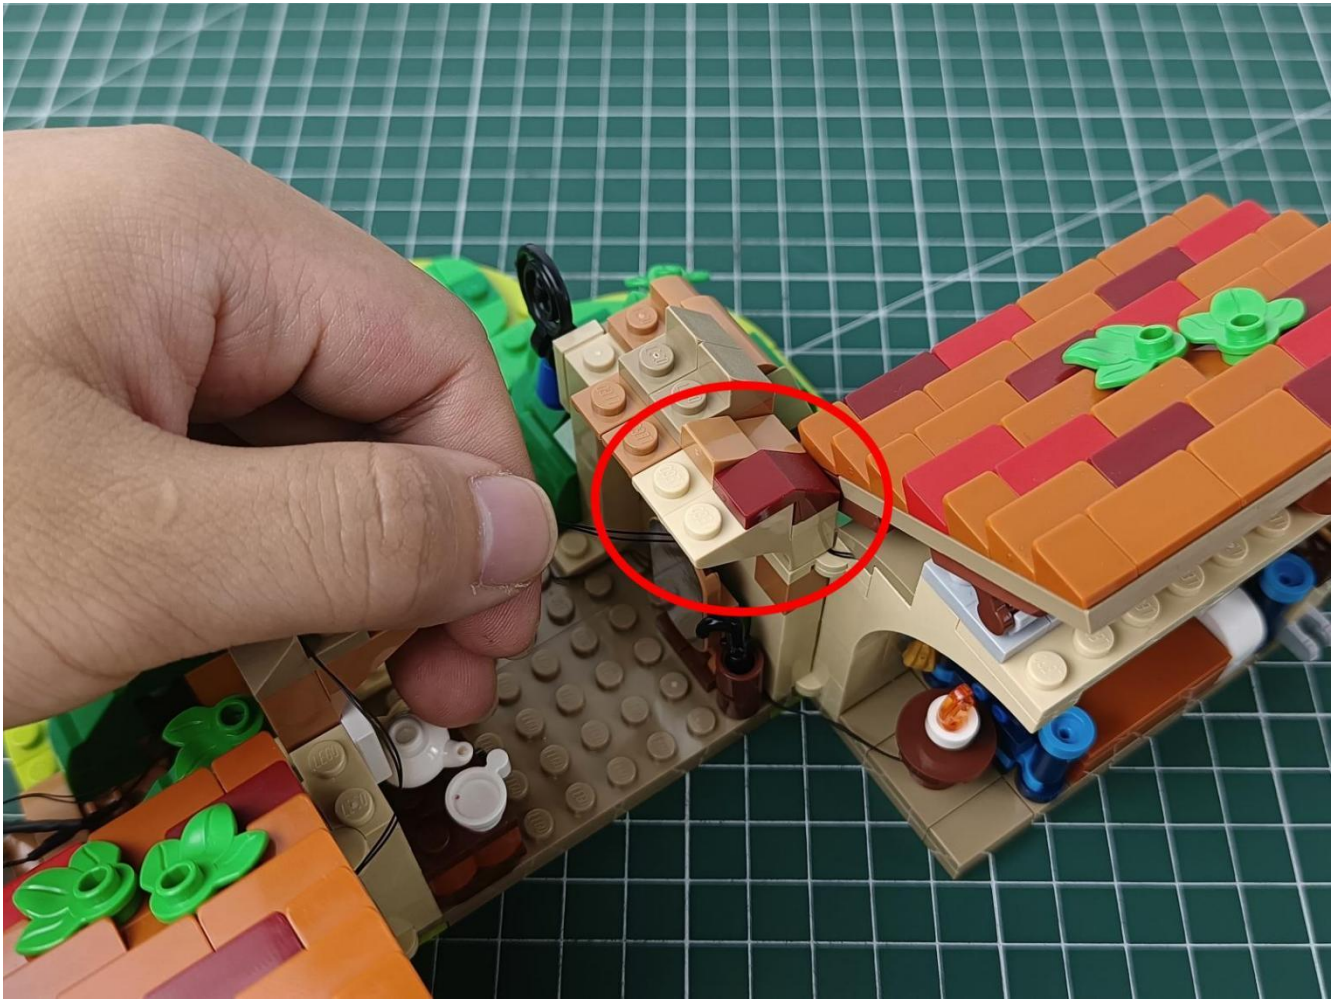

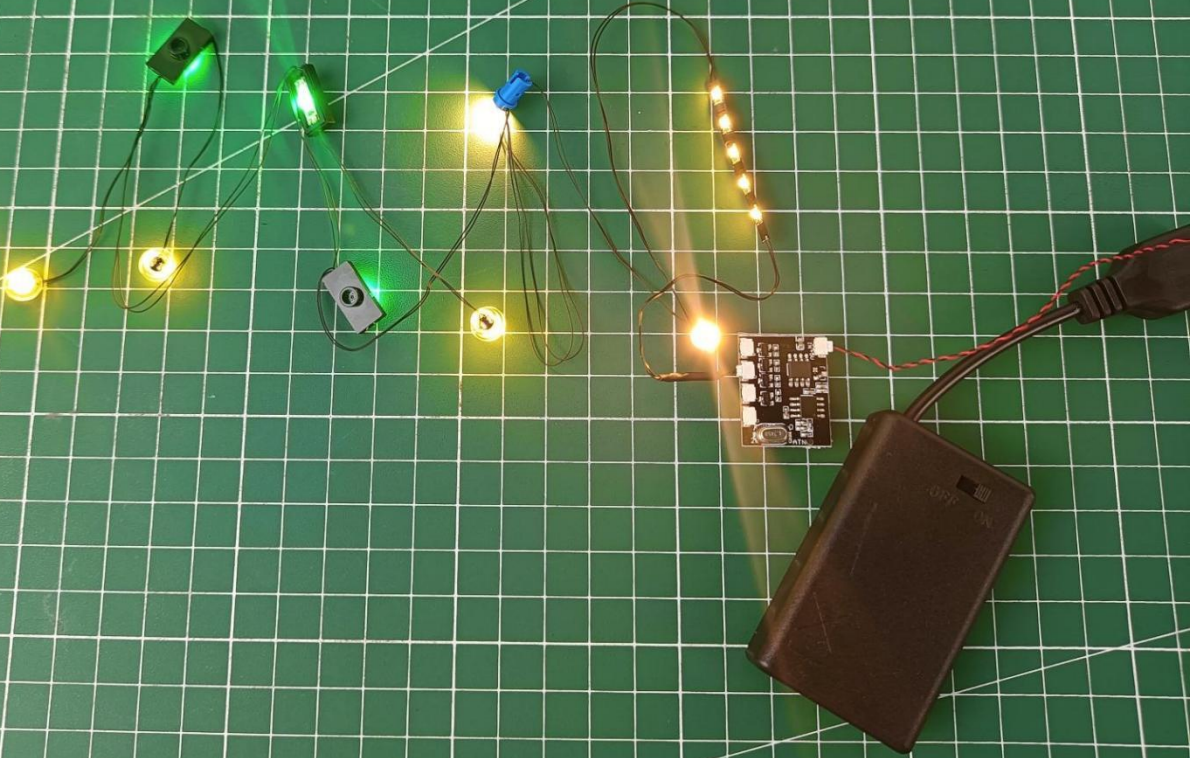

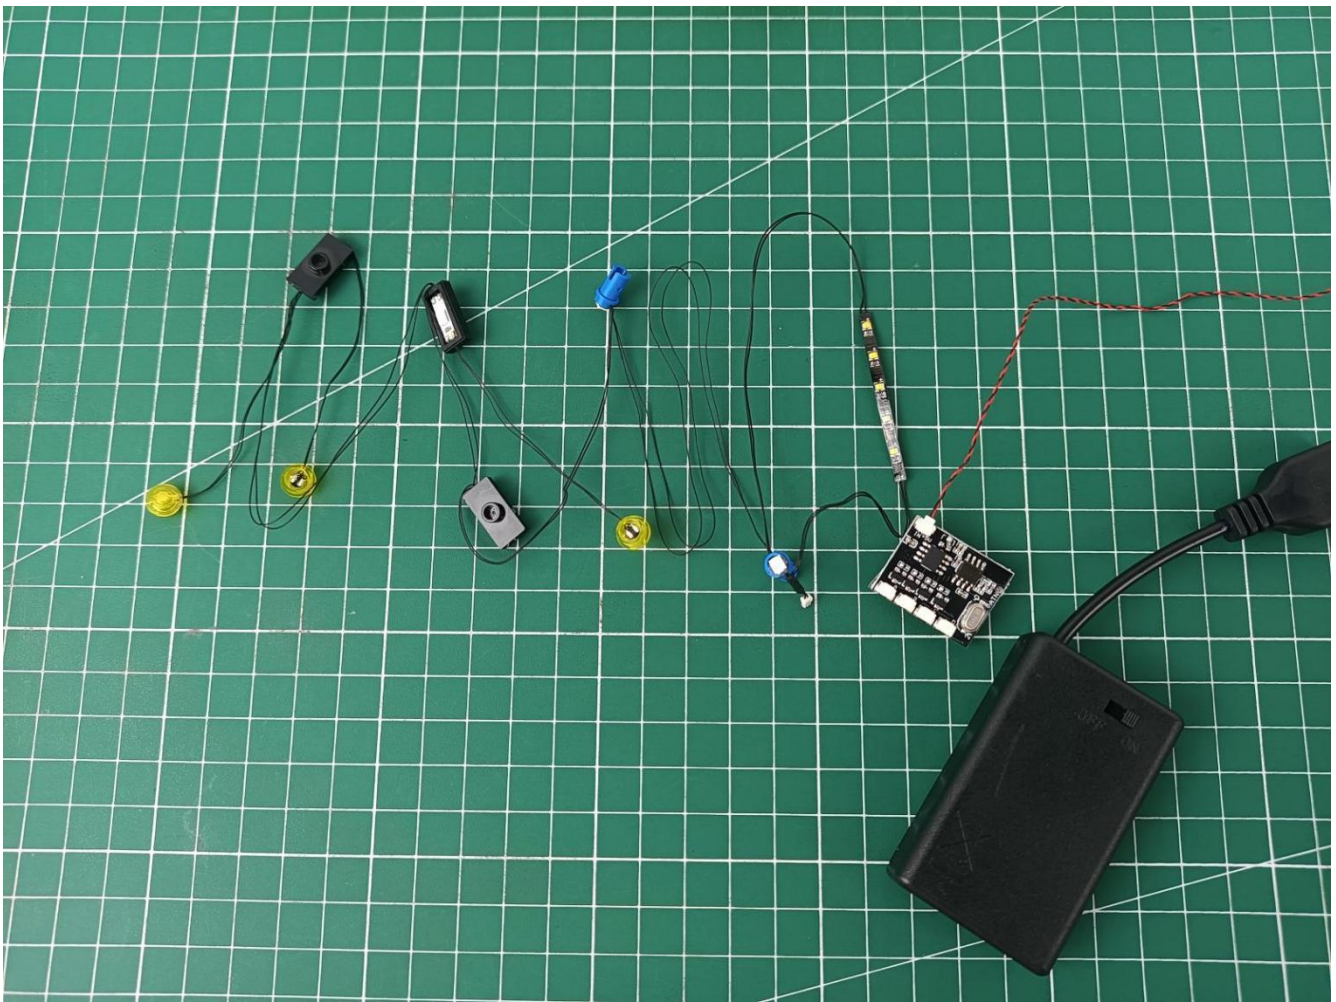

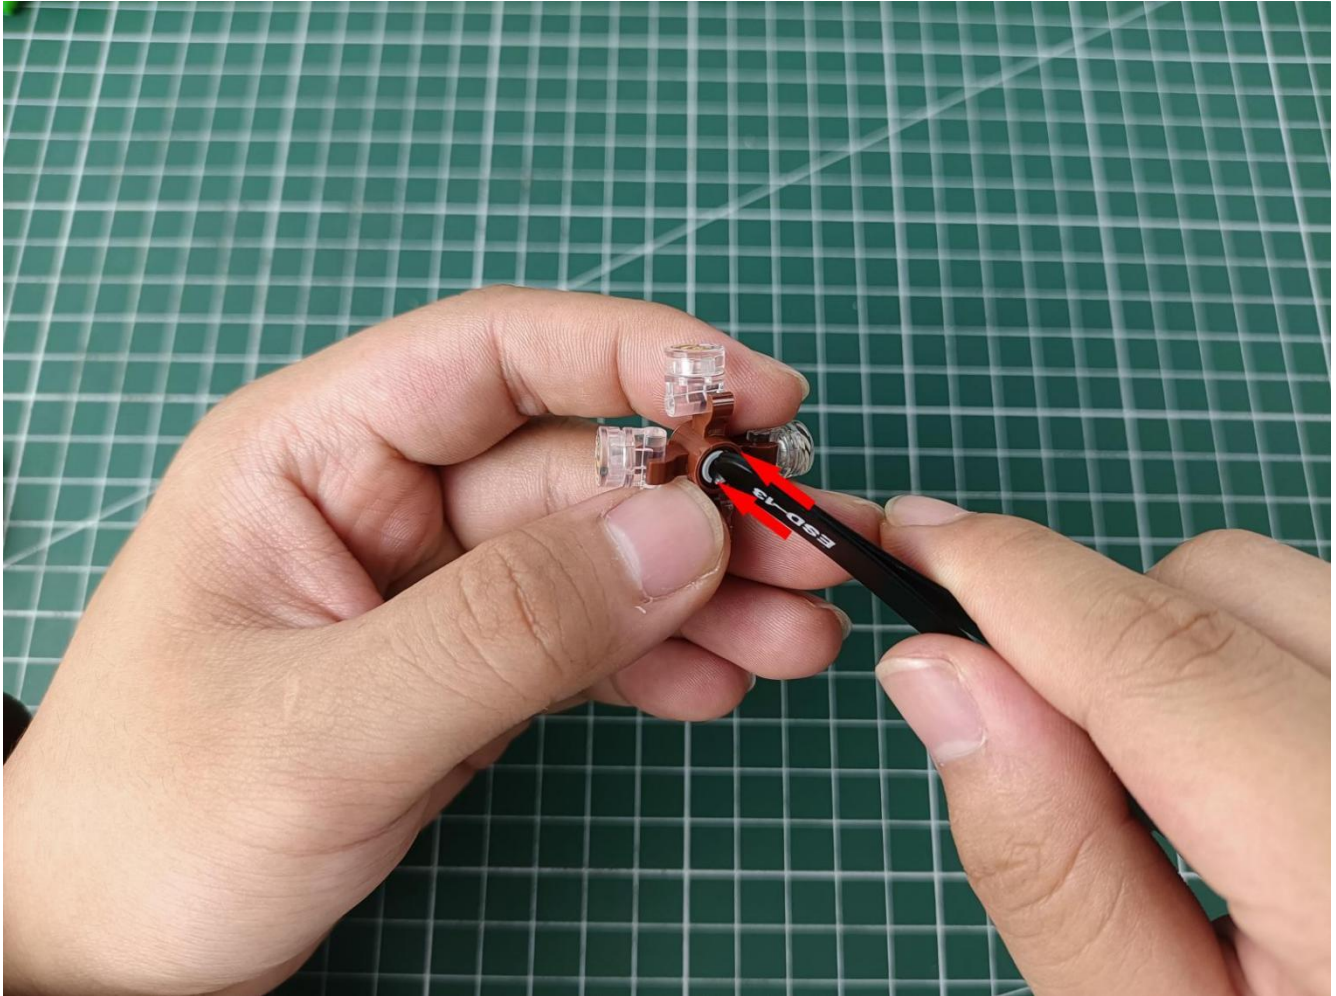

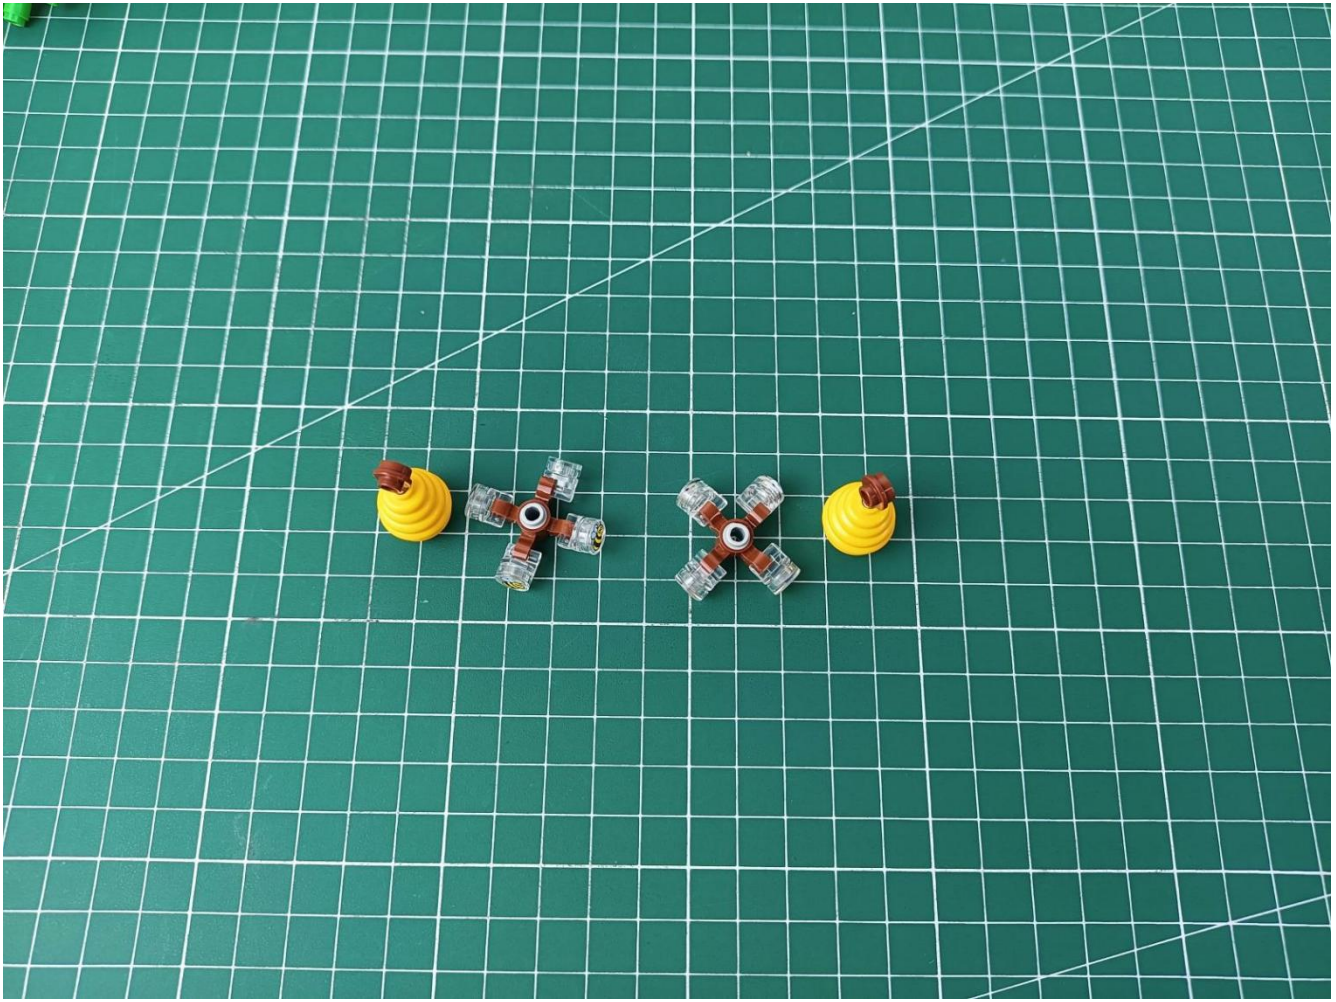

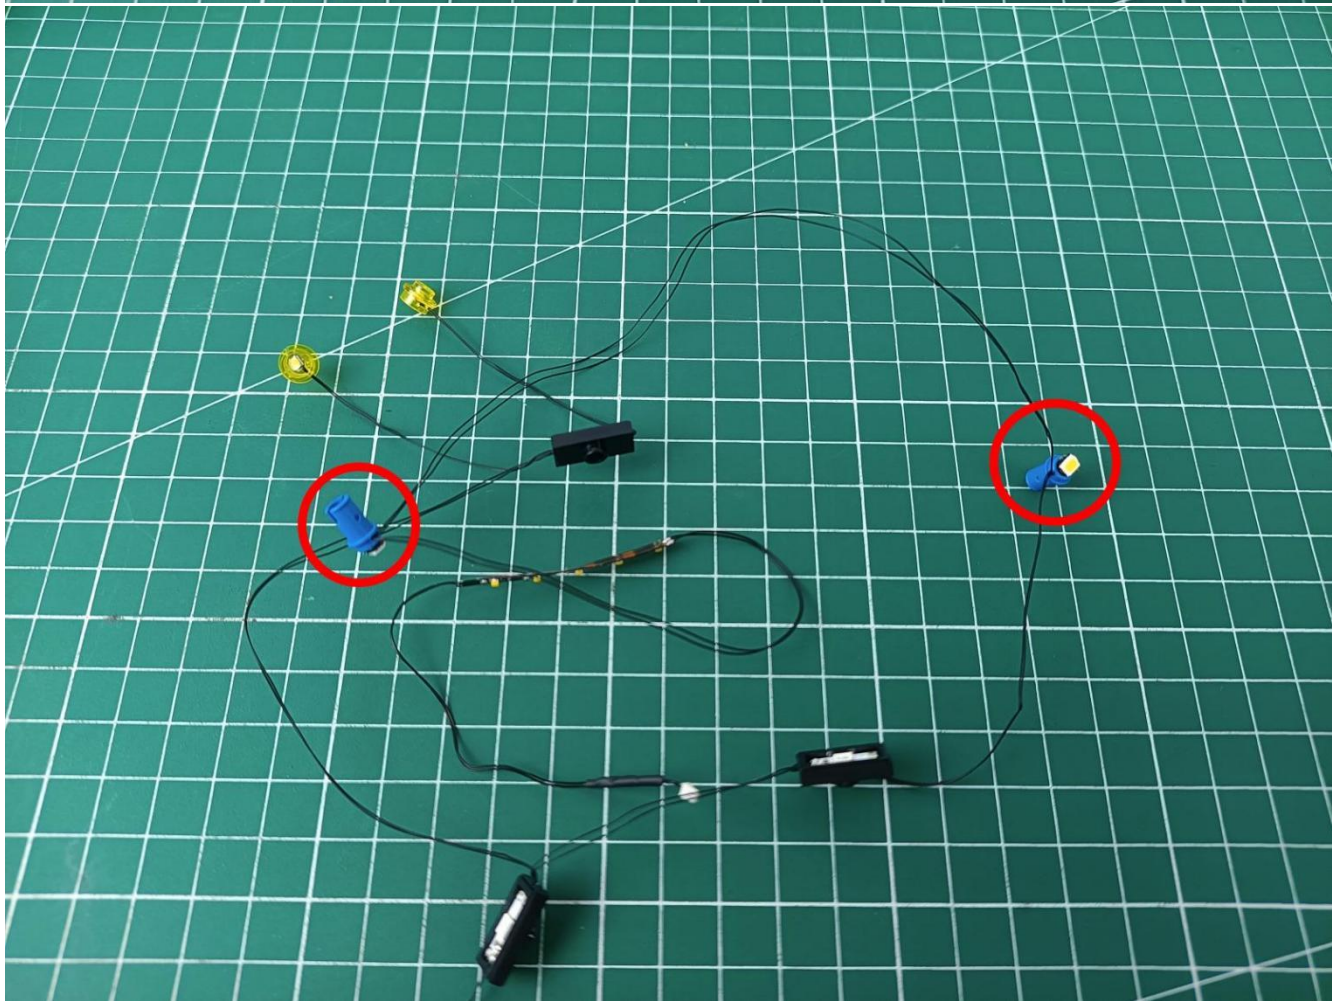

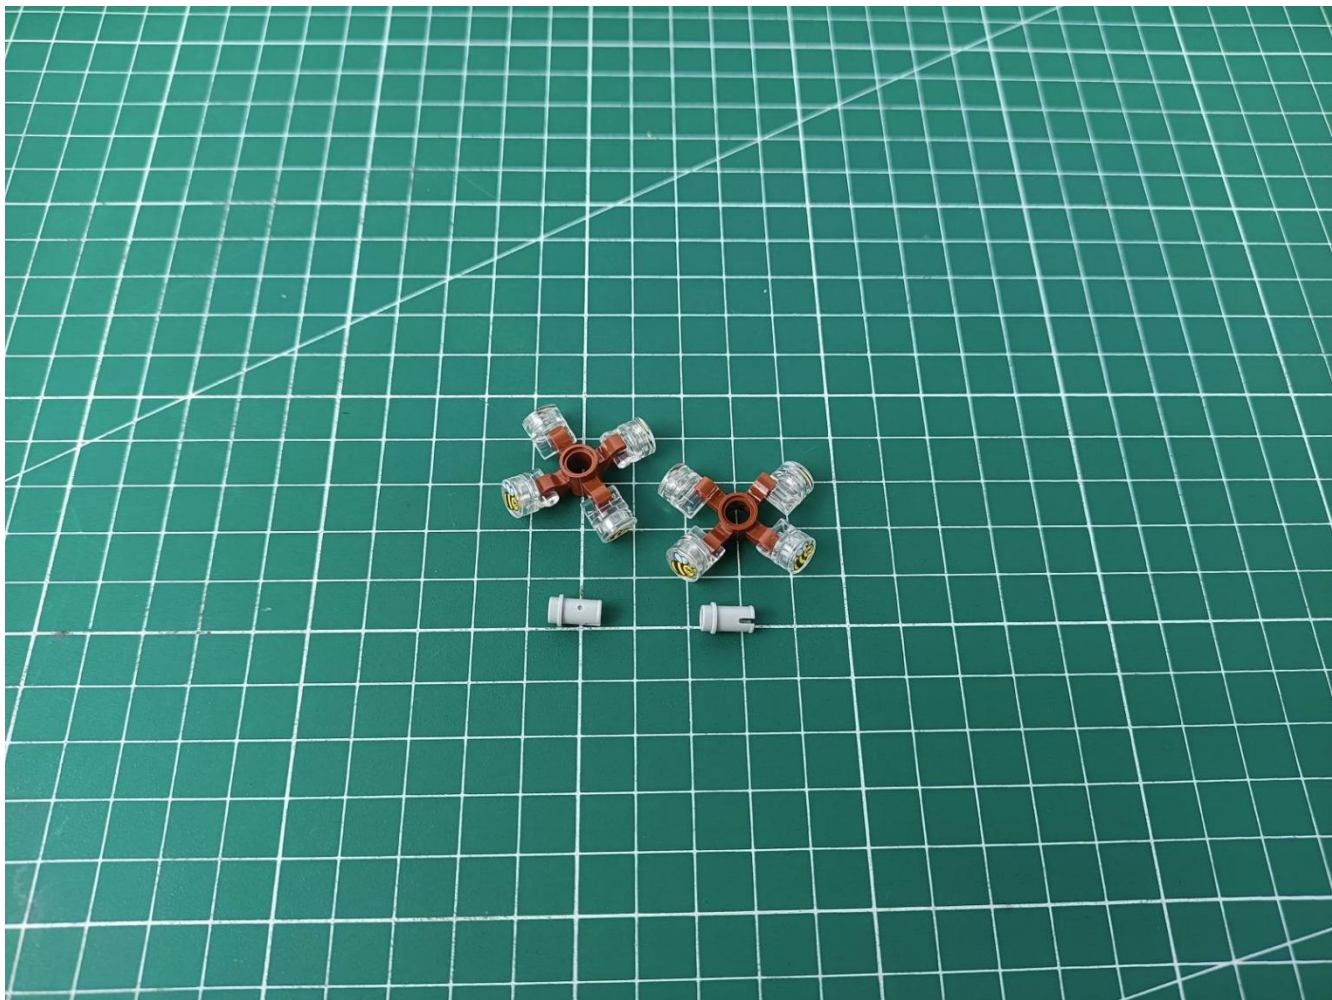

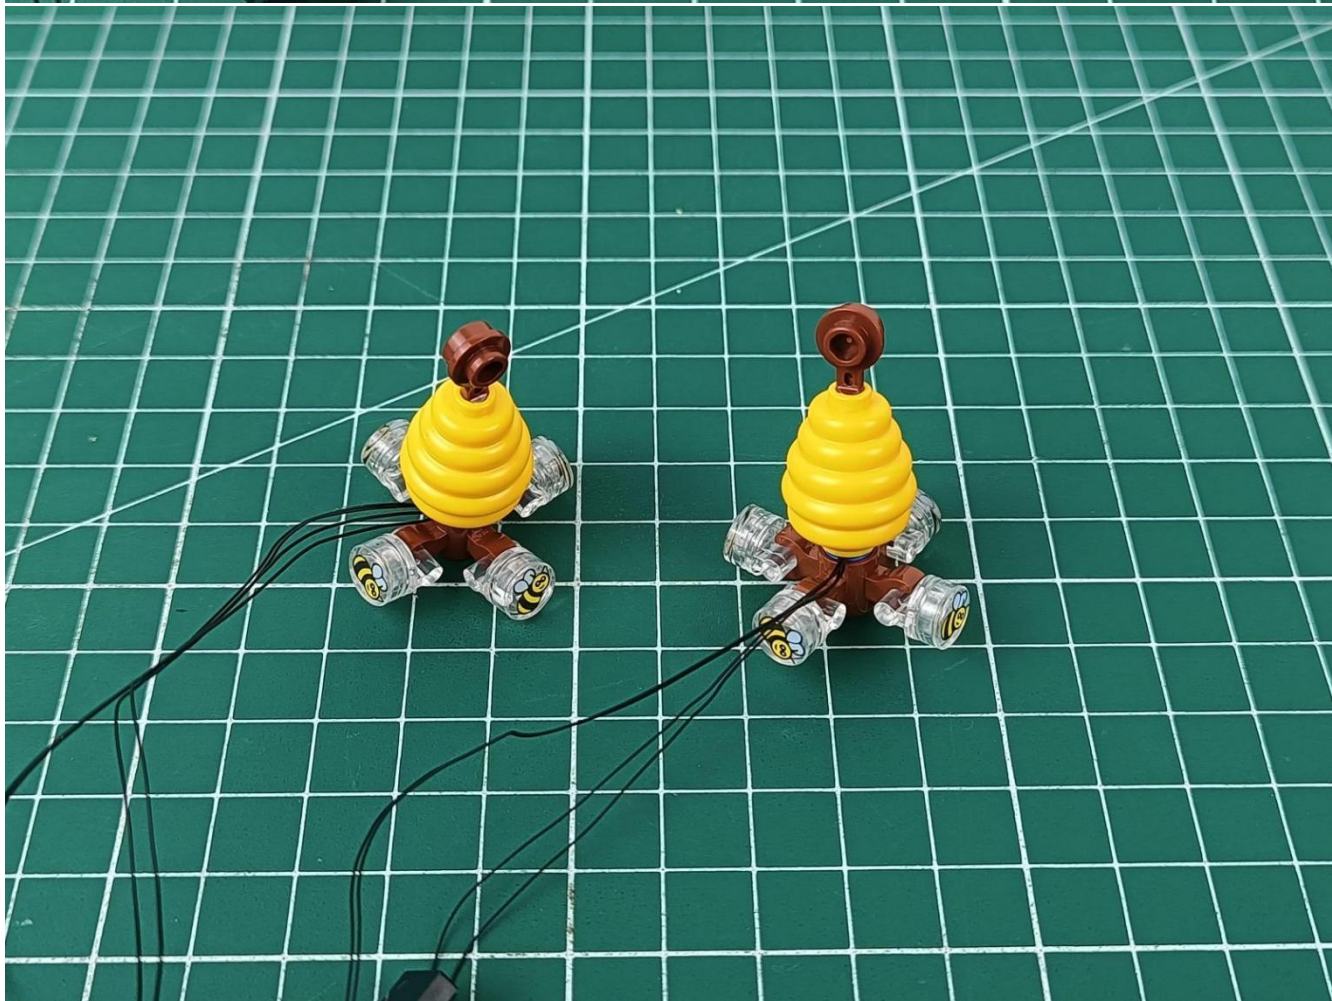

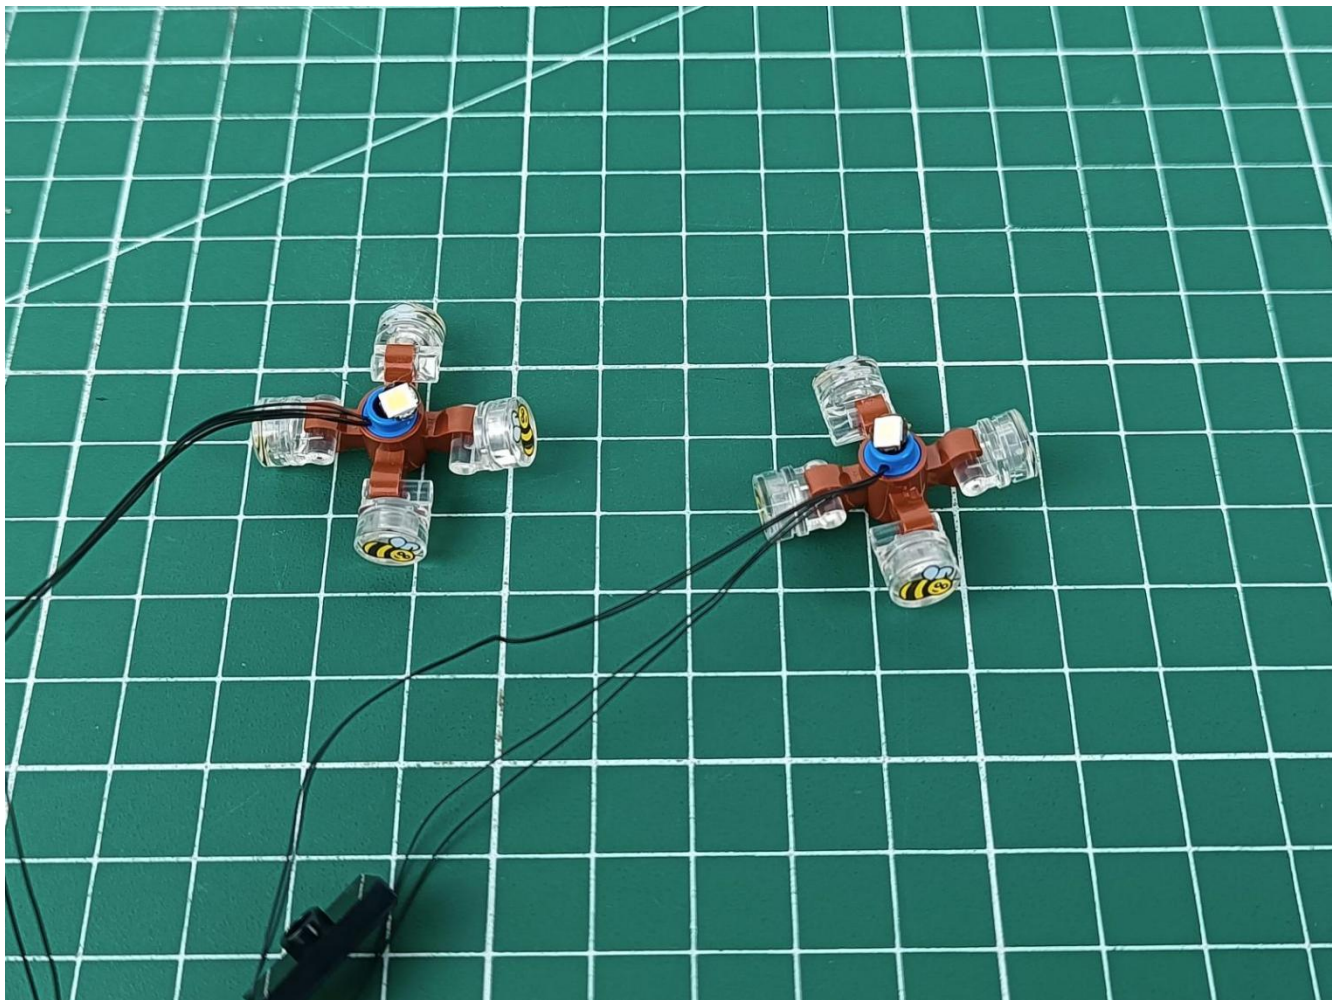

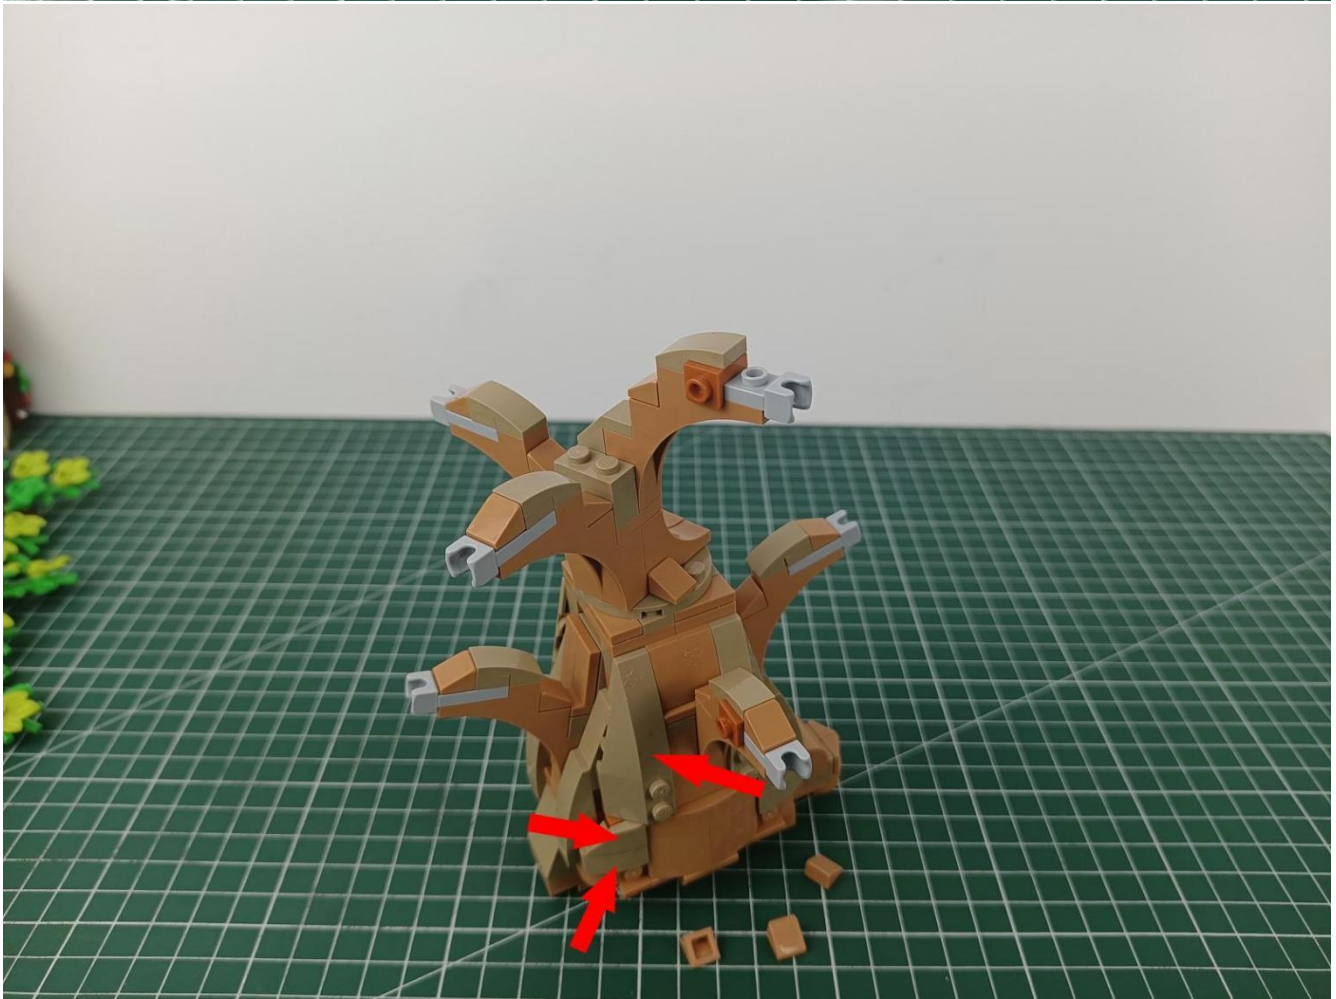

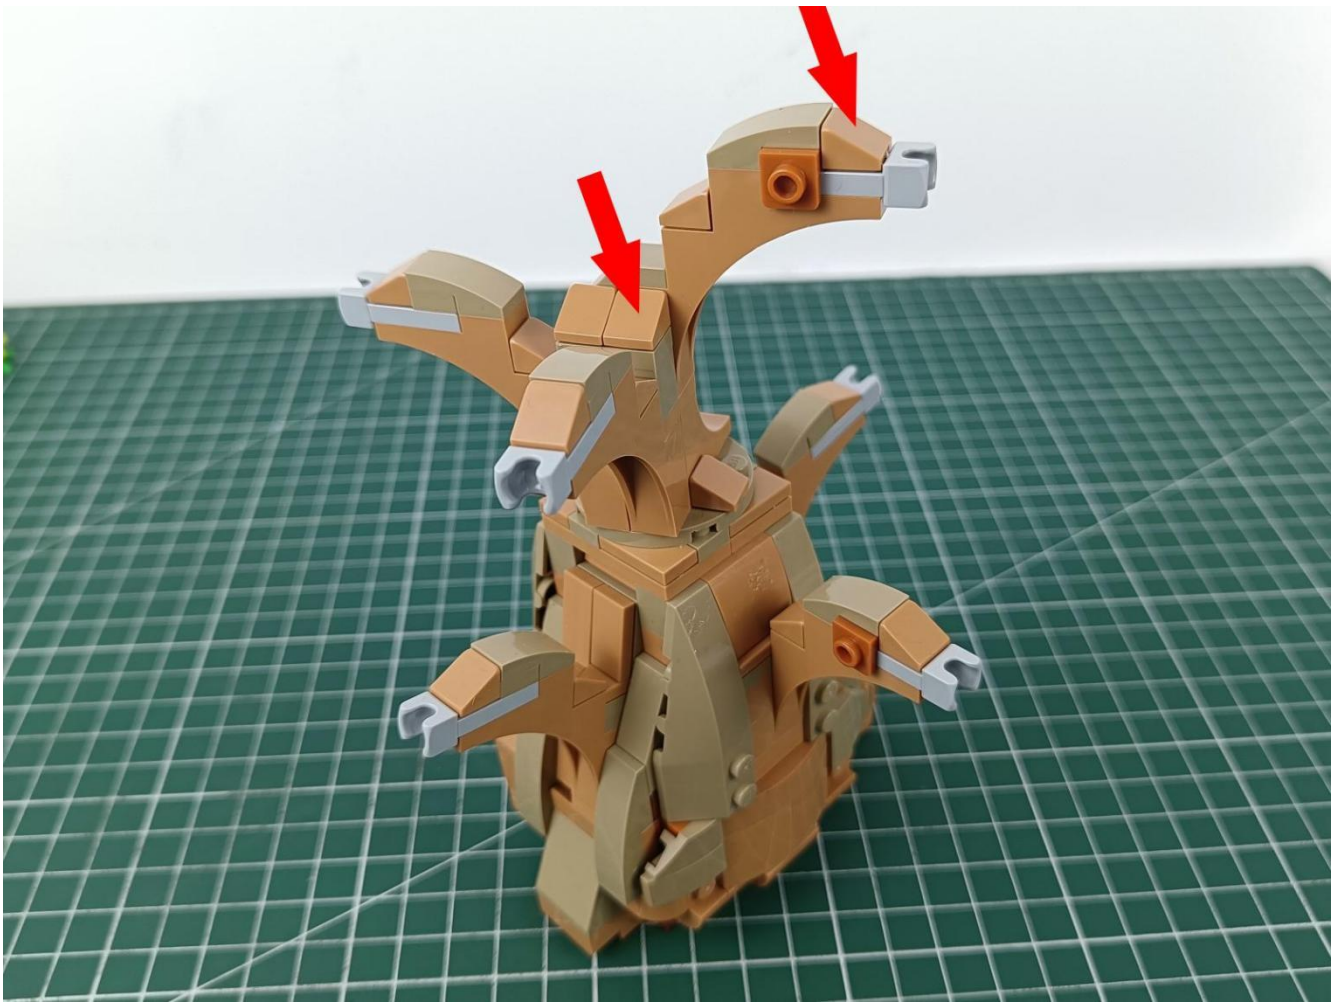

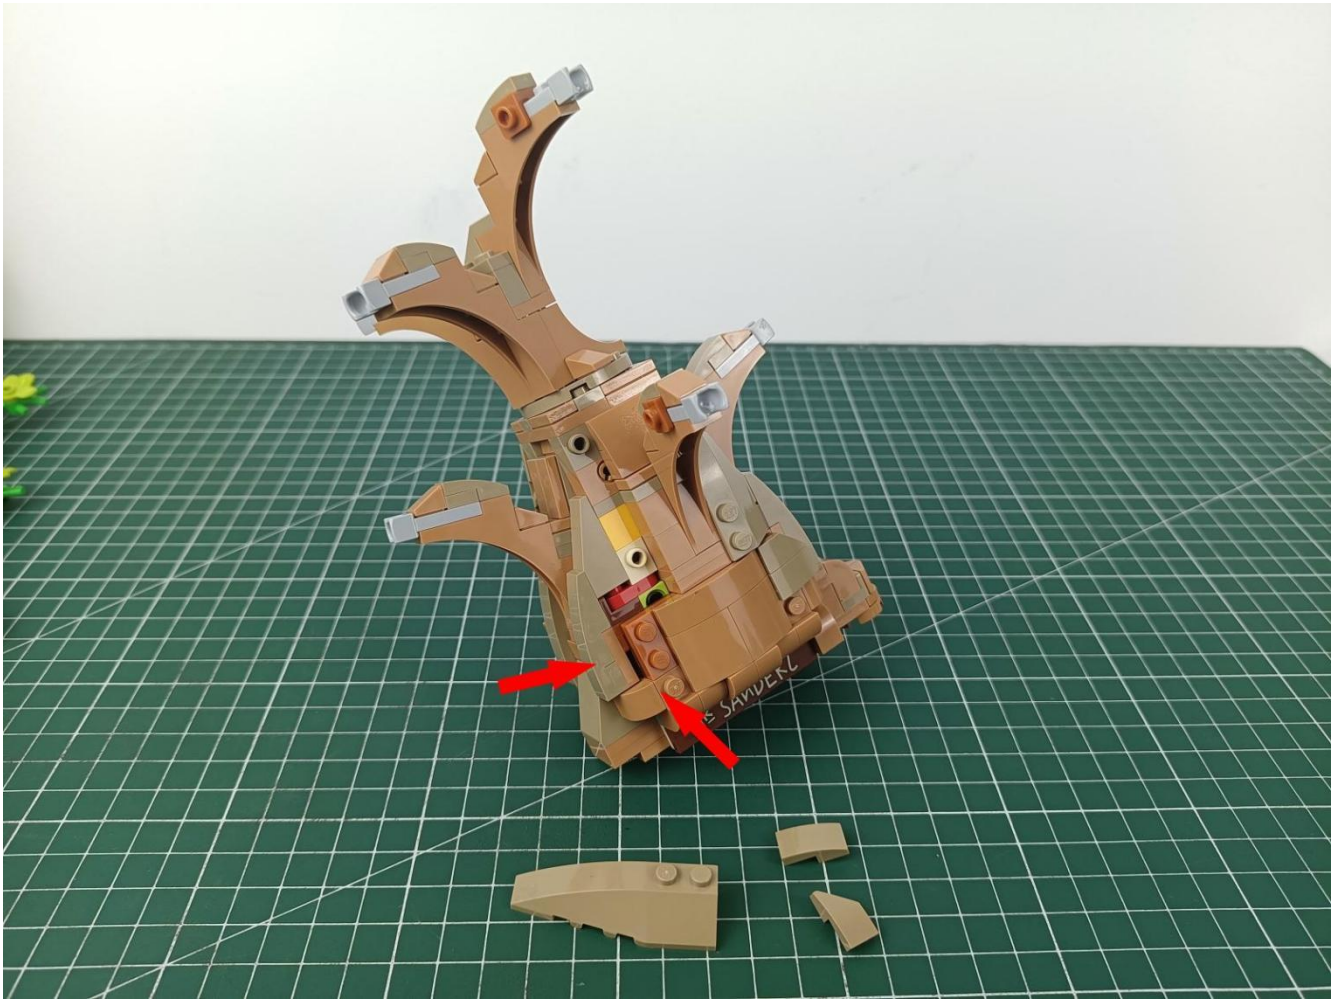

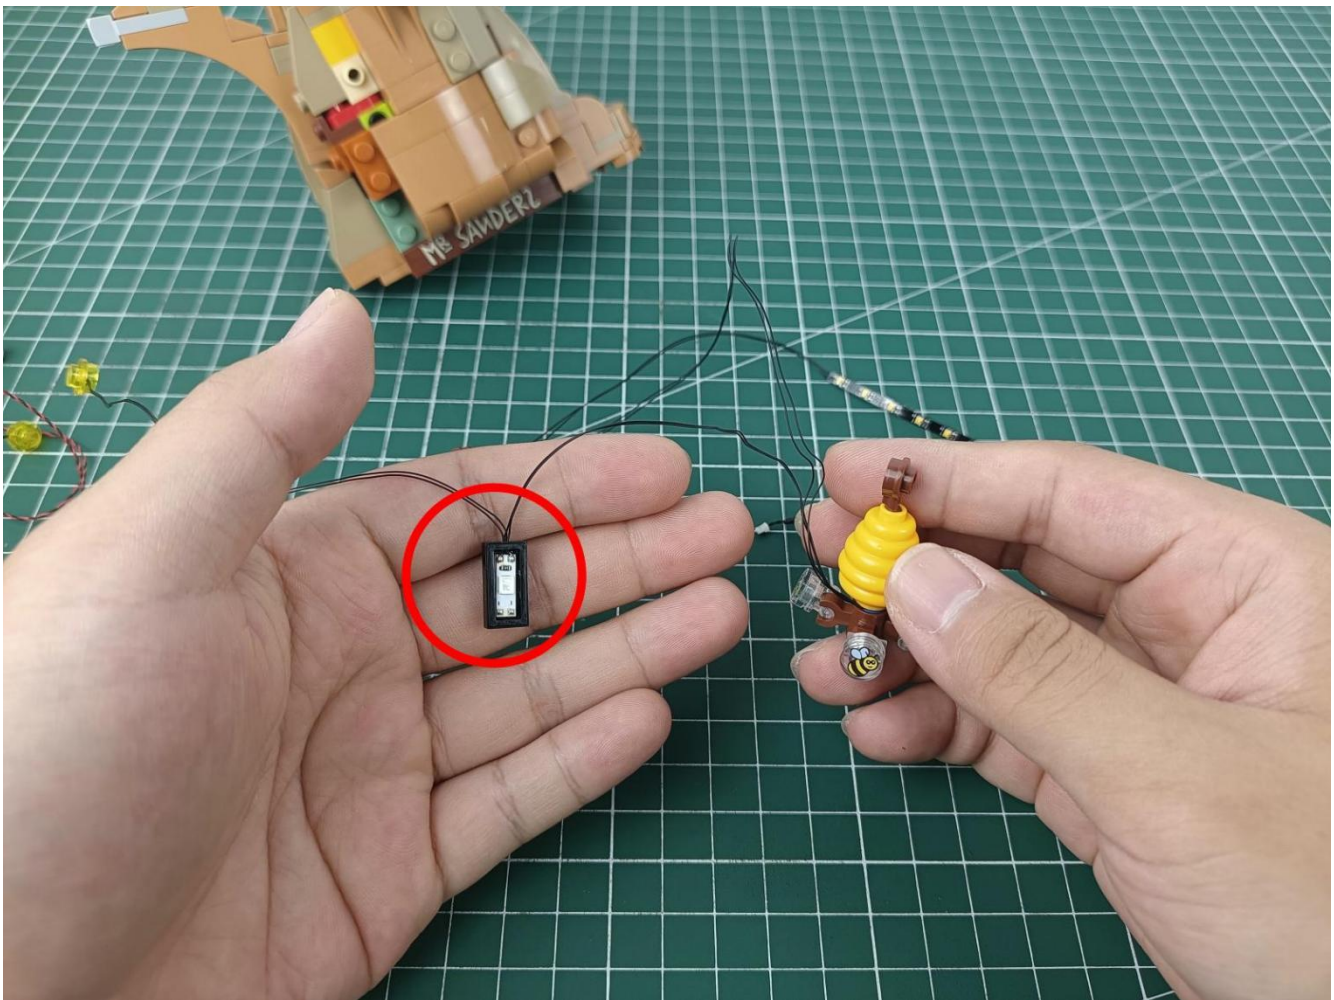

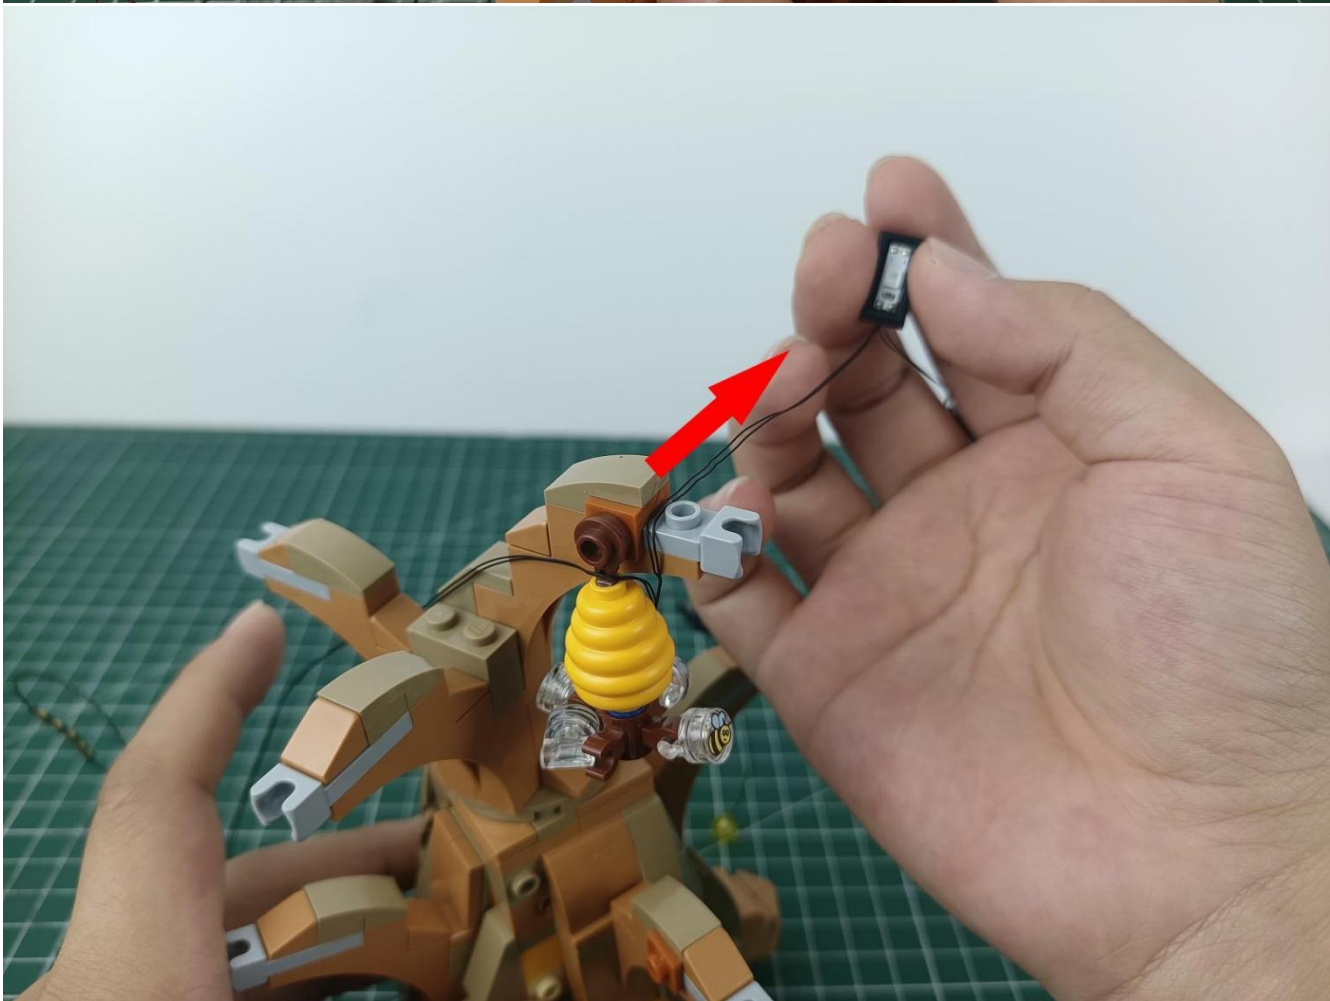

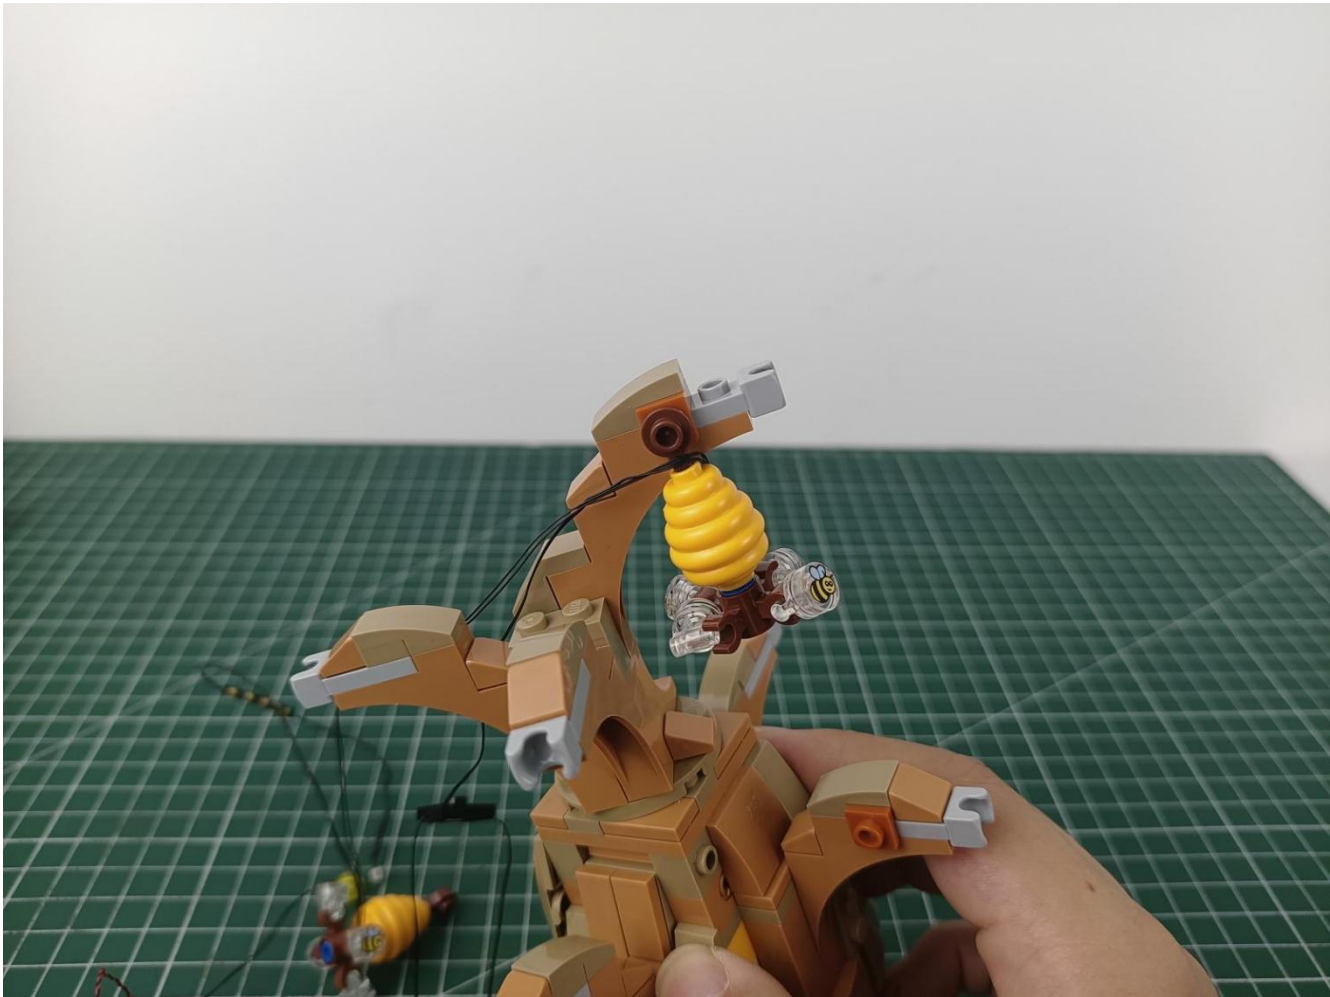

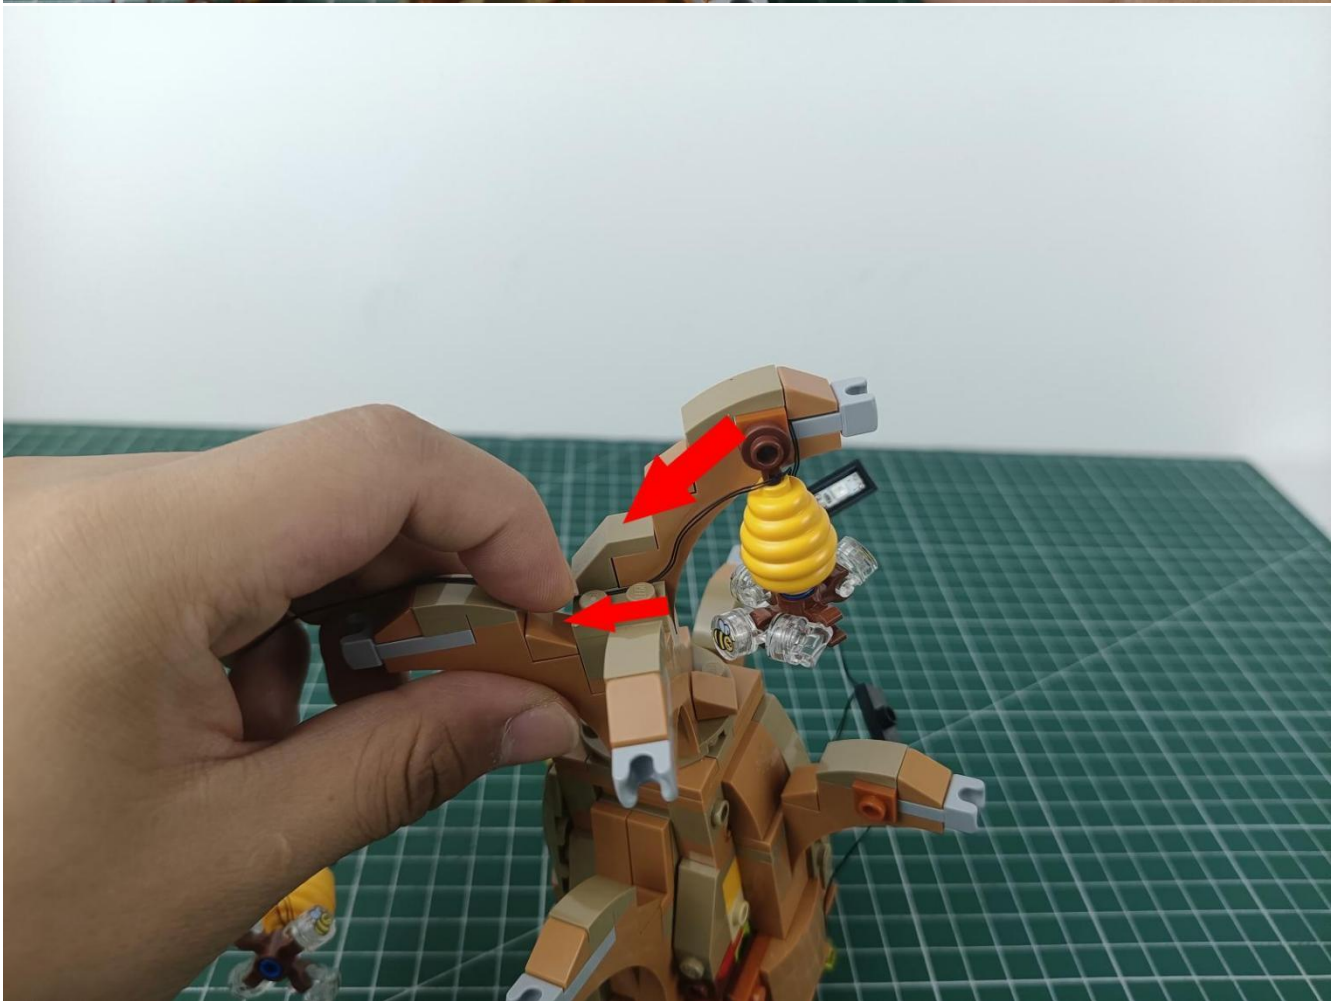

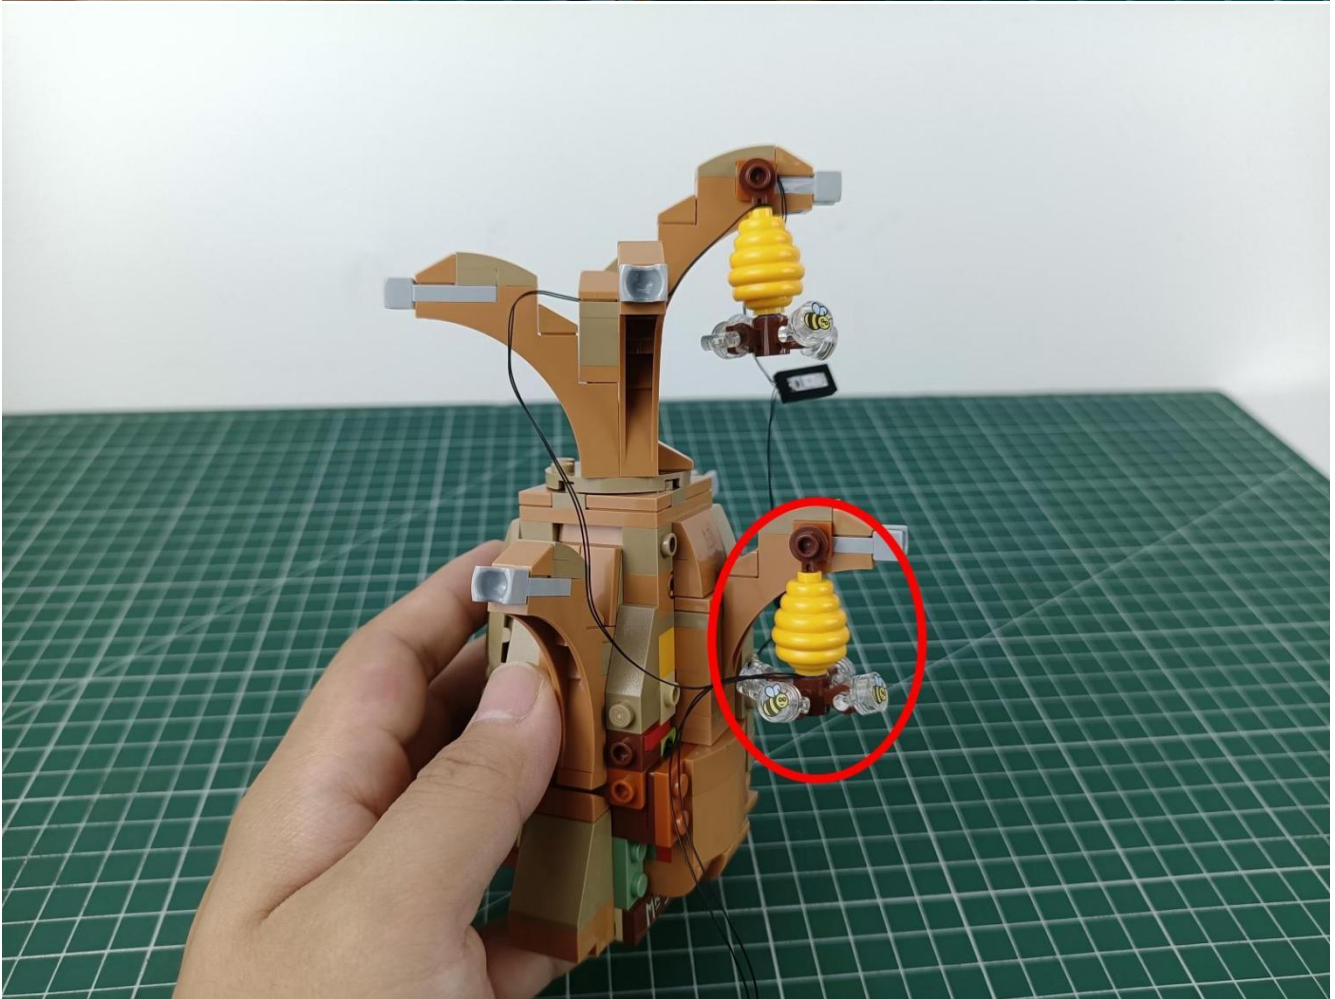

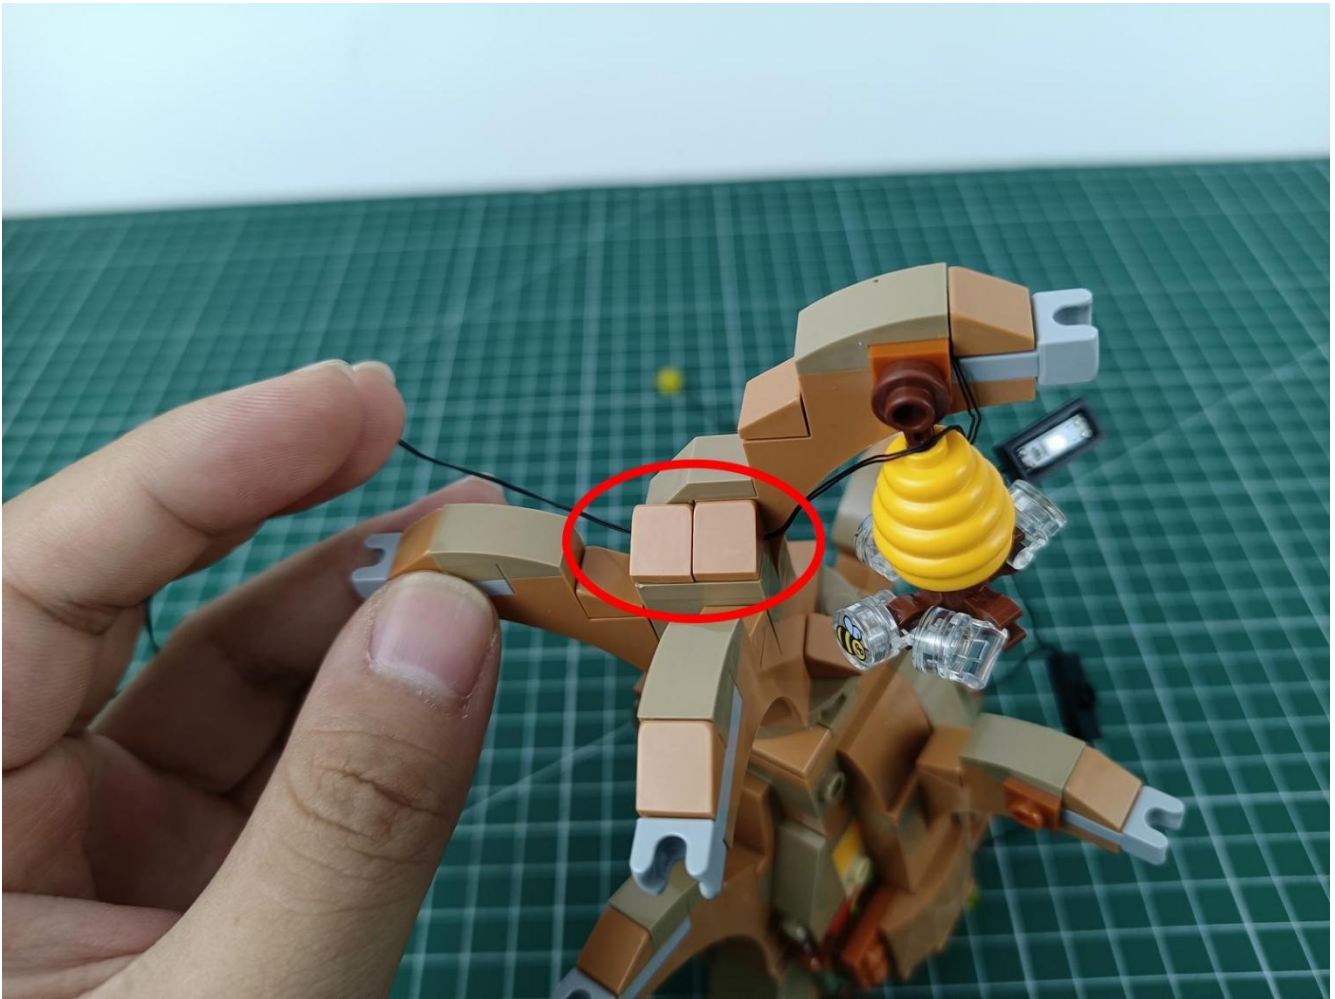

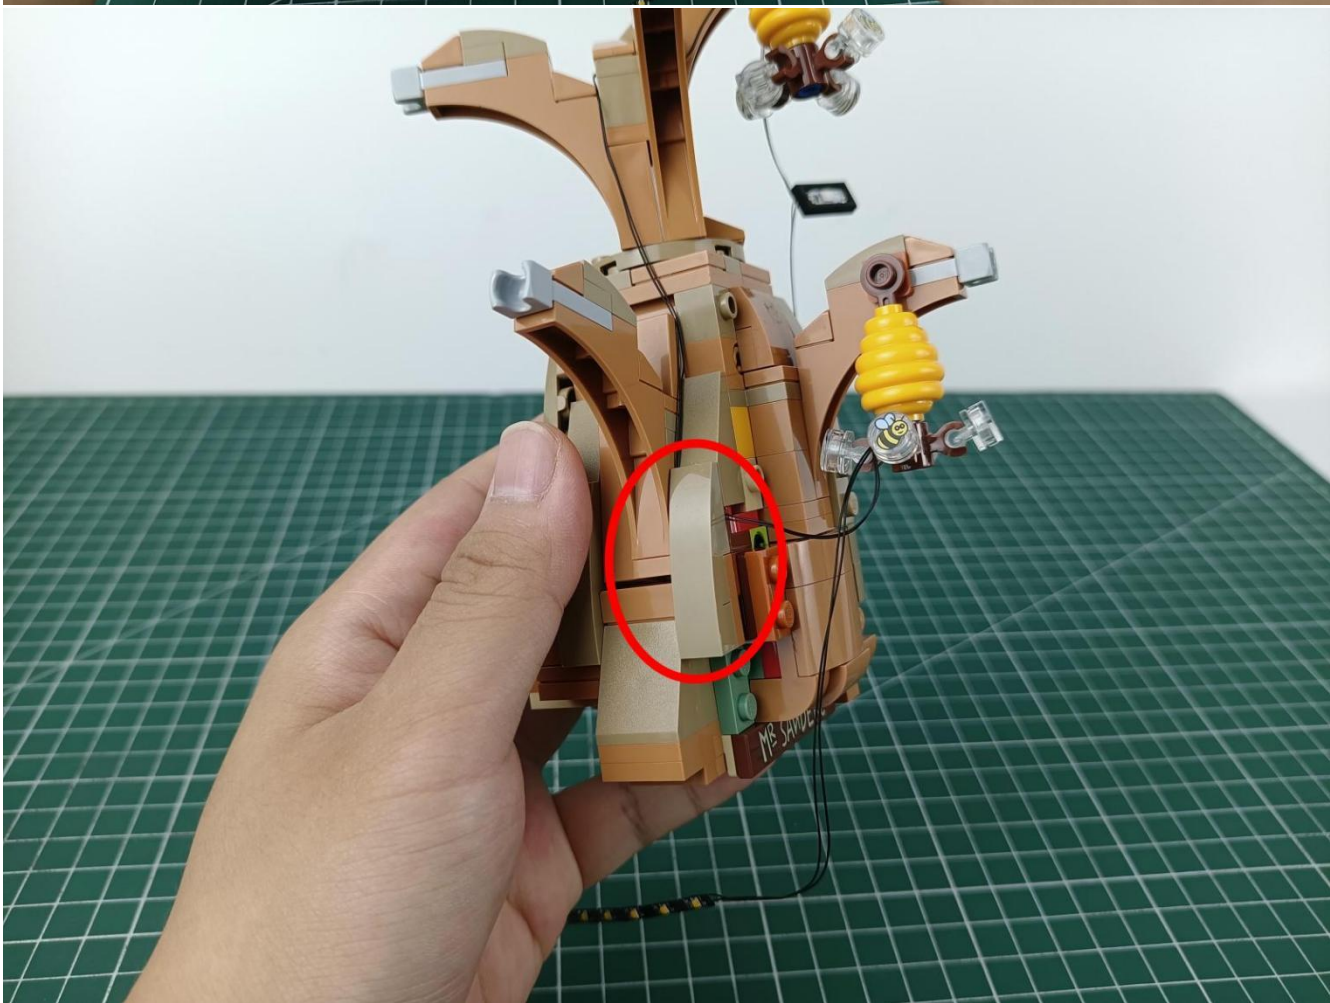

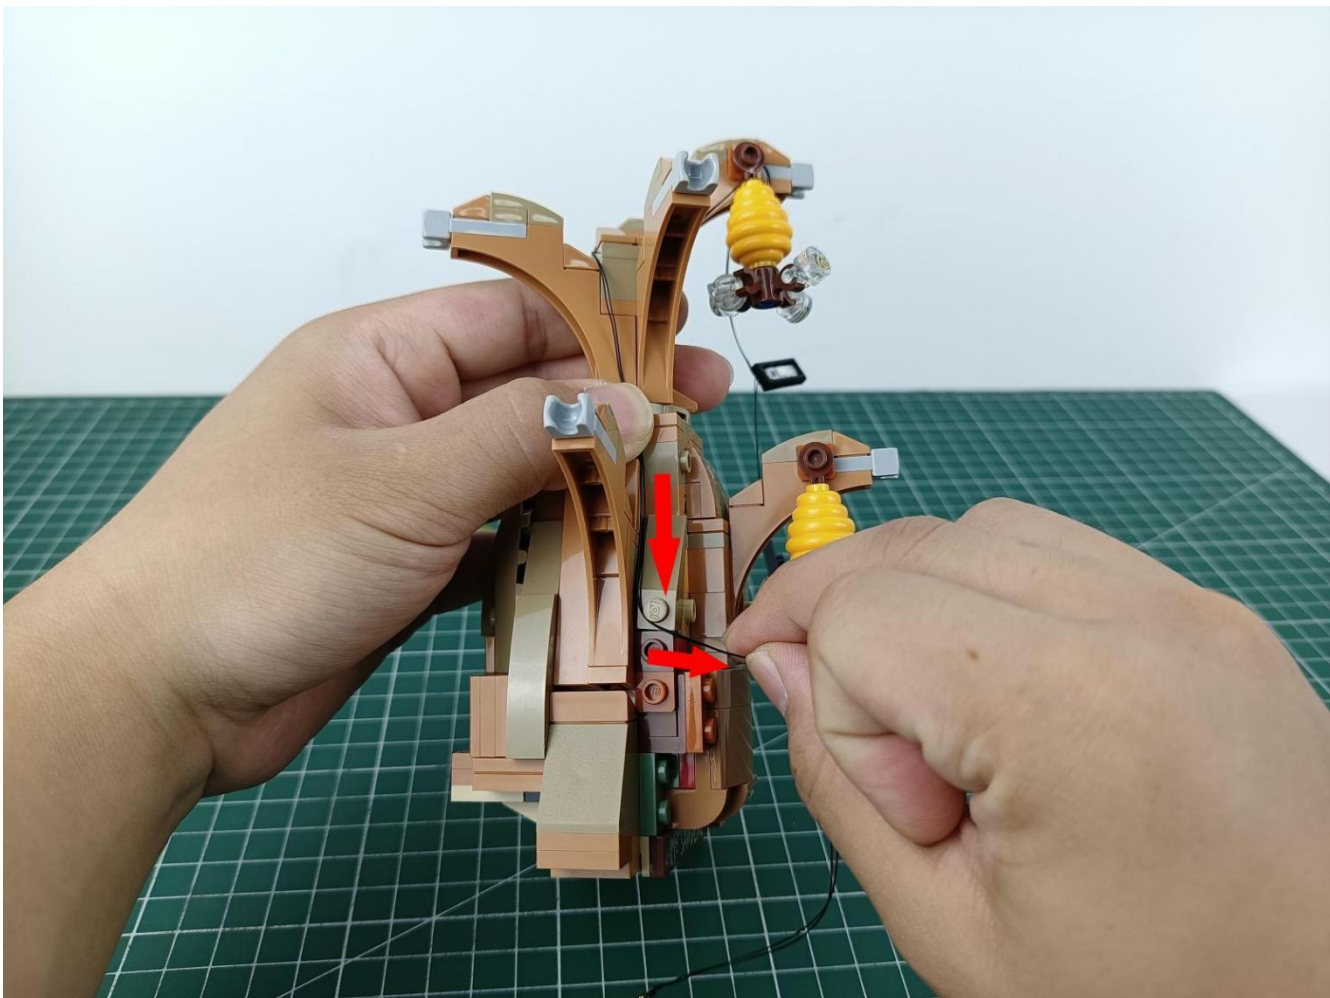

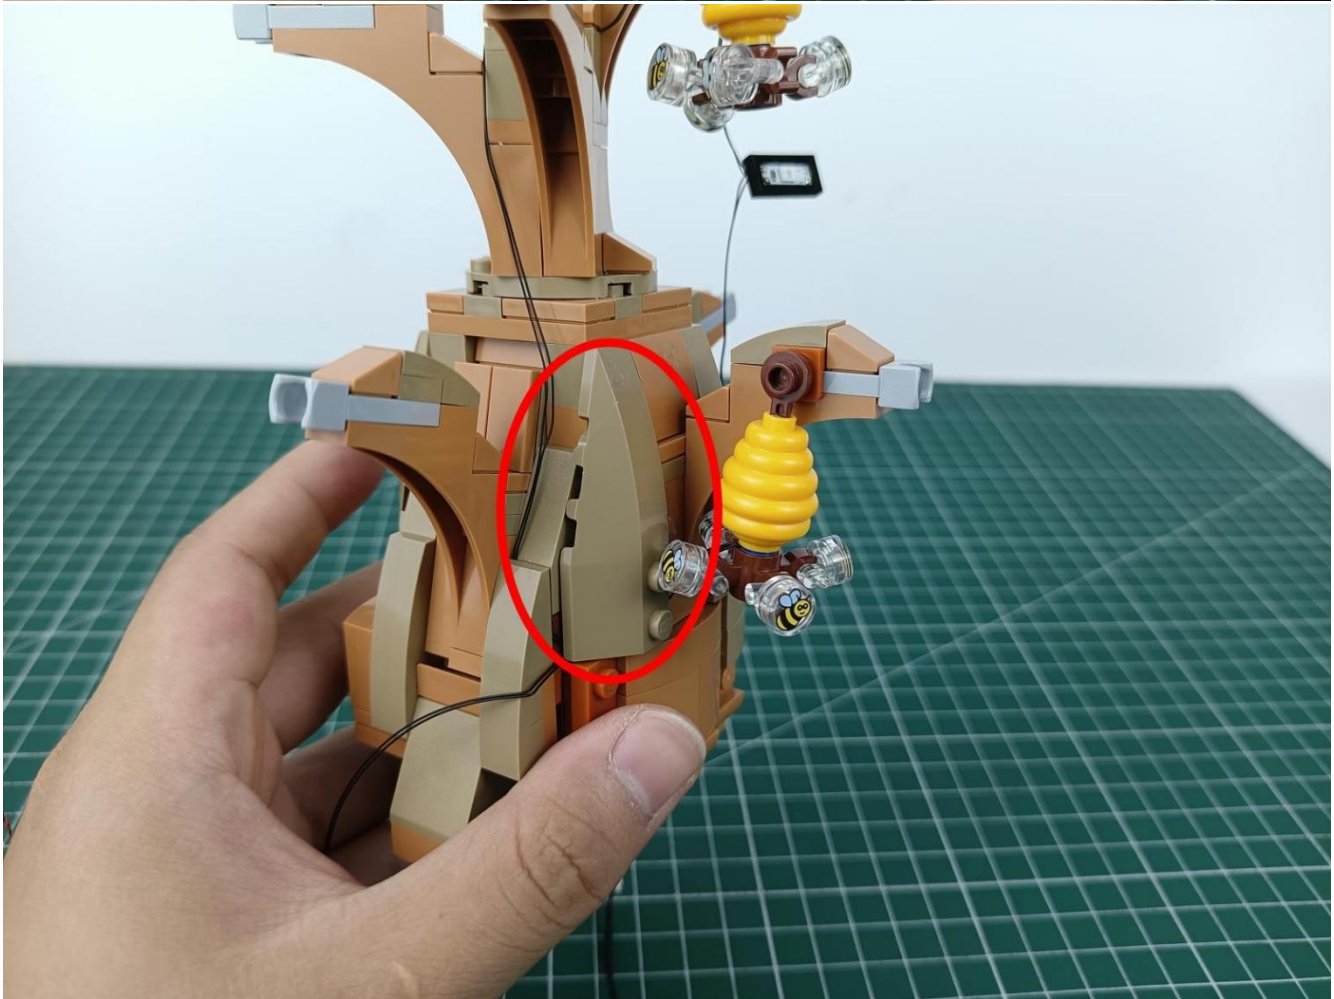

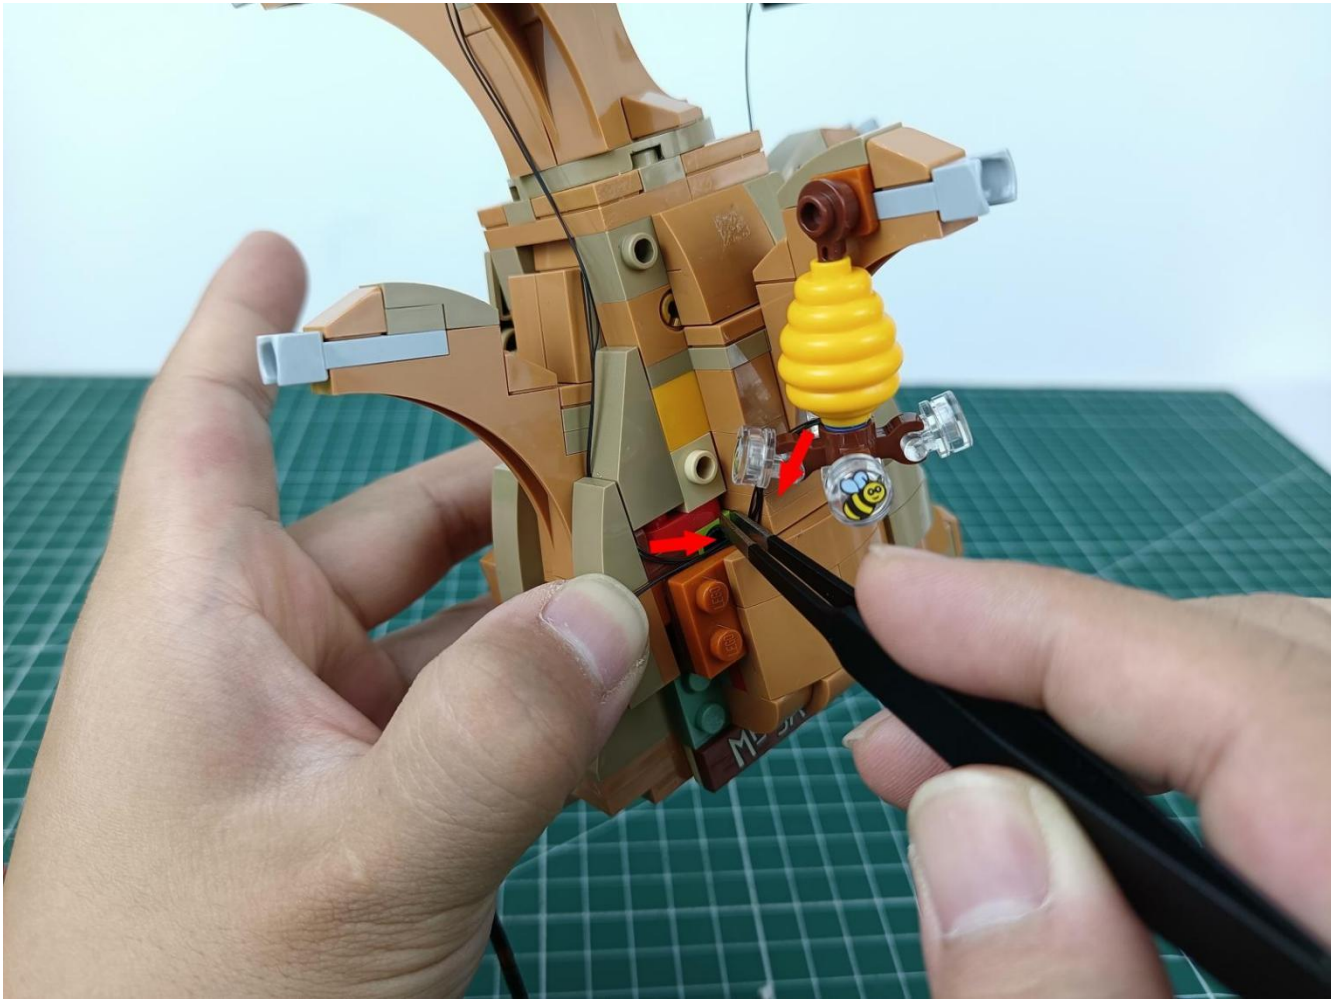

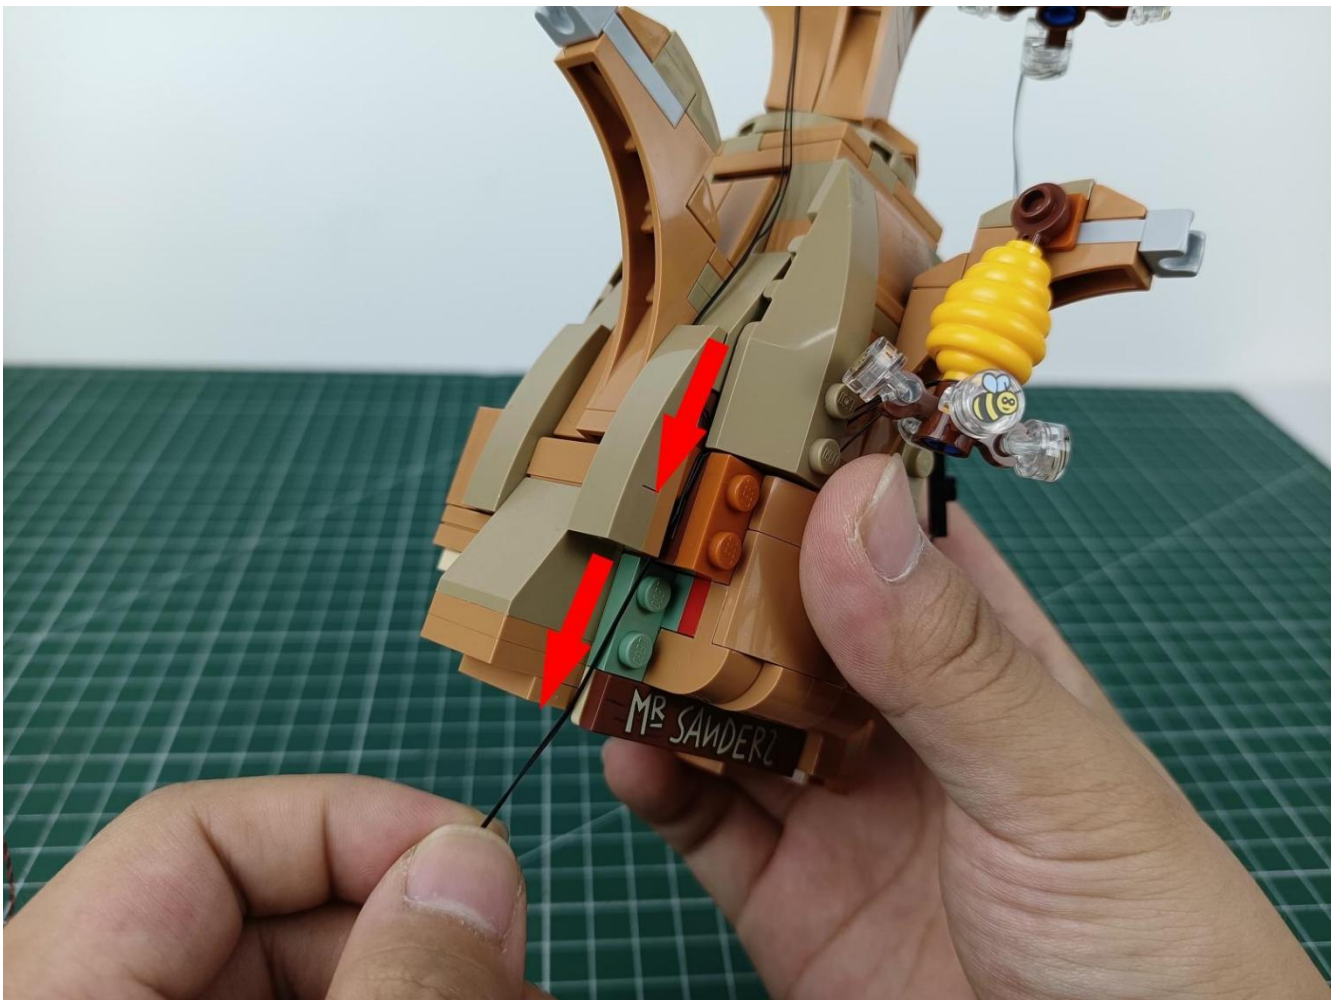

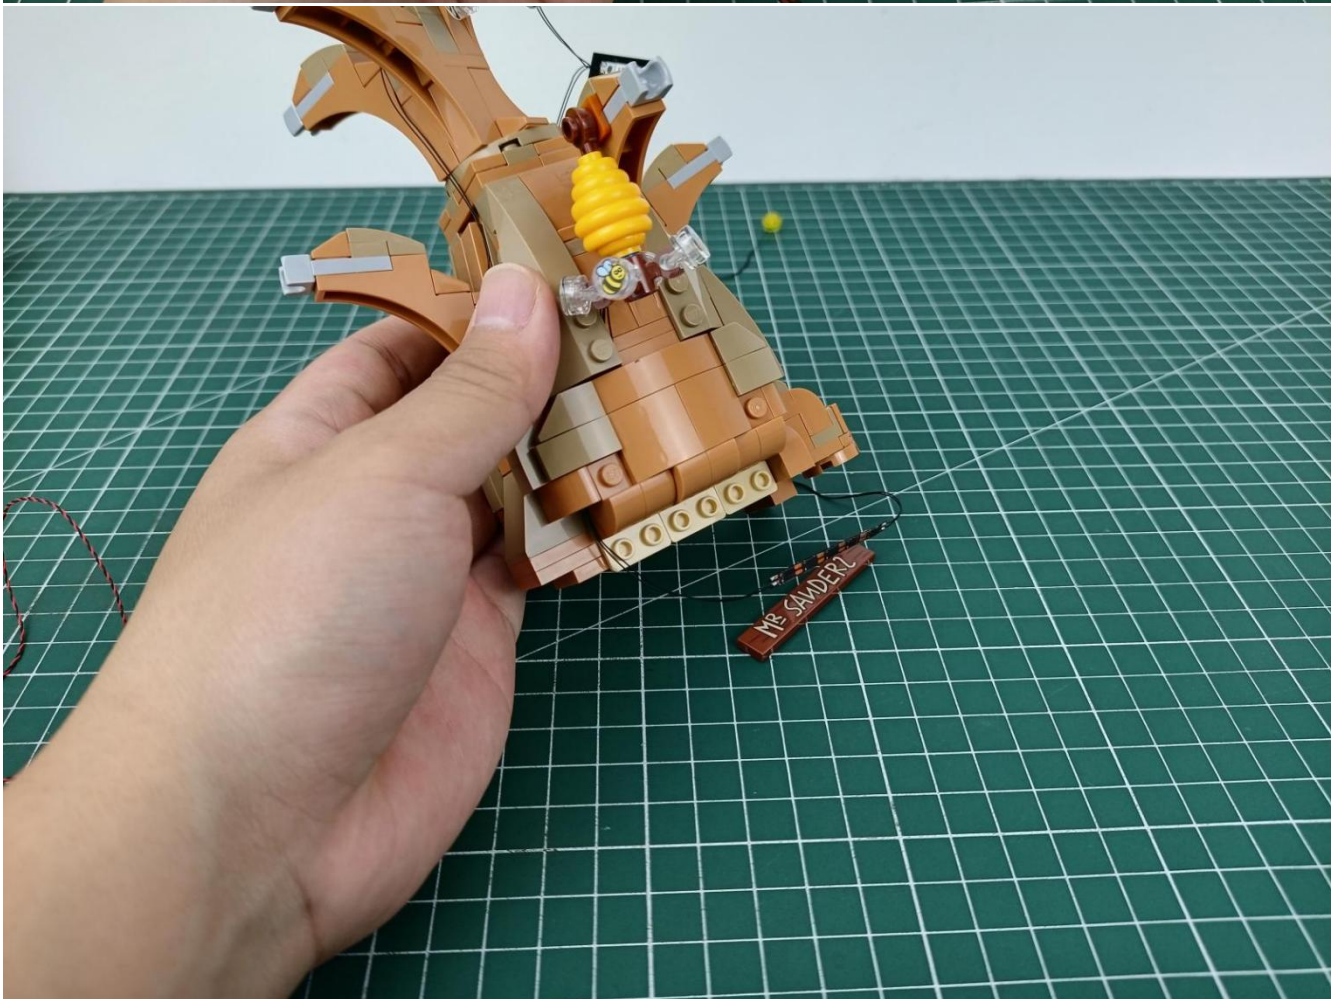

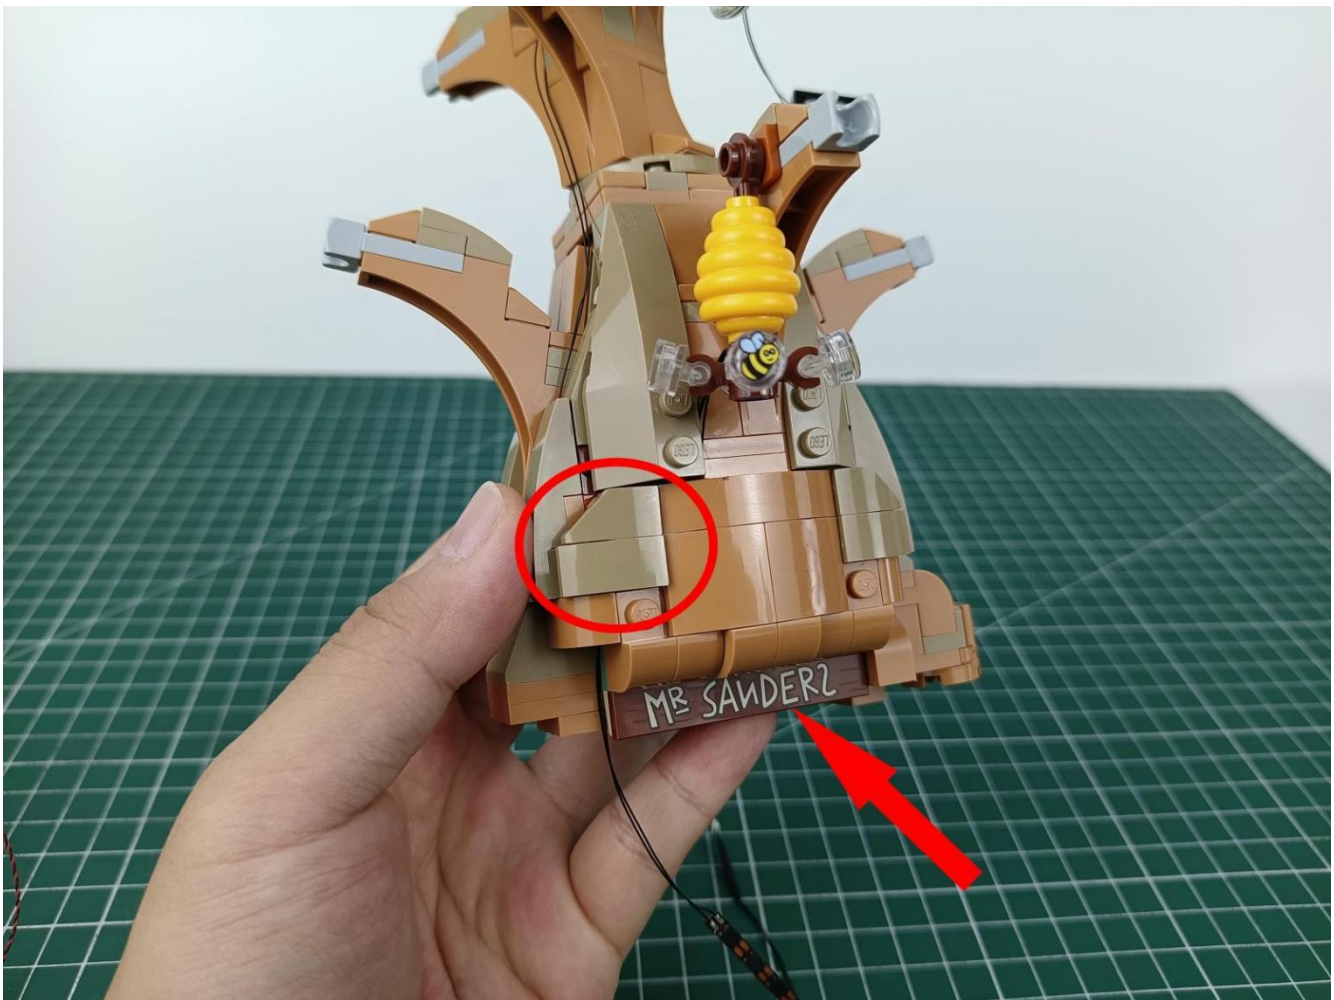

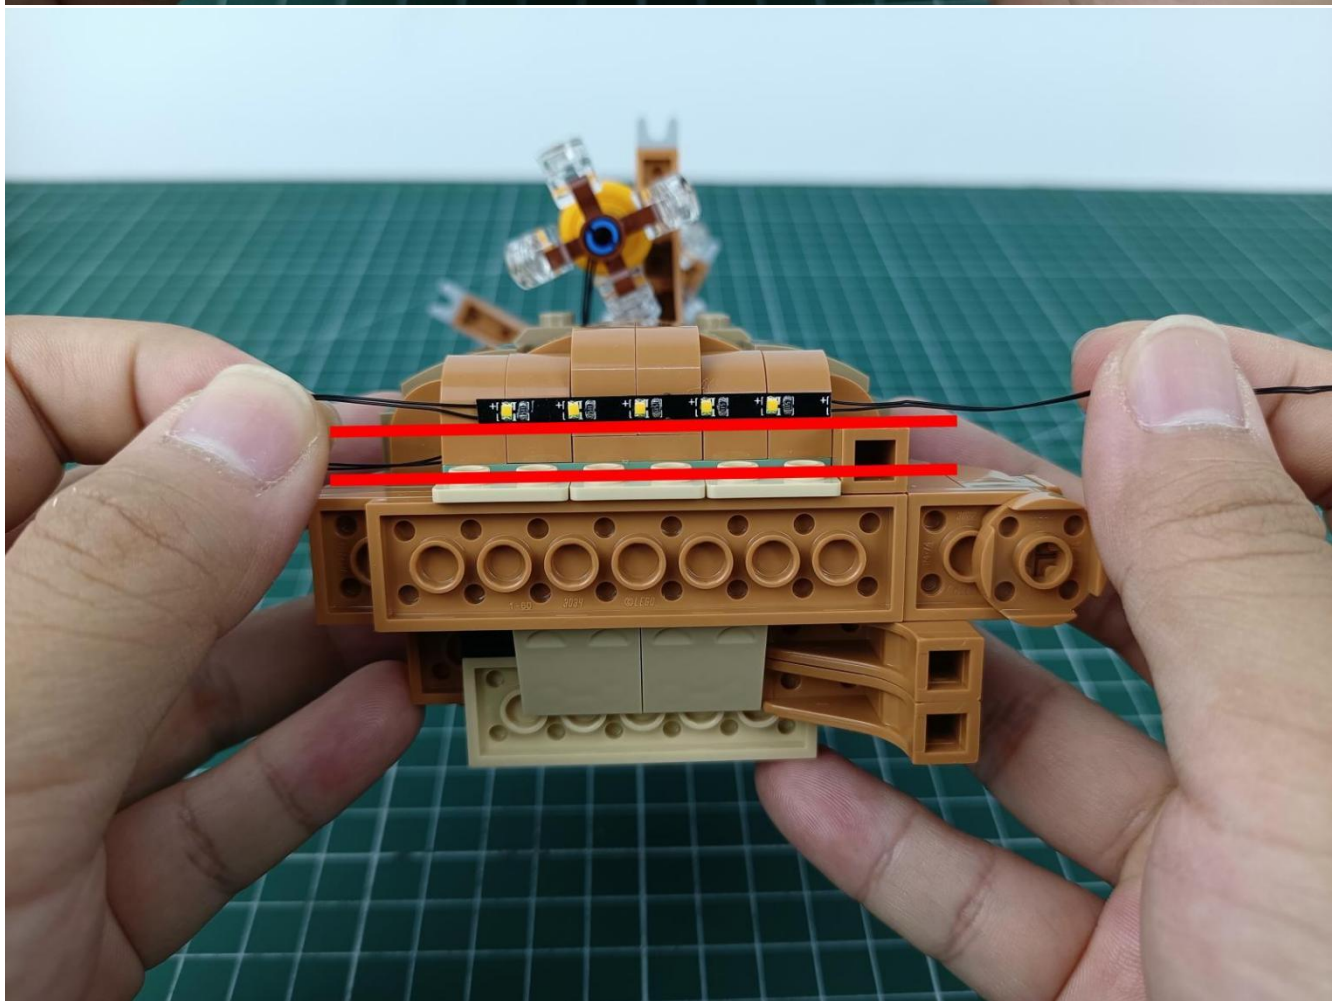

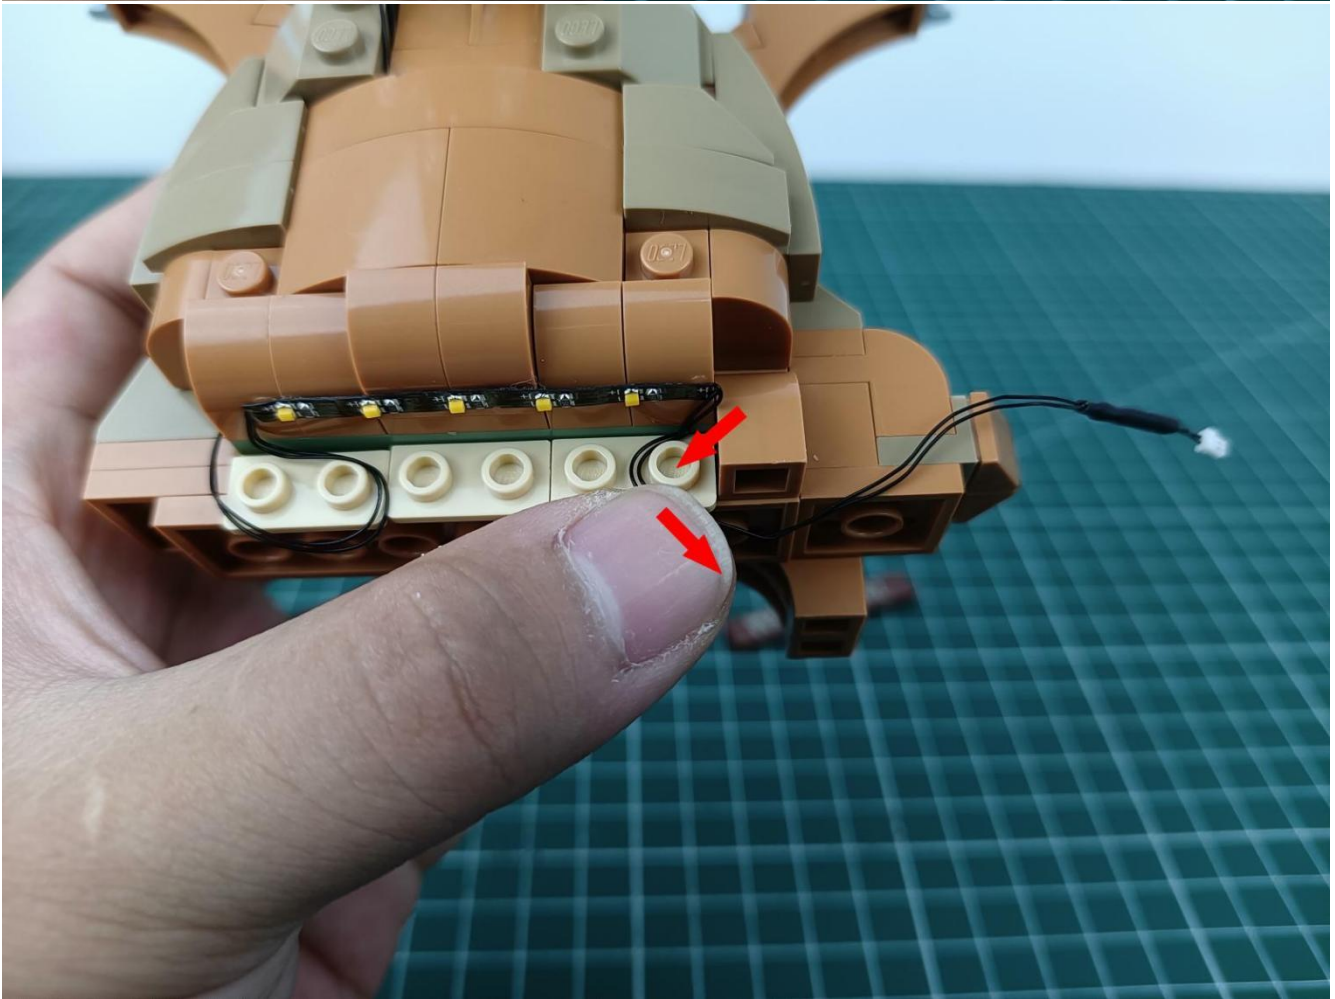

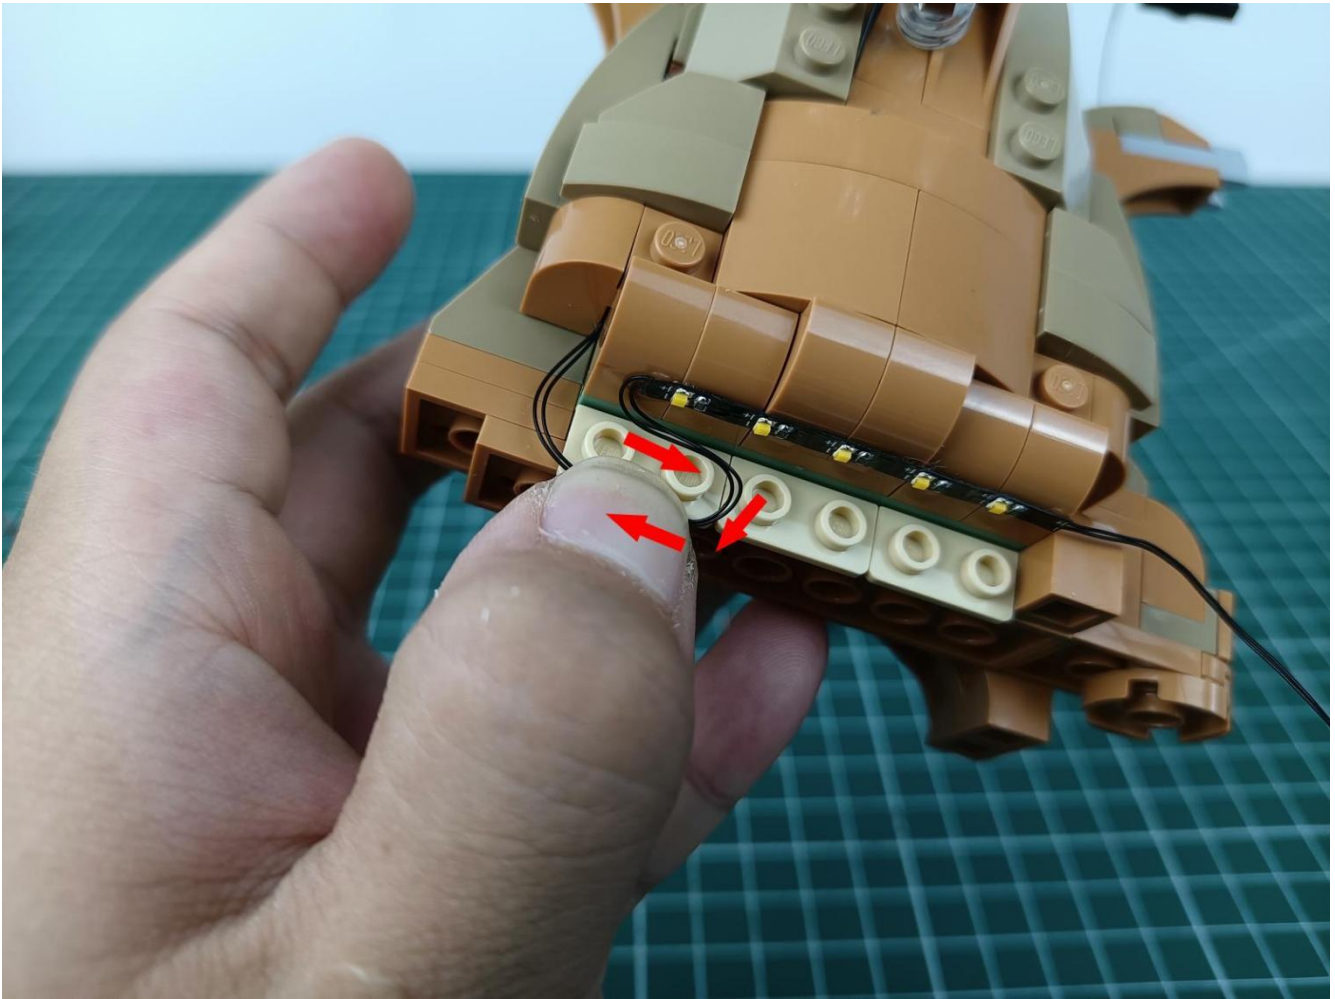

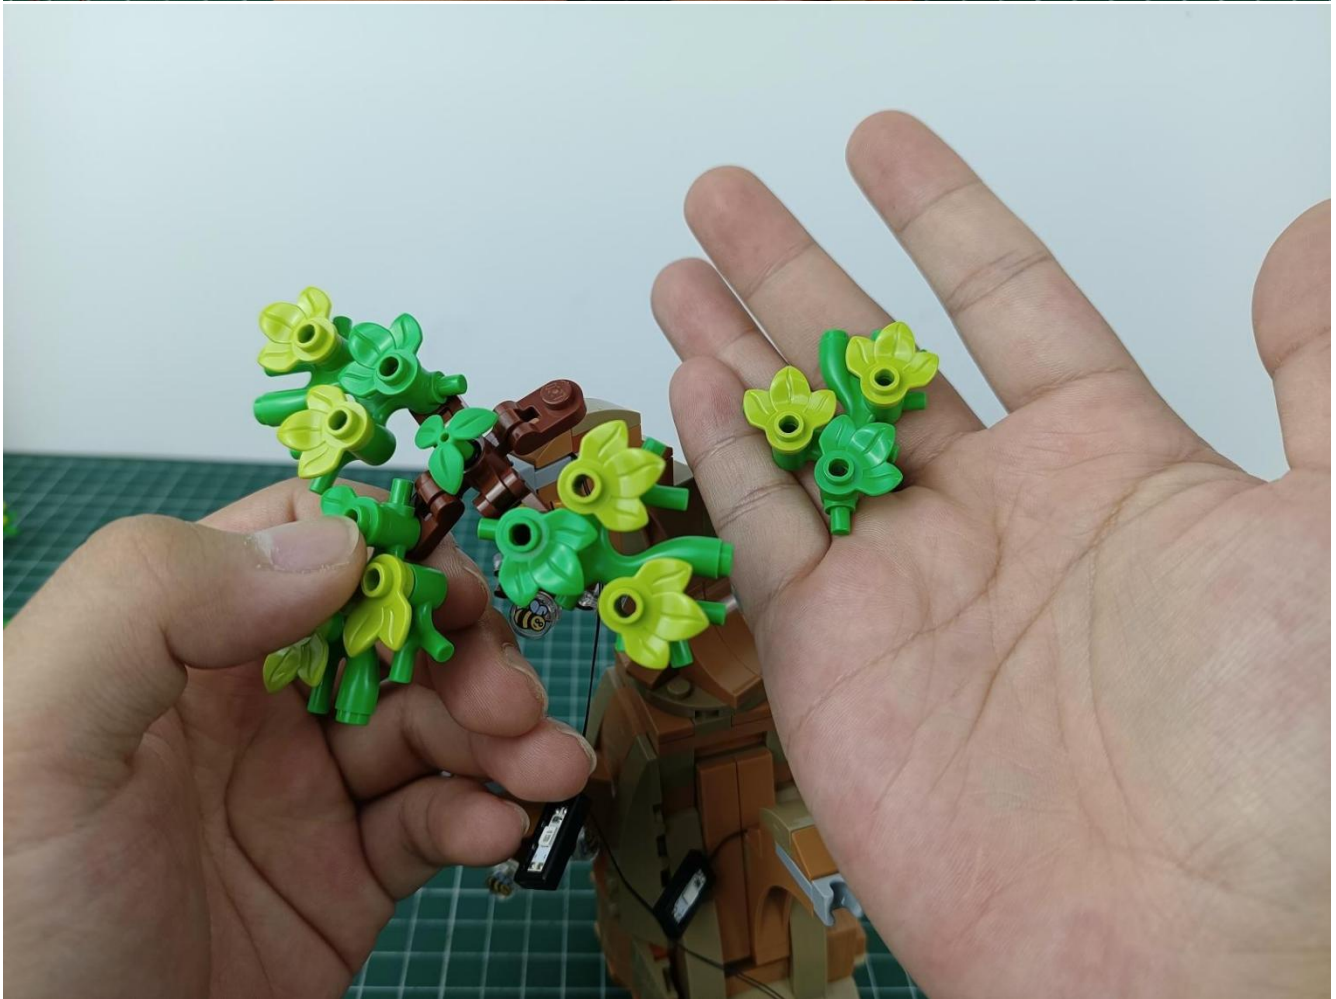

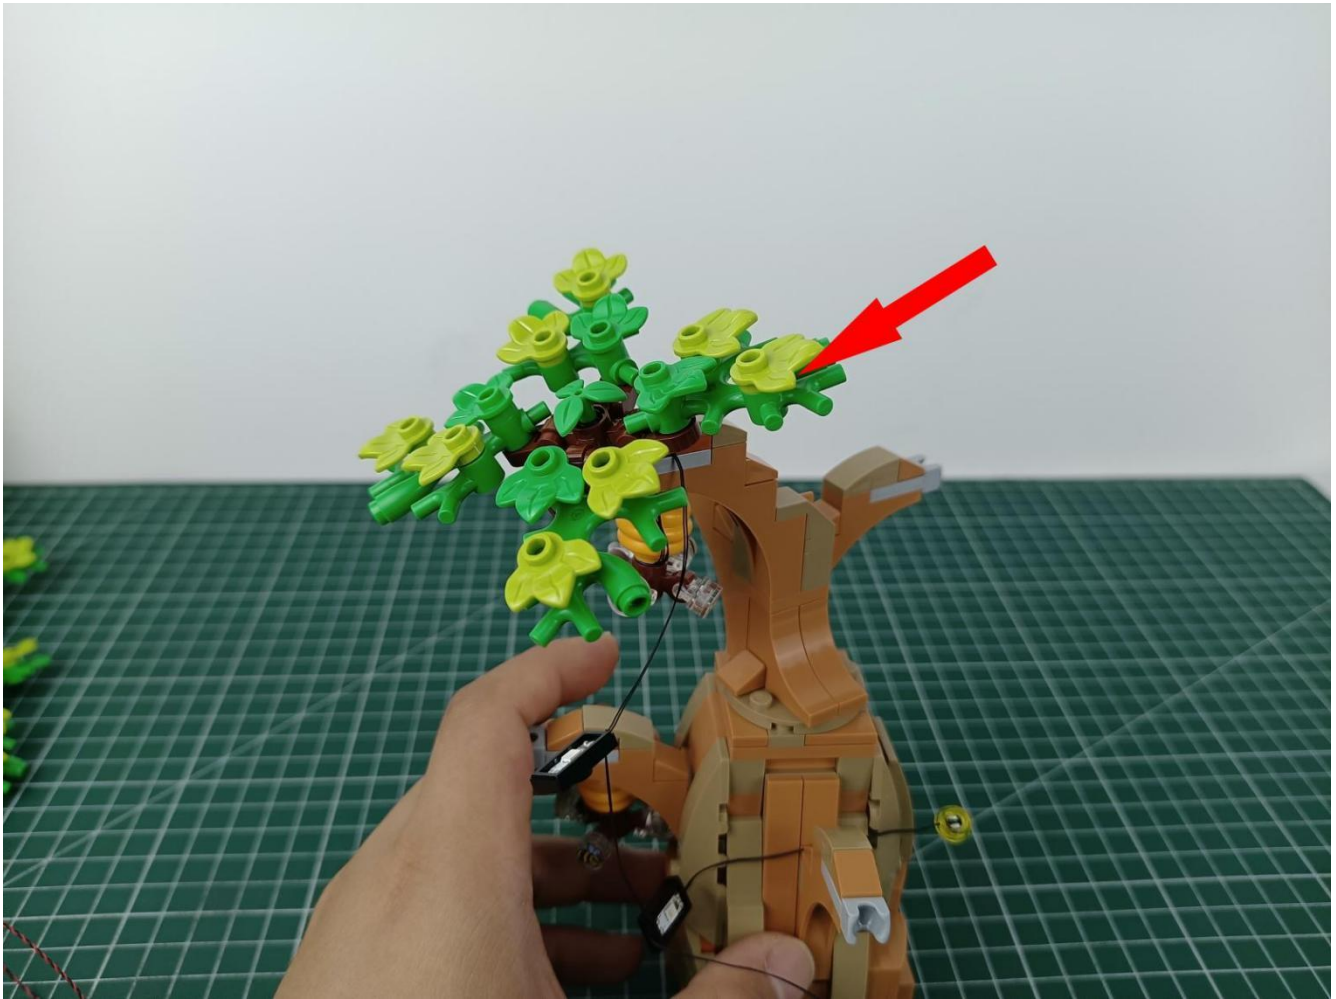

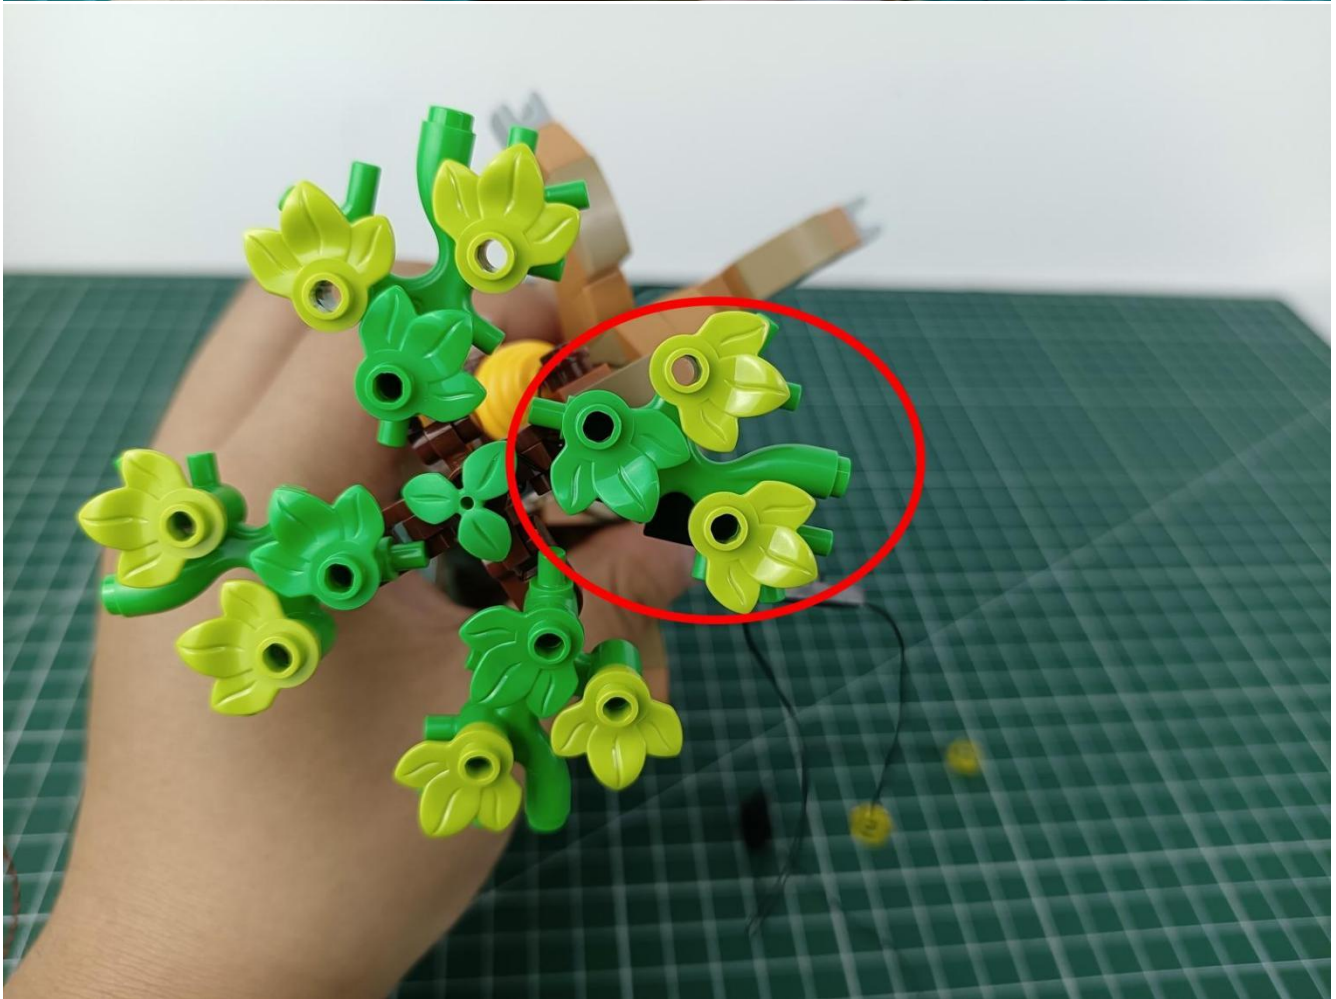

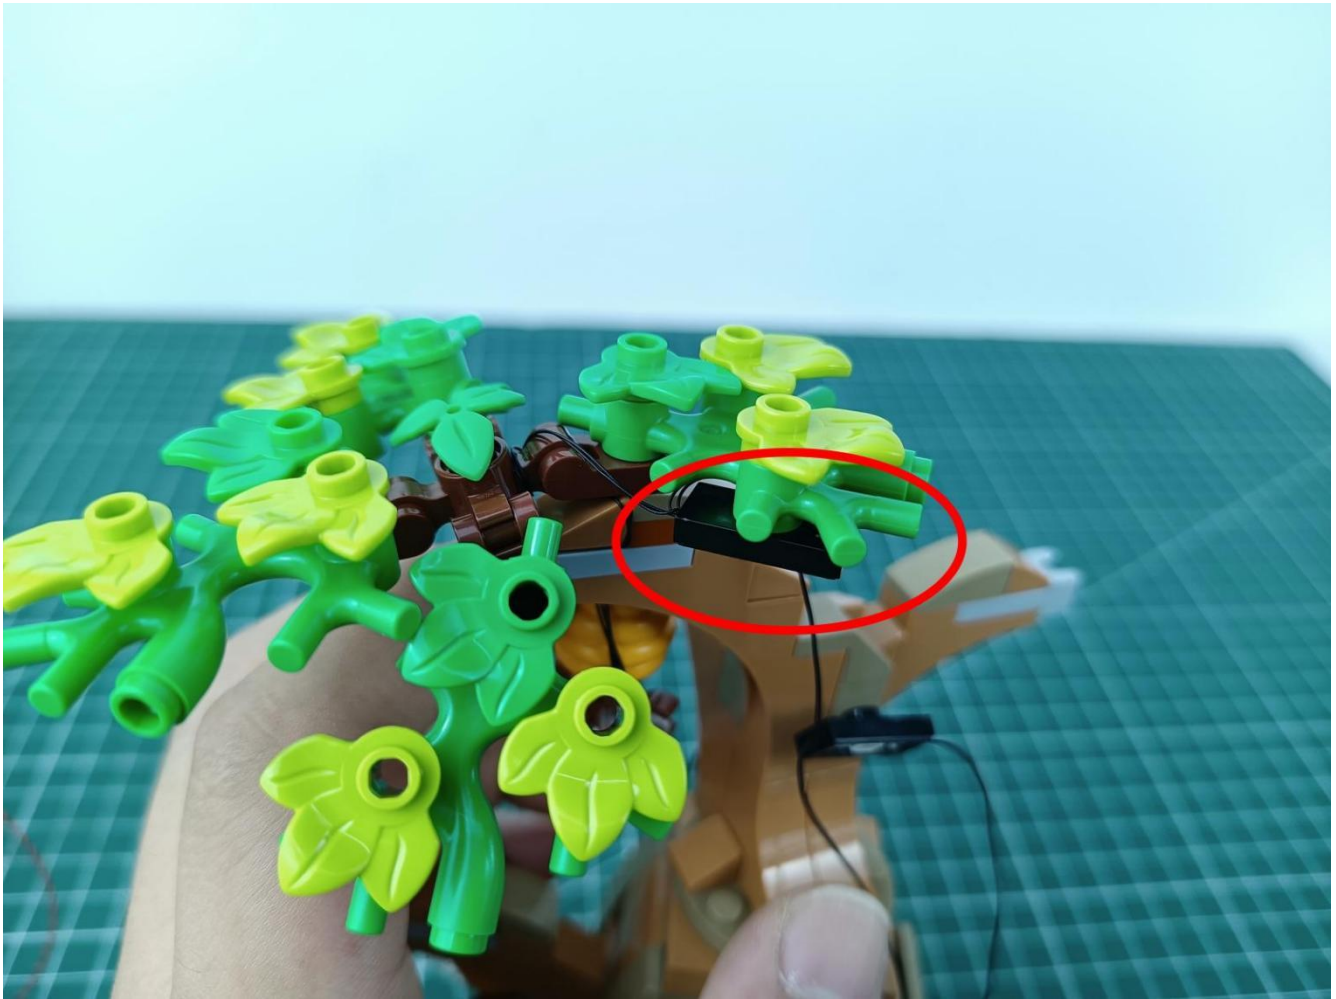

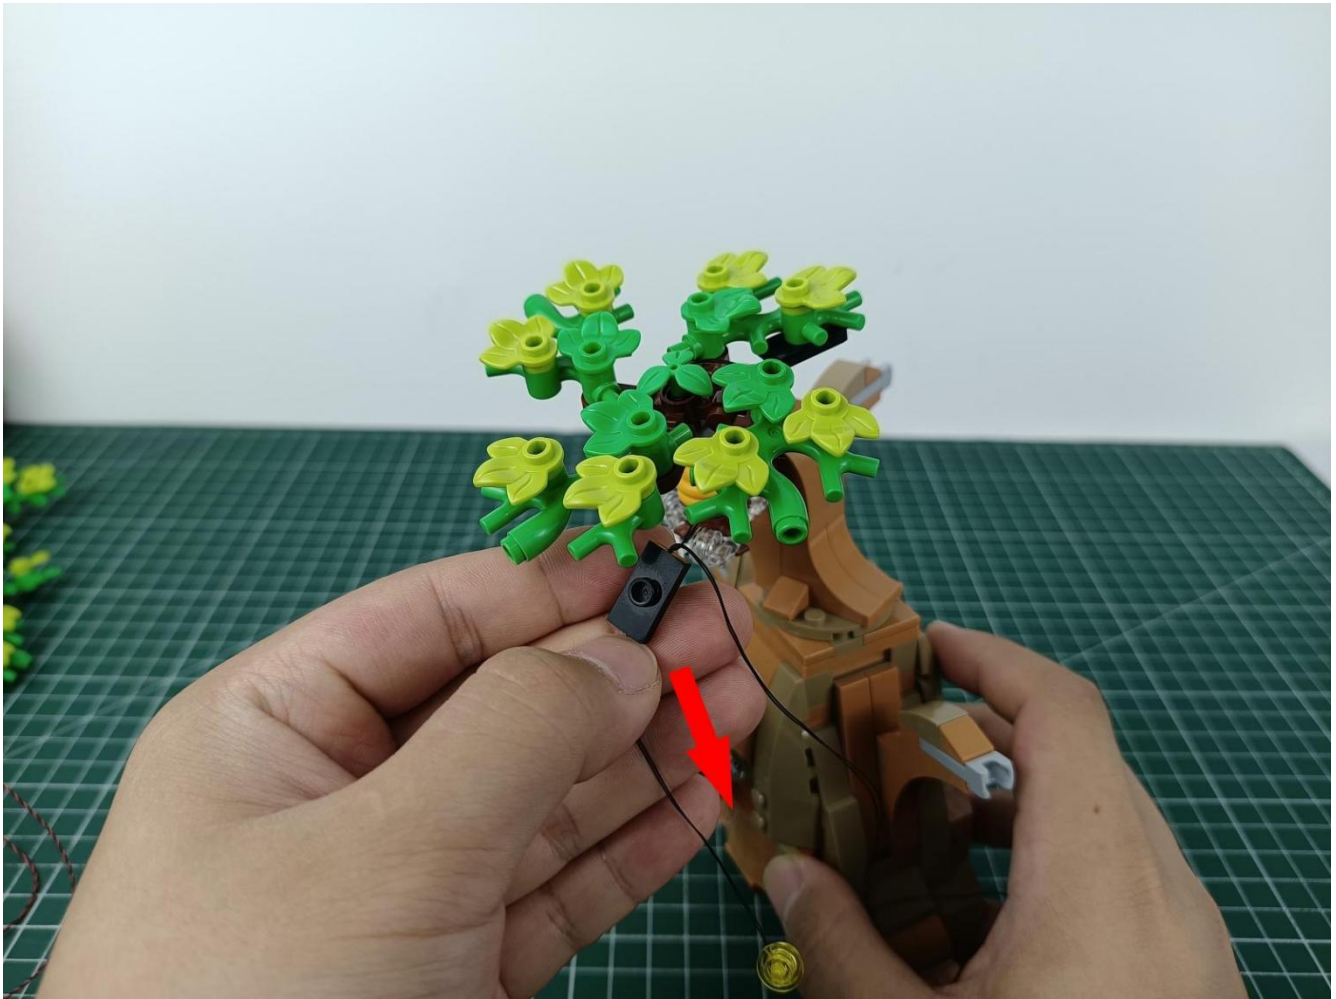

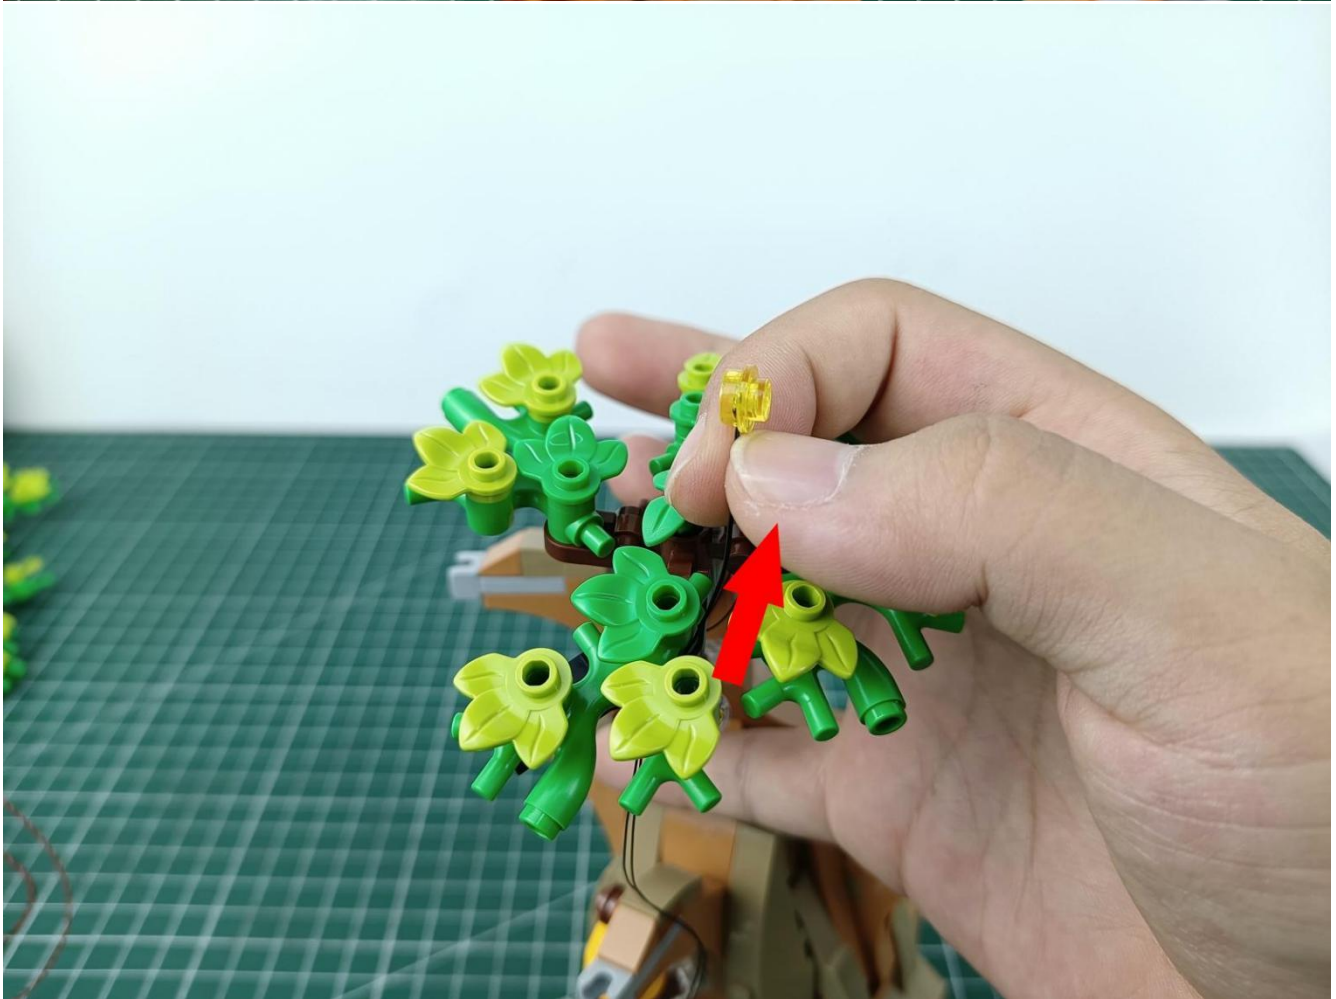

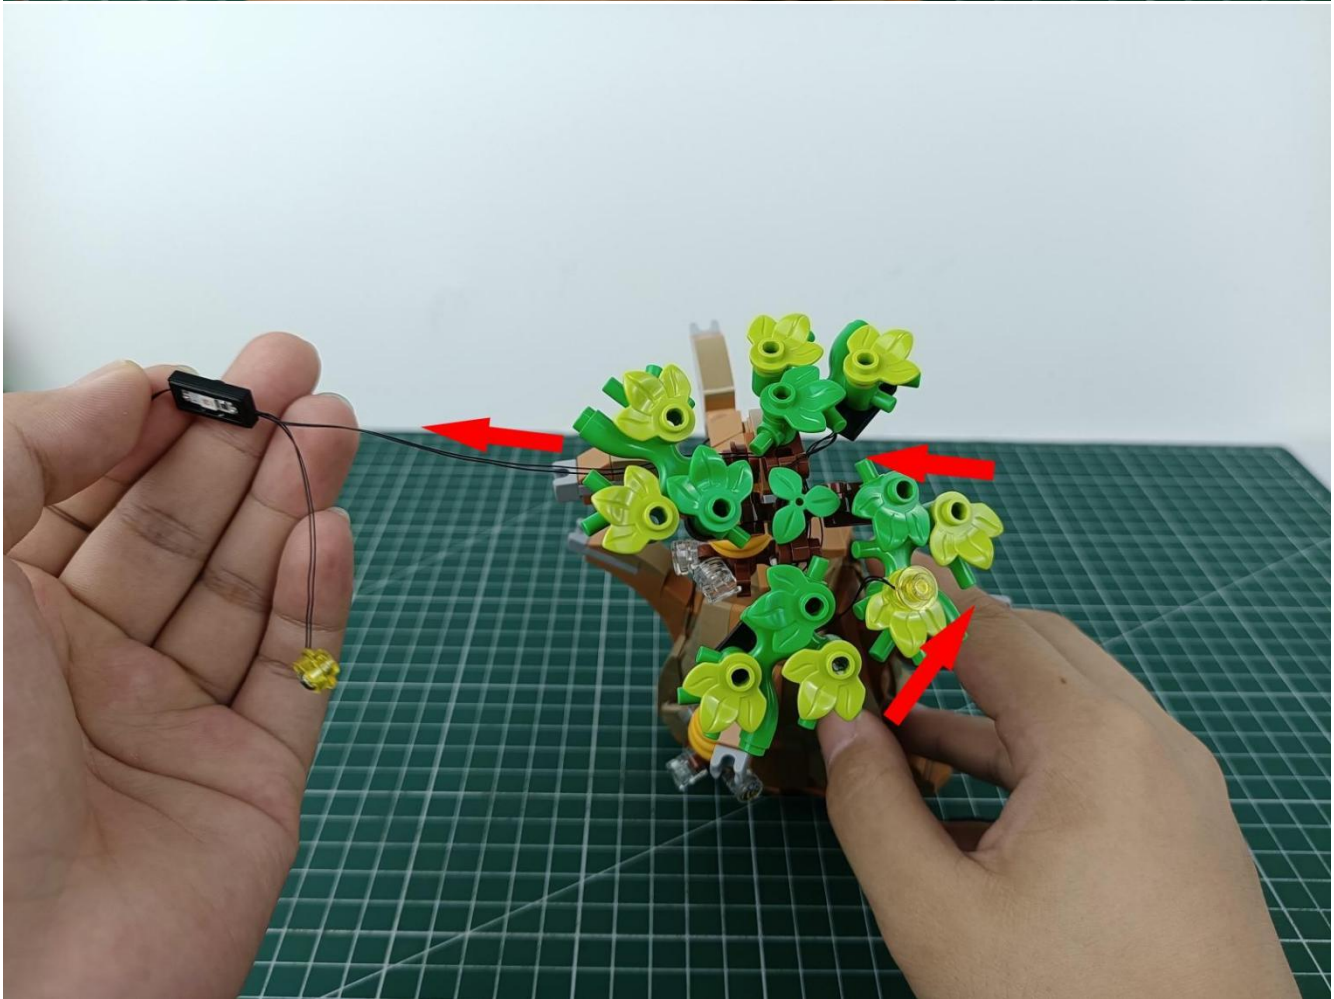

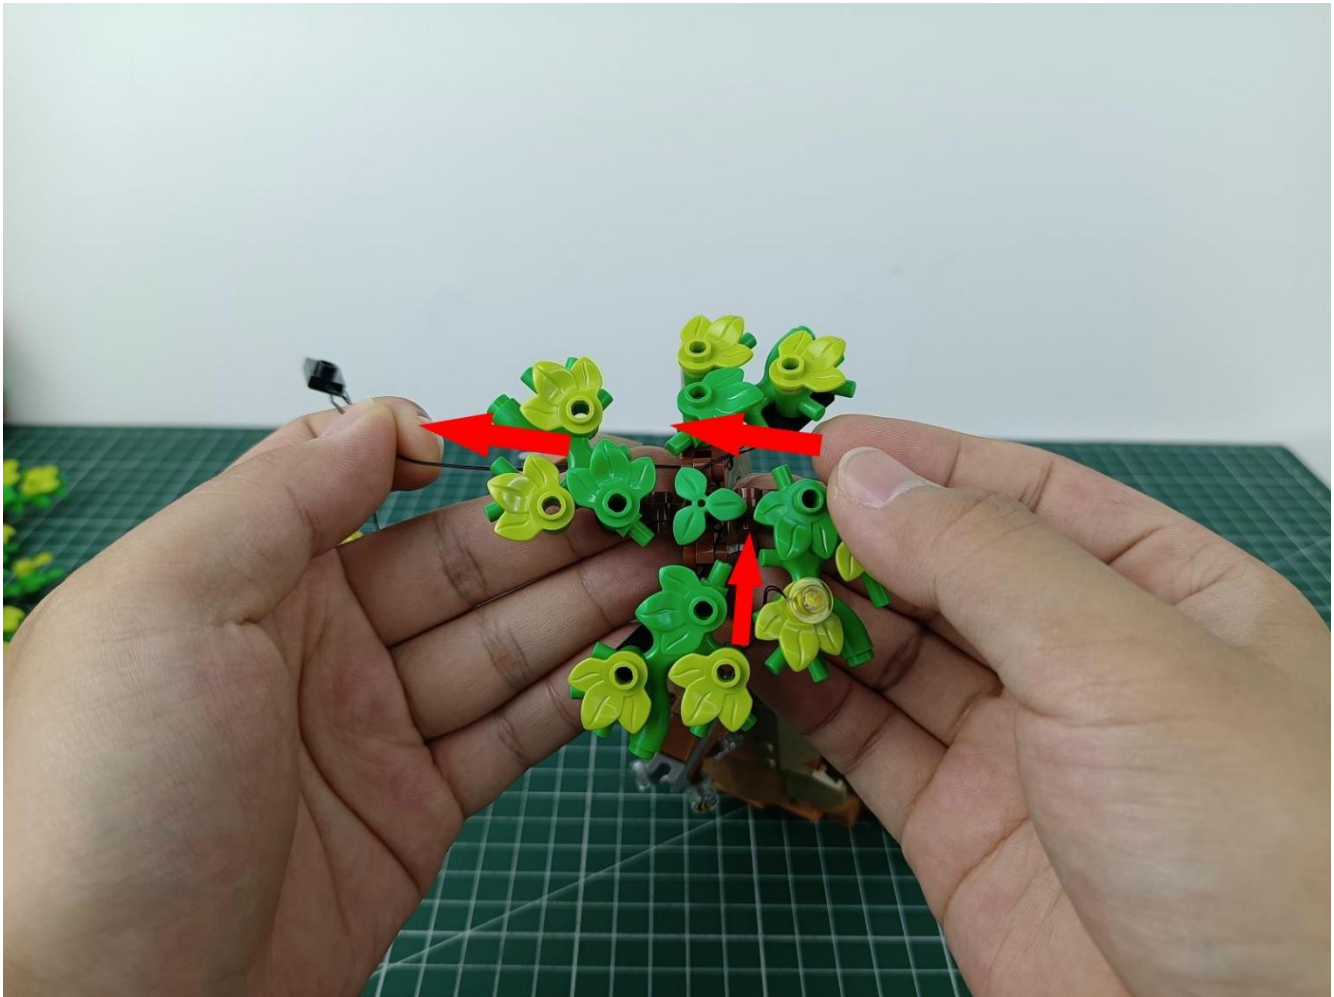

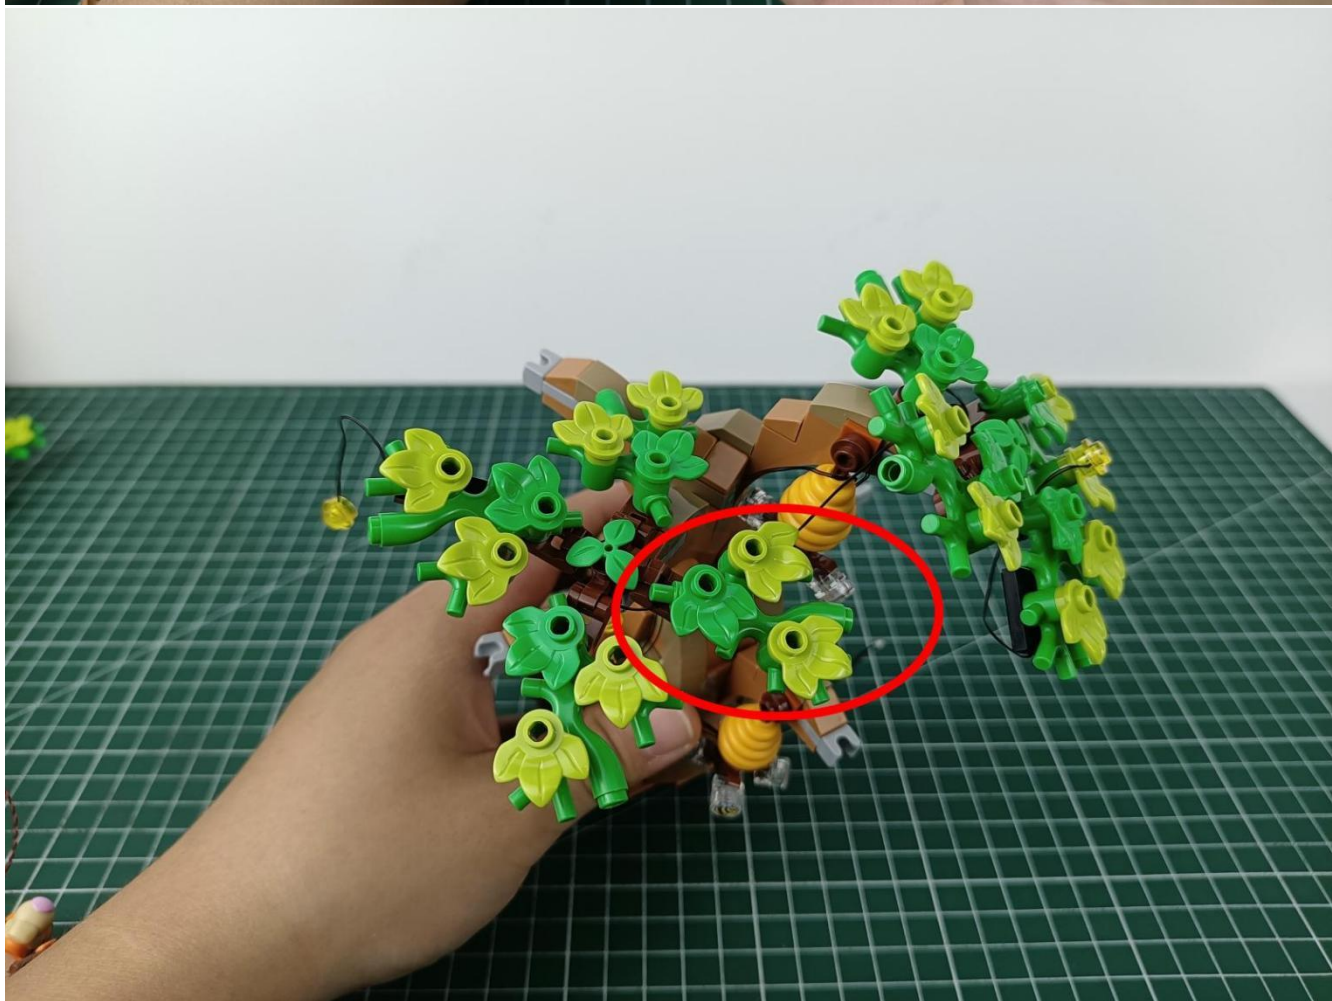

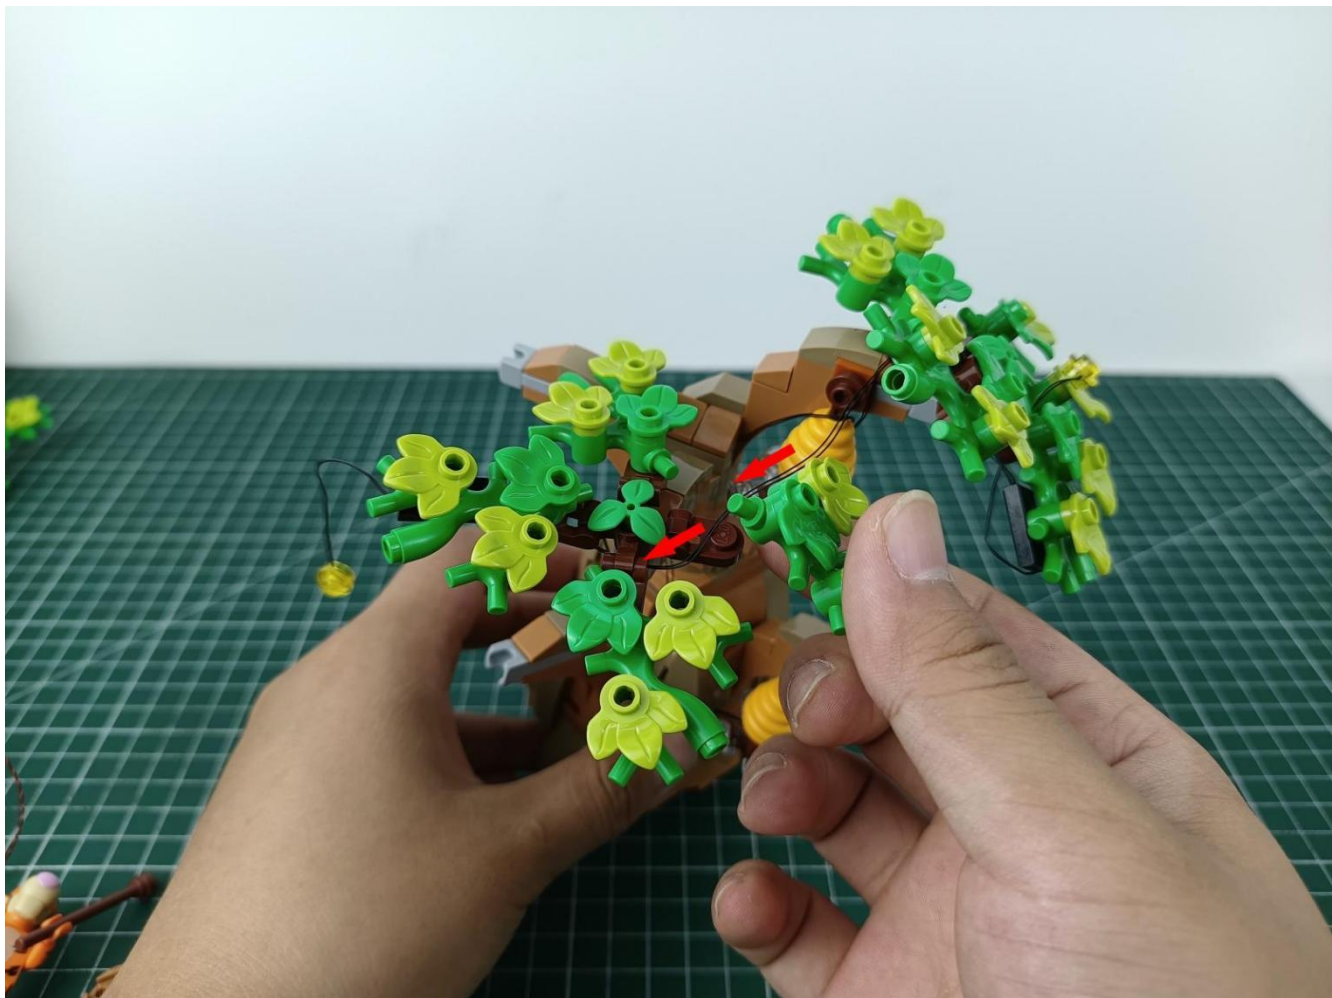

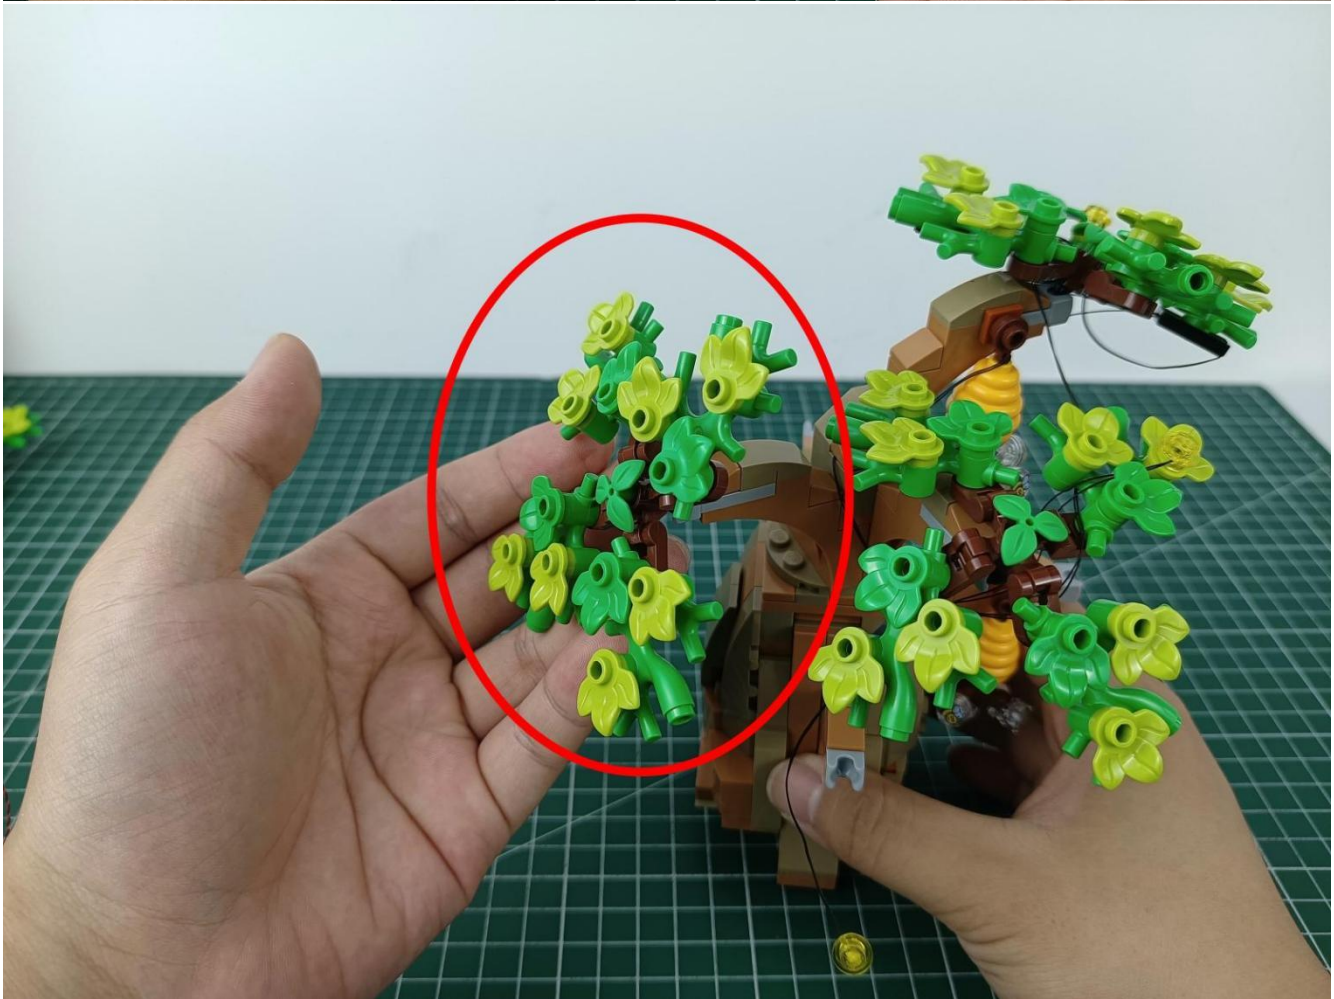

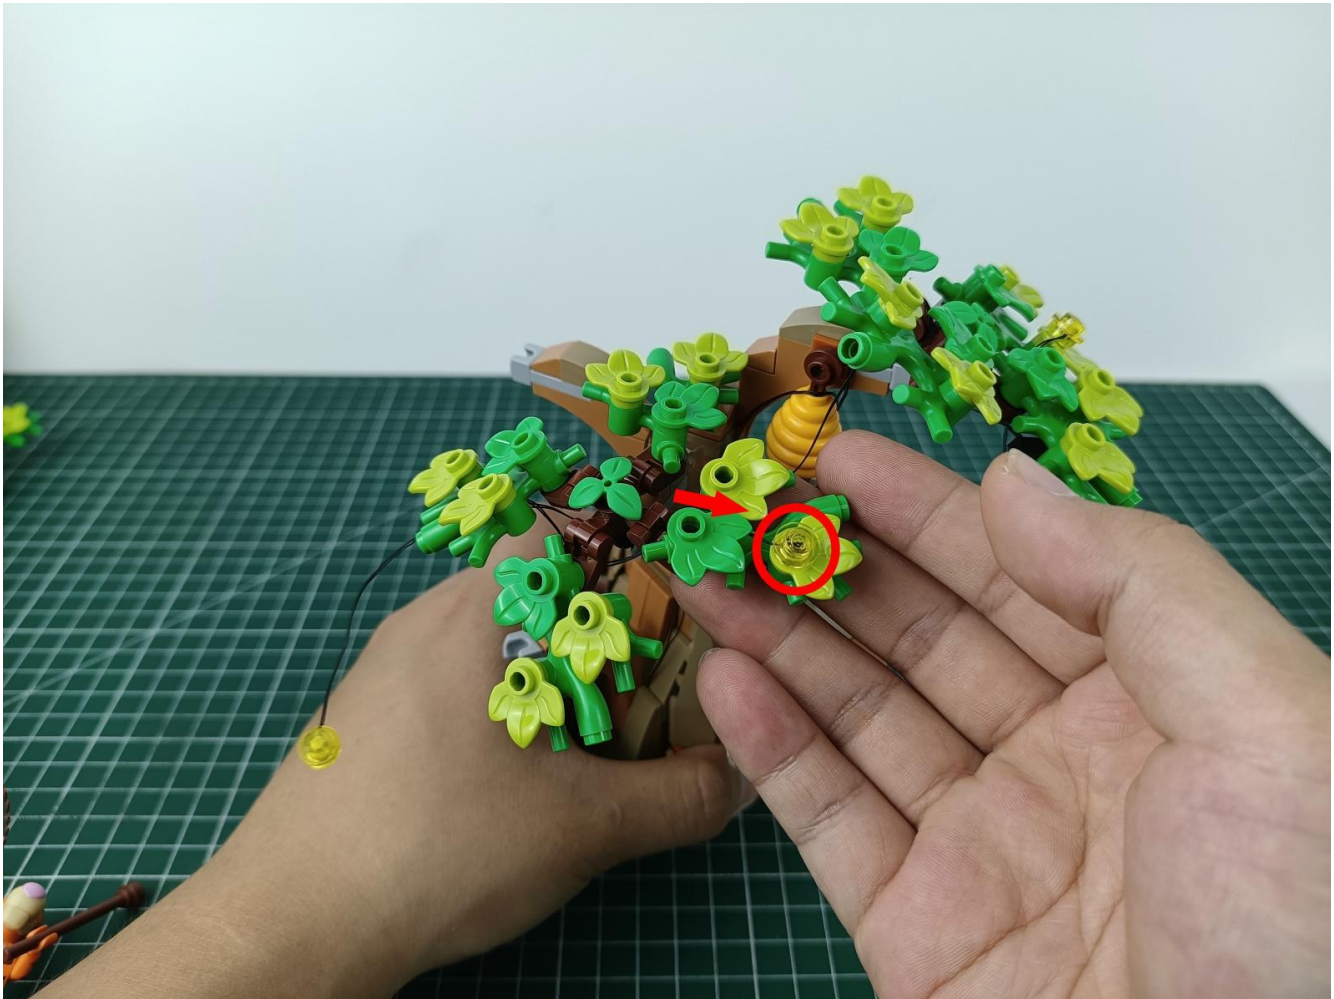

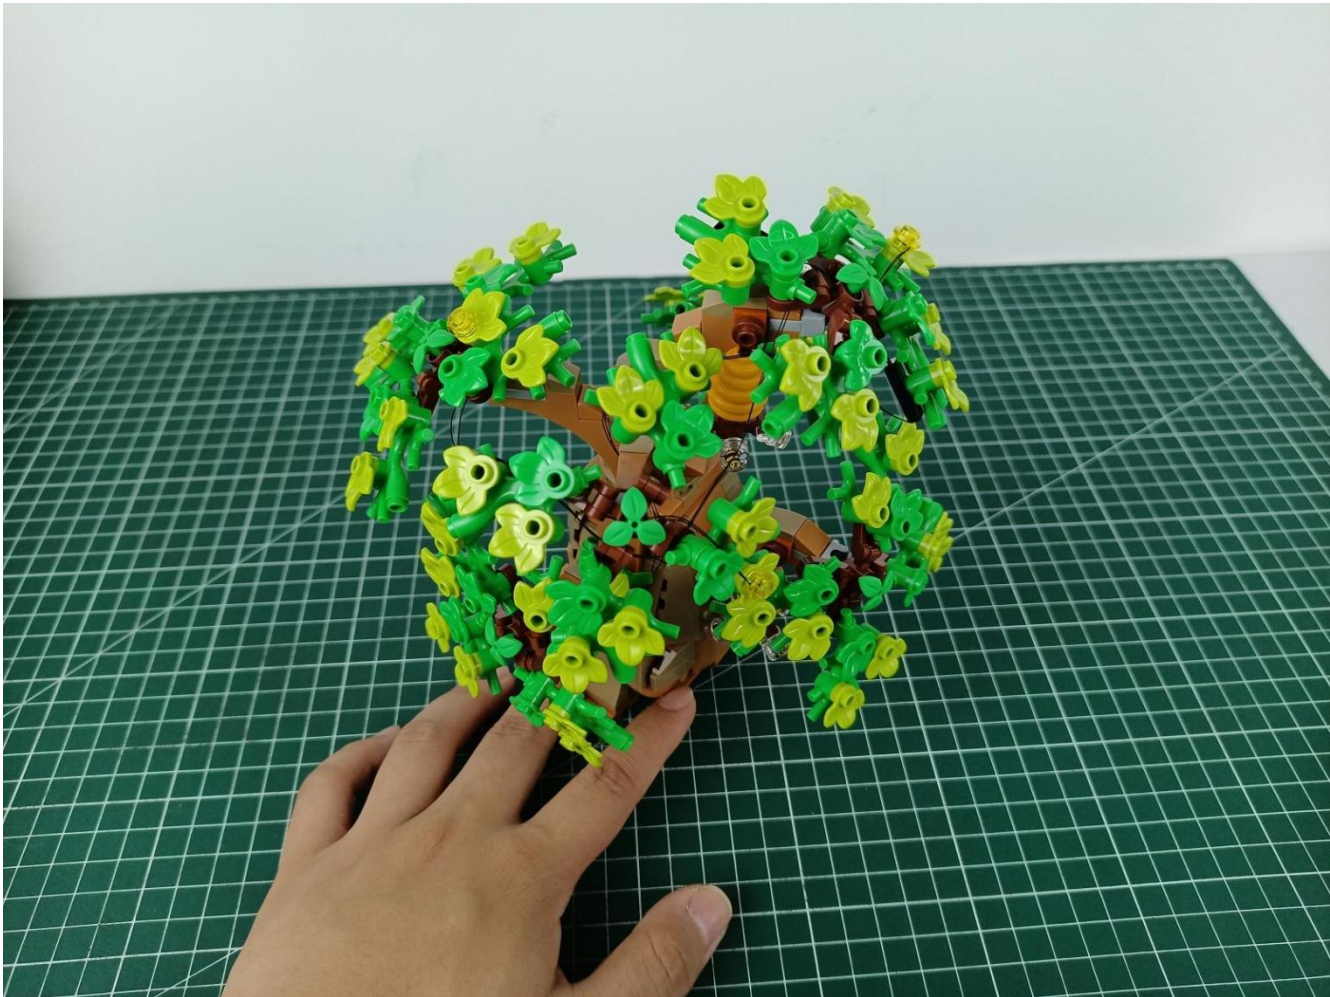

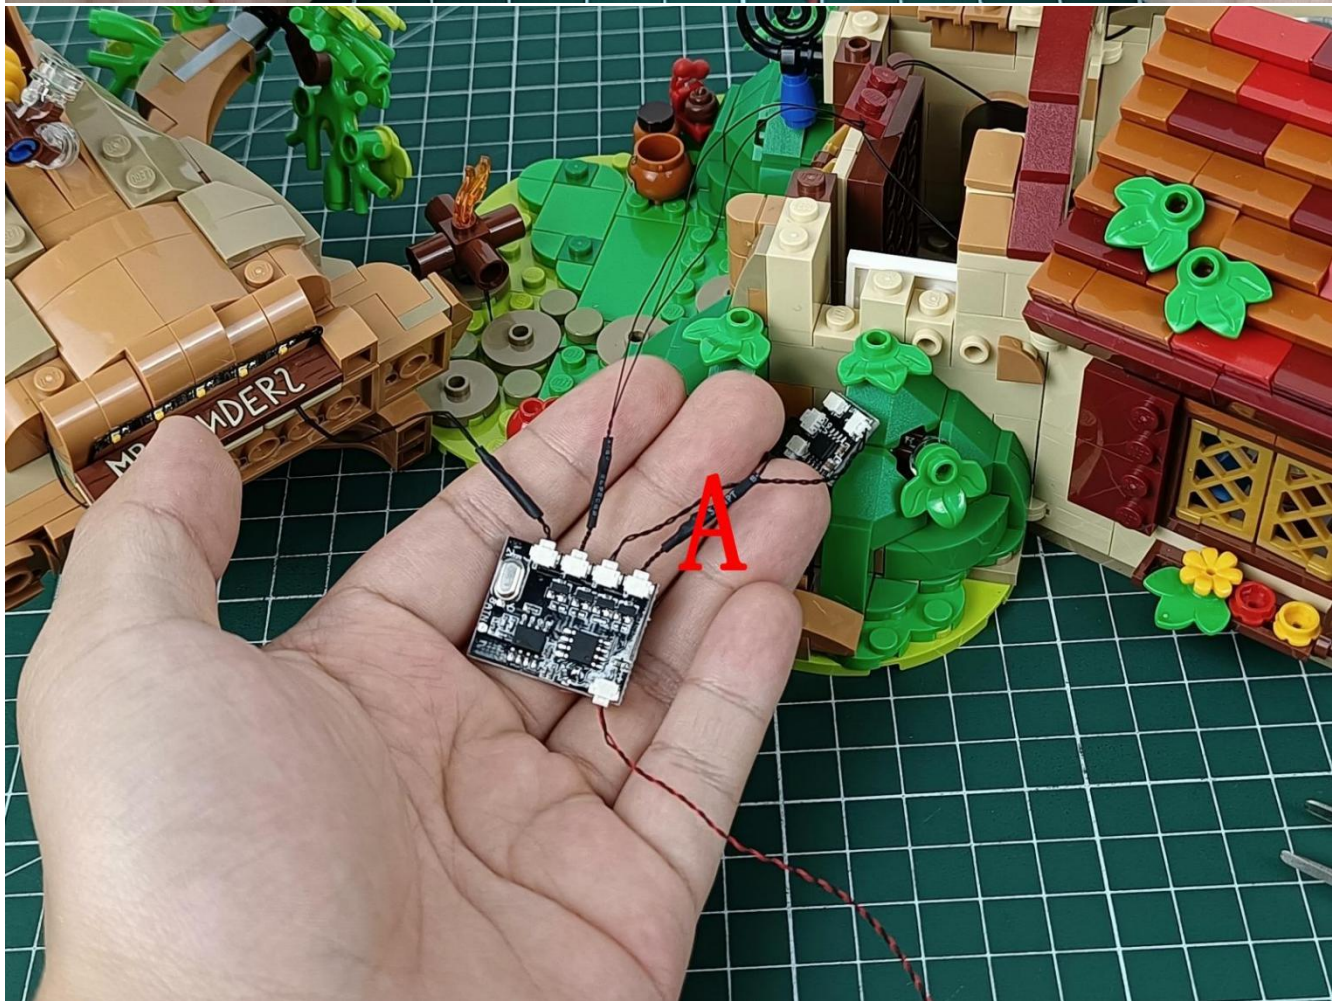

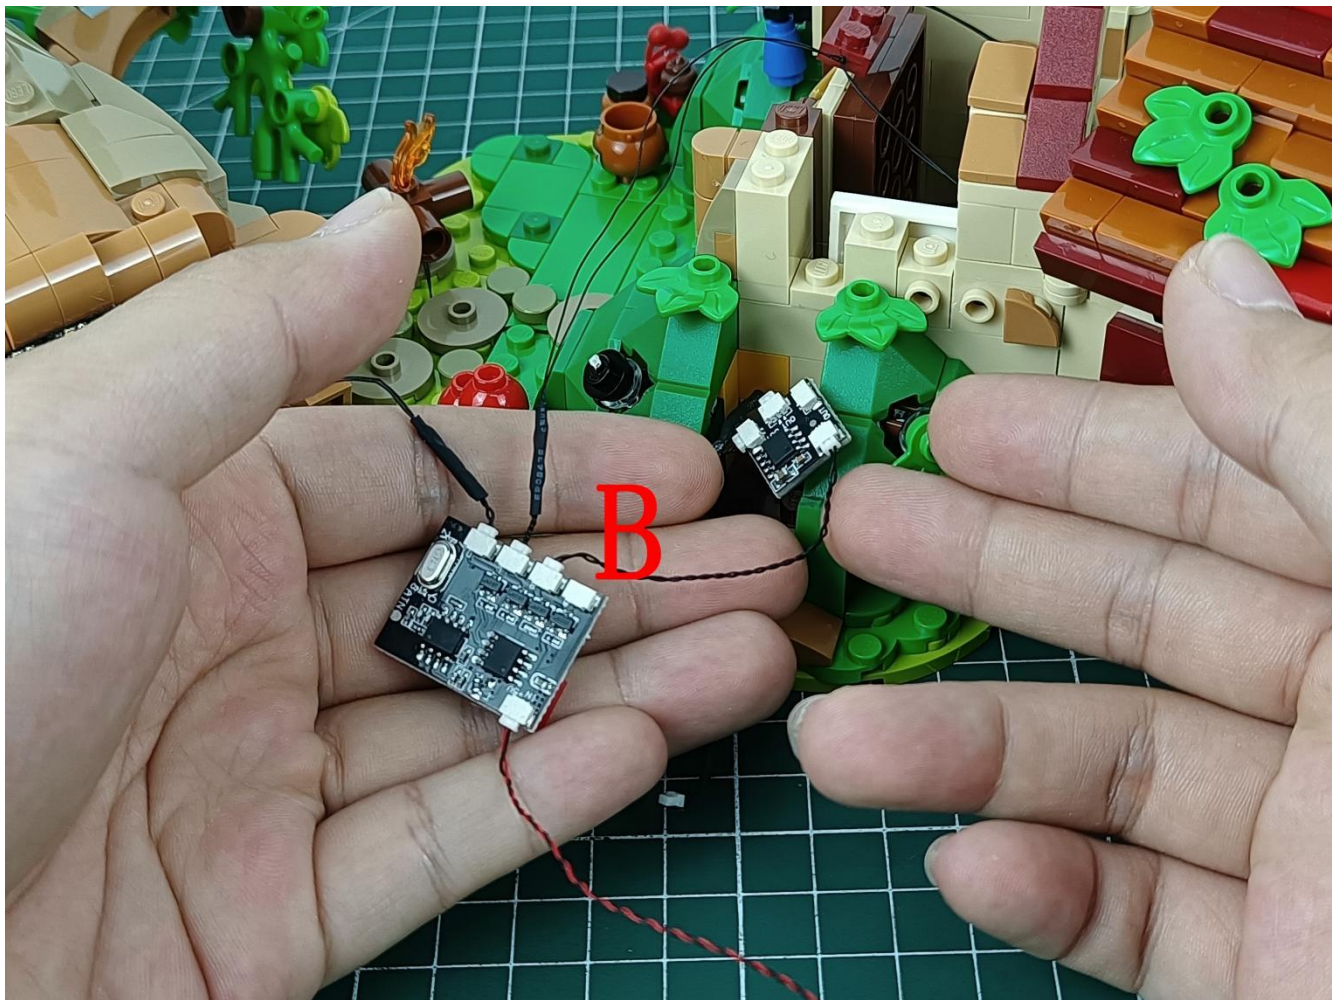

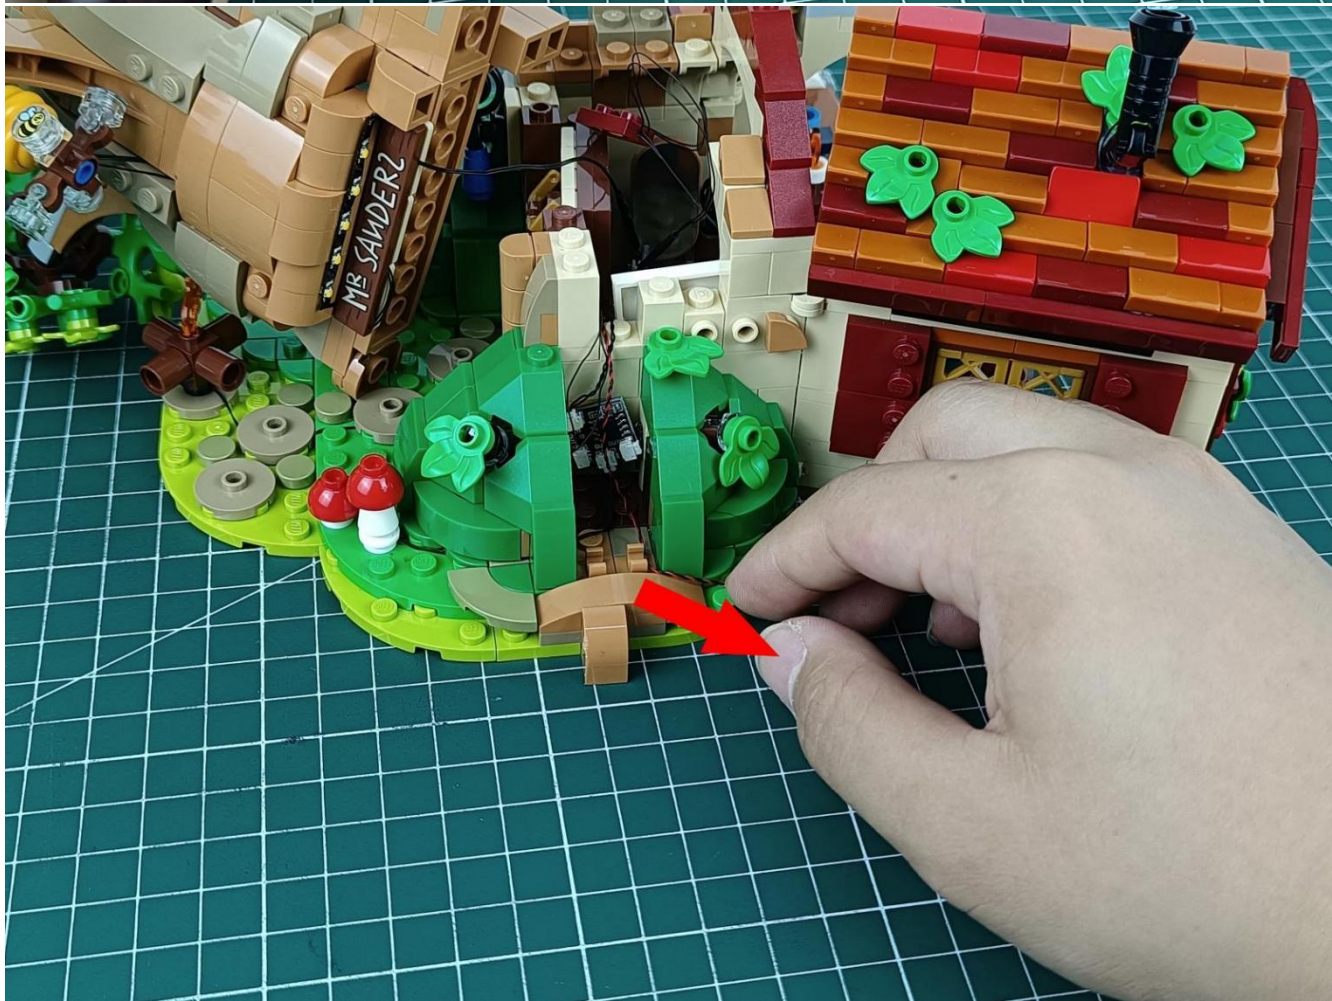

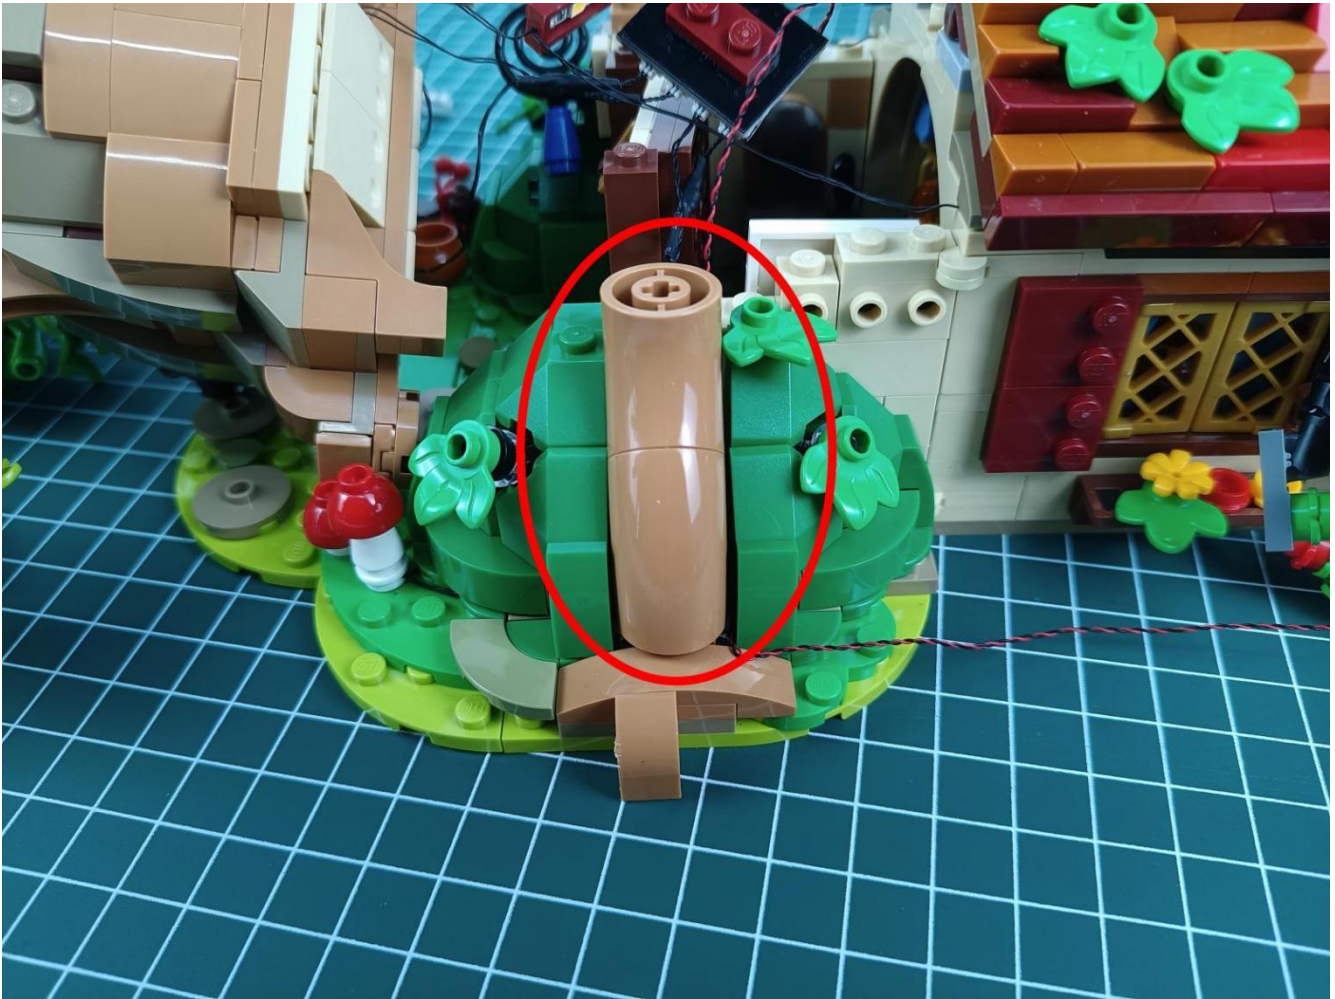

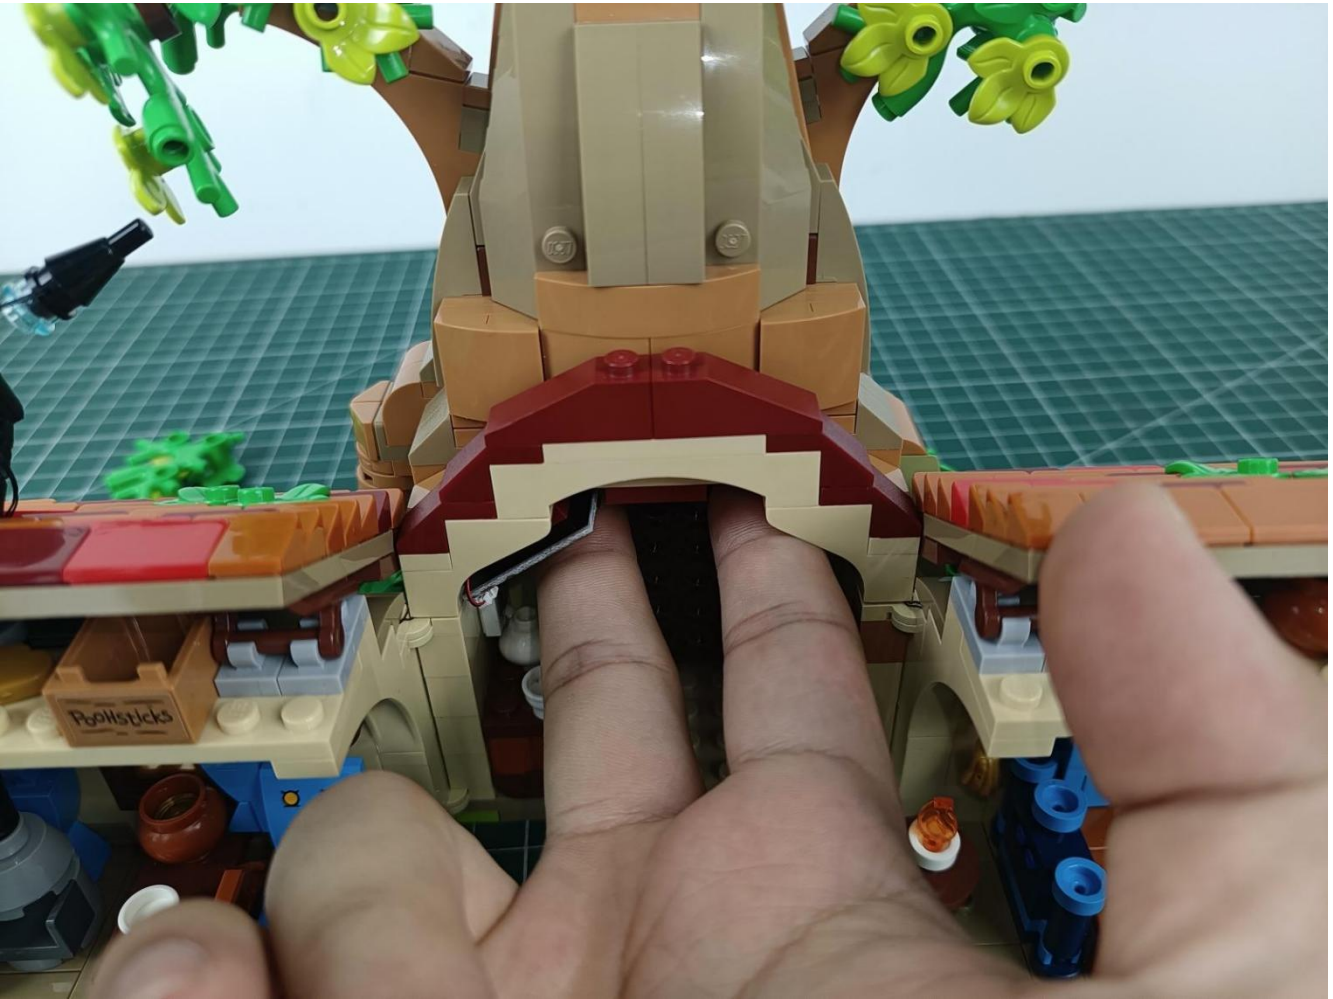

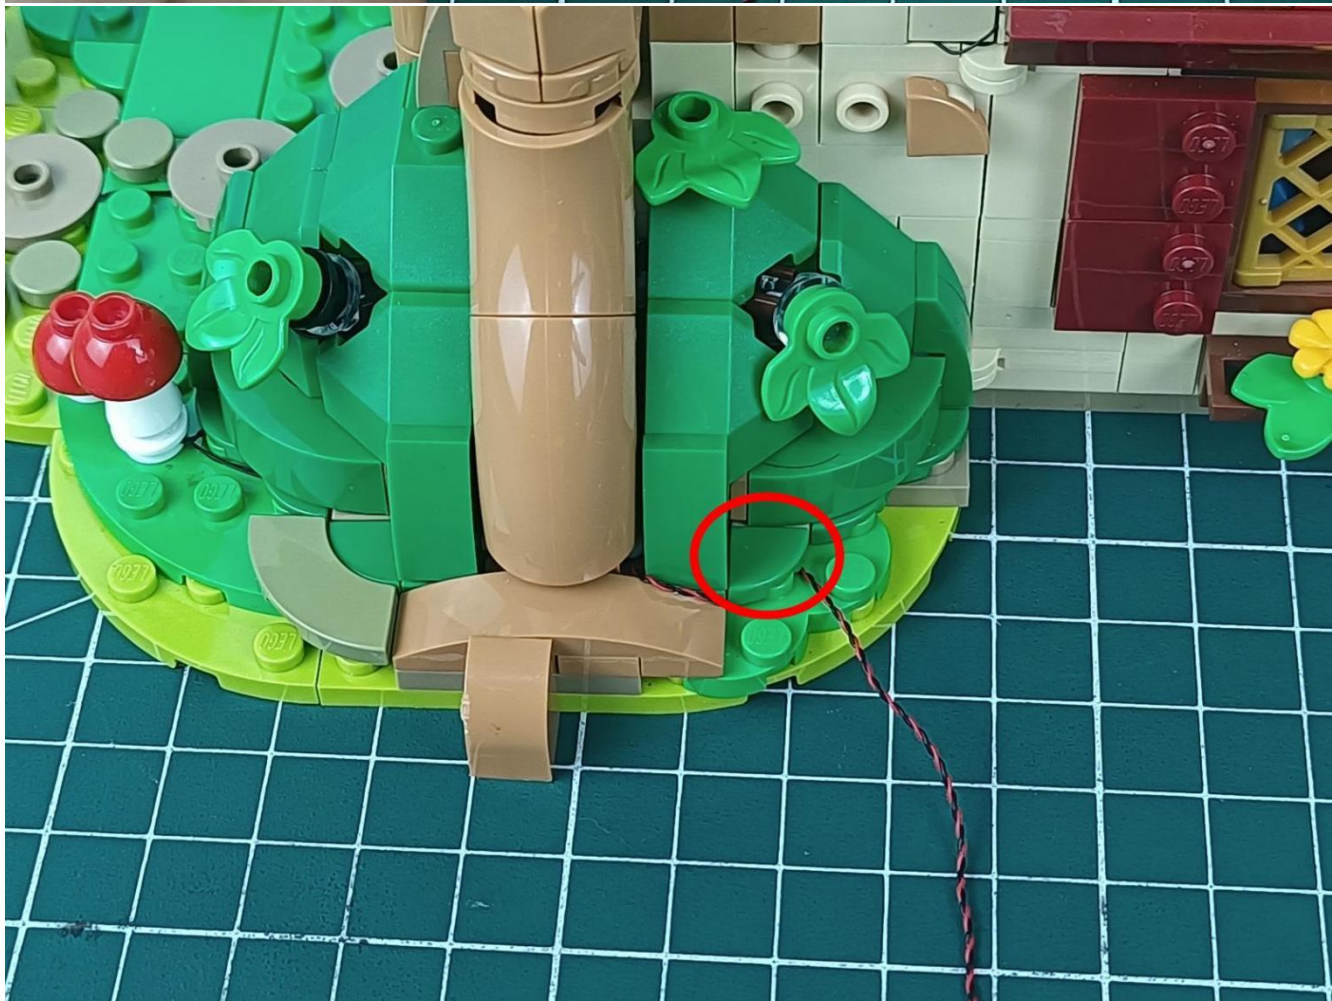

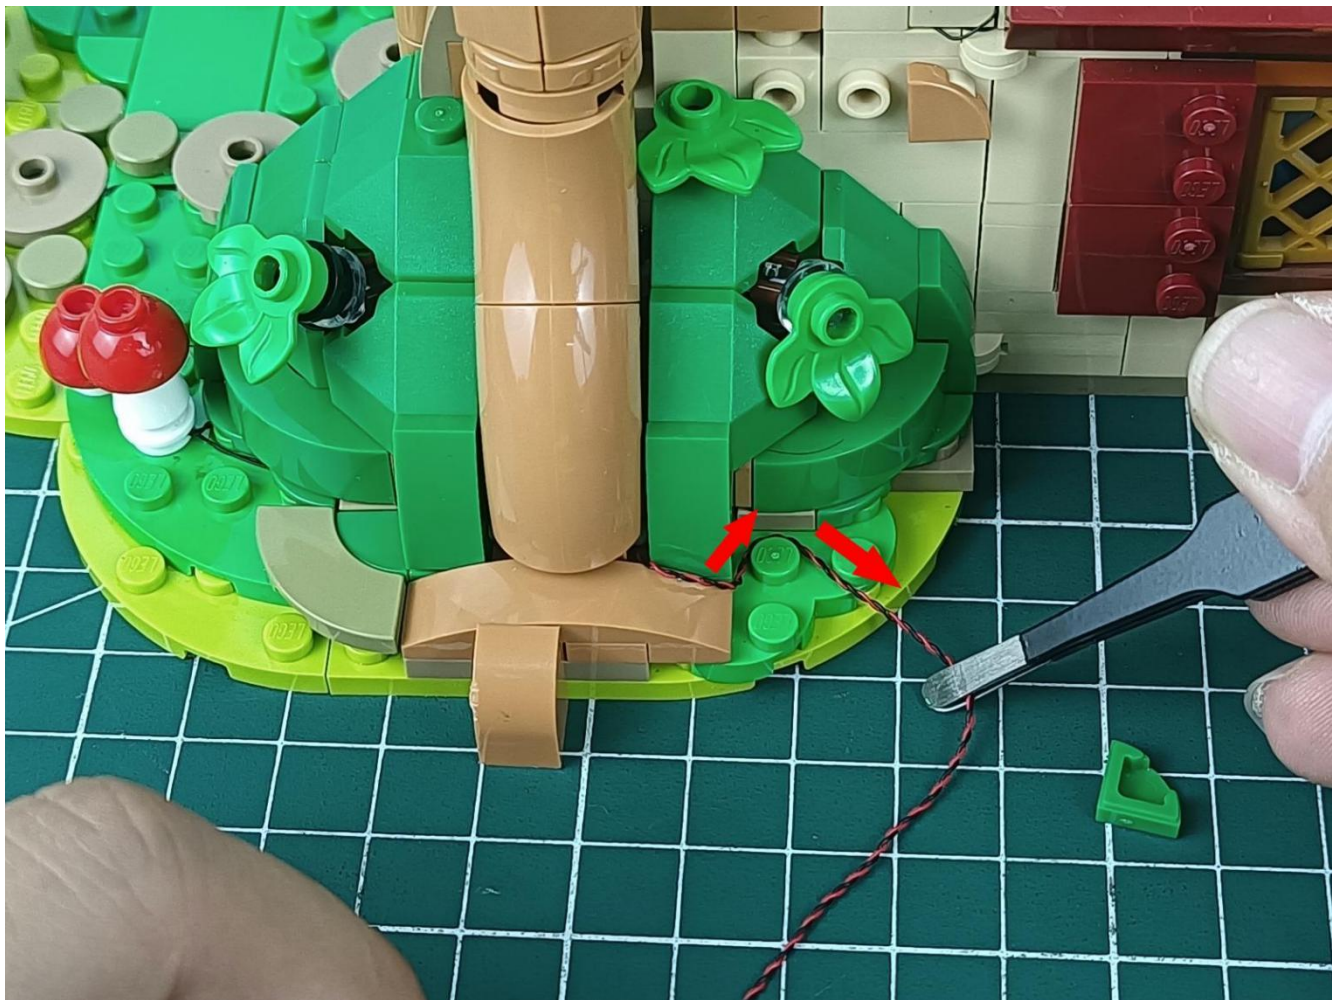

The installation is complete

The above are ideas and instructions provided by our designers. Please move on:

- 1: Do you have any suggestions about the material and quality of our products?
- 2: Do you have any suggestions on the installation instructions and the degree of difficulty of the installation?
- 3: If you have better installation method and ideas, please contact us in time.
