

# 10358 Transformers: Soundwave

- Installation requires a lot of patience and great observation that your LEGO bricks will come alive when you get this finished. The bricks with lighting as below, so make sure you're ready and let's get started.

# Strategies for the Installation

This instruction divides three sections to complete the installation of the lighting set.

## **Section A:** Check the type and quantity of components.

The quantity and type of components of each products are different and it needs to be carefully checked to make sure there do have enough material. The type of components is indicated by the label on the bag.

## **Section B:** Test that each components is working properly.

Each components is made individually so it is necessary to test that each components is working properly to avoid the situation that the lighting does not work .

## **Section C:** laying out components following the instruction.

Our material is very small but not fragile, just be reminded that don't to pull the wires too hard. For different people, there may be some installation steps that you can't understand. Please look at the previous and later installation step.

## Section A: Check the type and quantity of components.

This set includes nine bags labeled “1,” “2,” “3,” “4,” “5,” “6,” “7,” “A01305 Power Supply,” “A03801 Remote Control.” Please ensure the components inside each bag match the items shown in the image.

## Remote control safety lock and battery model description

Batteries are not included in the remote control, please go to the nearest store to buy CR2025 or CR2032 button batteries to install in the remote control.

## Remote Control Module Testing

Remove the light fixture from any bag and connect it to the output port of the remote control template.

Testing Procedure:

1. Press the ON button on the remote control;
2. Observe whether the lighting fixture illuminates;
3. Press the OFF button on the remote control;
4. Test each output port individually.

**Please contact us immediately if there have any missing components.**

## **Section B:** Test that each components is working properly.

**Take out the expansion board and usb power cord from "1 bag " and the " No. A01305 Power Supply bag" .**

The connection method between the usb power cord and expansion boards is as follows:

The USB Power Cord can be powered by phone chargers, power banks, etc.

### USB Connectors to Connect Devices

This instruction will use the power bank as power supply . The test structure is shown as follow. All lamp in this set will be tested by this structure.

When we test the "①" lighting fixtures, remove one of them and connect it to the socket. Turn on the portable power bank, and the light strip will light up normally, as shown in the figure below.

Test each lamp according to this method. It should be noted that after the test, the lamp must be returned to the corresponding bag to avoid confusion of types.

### LED strip test:

Take out the LED light bar, connect the usb power cord, turn on the mobile power supply, the light will be on normally, as shown in the figure below.

## Section C: laying out components following the instruction.

## TIPS

The lamp wire needs to be threaded through the cut of the round plate and installed on the building block.

The plate without slit

The squeeze causes the protective layer of the wire to be torn apart, the positive and negative wires touch together, and the set is short-circuited and the hot or wire is crushed, the wire to be disconnected and don't work.

The plate with slit

The wire has enough space to avoid being squeezed endowed with longer service life and more stable effect.

12

13

14

15

16. Slightly lift the left shoulder of the figure to create a small opening for later use.

17

18.

19. Thread the cable through the hole in the shoulder, then press the piece into place.

20

21

22

23

24

25

**26.Remove the black building blocks.**

**27.Light-emitting surface facing down.**

28

29

30

31

32

33

34

**35.Remove the gray 2x2 circular base plate.**

**36.Remove the gray building block at the very front.**

**37**

38

39

40

41

42

**43. Thread the red and black string through the holes in the blue building blocks.**

**44**

45

46

47

48

49

50

51

**52.This must align with and must not exceed.**

**53**

**54**

**55.Repeat the same steps for the right arm.**

**56**

**57**

58

59

60

61

63

64

65

66

68

69. Thread the black string through the holes from left to right.

70

71. Pull your foot back.

72

73

**75. Repeat the same steps for the right leg.**

76

77

78

**79.Thread the black string through the holes from left to right.**

**80.Repeat the same steps for the building blocks on the other side of the foot.**

81

## Remote control safety lock and battery model description

Batteries are not included in the remote control, please go to the nearest store to buy CR2025 or CR2032 button battery to install in the remote control.

## Remote Control Function Introduce

**ON:** All lights turn on sequentially.

**OFF:** All lights are off.

: A, B, C, D are turned on slowly in sequence.

: Breathing light mode.

: A and D the light is on and C and B flash alternately.

: A the light is on, B, C, D flow light effect I .

: A the light is on, B, C, D flow light effect II.

: Quickly open from A to D in turn.

: A, B, C, D flow light effect.

: A, B, C, D flash alternately.

**A:** Turn A on/off.

**B:** Turn B on/off.

**C:** Turn C on/off.

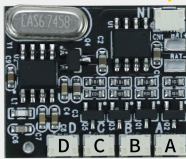

**D:** Turn D on/off.

**↑:** Increase frequency.

**↓:** Decrease frequency.

**+: Brightness+:** Increases brightness

**\*-:** Brightness+: Increases brightness

**85. Connect the head cable to Port A, the chest cable to Port B, the arm cannon cable to Port D, and the 8-seat expansion board cable to Port C.**

86

87

88

**Good job, you've done all the installation steps, power it up and enjoy your work.**

**The battery box can also power the set. If it is necessary to change the power supply , prepare three AAA batteries, install them in the battery box, turn on the switch on the battery box, remove the plug of the USB Power Cable from the socket of the expansion board,plug the plug of the battery box to the same socket in the expansion board to power the suit as well.**

**THANKS**

## **Tips**

**If you encounter any installation problems please contact the seller, we will be happy to help you solve!**
