

41843 Family Christmas Tree Decoration

- Installation requires a lot of patience and great observation that your LEGO bricks will come alive when you get this finished. The bricks with lighting as below, so make sure you're ready and let's get started.

Strategies for the Installation

This instruction divides three sections to complete the installation of the lighting set.

Section A: Check the type and quantity of components.

The quantity and type of components of each products are different and it needs to be carefully checked to make sure there do have enough material. The type of components is indicated by the label on the bag.

Section B: Test that each components is working properly.

Each components is made individually so it is necessary to test that each components is working properly to avoid the situation that the lighting does not work .

Section C: laying out components following the instruction.

Our material is very small but not fragile, just be reminded that don't to pull the wires too hard. For different people, there may be some installation steps that you can't understand. Please look at the previous and later installation step.

Section A: Check the type and quantity of components.

This set contains twelve bags labelled "1" "2" "3" "4" "5" "6" "7" "8" "9" "10" "11" "12", please make sure that the components in each bag are the same as shown in the pictures.

Colorful remote control battery

**The colorful remote control does not include batteries.
Please purchase CR2025 or CR2032 button batteries from
a nearby store and install them in the colorful remote control.**

Please contact us immediately if there have any missing components.

Section B: Test that each components is working properly.

Take out the colorful remote control module and usb power cord from "No. 11 bag " and the " No.10 bag" .

The connection method between the usb power cord and colorful remote control module is as follows:

Colorful Remote Control Function Introduce

The usb power cord can be powered by phone chargers, power banks,etc.

USB Connectors to Connect Devices

This instruction will use the power bank as power supply . The test structure is shown as follow. All lamp in this set will be tested by this structure.

When we test the "①" lighting fixtures, remove one of them and connect it to the colorful remote control module. Turn on the portable power bank, and the light strip will light up normally, as shown in the figure below.

Colorful Remote Control Function Introduce

Test each lamp according to this method. It should be noted that after the test, the lamp must be returned to the corresponding bag to avoid confusion of types.

LED strip test:

Take out the colored light strip and colored connecting wires from the bag, ensure to place the light strip according to the arrow instructions, and then connect them together. Turn on the portable power bank and the colored remote control, and the lights will illuminate normally, as shown in the following picture.

Section C: laying out components following the instruction.

TIPS

The lamp wire needs to be threaded through the cut of the round plate and installed on the building block.

The plate without slit

The squeeze causes the protective layer of the wire to be torn apart, the positive and negative wires touch together, and the set is short-circuited and the hot or wire is crushed, the wire to be disconnected and don't work.

The plate with slit

The wire has enough space to avoid being squeezed endowed with longer service life and more stable effect.

331. When controlling the star top decoration of the Christmas tree with a remote control, there may be some delay, and the remote control needs to be aimed at the module to be controlled.

Good job, you've done all the installation steps, power it up and enjoy your work.

The battery box can also power the set. If it is necessary to change the power supply , prepare three aaa batteries, install them in the battery box, turn on the switch on the battery box, remove the plug of the usb power cable from the socket of the expansion board, plug the plug of the battery box to the same socket in the expansion board to power the suit as well.

THANKS

Tips

If you encounter any installation problems please contact the seller, we will be happy to help you solve!
