

# 10298 Vespa 125 P31802

- **P31802 is the unique code of lighting set, we use this to accurately identify the product you purchased and the corresponding manuals and services you need to obtain. Please make sure your product code is the same as the label on the back of the box shown “10298 P31802”.**
- **Installation requires a lot of patience and great observation that your LEGO bricks will come alive when you get this finished. The bricks with lighting as below, so make sure you're ready and let's get started.**

# Strategies for the Installation

This instruction divides three sections to complete the installation of the lighting set.

## **Section A:** Check the type and quantity of components.

The quantity and type of components of each products are different and it needs to be carefully checked to make sure there do have enough material.

The type of components is indicated by the label on the bag.

## **Section B:** Test that each components is working properly.

Each components is made individually so it is necessary to test that each components is working properly to avoid the situation that the lighting does not work .

## **Section C:** laying out components following the instruction.

Our material is very small but not fragile, just be reminded that don't to pull the wires too hard. For different people, there may be some installation steps that you can't understand. Please look at the previous and later installation step

**The PDF installation instructions are of great significance to the installation. If the content of the files cannot be understood, please return to our website to select the video instructions. Also if the video manual cannot be understood, please switch to the PDF manual.**

**Section A: Check the type and quantity of components.**

**There are 12 bags in this set. The name and quantities of specific components are as shown , please check carefully.**

Label	Content	Quantity
Light-15CM Yellow	Light-15CM Yellow	2
High-Brightness Light 30CM-Warm White	High-Brightness Light 30CM-Warm White	1
High-Brightness Light 30CM-White	High-Brightness Light 30CM-White	1
High-Brightness Light 15CM-Red	High-Brightness Light 15CM-Red	1
Expansion Board	4 Socket Expansion Board	2
Power Supply	Power Supply	1
Connecting Cable 30CM	Connecting Cable 30CM	1
Connecting Cable 20CM	Connecting Cable 20CM	1
Connecting Cable 15CM-RGB	Connecting Cable 15CM-RGB	5
LED Strip RGB	LED Strip RGB	5
RGB Remote Control	RGB Remote Control	1
Components		

**Please contact us immediately if there have any missing components.**

## Section B: Test that each components is working properly.

We need a structure to test all lights, so take out the bag with label “USB Power Cord”and “Expansion Boards”as follows.

It is worth reminding that our products are all customized. They have a unique way of connecting. The white plug on wire and the socket of the expansion board need to be connected together to transmit power.

Note that on one side of the white plug you can see two very small golden wires that should be connected to the two golden needles in socket of the expansion board. shown as blow.

All our connections between plug and socket are all the same as shown above. So for any such structure with plug and socket, please pay attention to the golden wire of the plug and the golden needle of the socket, they must be touched together.

The connection method between the USB Power Cord and Expansion Boards is as follows:

The USB Power Cord can be powered by phone chargers, power banks, etc.

This instruction will use the power bank as power supply . The test structure is shown as follow. All lamp in this set will be tested by this structure.

The battery box can also power the set. If it is necessary to change the power supply , prepare three AAA batteries, install them in the battery box, turn on the switch on the battery box, remove the plug of the USB Power Cable from the socket of the expansion board,plug the plug of the battery box to the same socket in the expansion board to power the suit as well.

when we test "High-Brightness light 30CM-Warm White" particles,Take out the bag labelled "High-Brightness light 30CM-Warm White".Take out one of the light and connect it to the socket. Turn on the power bank, the light will turn on normally as shown below.

**Test each lamp according to this method. It should be noted that after the test, the lamp must be returned to the corresponding bag to avoid confusion of types.**

**he components needs to be tested in this set is 2\*Light-15CM Yellow, 1\*High-Brightness Light 30CM-White, 1\*High-Brightness Light 15CM-Red, 5\*LED Strip RGB.  
Please contact us immediately if any components don't work.**

**Section C:** laying out components following the instruction.
