

10365 Captain Jack Sparrow's Pirate Ship

- Installation requires a lot of patience and great observation that your LEGO bricks will come alive when you get this finished. The bricks with lighting as below, so make sure you're ready and let's get started.

Strategies for the Installation

This instruction divides three sections to complete the installation of the lighting set.

Section A: Check the type and quantity of components.

The quantity and type of components of each products are different and it needs to be carefully checked to make sure there do have enough material. The type of components is indicated by the label on the bag.

Section B: Test that each components is working properly.

Each components is made individually so it is necessary to test that each components is working properly to avoid the situation that the lighting does not work .

Section C: laying out components following the instruction.

Our material is very small but not fragile, just be reminded that don't to pull the wires too hard. For different people, there may be some installation steps that you can't understand. Please look at the previous and later installation step.

Section A: Check the type and quantity of components.

This set contains four bags labelled "1" "2" "3" "4", please make sure that the components in each bag are the same as shown in the pictures.

Remote control safety lock and battery model description

Batteries are not included in the remote control, please go to the nearest store to buy CR2025 or CR2032 button batteries to install in the remote control.

Please contact us immediately if there have any missing components.

Section B: Test that each components is working properly.

Take out the expansion board and usb power cable from "No. 2 bag " and the " No. 4 bag" .

It is worth reminding that our products are all customized. They have a unique way of connecting. The white plug on wire and the socket of the expansion board need to be connected together to transmit power.

Note that on one side of the white plug you can see two very small golden wires that should be connected to the two golden needles in socket of the expansion board.shown as blow.

Side-Mounted Expansion Board

All our connections between plug and socket are all the same as shown above. So for any such structure with plug and socket, please pay attention to the golden wire of the plug and the golden needle of the socket, they must be touched together.

The connection method between the usb power cord and expansion Boards is as follows:

The usb power cord can be powered by phone chargers, power banks, etc.

USB Connectors to Connect Devices

This instruction will use the power bank as power supply . The test structure is shown as follow. All lamp in this set will be tested by this structure.

When we test the "①" lighting fixtures, remove one of them and connect it to the socket. Turn on the portable power bank, and the light strip will light up normally, as shown in the figure below.

Test each lamp according to this method. It should be noted that after the test, the lamp must be returned to the corresponding bag to avoid confusion of types.

Attention that after the test is completed, each components should put back in the corresponding bag including the socket and the usb power cable.
Please contact us immediately if any components don't work.

Section C: laying out components following the instruction.

14

15

16

17

18. Connect the lamp wire to the expansion board.

19

20. Turn the left switch to rotate the cannon out, and then secure the lighting fixture onto the cannon.

21

22. Turn to the other side, install the lighting fixture using the same method as before, and then connect the light wires to the expansion board.

23. Look to the right and install the lighting fixtures on both sides using the same method as before. After installation, connect the light wires to the expansion board.

24

25.Look to the leftmost side and connect the 20CM cable to the expansion board.

26.Look to the right, connect the 15CM cable to the expansion board, and finally, look to the right again to connect the 5CM cable to another expansion board.

27.Look to the far right, thread the 15CM connecting cable through the empty gap of the building block to the right, and then connect it to the expansion board.

28.Twist the four connecting wires that were just connected to the expansion board into one bundle.

Remote Control Function Introduce

ON: All lights turn on sequentially.

OFF: All lights are off.

☼ : A, B, C, D are turned on slowly in sequence.

☼ : Breathing light mode.

☼ : A and D the light is on and C and B flash alternately.

☼ : A the light is on, B, C, D flow light effect I.

☼ : A the light is on, B, C, D flow light effect II.

☼ : Quickly open from A to D in turn.

☼ : A, B, C, D flow light effect.

☼ : A, B, C, D flash alternately.

A: Turn A on/off.

B: Turn B on/off.

C: Turn C on/off.

D: Turn D on/off.

↑ : Increase frequency.

↓ : Decrease frequency.

+: Brightness+: Increases brightness

*-: Brightness+: Increases brightness

Remote control safety lock and battery model description

Batteries are not included in the remote control, please go to the nearest store to buy CR2025 or CR2032 button batteries to install in the remote control.

31

32

33. Turn the steering wheel and see if it operates normally.

34

35

36

37

38. Turn the right switch to move the cannon out.

39

40. Remove the gray building blocks in order, twist the switch on the right side, and move the cannon back to the interior of the ship.

41

42. Remove the gray blocks in order, turn the switch on the left, and then move the cannon back into the ship.

43

44

45

46

Good job, you've done all the installation steps, power it up and enjoy your work.

The battery box can also power the set. If it is necessary to change the power supply , prepare three aaa batteries, install them in the battery box, turn on the switch on the battery box, remove the plug of the usb power cable from the socket of the expansion board,plug the plug of the battery box to the same socket in the expansion board to power the suit as well.

THANKS

Tips

If you encounter any installation problems please contact the seller, we will be happy to help you solve!
