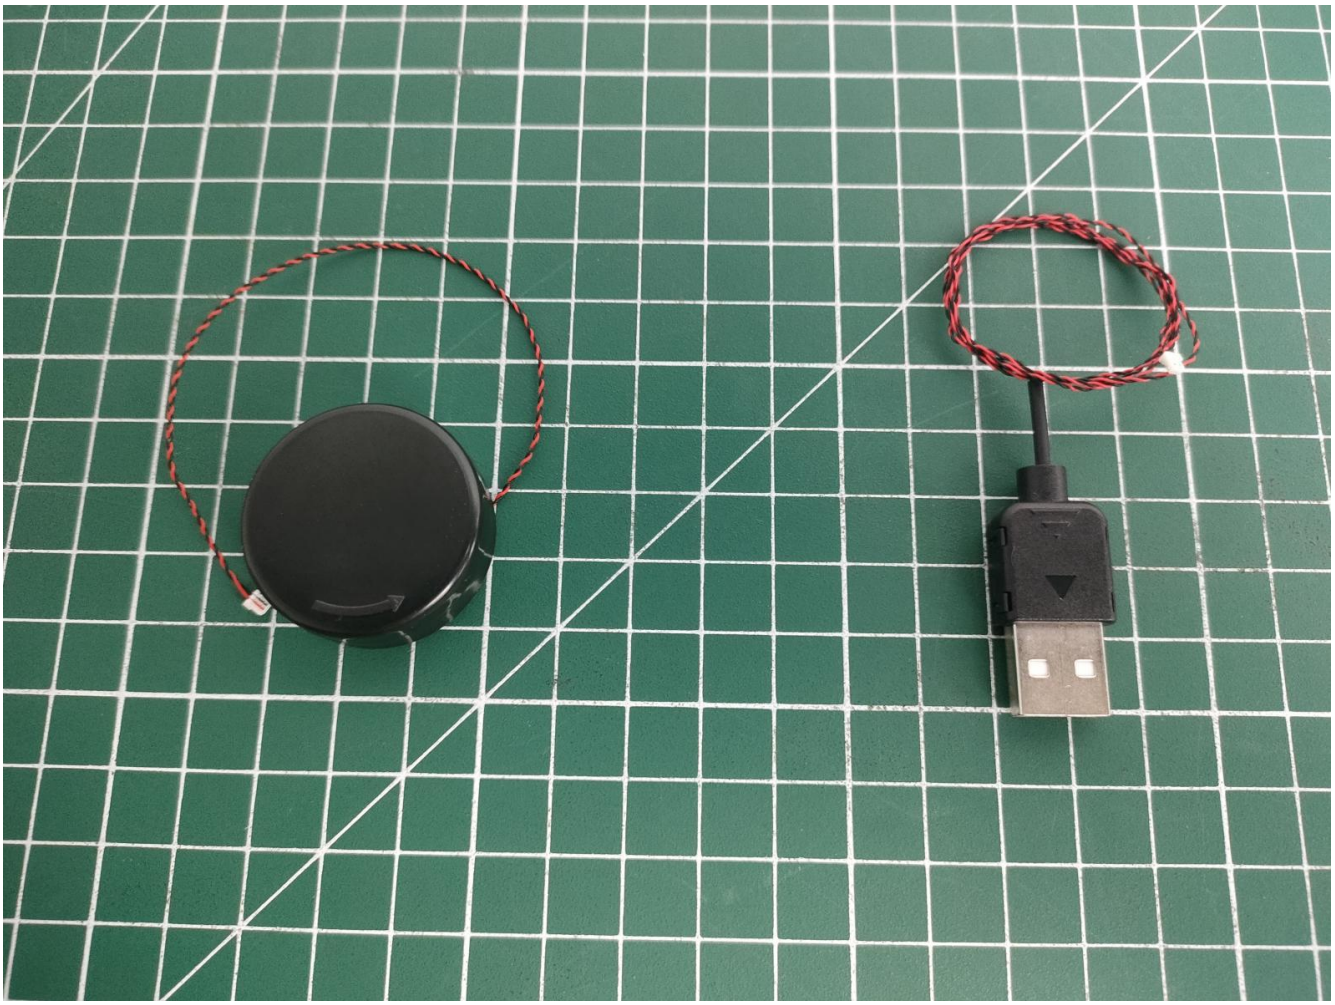
LED LIGHTING KIT

Introduction

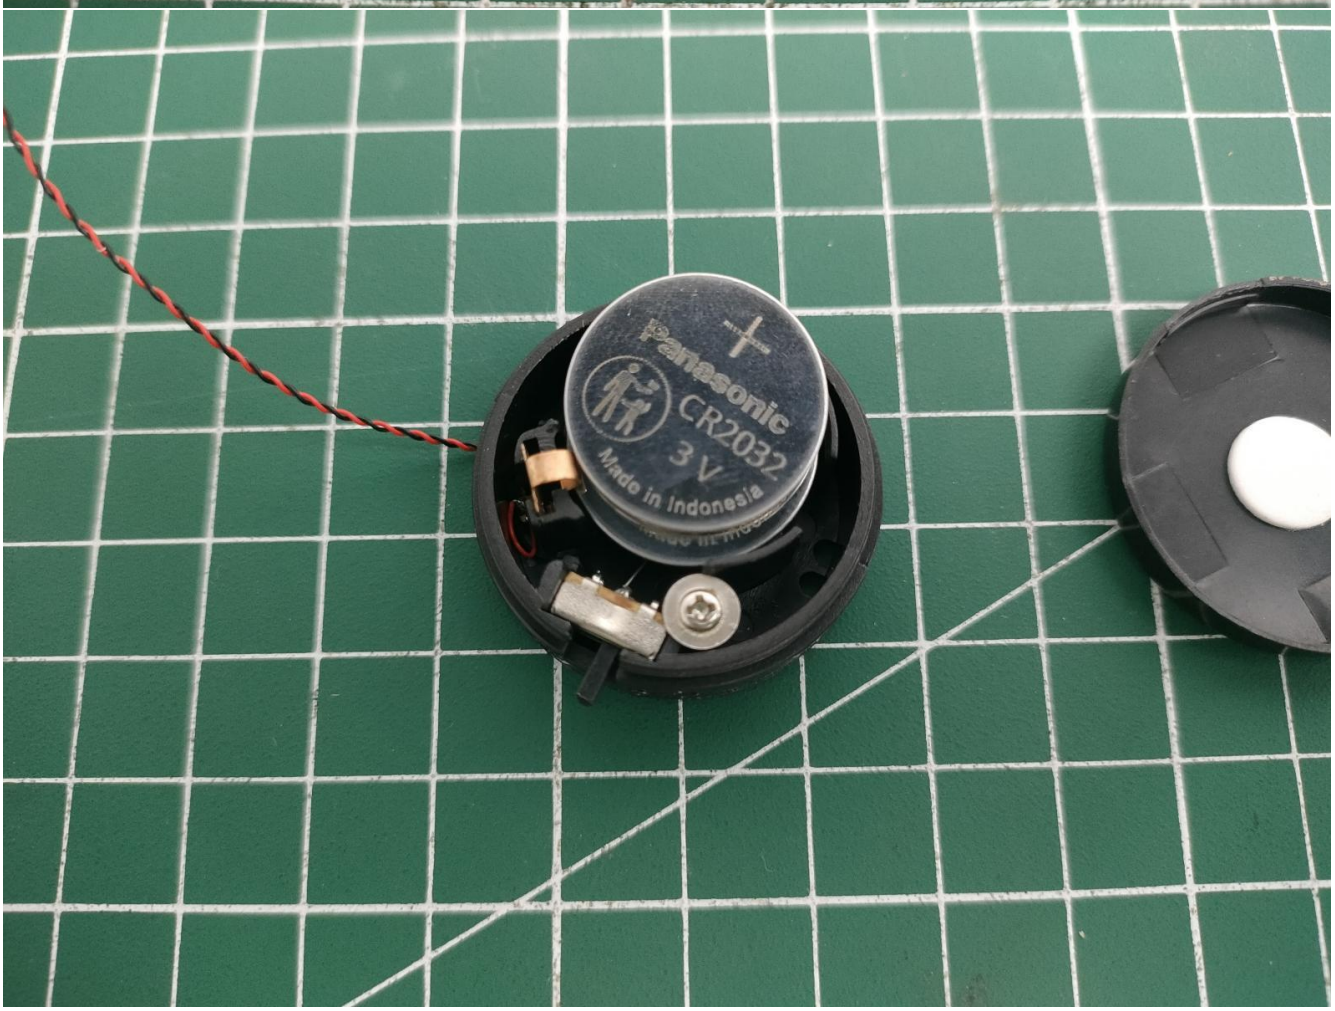
Image	Name	Introduction
	USB Power Cable	Mainly used to provide electricity, Used in power supply mode A
	Flat Battery Pack	Mainly used to provide electricity, Used in power supply mode A
	Expansion Boards	Mainly used to provide electricity, Used in power supply mode A

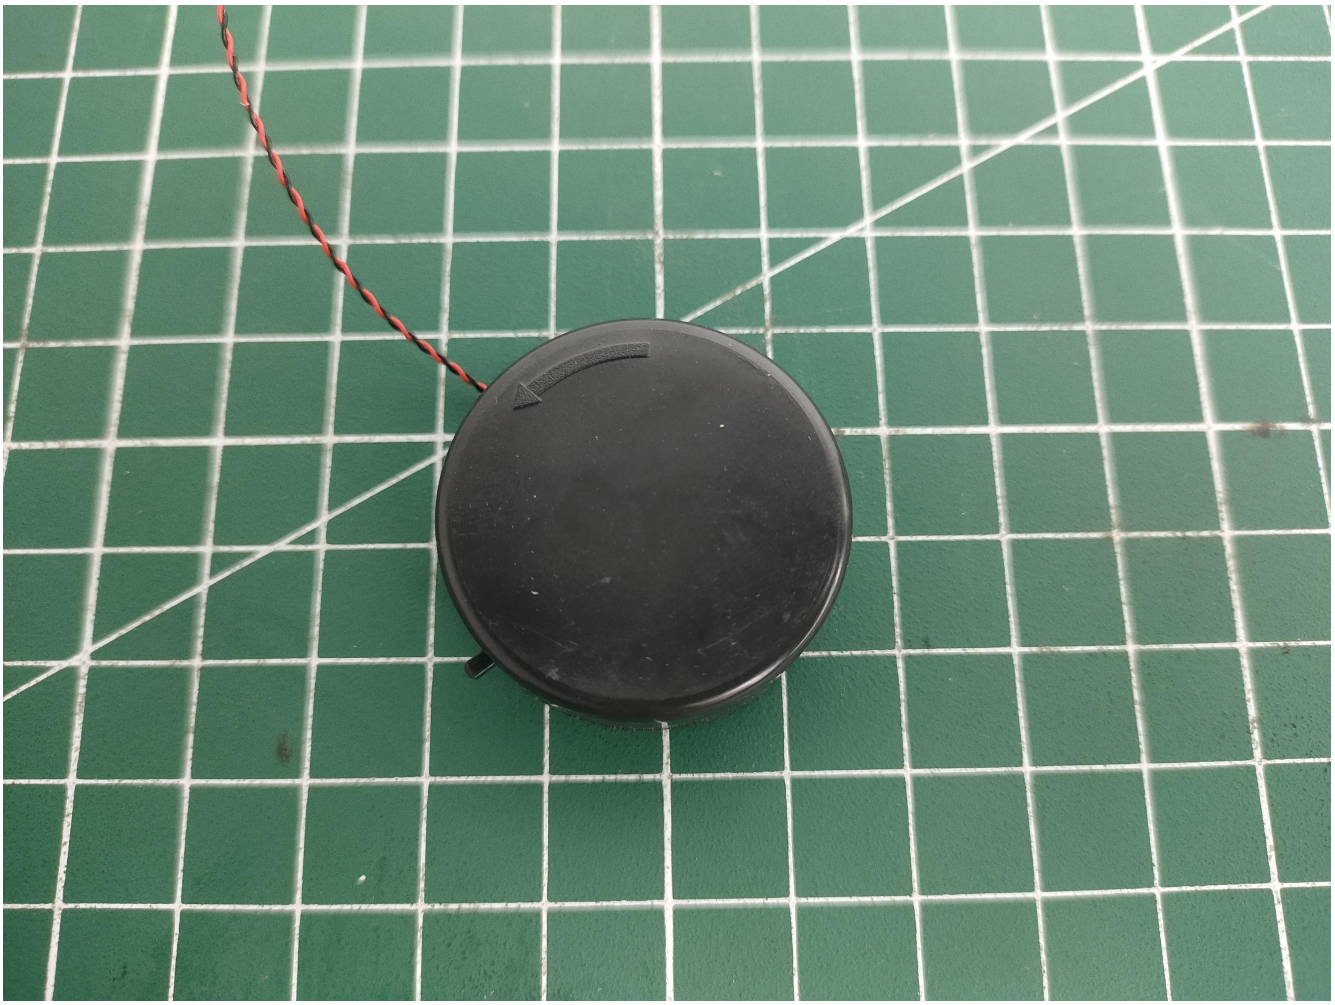
This demonstration uses a round button battery, put the USB power cord back into the bag to prevent loss. If there is no battery, you can choose the USB power cord to supply power, and the connection method is the same as the round button.



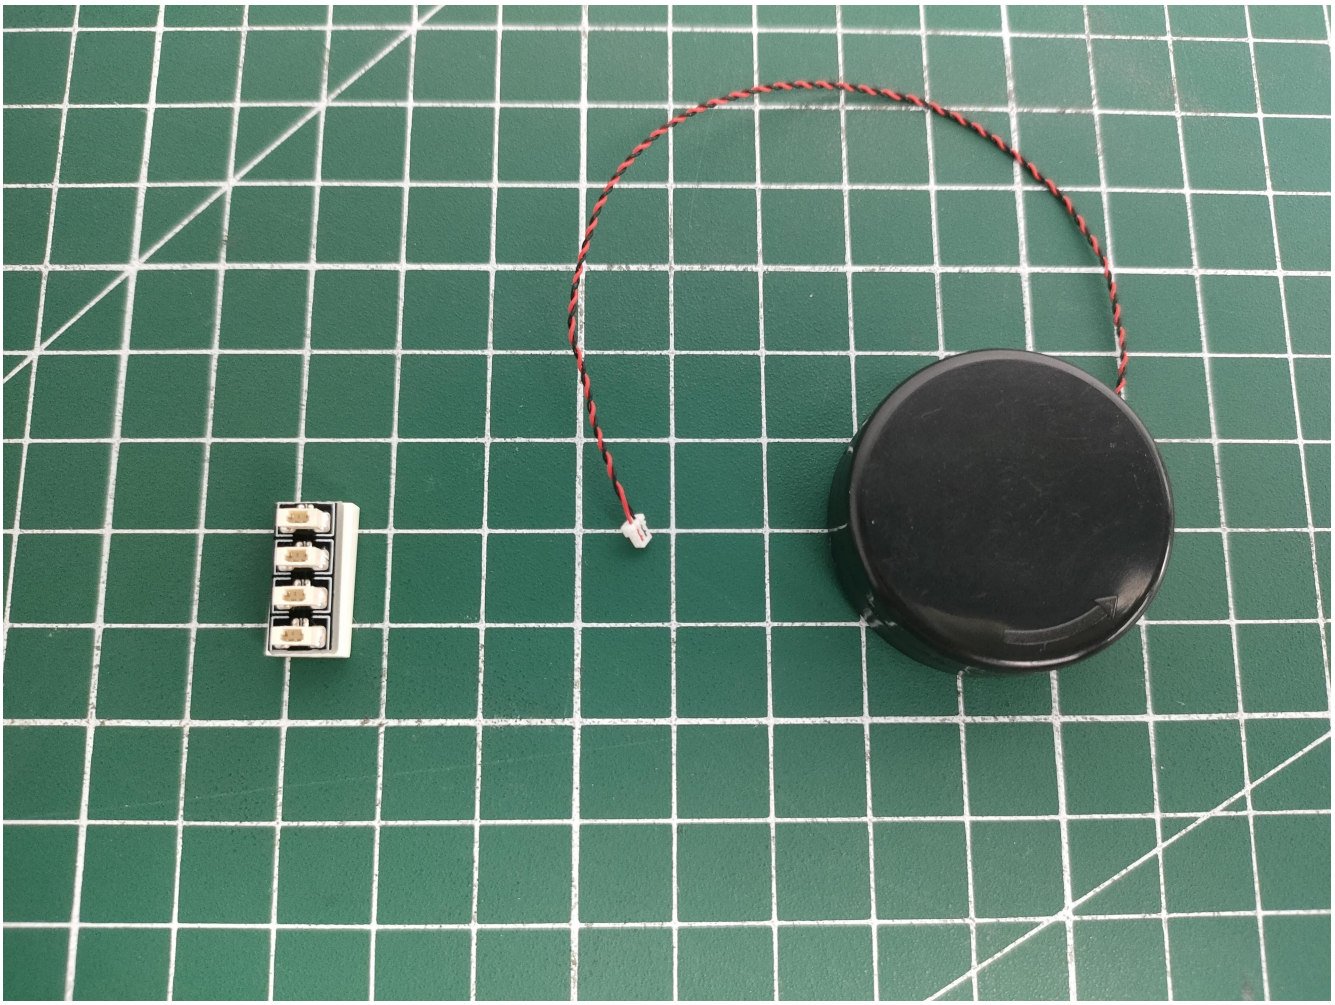
Twist the round button battery box in the direction of the arrow

Take out 2 round batteries, put them in the round battery box, close the battery box

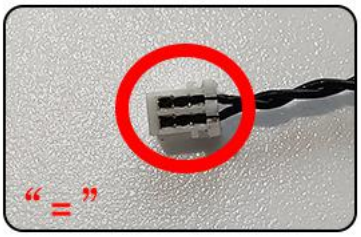


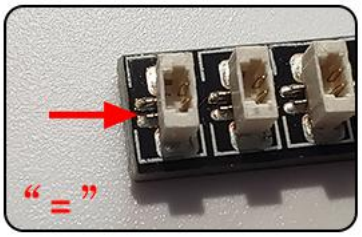


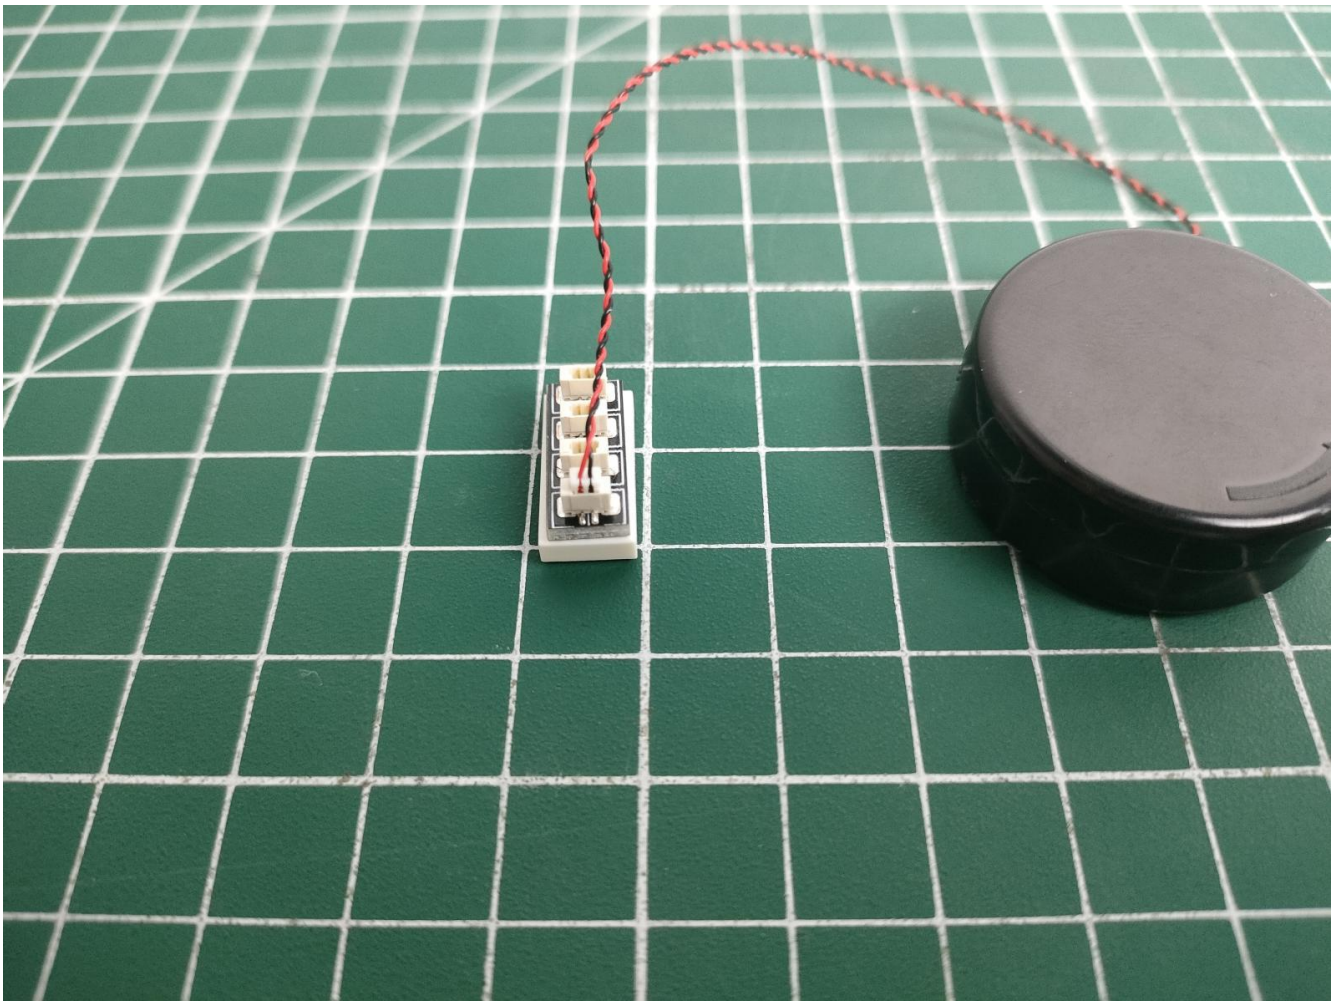
Connect the power cord of the round button battery box to the expansion board



Please pay attention to the way the interface is used. The interface is small, please use it carefully: the = sign of the 2P interface is aligned with the = sign of the expansion board

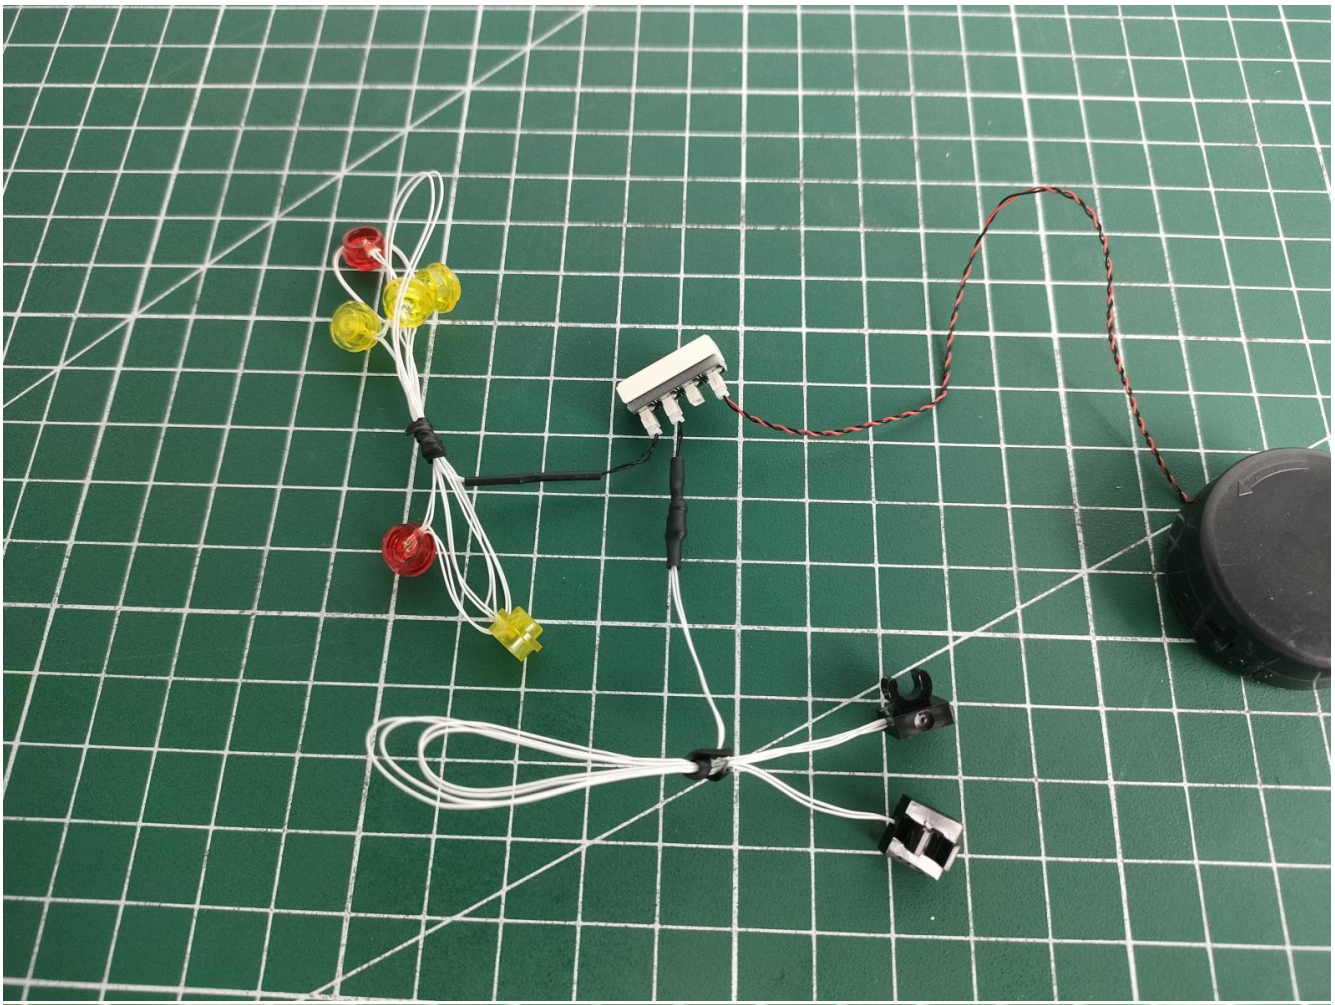


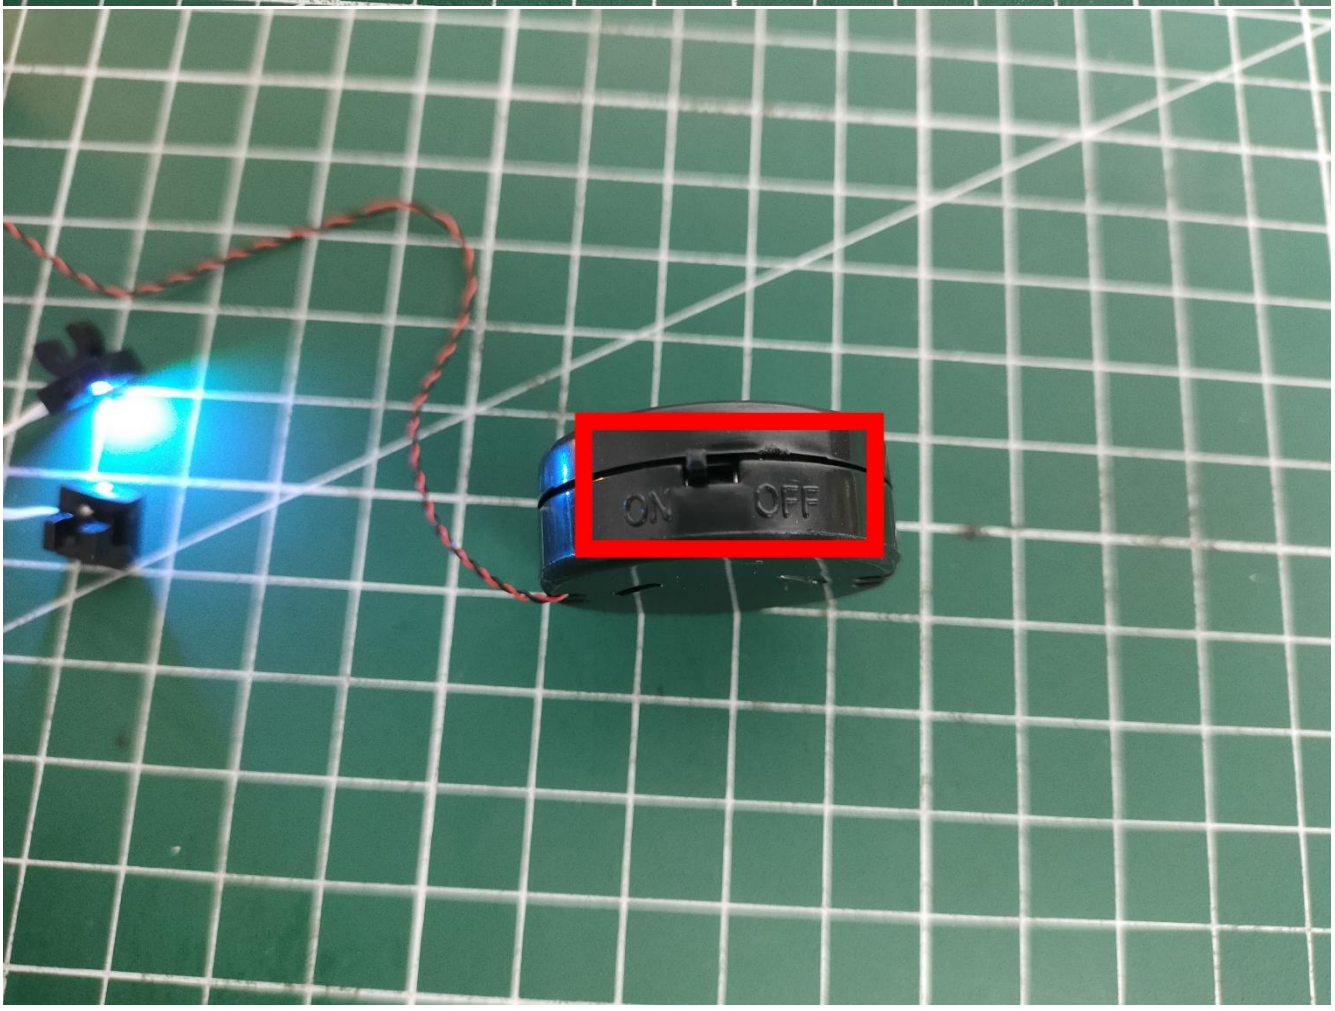




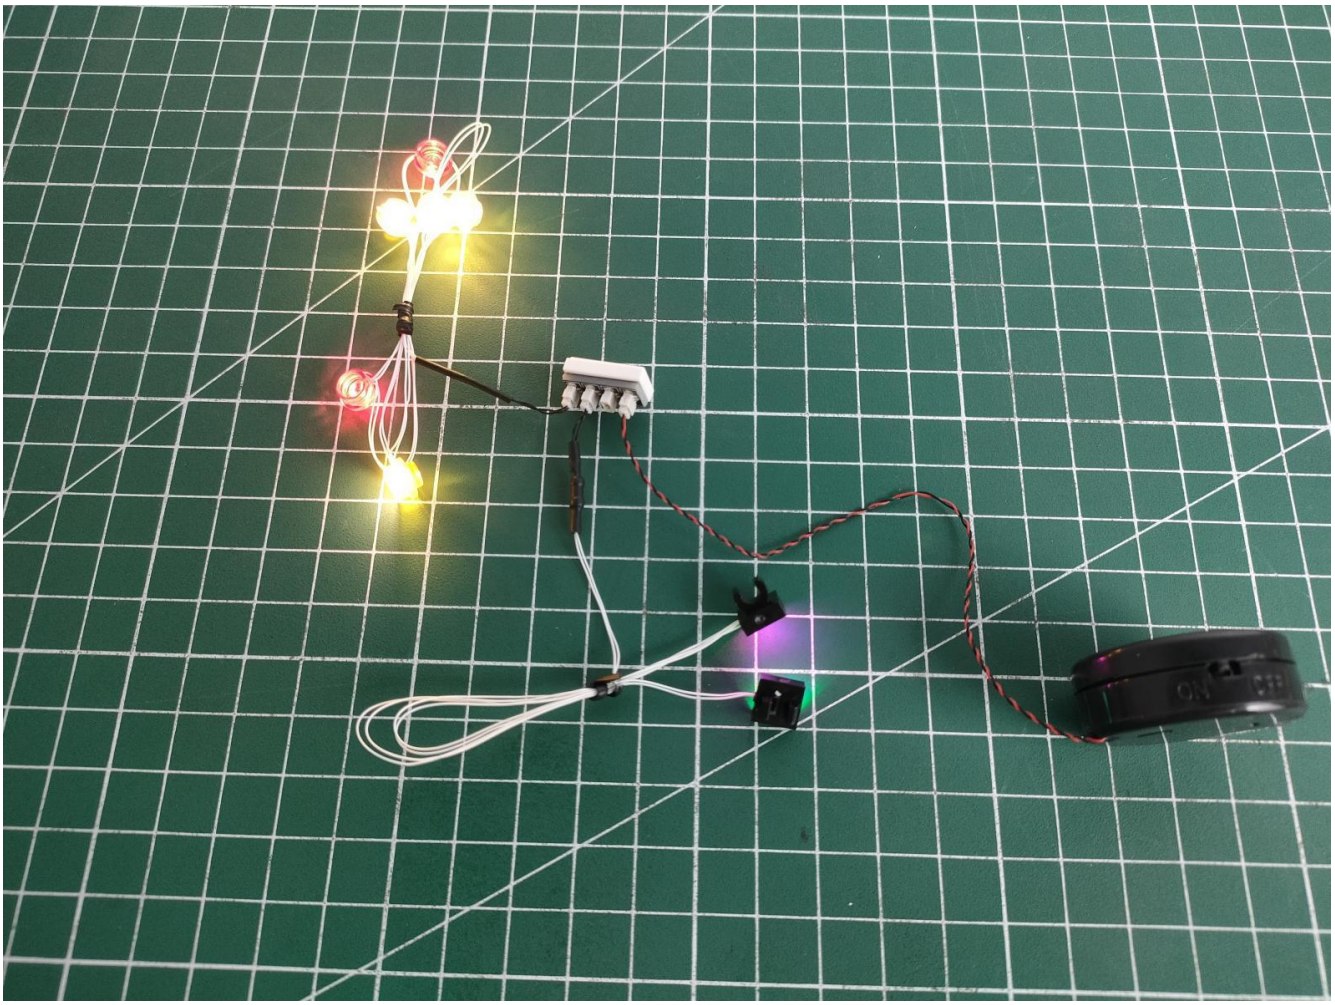
Take out the lighting from bag number 1.

The lighting is connected to the expansion board, power-on test.





ON
OFF



If something abnormal happens, please contact us in time!

After the test is completed, all parts are separated and placed aside, waiting for installation and use.
